PART 1 – FINANCIAL INFORMATION

ITEM 1 – FINANCIAL STATEMENTS

EVANS BANCORP, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

THREE MONTHS ENDED MARCH 31, 2015 AND 2014

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies followed by Evans Bancorp, Inc. (the “Company”), a financial holding company, and its two direct, wholly-owned subsidiaries: (i) Evans Bank, National Association (the “Bank”), and the Bank’s subsidiaries, Evans National Leasing, Inc. (“ENL”), Evans National Holding Corp. (“ENHC”) and Suchak Data Systems, LLC (“SDS”); and (ii) Evans National Financial Services, LLC (“ENFS”), and ENFS’s subsidiary, The Evans Agency, LLC (“TEA”), and TEA’s subsidiaries, Frontier Claims Services, Inc. (“FCS”) and ENB Associates Inc. (“ENBA”), in the preparation of the accompanying interim unaudited consolidated financial statements conform with U.S. generally accepted accounting principles (“GAAP”) and with general practice within the industries in which it operates. Except as the context otherwise requires, the Company and its direct and indirect subsidiaries are collectively referred to in this report as the “Company.”

The accompanying consolidated financial statements are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of the Company’s financial position and results of operations for the interim periods have been made. During the three month period ended March 31, 2015, the Company revised the unaudited Consolidated Statement of Cash Flows for the three month period ended March 31, 2014 to correct errors of a \$40 thousand increase within “Depreciation and amortization”, \$236 thousand increase within “Change in other assets affecting cash flow”, and \$276 thousand decrease within “Change in other liabilities affecting cash flow” line items. The Company has assessed the materiality of this correction and concluded, based on qualitative and quantitative considerations, in accordance with Staff Accounting Bulletin No. 99, that the adjustments were not material to our previously reported financial statements.

The results of operations for the three month periods ended March 31, 2015 are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited consolidated financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014.

Table of Contents

Available for sale securities with a total fair value of \$85.6 million and \$68.8 million at March 31, 2015 and December 31, 2014, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law.

The Company uses the Federal Home Loan Bank of New York (“FHLBNY”) as its primary source of overnight funds and also has several long-term advances with FHLBNY. The Company had no borrowed funds as of March 31, 2015, and had a total of \$13.7 million in borrowed funds with FHLBNY at December 31, 2014. The Company has placed sufficient collateral in the form of residential and commercial real estate loans at FHLBNY that meet FHLB collateral requirements. As a member of the Federal Home Loan Bank (“FHLB”) System, the Bank is required to hold stock in FHLBNY. The Bank held \$0.8 million and \$1.4 million in FHLBNY stock as of March 31, 2015 and December 31, 2014 at amortized cost. The Company regularly evaluates investments in FHLBNY for impairment, considering liquidity, operating performance, capital position, stock repurchase and dividend history. At this time, the Company does not believe any impairment in FHLBNY stock is warranted.

The scheduled maturities of debt and mortgage-backed securities at March 31, 2015 and December 31, 2014 are summarized below. All maturity amounts are contractual maturities. Actual maturities may differ from contractual maturities because certain issuers have the right to call or prepay obligations with or without call premiums.

Table of Contents

Management has assessed the securities available for sale in an unrealized loss position at March 31, 2015 and December 31, 2014 and determined the decline in fair value below amortized cost to be temporary. In making this determination, management considered the period of time the securities were in a loss position, the percentage decline in comparison to the securities' amortized cost, and the financial condition of the issuer (primarily government or government-sponsored enterprises). In addition, management does not intend to sell these securities and it is not more likely than not that the Company will be required to sell these securities before recovery of their amortized cost. Management believes the decline in fair value is primarily related to market interest rate fluctuations and not to the credit deterioration of the individual issuers.

The Company had not recorded any other-than-temporary impairment ("OTTI") charges as of March 31, 2015 and did not record any OTTI charges during 2014. Nevertheless, it remains possible that there could be deterioration in the asset quality of the securities portfolio in the future. The credit worthiness of the Company's portfolio is largely reliant on the ability of U.S. government sponsored agencies such as FHLB, Federal National Mortgage Association ("FNMA"), Government National Mortgage Association ("GNMA"), and Federal Home Loan Mortgage Corporation ("FHLMC"), and municipalities throughout New York State to meet their obligations. In addition, dysfunctional markets could materially alter the liquidity, interest rate, and pricing risk of the portfolio. The relatively stable past performance is not a guarantee for similar performance of the Company's securities portfolio going forward.

3. FAIR VALUE MEASUREMENTS

The Company follows the provisions of ASC Topic 820, "Fair Value Measurements and Disclosures." Those provisions relate to financial assets and liabilities carried at fair value and fair value disclosures related to financial assets and liabilities. ASC Topic 820 defines fair value and specifies a hierarchy of valuation techniques based on the nature of the inputs used to develop the fair value measures. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

There are three levels of inputs to fair value measurements:

- Level 1, meaning the use of quoted prices for identical instruments in active markets;
- Level 2, meaning the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; and
- Level 3, meaning the use of unobservable inputs.

Observable market data should be used when available.

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A RECURRING BASIS

The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a recurring basis at March 31, 2015 and December 31, 2014:

(in thousands)	Level 1	Level 2	Level 3	Fair Value
March 31, 2015				
Securities available-for-sale:

States and political subdivisions	-	31,060	-	31,060
Mortgage-backed securities	-	37,756	-	37,756
Mortgage servicing rights	-	-	518	518

Table of Contents

Securities available for sale

Fair values for securities are determined using independent pricing services and market-participating brokers. The Company's independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information for structured securities, cash flow and, when available, loan performance data. Because many fixed income securities do not trade on a daily basis, the evaluated pricing applications apply information as applicable through processes, such as benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations. In addition, model processes, such as the Option Adjusted Spread model, are used to assess interest rate impact and develop prepayment scenarios. The models and the process take into account market convention. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models. The company's service provider may occasionally determine that it does have not sufficient verifiable information to value a particular security. In these cases the Company will utilize valuations from another pricing service.

Management believes that it has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of securities to enable management to maintain an appropriate system of internal control. On a quarterly basis, the Company reviews changes in the market value of its security portfolio. Individual changes in valuations are reviewed for consistency with general interest rate movements and any known credit concerns for specific securities. Additionally, on an annual basis, the Company has its entire security portfolio priced by a second pricing service to determine consistency with another market evaluator. If, on the Company's review or in comparing with another servicer, a material difference between pricing evaluations were to exist, the Company would submit an inquiry to the service provider regarding the data used to value a particular security. If the Company determines it has market information that would support a different valuation than the initial evaluation it can submit a challenge for a change to that security's valuation. There were no material differences in valuations noted in the first quarter of 2015 or during fiscal year 2014.

Securities available for sale are classified as Level 2 in the fair value hierarchy as the valuation provided by the third-party provider uses observable market data.

Mortgage servicing rights

Mortgage servicing rights ("MSRs") do not trade in an active, open market with readily observable prices. Accordingly, the Company obtains the fair value of the MSRs using a third-party pricing provider. The provider determines the fair value by discounting projected net servicing cash flows of the remaining servicing portfolio. The valuation model used by the provider considers market loan prepayment predictions and other economic factors which management considers to be significant unobservable inputs. The fair value of MSRs is mostly affected by changes in mortgage interest rates since rate changes cause the loan prepayment acceleration factors to increase or decrease. Management has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in

determining the fair value of MSRs to enable management to maintain an appropriate system of internal control. Mortgage servicing rights are classified within Level 3 of the fair value hierarchy as the valuation is model driven and primarily based on unobservable inputs.

The following table summarizes the changes in fair value for mortgage servicing rights during the three month periods ended March 31, 2015 and 2014, respectively:

	Three months ended March 31,	
(in thousands)	2015	2014
Mortgage servicing rights - January 1	\$ 518	\$ 509
Gains (losses) included in earnings	(45)	(38)
Additions from loan sales	24	-
Mortgage servicing rights - March 31	\$ 497	\$ 471

Table of Contents

Quantitative information about the significant unobservable inputs used in the fair value measurement of MSRs at the respective dates is as follows:

	3/31/2015		12/31/2014	
Servicing fees	0.25	%	0.25	%
Discount rate	9.52	%	9.52	%
Prepayment rate (CPR)	9.80	%	9.28	%

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A NONRECURRING BASIS

The Company is required, on a nonrecurring basis, to adjust the carrying value of certain assets or provide valuation allowances related to certain assets using fair value measurements. The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a nonrecurring basis at March 31, 2015 and December 31, 2014:

(in thousands)	Level 1	Level 2	Level 3	Fair Value
March 31, 2015				
Impaired loans	\$ -	-	14,569	\$ 14,569
December 31, 2014				
Impaired loans	\$ -	-	13,716	\$ 13,716

Impaired loans

The Company evaluates and values impaired loans at the time the loan is identified as impaired, and the fair values of such loans are estimated using Level 3 inputs in the fair value hierarchy. Each loan's collateral has a unique appraisal and management's discount of the value is based on factors unique to each impaired loan. The significant unobservable input in determining the fair value is management's subjective discount on appraisals of the collateral securing the loan, which ranges from 10%-50%. Collateral may consist of real estate and/or business assets including equipment, inventory and/or accounts receivable and the value of these assets is determined based on appraisals by qualified licensed appraisers hired by the Company. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation, estimated costs to sell, and/or management's expertise and knowledge of the client and the client's business.

The Company has an appraisal policy in which appraisals are obtained upon a commercial loan being downgraded on the Company internal loan rating scale to a 5 (special mention) or a 6 (substandard) depending on the amount of the loan, the type of loan and the type of collateral. All impaired commercial loans are either graded a 6 or 7 on the internal loan rating scale. For consumer loans, the Company obtains appraisals when a loan becomes 90 days past due or is determined to be impaired, whichever occurs first. Subsequent to the downgrade or reaching 90 days past due, if the loan remains outstanding and impaired for at least one year more, management may require another follow-up appraisal. Between receipts of updated appraisals, if necessary, management may perform an internal valuation based on any known changing conditions in the marketplace such as sales of similar properties, a change in the condition of the collateral, or feedback from local appraisers. Impaired loans had a gross value of \$15.7 million, with a valuation allowance of \$1.2 million, at March 31, 2015, compared to a gross value for impaired loans of \$15.0 million, with a valuation allowance of \$1.3 million, at December 31, 2014.

Table of Contents

FAIR VALUE OF FINANCIAL INSTRUMENTS

At March 31, 2015 and December 31, 2014, the estimated fair values of the Company's financial instruments, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis, were as follows:

	March 31, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)		(in thousands)	
Financial assets:				
Level 1:				
Cash and cash equivalents	\$ 60,694	\$ 60,694	\$ 10,898	\$ 10,898
Level 2:				
Available for sale securities	98,393	98,393	95,533	95,533
FHLB and FRB stock	2,308	2,308	2,925	2,925
Level 3:				
Held to maturity securities	1,588	1,576	1,599	1,574
Loans and leases, net	688,961	700,338	683,131	685,148
Mortgage servicing rights	497	497	518	518
Financial liabilities:				
Level 1:				
Demand deposits	\$ 169,965	\$ 169,965	\$ 158,631	\$ 158,631
NOW deposits	82,956	82,956	72,670	72,670

Securities sold under agreement to repurchase	10,673	10,673	13,778	13,778
Level 2:				
Other borrowed funds	-	-	13,700	13,700
Junior subordinated debentures	11,330	11,330	11,330	11,330
Level 3:				
Time deposits	111,120	110,678	112,792	113,854

Table of Contents

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practical to estimate that value.

Cash and Cash Equivalents. For these short-term instruments, the carrying amount is a reasonable estimate of fair value. "Cash and Cash Equivalents" includes interest-bearing deposits at other banks.

FHLB and FRB stock. The carrying value of FHLB and FRB stock approximate fair value.

Securities held to maturity. The Company holds certain municipal bonds as held-to-maturity. These bonds are generally small in dollar amount and are issued only by certain local municipalities within the Company's market area. The original terms are negotiated directly and on an individual basis consistent with our loan and credit guidelines. These bonds are not traded on the open market and management intends to hold the bonds to maturity. The fair value of held-to-maturity securities is estimated by discounting the future cash flows using the current rates at which similar agreements would be made with municipalities with similar credit ratings and for the same remaining maturities.

Loans and Leases, net. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities, net of the appropriate portion of the allowance for loan losses. For variable rate loans, the carrying amount is a reasonable estimate of fair value. This fair value calculation is not necessarily indicative of the exit price, as defined in ASC 820.

Deposits. The fair value of demand deposits, NOW accounts, muni-vest accounts and regular savings accounts is the amount payable on demand at the reporting date. The fair value of time deposits is estimated using the rates currently offered for deposits of similar remaining maturities.

Junior Subordinated Debentures. There is no active market for the Company's debentures. The fair value of the junior subordinated debentures is determined using an expected present value technique. The fair value of the adjustable-rate debentures approximates their face amount.

Commitments to extend credit and standby letters of credit. As described in Note 8 - "Contingent Liabilities and Commitments" to these Unaudited Consolidated Financial Statements, the Company was a party to financial instruments with off-balance sheet risk at March 31, 2015 and December 31, 2014. Such financial instruments consist

of commitments to extend permanent financing and letters of credit. If the options are exercised by the prospective borrowers, these financial instruments will become interest-earning assets of the Company. If the options expire, the Company retains any fees paid by the counterparty in order to obtain the commitment or guarantee. The fees collected for these commitments are recorded as “unearned commitment fees” in Other Liabilities. The carrying value approximates the fair value.

Securities Sold Under Agreement to Repurchase. The fair value of the securities sold under agreement to repurchase approximates its carrying value.

Other Borrowed Funds. The fair value of the short-term portion of other borrowed funds approximates its carrying value. The fair value of the long-term portion of other borrowed funds is estimated using a discounted cash flow analysis based on the Company’s current incremental borrowing rates for similar types of borrowing arrangements.

4. LOANS AND THE ALLOWANCE FOR LOAN LOSSES

Loan Portfolio Composition

The following table presents selected information on the composition of the Company's loan portfolio as of the dates indicated:

	March 31, 2015	December 31, 2014
	(in thousands)	
Mortgage loans on real estate:		
Residential Mortgages	\$ 100,548	\$ 98,374
Commercial and multi-family	366,657	363,252
Construction-Residential	238	721
Construction-Commercial	39,723	40,986
Home equities	59,689	59,948
Total real estate loans	566,855	563,281
Commercial and industrial loans	132,416	129,456
Consumer loans	1,704	1,764
Other	122	404
Net deferred loan origination costs	641	759
Total gross loans	701,738	695,664
Allowance for loan losses	(12,777)	(12,533)
Loans, net	\$ 688,961	\$ 683,131

The Bank sells certain fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. In the three month period ended March 31, 2015, the Bank sold mortgages to FNMA totaling \$2.6 million, as compared with no mortgages sold to FNMA in the three month period ended March 31, 2014. At March 31, 2015, the Bank had a loan servicing portfolio principal balance of \$72.2 million upon which it earns servicing fees, as compared with \$71.6 million at December 31, 2014. The value of the mortgage servicing rights for that portfolio was \$0.5 million at March 31, 2015 and December 31, 2014, respectively. At March 31, 2015, there were

\$2.8 million in residential mortgage loans held-for-sale, compared with \$0.4 million in residential mortgages held for sale at December 31, 2014. The Company had no commercial loans held-for-sale at March 31, 2015 or December 31, 2014. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud.

As noted in Note 1, these financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014. Disclosures related to the basis for accounting for loans, the method for recognizing interest income on loans, the policy for placing loans on nonaccrual status and the subsequent recording of payments and resuming accrual of interest, the policy for determining past due status, a description of the Company's accounting policies and methodology used to estimate the allowance for loan losses, the policy for charging off loans, the accounting policies for impaired loans, and more descriptive information on the Company's credit risk ratings are all contained in the Notes to the Audited Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. Unless otherwise noted in this Form 10-Q, the policies and methodology described in the Annual Report for the year ended December 31, 2014 are consistent with those utilized by the Company in the three months ended March 31, 2015.

Table of Contents

Credit Quality Indicators

The Bank monitors the credit risk in its loan portfolio by reviewing certain credit quality indicators (“CQI”). The primary CQI for its commercial mortgage and commercial and industrial (“C&I”) portfolios is the individual loan’s credit risk rating. The following list provides a description of the credit risk ratings that are used internally by the Bank when assessing the adequacy of its allowance for loan and lease losses:

- 1-3-Pass
- 4-Watch
- 5-O.A.E.M. (Other Assets Especially Mentioned) or Special Mention
- 6-Substandard
- 7-Doubtful
- 8-Loss

The Company’s consumer loans, including residential mortgages and home equities, are not individually risk rated or reviewed in the Company’s loan review process. Consumers are not required to provide the Company with updated financial information as is a commercial customer. Consumer loans also carry smaller balances. Given the lack of updated information after the initial underwriting of the loan and small size of individual loans, the Company uses delinquency status as the credit quality indicator for consumer loans.

The following tables provide data, at the class level, of credit quality indicators of certain loans and leases for the dates specified:

March 31, 2015

Troubled debt restructurings

The Company had \$6.8 million in loans that were restructured in a troubled debt restructuring (“TDR”) at March 31, 2015, compared with \$6.6 million at December 31, 2014. \$2.2 million and \$1.9 million of those balances were in non-accrual status at March 31, 2015 and December 31, 2014, respectively. Any TDR that is placed on non-accrual is not reverted back to accruing status until the borrower makes timely payments as contracted for at least six months and future collection under the revised terms is probable. All of the Company’s restructurings were allowed in an effort to maximize its ability to collect on loans where borrowers were experiencing financial difficulty. The Company did not engage in any re-modifications during the three month periods ended March 31, 2015 and 2014.

The reserve for a TDR is based upon the present value of the future expected cash flows discounted at the loan’s original effective rate or upon the fair value of the collateral less costs to sell, if the loan is deemed collateral dependent. This reserve methodology is used because all TDR loans are considered impaired. As of March 31, 2015, there were no commitments to lend additional funds to debtors owing on loans whose terms have been modified in TDRs.

The following tables summarize the loans that were classified as troubled debt restructurings as of the dates indicated:

	March 31, 2015 (\$ in thousands)			
	Total	Nonaccruing	Accruing	Related Allowance
Commercial and industrial	\$ 874	\$ 677	\$ 197	\$ 200

The Company's TDRs have various agreements that involve deferral of principal payments, or interest-only payments, for a period (usually 12 months or less) to allow the customer time to improve cash flow or sell the property. Other common types of concessions leading to the designation of a TDR are lines of credit that are termed out and extensions of maturities at rates that are less than market given the risk profile of the borrower.

The following table shows the data for TDR activity by type of concession granted to the borrower for the three month periods ended March 31, 2015 and 2014:

Table of Contents

Three months ended March 31, 2015 (\$ in thousands)				Three months ended March 31, 2014 (\$ in thousands)		
Troubled Debt Restructurings by Type of Concession	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Commercial and Industrial: Deferral of principal	3	\$ 541	\$ 541	-	\$ -	\$ -

Home Equities: Deferral of principal	-	-	-	-	-	-
Consumer loans	-	-	-	-	-	-
Other	-	-	-	-	-	-

The general practice of the Bank is to work with borrowers so that they are able to pay back their loan in full. If a borrower continues to be delinquent or cannot meet the terms of a TDR and the loan is determined to be uncollectible, the loan will be charged off. The following table presents loans which were classified as TDRs during the previous 12 months which defaulted during the three month periods ended March 31, 2015 and 2014:

Three months ended

Table of Contents

5. PER SHARE DATA

The common stock per share information is based upon the weighted average number of shares outstanding during each period. For the three month periods ended March 31, 2015 and 2014, the Company had an average of 78,167 and 83,497 dilutive shares outstanding, respectively.

Potential common shares that would have the effect of increasing diluted earnings per share are considered to be anti-dilutive and not included in calculating diluted earnings per share. For the three month periods ended March 31, 2015 and 2014, there was an average of 38,630 and 9,000 anti-dilutive shares outstanding, respectively, that were not included in calculating diluted earnings per share because their effect was anti-dilutive.

6. OTHER COMPREHENSIVE INCOME

The following tables summarize the changes in the components of accumulated other comprehensive income (loss) during the three month periods ended March 31, 2015 and 2014:

	Balance at December 31, 2014 (in thousands)		Balance at March 31, 2015
	Net	Change

Income before income taxes	2,111	811	2,922
Income tax provision	596	313	909
Net income	\$ 1,515	\$ 498	\$ 2,013

8. CONTINGENT LIABILITIES AND COMMITMENTS

The unaudited consolidated financial statements do not reflect various commitments and contingent liabilities, which arise in the normal course of business, and which involve elements of credit risk, interest rate risk and liquidity risk. These commitments and contingent liabilities consist of commitments to extend credit and standby letters of credit. A summary of the Bank's commitments and contingent liabilities is as follows:

	March 31, 2015	December 31, 2014
	(in thousands)	
Commitments to extend credit	\$ 234,311	\$ 212,193
Standby letters of credit	2,767	2,430
Total	\$ 237,078	\$ 214,623

Table of Contents

Commitments to extend credit and standby letters of credit include some exposure to credit loss in the event of nonperformance by the customer. The Bank's credit policies and procedures for credit commitments and financial guarantees are the same as those for extensions of credit that are recorded on the Company's unaudited consolidated balance sheets. Because these instruments have fixed maturity dates, and because they may expire without being drawn upon, they do not necessarily represent cash requirements of the Bank. The Bank has not incurred any losses on its commitments and did not record a reserve for its commitments during the first three months of 2015 or during 2014.

Certain lending commitments for construction residential mortgage loans are considered derivative instruments under the guidelines of GAAP. The changes in the fair value of these commitments, due to interest rate risk, are not recorded on the consolidated balance sheets as the fair value of these derivatives is not considered material.

The Company is subject to possible litigation proceedings in the normal course of business. As noted in Item 1 of Part II of the Company's Quarterly Report on Form 10-Q, in which these unaudited financial statements are included, on September 2, 2014 the Office of the Attorney General for the State of New York ("NYAG") filed a formal complaint against the Company and the Bank regarding residential lending practices. The Company accrued an estimated liability relating to the NYAG investigation totaling \$1.0 million during 2014. At March, 31, 2015, a range of loss could not be determined, and management believes the \$1.0 million accrual is the best estimate of probable loss.

9. NET PERIODIC BENEFIT COSTS

On January 31, 2008, the Bank froze its defined benefit pension plan. The plan covered substantially all Company employees. The plan provides benefits that are based on the employees' compensation and years of service. Under the freeze, eligible employees will receive, at retirement, the benefits already earned through January 31, 2008, but have not accrued any additional benefits since then. As a result, service cost is no longer incurred.

The Bank uses an actuarial method of amortizing prior service cost and unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank used recognized the prior service cost and net gains or losses over the average remaining service period of active employees.

The Bank also maintains a nonqualified supplemental executive retirement plan covering certain members of the Company's senior management. The Bank uses an actuarial method of amortizing unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank uses recognizes the net gains or losses over the average remaining service period of active employees.

The Bank did not contribute to the defined benefit pension plan in the first three months of 2015, and expects to contribute \$110 thousand additional funds to the pension plan in the remainder of 2015.

The following table presents the net periodic cost for the Bank's defined benefit pension plan and supplemental executive retirement plan for the three month periods ended March 31, 2015 and 2014:

32

Table of Contents

Three months ended March 31,

Amortization of the net loss	17	5	31	21
Net periodic cost (benefit)	\$ (9)	\$ (20)	\$ 123	\$ 111

10. RECENT ACCOUNTING PRONOUNCEMENTS

Accounting Standards Update (“ASU”) 2014-04, Reclassification of Collateralized Mortgage Loans upon a Troubled Debt Restructuring. The objective of this proposed ASU is to clarify when an in substance repossession or foreclosure

occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, such that all or a portion of the loan should be derecognized and the real estate property recognized. The main provisions would also require additional disclosures regarding the amount of foreclosed residential real estate property held by the creditor and the recorded investments of consumer mortgage loans that are in the process of foreclosure at each interim and annual reporting period. This ASU became effective for the Company in fiscal years and interim periods within those years, beginning after December 15, 2014. The Company has adopted this guidance for the reporting periods after December 15, 2014 and did not have a material impact on its financial statements.

ASU 2014-09, Revenue from Contracts with Customers. The objective of this proposed ASU is to require entities to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This ASU will replace most existing revenue recognition guidance under U.S. GAAP when it becomes effective. The amendments in this ASU are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. The standard allows an entity to apply the amendments in the ASU using either the retrospective or cumulative effect transition method. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

Table of Contents

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q may contain certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that involve substantial risks and uncertainties. When used in this report, or in the documents incorporated by reference herein, the words "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "seek," and similar expressions identify such forward-looking statements. These forward-looking statements include statements regarding the Company's business plans, prospects, growth and operating strategies, statements regarding the asset quality of the Company's loan and investment portfolios, and estimates of the Company's risks and future costs and benefits.

These forward-looking statements are based largely on the expectations of the Company's management and are subject to a number of risks and uncertainties, including but not limited to: general economic conditions, either nationally or in the Company's market areas, that are worse than expected; increased competition among depository or other financial institutions; inflation and changes in the interest rate environment that reduce the Company's margins or reduce the fair value of financial instruments; changes in laws or government regulations affecting financial institutions, including changes in regulatory fees, monetary policy, and capital requirements; the Company's ability to enter new markets successfully and capitalize on growth opportunities; the Company's ability to successfully integrate acquired entities; changes in accounting pronouncements and practices, as adopted by financial institution regulatory agencies, the Financial Accounting Standards Board and the Public Company Accounting Oversight Board; changes in consumer spending, borrowing and saving habits; changes in the Company's organization, compensation and benefit plans; and other factors discussed elsewhere in this Quarterly Report on Form 10-Q, as well as in the Company's periodic reports filed with the SEC, in particular the "Risk Factors" discussed in Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014. Many of these factors are beyond the Company's control and are difficult to predict.

Because of these and other uncertainties, the Company's actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. Forward-looking statements speak only as of the date they are made. The Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new, updated information, future events or otherwise.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

The Company's Unaudited Consolidated Financial Statements included in this Quarterly Report on Form 10-Q are prepared in accordance with U.S. GAAP and follow general practices within the industries in which it

operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the Company's Unaudited Consolidated Financial Statements and Notes. These estimates, assumptions and judgments are based on information available as of the date of the Unaudited Consolidated Financial Statements. Accordingly, as this information changes, the Unaudited Consolidated Financial Statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments, and as such, have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal cash flow modeling techniques. Refer to Note 3 – "Fair Value Measurements" to the Company's Unaudited Consolidated Financial Statements included in Item 1 of this Quarterly Report on Form 10-Q for further detail on fair value measurement.

Significant accounting policies followed by the Company are presented in Note 1 – "Organization and Summary of Significant Accounting Policies" to the Audited Consolidated Financial Statements included in Item 8 in its Annual Report on Form 10-K for the year ended December 31, 2014. These policies, along with the disclosures presented in the other Notes to the Company's Audited Consolidated Financial Statements contained in its Annual Report on Form 10-K and in this financial review, provide information on how significant assets and liabilities are presented in the Company's Unaudited Consolidated Financial Statements and how those values are determined.

Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for loan losses and valuation of goodwill to be the accounting areas that require the most subjective or complex judgments, and as such, could be most subject to revision as new information becomes available.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses in the Company's loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment on the part of management and the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan portfolio also represents the largest asset type on the Company's Unaudited Consolidated Balance Sheets. Note 1 to the Audited Consolidated Financial Statements included in Item 8 in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, describes the methodology used to determine the allowance for loan losses.

Goodwill

The amount of goodwill reflected in the Company's Unaudited Consolidated Financial Statements is required to be tested by management for impairment on at least an annual basis. The test for impairment of goodwill on the identified reporting unit is considered a critical accounting estimate because it requires judgment on the part of management and the use of estimates related to the growth assumptions and market multiples used in the valuation model. The goodwill impairment testing is performed annually as of December 31st. No impairment charges were incurred in the most recent test and the fair value of the tested reporting unit substantially exceeded its fair value. There were no triggering events in the three month period ended March 31, 2015 that resulted in an interim impairment test.

ANALYSIS OF FINANCIAL CONDITION

Loan Activity

Total loans grew to \$701.7 million at March 31, 2015, a \$6.1 million, or 0.9%, increase from total loans of \$695.7 million at December 31, 2014. Total loans grew \$41.0 million, or 6.2%, from \$660.7 million at March 31, 2014.

Loans secured by real estate were \$566.9 million at March 31, 2015, reflecting a \$3.6 million, 0.6%, increase from \$563.3 million at December 31, 2014. The Company's commercial real estate portfolio has historically been the fastest growing part of the real estate portfolio, which experienced \$3.4 million, or 0.9%, growth from December 31,

2014, however, the Company's residential real estate loan portfolio increased \$2.2 million, or 2.2%, since December 31, 2014. The Company's largest loan growth was realized in the commercial and industrial loan portfolio of \$132.4 million, which grew \$3.0 million, or 2.3%, from \$129.5 million at December 31, 2014. Commercial construction and residential construction loans decreased \$1.3 million, or 3.1%, and \$0.5 million, or 67.0%, respectively, from \$41.0 million and \$0.7 million at December 31, 2014, respectively.

The Company sold \$2.6 million in residential mortgages originated during the first quarter of 2015, compared with retaining all of its originated residential mortgages during the first quarter of 2014 as deposits increased and the Company was in an overall liquid position. Residential mortgages sold in the first quarter of 2015 equated to approximately 40.5% of the residential mortgages originated by the Company during this quarter.

The Bank sells certain fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. In the three month period ended March 31, 2015, the Bank sold mortgages to FNMA totaling \$2.6 million, as compared with no mortgages sold to FNMA in the three month period ended March 31, 2014. At March 31, 2015, the Bank had a loan servicing portfolio principal balance of \$72.2 million upon which it earns servicing fees, as compared with \$71.6 million at December 31, 2014. The value of the mortgage servicing rights for that portfolio was \$0.5 million at March 31, 2015 and December 31, 2014, respectively. At March 31, 2015, there were \$2.8 million in residential mortgage loans held-for-sale, compared with \$0.4 million in residential mortgages held for sale at December 31, 2014. The Company had no commercial loans held-for-sale at March 31, 2015 or December 31, 2014. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud.

The Company continues to focus on diversified growth with commercial and industrial ("C&I") lending as a way to achieve such diversification in its loan portfolio, which has historically experienced strong growth rates in real estate loans. In the first quarter of 2015, C&I balances increased \$3.0 million, or 2.3%, from \$129.5 million at December 31, 2014, and increased \$21.5 million, or 19.4%, from \$111.0 million at March 31, 2014.

Table of Contents

Credit Quality of Loan Portfolio

Total non-performing loans, defined as accruing loans greater than 90 days past due and non-accrual loans, totaled \$11.8 million, or 1.68% of total loans outstanding, as of March 31, 2015, compared with \$10.6 million, or 1.52% of total loans outstanding, as of December 31, 2014, and \$5.2 million, or 0.79% of total loans and leases outstanding at March 31, 2014. The \$1.2 million increase in non-performing loans from December 31, 2014 was due to commercial loan relationships identified during the quarter as non-accrual loans.

In the first quarter of 2015, commercial credits graded as “special mention” and “substandard” of \$36.9 million increased \$7.9 million, or 27.4%, from \$29.0 million at December 31, 2014. As noted in Note 4 to the Company’s Unaudited Financial Statements included in Part I of this Quarterly Report on Form 10-Q, internal risk ratings are the credit quality indicators used by the Company’s management to determine the appropriate allowance for loan losses for commercial credits. “Special mention” and “substandard” loans are weaker credits with a higher risk of loss categorized as “criticized” credits rather than “pass” or “watch” credits. A \$5.9 million, or 33.4%, increase in “special mention” and a \$2.0 million, or 17.9%, increase in “substandard” commercial credits since December 31, 2014 resulted from a commercial real estate relationship and a commercial loan relationship down-graded from a “pass” rating into a “criticized” rating during the year.

The allowance for loan losses totaled \$12.8 million, or 1.82% of total loans outstanding as of March 31, 2015, compared with \$12.5 million, or 1.80% of total loans outstanding as of December 31, 2014, and \$11.7 million, or 1.78% of total loans outstanding at March 31, 2014. The \$0.2 million increase in the allowance during the first quarter of 2015 was driven primarily by the increase to “criticized” commercial loans during the quarter described above. The net charge-off (recovery) ratio in the first quarter of 2015 was (0.03)% of average net loans, compared with a ratio of 0.00% in the fourth quarter of 2014 and (0.05)% in the first quarter of 2014.

The coverage ratio of the allowance for loan losses to non-performing loans was 108.3% at March 31, 2015 compared with 118.3% at December 31, 2014, and 224.7% at March 31, 2014. The first quarter coverage ratio decreased from December 31, 2014 due to the \$1.2 million, or 11.4%, increase in total non-performing loans.

Investing Activities

Total securities were \$100.0 million at March 31, 2015, compared with \$97.1 million at December 31, 2014 and \$97.0 million at March 31, 2014. Interest-bearing deposits at other banks, which consist of overnight funds kept at correspondent banks and the Federal Reserve, increased to \$46.0 million at March 31, 2015 from \$2.1 million at December 31, 2014 and \$30.1 million at March 31, 2014. Interest-bearing cash increased in the first quarter of 2015 due to a \$72.7 million, or 10.3%, increase in the Company’s total deposits, driven primarily by increases in regular

savings, demand deposits, and NOW accounts. Securities and interest-bearing deposits at correspondent banks made up 13.6% of the Bank's total average interest earning assets in the first quarter, compared with 13.3% in the fourth quarter of 2014 and 16.8% in the first quarter of 2014.

The Company's highest concentration in its securities portfolio was in available for sale U.S. government sponsored mortgage-backed securities at 39.6% of total investment securities at March 31, 2015, compared with 38.9% at December 31, 2014 and 35.7% at March 31, 2014. The concentration in tax-advantaged debt securities issued by state and political subdivisions and U.S. government-sponsored agency bonds was 31.9% and 26.9%, respectively, of the total securities portfolio at March 31, 2015, compared with 27.5% and 32.0% at December 31, 2014, and 32.9% and 28.9% at March 31, 2014.

Management believes that the credit quality of the securities portfolio as a whole is strong, as the portfolio has no individual securities in a significant unrealized loss position. Interest rates have remained low, however, rates decreased slightly in the first quarter since December 31, 2014, resulting in an increase in the net unrealized gain position of the available-for-sale investment portfolio to \$2.0 million at March 31, 2015, compared with \$1.5 million at December 31, 2014 and \$0.9 million at March 31, 2014.

The Company monitors extension and prepayment risk in the securities portfolio to limit potential exposures. Available-for-sale securities with a total fair value of \$85.6 million at March 31, 2015, compared with \$68.8 million at December 31, 2014 and \$93.6 million at March 31, 2014, were pledged as collateral to secure public deposits and for other purposes required or permitted by law. The Company has no direct exposure to subprime mortgages, nor does the Company hold private mortgage-backed securities, credit default swaps, or FNMA or FHLMC preferred stock investments in its investment portfolio.

Table of Contents

Funding Activities

Total deposits at March 31, 2015 were \$780.4 million, a \$72.7 million, or 10.3%, increase when compared with \$707.6 million at December 31, 2014, and a \$58.4 million, 8.1%, increase from \$721.9 million at March 31, 2014. The increases in deposit balances were driven by growth in regular savings, NOW accounts and demand deposit products. The growth in the Company's total deposits from December 31, 2014 was due mainly to increases of \$52.8 million, or 14.5%, in savings deposits, \$10.3 million, or 14.2%, in NOW accounts, and \$11.3 million, 7.1%, in demand deposits. In the first quarter the Bank introduced a new money market account that has been successful in acquiring new customer deposit relationships and providing cross sell opportunities.

In the first quarter of 2015, time deposits decreased \$1.7 million, or 1.5%, from \$112.8 million December 31, 2014 to \$111.1 million at March 31, 2015.

As of March 31, 2015, the Company had no other borrowings, which include the Bank's overnight line of credit and other advances with the FHLB NY, compared with \$13.7 million at December 31, 2014 and \$9.0 million at March 31, 2014. The Company had moved into an overall liquid position in the first quarter of 2015 as a result of the increase in total deposits described above.

Table of Contents

ANALYSIS OF RESULTS OF OPERATIONS

Average Balance Sheet

The following tables present the significant categories of the assets and liabilities of the Company, interest income and interest expense, and the corresponding yields earned and rates paid for the periods indicated. The assets and liabilities are presented as daily averages. The average loan balances include both performing and non-performing loans. Investments are included at amortized cost. Yields are presented on a non-tax-equivalent basis.

	Three months ended March 31, 2015			Three months ended March 31, 2014		
	Average Outstanding Balance (dollars in thousands)	Interest Earned/ Paid	Yield/ Rate	Average Outstanding Balance (dollars in thousands)	Interest Earned/ Paid	Yield/ Rate

Table of Contents

Net Income

Net income was \$1.9 million, or \$0.44 per diluted share, in the first quarter of 2015 compared with \$2.0 million, or \$0.47 per diluted share, in the first quarter of 2014. The slight decline was due to lower insurance agency revenue, which offset net interest income growth and lower operating expenses. As a result, return on average equity was 8.74% for the first quarter of 2015 compared with 10.01% in the first quarter of 2014.

Other Results of Operations – Quarterly Comparison

Net interest income was \$7.6 million in the first quarter, an increase of \$0.3 million, or 3.9%, from the prior-year period, which reflects strong loan growth. First quarter net interest income was down \$0.9 million, or 10.2%, from the trailing fourth quarter of 2014 which benefited from approximately \$0.6 million of accelerated fee income due to two commercial loan payoffs.

Net interest margin of 3.84% improved 5 basis points over the 2014 first quarter rate of 3.79%, and was primarily impacted by a 2 basis point decrease in pricing on Evans' interest bearing liabilities, combined with a 2 basis point increase in the yield on interest-earning assets as lower interest-earning fed funds were invested into higher yielding loans. When compared with the trailing fourth quarter rate of 4.32%, first quarter net interest margin was down 48 basis points. Excluding the accelerated loan fees of \$0.6 million mentioned previously, the adjusted fourth quarter net interest margin was 4.03%. The 19 basis point decrease from the adjusted fourth quarter margin was primarily due to a decrease in the yield on interest-earning assets.

The provision for loan losses was \$201 thousand in the 2015 first quarter, up slightly from \$153 thousand in the prior-year period. When compared with the trailing fourth quarter of 2014, the provision decreased by \$373 thousand as a result of significant pay-downs on impaired loans.

Non-interest income was \$3.1 million, or 28.8% of total revenue, in the quarter, down \$0.3 million, or 9.7%, from the prior-year period. Insurance agency revenue of \$1.8 million was down \$0.3 million, or 14.2%, from the 2014 first quarter, due mostly to decreases in personal property and casualty and profit sharing revenue. The profit sharing decrease was driven by damage losses sustained by customers during a major snow storm in November 2014. Compared with the trailing fourth quarter of 2014, total non-interest income increased by \$2.8 million due mainly to the loss on a tax credit investment that occurred in the trailing quarter.

Total non-interest expense was \$7.5 million in the first quarter, a decrease of 1.4% from the prior-year period. Personnel expenses, the largest expense item for the Company, were up \$0.1 million, or 2.1%, from the last

year's first quarter, and reflect annual merit increases and personnel hires to support the Company's growth strategy. Disciplined expense management resulted in an aggregated decrease in all other expense categories of \$205 thousand compared with the 2014 first quarter. Compared with the trailing fourth quarter of 2014, total non-interest expense was down \$0.3 million, or 3.9%.

Income tax expense for the quarter was \$1.0 million, representing an effective tax rate of 35.1% compared with an effective tax rate of 31.1% in the first quarter of 2014. The increase was mostly due to one-time adjustments to deferred tax assets as a result of statutory changes made by the New York State which became effective on January 1, 2015.

CAPITAL

The Company consistently maintains regulatory capital ratios significantly above the federal "well capitalized" standard, including a Tier 1 leverage ratio of 10.81% and 10.84% at March 31, 2015 and December 31, 2014, respectively. New minimum capital ratios became effective for the Company and the Bank on January 1, 2015 and will be fully-phased-in on January 1, 2019. As of March 31, 2015, the Company and the Bank met all applicable capital adequacy requirements under the Basel III Capital Rules.

Book value per share of the Company's common stock was \$20.49 at March 31, 2015, compared with \$20.41 at December 31, 2014. Tangible book value per share (a non-GAAP measure) at March 31, 2015 was \$18.58, compared with \$18.48 at December 31, 2014.

Table of Contents

Tangible book value per share is a non-GAAP financial measure. The Company calculates tangible book value per share by dividing tangible book value by the number of common shares outstanding, as compared to GAAP book value per share, which the Company calculates by dividing GAAP book value by the number of common shares outstanding. Management believes that this information is consistent with treatment by bank regulatory agencies, which exclude intangible assets from the calculation of risk-based capital ratios. Accordingly, management believes that this non-GAAP financial measure provides information that is important to investors and that is useful in understanding the Company's capital position and ratios. Further, management believes that presentation of this measure, together with the accompanying reconciliation, provides a complete understanding of factors and trends affecting the Company's business and allows investors to view the Company's performance in a manner similar to management, the financial services industry, bank stock analysts and regulatory agencies. However, this non-GAAP financial measure is supplemental and is not a substitute for an analysis based on GAAP financial measures. Note that other companies may use different calculations for this measure, and therefore the Company's presentation of tangible book value per share may not be comparable to similarly titled measures reported by other companies. Investors should review the Company's consolidated financial statements in their entirety and should not rely on any single financial measure.

A reconciliation of this non-GAAP financial measure, tangible book value per share, to the most directly comparable GAAP financial measure, book value, is set forth in the following table:

(\$ in thousands, except per share data)	March 31, 2015	December 31, 2014
Stockholders' equity ("book value")	\$ 86,701	\$ 85,788
Goodwill (related to insurance agency reporting unit)	(8,101)	(8,101)
Intangible assets (related to insurance agency reporting unit)	-	-
Tangible book value (non-GAAP)	\$ 78,600	\$ 77,687
Number of common shares outstanding	4,230,895	4,203,684
Tangible book value per share	\$ 18.58	\$ 18.48

On February 17, 2015, the Company declared a cash dividend of \$0.36 per share on the Company's outstanding common stock. The dividend was paid on April 7, 2015 to shareholders of record as of March 17, 2015.

LIQUIDITY

The Bank utilizes cash flows from the investment portfolio and federal funds sold balances to manage the liquidity requirements related to loan demand and deposit fluctuations. The Bank also has many borrowing options. As a member of the FHLB the Bank is able to borrow funds at competitive rates. Advances of up to \$184.6 million can be

drawn on the FHLB via an Overnight Line of Credit Agreement between the Bank and the FHLB. An amount equal to 25% of the Bank's total assets could be borrowed through the advance programs under certain qualifying circumstances. The Bank also has the ability to purchase up to \$14.0 million in federal funds from its correspondent banks. By placing sufficient collateral in safekeeping at the Federal Reserve Bank, the Bank could borrow at the discount window. The Bank's liquidity needs also can be met by more aggressively pursuing time deposits, or accessing the brokered time deposit market, including the Certificate of Deposit Account Registry Service ("CDARS") network. The Company's primary source of liquidity is dividends from the Bank. Additionally, the Company has access to capital markets as a funding source.

Cash flows from the Bank's investment portfolio are laddered, so that securities mature at regular intervals, to provide funds from principal and interest payments at various times as liquidity needs may arise. Contractual maturities are also laddered, with consideration as to the volatility of market prices. At March 31, 2015, approximately 8.6% of the Bank's securities had contractual maturity dates of one year or less and approximately 35.5% had maturity dates of five years or less.

Table of Contents

Management, on an ongoing basis, closely monitors the Company's liquidity position for compliance with internal policies, and believes that available sources of liquidity are adequate to meet funding needs in the normal course of business. As part of that monitoring process, management calculates the 90-day liquidity each month by analyzing the cash needs of the Bank. Included in the calculation are liquid assets and potential liabilities. Management stresses the potential liabilities calculation to ensure a strong liquidity position. Included in the calculation are assumptions of some significant deposit run-off as well as funds needed for loan closings and investment purchases. At March 31, 2015, in the Company's internal stress test, the Company had net short-term liquidity of \$193.7 million as compared with \$214.6 million at December 31, 2014, due to the usage of cash for loan growth. Available assets of \$167.0 million, divided by public and purchased funds of \$124.2 million, resulted in a long-term liquidity ratio of 134% at March 31, 2015, compared with 88% at December 31, 2014.

Management does not anticipate engaging in any activities, either currently or in the long term, for which adequate funding would not be available and which would therefore result in significant pressure on liquidity.

The Company believes that the Bank maintains a sufficient level of U.S. government and government agency securities and New York State municipal bonds that can be pledged as collateral for municipal deposits.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Additional information responsive to this Item is contained in the Liquidity section of Management's Discussion and Analysis of Financial Condition and Results of Operations, which information is incorporated herein by reference.

Market risk is the risk of loss from adverse changes in market prices and/or interest rates of the Bank's financial instruments. The primary market risk the Company is exposed to is interest rate risk. The core banking activities of lending and deposit-taking expose the Bank to interest rate risk, which occurs when assets and liabilities reprice at different times and by different amounts as interest rates change. As a result, net interest income earned by the Bank is subject to the effects of changing interest rates. The Bank measures interest rate risk by calculating the variability of net interest income in future periods under various interest rate scenarios using projected balances for interest-earning assets and interest-bearing liabilities. Management's philosophy toward interest rate risk management is to limit the variability of net interest income to changes in net interest rates. The balances of financial instruments used in the projections are based on expected growth from forecasted business opportunities, anticipated prepayments of loans, and expected maturities of investment securities, loans and deposits. Management supplements the modeling technique described above with analysis of market values of the Bank's financial instruments and changes to such

market values given changes in the interest rates.

The Bank's Asset-Liability Committee, which includes members of senior management, monitors the Bank's interest rate sensitivity with the aid of a model that considers the impact of ongoing lending and deposit taking activities, as well as interrelationships in the magnitude and timing of the repricing of financial instruments, including the effect of changing interest rates on expected prepayments and maturities. When deemed prudent, management has taken actions, and intends to do so in the future, to mitigate exposure to interest rate risk through the use of on- or off-balance sheet financial instruments. Possible actions include, but are not limited to, changing the pricing of loan and deposit products, and modifying the composition of interest-earning assets and interest-bearing liabilities, and reliance on other financial instruments used for interest rate risk management purposes.

Table of Contents

The following table demonstrates the possible impact of changes in interest rates on the Bank's net interest income over a 12-month period of time:

SENSITIVITY OF NET INTEREST INCOME TO CHANGES IN INTEREST RATES

	Calculated increase in projected annual net interest income (in thousands)	
	March 31, 2015	December 31, 2014
Changes in interest rates		
+200 basis points	\$ 982	\$ 531
+100 basis points	1,479	1,149
-100 basis points	NM	NM
-200 basis points	NM	NM

Many assumptions were utilized by management to calculate the impact that changes in interest rates may have on the Bank's net interest income. The more significant assumptions related to the rate of prepayments of mortgage-related assets, loan and deposit volumes and pricing, and deposit maturities. The Bank assumed immediate changes in rates including 200 basis point rate changes. In the event that the 200 basis point rate changes cannot be achieved, the applicable rate changes are limited to lesser amounts such that interest rates cannot be less than zero. These assumptions are inherently uncertain and, as a result, the Bank cannot precisely predict the impact of changes in interest rates on net interest income. Actual results may differ significantly due to the timing, magnitude, and frequency of interest rate changes in market conditions and interest rate differentials (spreads) between maturity/repricing categories, as well as any actions such as those previously described, which management may take to counter such changes. In light of the uncertainties and assumptions associated with the process, the amounts presented in the table and changes in such amounts are not considered significant to the Bank's projected net interest income.

ITEM 4 - CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's principal executive officer and principal financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2015 (the end of the period covered by this Report). Based on that evaluation, the Company's principal executive and principal financial officers concluded that as of March 31, 2015 the Company's disclosure controls and procedures were effective.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

No changes in the Company's internal control over financial reporting were identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 under the Exchange Act that occurred during the fiscal quarter ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

ITEM 1 – LEGAL PROCEEDINGS

The nature of the Company's business generates a certain amount of litigation involving matters arising in the ordinary course of business.

Additionally, as previously reported, on September 2, 2014, the Office of the Attorney General for the State of New York (the "NYAG") filed a formal complaint in the U.S. District Court for the Western District of New York against the Company and the Bank regarding residential lending practices. The complaint seeks unspecified monetary damages and injunctive relief.

The Company and the Bank believe that they have meritorious defenses to the NYAG's claims, deny any wrongdoing, and will defend against the NYAG's allegations. However, the outcome of this action may not be assured. If this action is decided unfavorably to the Company and the Bank, we could be required to pay a civil penalty and make other expenditures. Despite management's views of the merits of this litigation, or the reasonableness of our estimates and reserves, our financial statements could nonetheless be materially affected by an adverse judgment.

Under applicable accounting guidance, we accrue for litigation and claims where the potential loss from any claim or legal proceeding is considered probable and a range of possible losses can be estimated. Accordingly, based on the advice of counsel and a management review of the existing facts and circumstances, we recorded a reserve relating to the NYAG investigation totaling \$1 million in the second quarter of 2014. Legal proceedings are subject to uncertainties, and the outcomes are difficult to predict. Because of such uncertainties, accruals are based only on the best information available at the time. As additional information becomes available, we will reassess the potential liability related to this investigation and may revise this estimate.

In the opinion of management, there are no other proceedings pending to which the Company is a party or to which its property is subject, which, if determined adversely, would have a material effect on the Company's results of operations or financial condition.

ITEM 2 – UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

In March 2013, the Company announced it had been authorized by its Board of Directors to purchase up to 100,000 shares of the Company's outstanding common stock. In the first quarter of 2015, the Company purchased shares of its common stock as follows:

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Maximum Number of Shares that may yet be Purchased Under the Plans or Programs
January 2015:				
January 1, 2015 -		\$		
January 31, 2015	-	-	-	27,168
February 2015:				
February 1, 2015 -		\$		
February 28, 2015	-	-	-	27,168
March 2015:				
March 1, 2015 -		\$		
March 31, 2015	5,374	24.12	1,397	25,771
Total:	5,374	\$ 24.12	1,397	25,771

(1) 3,977 of the total shares purchased in the period consist of shares constructively tendered to the Company by attestation in satisfaction of the exercise price due upon exercise of options issued pursuant to the Company's 2009 Long-Term Incentive Plan. The "average price paid per share" reported in the table above, with respect to such shares, reflects the cost basis of the Company's Treasury shares and the fair market value of the Company's common stock on the purchase date, which was the cost paid by the Company upon acquisition of treasury shares and the closing sales price of the Company's common stock as reported on the NYSE MKT on that date, respectively.

(2) On March 25, 2013, the Board of Directors authorized the Company to repurchase up to 100,000 shares of the Company's common stock. The repurchase program has no fixed expiration date but may be suspended or discontinued at any time. The Company did not make any repurchases during the quarter ended March 31, 2015 except pursuant to this publically announced program.
