Forward-Looking Statements

Certain of the statements contained herein are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as “anticipates,” “intends,” “plans,” “seeks,” “believes,” “estimates,” “expects,” “projects,” and similar references to future performance.

Forward-looking statements are based on our current expectations and assumptions regarding economic, competitive, legislative and other developments. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. They have been made based upon management’s expectations and beliefs concerning future developments and their potential effect upon The Hartford Financial Services Group, Inc. and its subsidiaries (collectively, the “Company” or “The Hartford”). Future developments may not be in line with management’s expectations or may have unanticipated effects. Actual results could differ materially from expectations, depending on the evolution of various factors, including those set forth in Part I, Item 1A, Risk Factors in The Hartford’s 2013 Form 10-K Annual Report. These important risks and uncertainties include:

- risks that the total capital benefits of the Hartford Life Insurance KK transaction and the U.S. GAAP after-tax loss and statutory surplus loss at closing could differ materially from estimates;

- challenges related to the Company’s current operating environment, including global political, economic and market conditions, and the effect of financial market disruptions, economic downturns or other potentially adverse macroeconomic developments on the attractiveness of our products, the returns in our investment portfolios and the hedging costs associated with our variable annuities business;

- the risks, challenges and uncertainties associated with the realignment of our business to focus on our property and casualty, group benefits and mutual fund businesses;

- the risks, challenges and uncertainties associated with our capital management plan, expense reduction initiatives and other actions, which may include acquisitions, divestitures or restructurings;

- execution risk related to the continued reinvestment of our investment portfolios and refinement of our hedge program for our run-off annuity block;

- market risks associated with our business, including changes in interest rates, credit spreads, equity prices, market volatility and foreign exchange rates, and implied volatility levels, as well as continuing uncertainty in key sectors such as the global real estate market;

- the possibility of unfavorable loss development including with respect to long-tailed exposures;

- the possibility of a pandemic, earthquake, or other natural or man-made disaster that may adversely affect our businesses;

- weather and other natural physical events, including the severity and frequency of storms, hail, winter storms, hurricanes and tropical storms, as well as climate change and its potential impact on weather patterns;

- risk associated with the use of analytical models in making decisions in key areas such as underwriting, capital, hedging, reserving, and catastrophe risk management;

- the uncertain effects of emerging claim and coverage issues;

- the Company’s ability to effectively price its property and casualty policies, including its ability to obtain regulatory consents to pricing actions or to non-renewal or withdrawal of certain product lines;

- the impact on our statutory capital of various factors, including many that are outside the Company’s control, which can in turn affect our credit and financial strength ratings, cost of capital, regulatory compliance and other aspects of our business and results;

- risks to our business, financial position, prospects and results associated with negative rating actions or downgrades in the Company’s financial strength and credit ratings or negative rating actions or downgrades relating to our investments;

- the impact on our investment portfolio if our investment portfolio is concentrated in any particular segment of the economy;

- volatility in our statutory and U.S. GAAP earnings and potential material changes to our results resulting from our adjustment of our risk management program to emphasize protection of economic value;

the potential for differing interpretations of the methodologies, estimations and assumptions that underlie the valuation of the Company's financial instruments that could result in changes to investment valuations;
the subjective determinations that underlie the Company's evaluation of other-than-temporary impairments on available-for-sale securities;
losses due to nonperformance or defaults by others;

3

Table of Contents

- the potential for further acceleration of deferred policy acquisition cost amortization;
- the potential for further impairments of our goodwill or the potential for changes in valuation allowances against deferred tax assets;
 - the possible occurrence of terrorist attacks and the Company's ability to contain its exposure, including the effect of the absence or insufficiency of applicable terrorism legislation on coverage;
- the difficulty in predicting the Company's potential exposure for asbestos and environmental claims;
- the response of reinsurance companies under reinsurance contracts and the availability, pricing and adequacy of reinsurance to protect the Company against losses;
 - actions by our competitors, many of which are larger or have greater financial resources than we do;
- the Company's ability to distribute its products through distribution channels, both current and future;
- the cost and other effects of increased regulation as a result of the implementation of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, and the potential effect of other domestic and foreign regulatory developments, including those that could adversely impact the demand for the Company's products, operating costs and required capital levels;
- unfavorable judicial or legislative developments;
 - regulatory limitations on the ability of the Company and certain of its subsidiaries to declare and pay dividends;
- the Company's ability to maintain the availability of its systems and safeguard the security of its data in the event of a disaster, cyber or other information security incident or other unanticipated event;
- the risk that our framework for managing operational risks may not be effective in mitigating material risk and loss to the Company;
- the potential for difficulties arising from outsourcing and similar third-party relationships;
- the impact of changes in federal or state tax laws;
- regulatory requirements that could delay, deter or prevent a takeover attempt that shareholders might consider in their best interests;
- the impact of potential changes in accounting principles and related financial reporting requirements;
- the Company's ability to protect its intellectual property and defend against claims of infringement; and
- other factors described in such forward-looking statements.

Any forward-looking statement made by the Company in this document speaks only as of the date of the filing of this Form 10-Q. Factors or events that could cause the Company's actual results to differ may emerge from time to time, and it is not possible for the Company to predict all of them. The Company undertakes no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise.

Part I. FINANCIAL INFORMATION

Item 1. Financial Statements

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
The Hartford Financial Services Group, Inc.
Hartford, Connecticut

We have reviewed the accompanying condensed consolidated balance sheet of The Hartford Financial Services Group, Inc. and subsidiaries (the "Company") as of March 31, 2014, and the related condensed consolidated statements of operations, comprehensive income (loss), changes in stockholders' equity, and cash flows for the three-month periods ended March 31, 2014 and 2013. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Company as of December 31, 2013, and the related consolidated statements of operations, comprehensive income, changes in stockholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 28, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2013 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Dollar amounts in millions, except for per share data, unless otherwise stated)
(Unaudited)

1. Basis of Presentation and Significant Accounting Policies

The Hartford Financial Services Group, Inc. is a holding company for insurance and financial services subsidiaries that provide property and casualty and life insurance as well as investment products to both individual and business customers in the United States (collectively, "The Hartford", the "Company", "we" or "our"). Also, the Company continues to manage life and annuity products previously sold.

On January 1, 2013, the Company completed the sale of its Retirement Plans business to Massachusetts Mutual Life Insurance Company ("MassMutual") and on January 2, 2013 the Company completed the sale of its Individual Life insurance business to The Prudential Insurance Company of America ("Prudential"), a subsidiary of Prudential Financial, Inc. For further discussion of these and other such transactions, see Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements.

On December 12, 2013, the Company completed the sale of Hartford Life International Limited ("HLIL"), an indirect wholly-owned

subsidiary. For further discussion of this transaction, see Note 2 - Business Dispositions and Note 14 - Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

The Condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information, which differ materially from the accounting practices prescribed by various insurance regulatory authorities. These Condensed Consolidated Financial Statements and Notes should be read in conjunction with the Consolidated Financial Statements and Notes thereto included in the Company's 2013 Form 10-K Annual Report. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the full year.

The accompanying Condensed Consolidated Financial Statements and Notes as of March 31, 2014, and for the three months ended March 31, 2014 and 2013 are unaudited. These financial statements reflect all adjustments (generally consisting only of normal accruals) which are, in the opinion of management, necessary for the fair presentation of the financial position, results of operations and cash flows for the interim periods. In 2014, a subsidiary of the Company changed its method of reporting revenues and expenses. Fee income and directly related expenses previously reported as gross amounts are being reported as a net amount in insurance operating costs and other expenses in the Condensed Consolidated Statements of Operations. This change in the method of reporting revenues and expenses did not have a material impact on the Company's condensed consolidated results of operations, financial position or liquidity. The Condensed Consolidated Financial Statements have been retrospectively adjusted to conform to the current year presentation.

The Company's significant accounting policies are summarized in Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Consolidated Financial Statements included in the Company's 2013 Form 10-K Annual Report.

Consolidation

The Condensed Consolidated Financial Statements include the accounts of The Hartford Financial Services Group, Inc., companies in which the Company directly or indirectly has a controlling financial interest and those variable interest entities ("VIEs") in which the Company is required to consolidate. Entities in which the Company has significant influence over the operating and financing decisions but are not required to consolidate are reported using the equity method. All intercompany transactions and balances between The Hartford and its subsidiaries and affiliates have been eliminated. For further information on VIEs see Note 6 - Investments and Derivative Instruments of Notes to Condensed Consolidated Financial Statements.

Discontinued Operations

The results of operations of a component of the Company that either has been disposed of or is classified as held-for-sale are reported in discontinued operations if the operations and cash flows of the component have been or will be eliminated from the ongoing operations of the Company as a result of the disposal transaction and the

Company will not have any significant continuing involvement in the operations of the component after the disposal transaction. The Company presents the operations of businesses that meet these criteria as discontinued operations in the Condensed Consolidated Financial Statements. Accordingly, results of operations for prior periods are retrospectively reclassified. For information on the specific businesses and related impacts, see Note 14 - Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

1. Basis of Presentation and Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements, in conformity with U.S. GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates include those used in determining property and casualty insurance product reserves, net of reinsurance; estimated gross profits used in the valuation and amortization of assets and liabilities associated with variable annuity and other universal life-type contracts; evaluation of other-than-temporary impairments on available-for-sale securities and valuation allowances on investments; living benefits required to be fair valued; goodwill impairment; valuation of investments and derivative instruments; valuation allowance on deferred tax assets; and contingencies relating to corporate litigation and regulatory matters. Certain of these estimates are particularly sensitive to market conditions, and deterioration and/or volatility in the worldwide debt or equity markets could have a material impact on the Condensed Consolidated Financial Statements.

Mutual Funds

The Company maintains a mutual fund operation whereby the Company provides investment management, administrative and distribution services to The Hartford-sponsored mutual funds (collectively, "mutual funds"). These mutual funds are registered with the Securities and Exchange Commission ("SEC") under the Investment Company Act of 1940. The mutual funds are owned by the shareholders of those funds and not by the Company. As such, the mutual fund assets and liabilities and related investment returns are not reflected in the Company's Condensed Consolidated Financial Statements since they are not assets, liabilities and operations of the Company.

Reclassifications

Certain reclassifications have been made to prior period financial information to conform to the current year presentation.

Future Adoption of New Accounting Standard

Reporting Discontinued Operations

In April 2014, the FASB issued updated guidance on reporting discontinued operations. Under this updated guidance, a discontinued operation will include a disposal of a major part of an entity's operations and financial results such as a separate major line of business or a separate major geographical area of operations. The guidance raises the threshold to be a major operation but no longer precludes discontinued operations presentation where there is significant continuing involvement or cash flows with a disposed component of an entity. The guidance expands disclosures to include cash flows where there is significant continuing involvement with a discontinued operation and the pre-tax profit or loss of disposal transactions not reported as discontinued operations. The updated guidance is effective prospectively for years beginning on or after December 15, 2014, with early application permitted. The Hartford will apply the guidance to new disposals and operations newly classified as held for sale beginning first quarter of 2015, with no effect on existing reported discontinued operations. The effect on the Company's future results of operations or financial condition will depend on the nature of future disposal transactions.

Income Taxes

A reconciliation of the tax provision at the U.S. Federal statutory rate to the provision for income taxes is as follows:

	Three Months Ended March		
	31,		
	2014	2013	
Tax benefit at U.S. Federal statutory rate	\$229	\$(153))
Tax-exempt interest	(35))(34))
Dividends received deduction	(27))(32))
Other [1]	(7)22)

Income tax expense (benefit) \$160 \$(197)

[1] Includes a permanent difference of \$25 related to non-deductible goodwill for the three months ended March 31, 2013.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

1. Basis of Presentation and Significant Accounting Policies (continued)

The separate account dividends-received deduction (“DRD”) is estimated for the current year using information from the most recent return, adjusted for current year equity market performance and other appropriate factors, including estimated levels of corporate dividend payments and level of policy owner equity account balances. The actual current year DRD can vary from estimates based on, but not limited to, changes in eligible dividends received in the mutual funds, amounts of distribution from these mutual funds, amounts of short-term capital gains at the mutual fund level and the Company’s taxable income before the DRD. The Company evaluates its DRD computations on a quarterly basis.

The Company and its subsidiaries file income tax returns in the United States (“U.S.”) federal jurisdiction, and various states and foreign jurisdictions as applicable. The Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years prior to 2007. The audit of the years 2007-2009 commenced during 2010 and is expected to conclude in the second half of 2015. The 2010-2011 audit commenced in the fourth quarter of 2012 and is expected to conclude by the end of 2015. Management believes that adequate provision has been made in the consolidated financial statements for any potential assessments that may result from tax examinations and other tax-related matters for all open tax years.

The Company has recorded a deferred tax asset valuation allowance that is adequate to reduce the total deferred tax asset to an amount that will be more likely than not realized. The deferred tax asset valuation allowance was \$4 as of March 31, 2014 and December 31, 2013 attributable mostly to U.S. net operating losses. In assessing the need for a valuation allowance, management considered future taxable temporary difference reversals, future taxable income exclusive of reversing temporary differences and carryforwards, taxable income in open carry back years, as well as other tax planning strategies. These tax planning strategies include holding a portion of debt securities with market value losses until recovery, altering the level of tax exempt securities, selling appreciated securities to offset capital losses, business considerations such as asset-liability matching, and the sales of certain corporate assets. Management views such tax planning strategies as prudent and feasible, and will implement them, if necessary, to realize the deferred tax asset. Future economic conditions and debt market volatility, including increases in interest rates, can adversely impact the Company's tax planning strategies and in particular the Company's ability to utilize tax benefits on previously recognized realized capital losses.

2. Business Dispositions

Sale of Hartford Life International Limited (“HLIL”)

On December 12, 2013, the Company completed the sale of HLIL, an indirect wholly-owned subsidiary, in a cash transaction to Columbia Insurance Company, a Berkshire Hathaway company, for approximately \$285. At closing, HLIL’s sole asset was its subsidiary, Hartford Life Limited, a Dublin-based company that sold variable annuities in the U.K. from 2005 to 2009. The sale transaction resulted in an after-tax loss of \$102 upon disposition for the year ended December 31, 2013. The operations of the Company's U.K. variable annuity business meet the criteria for reporting as discontinued operations as further discussed in Note 14 - Discontinued Operations of Notes to Condensed Consolidated Financial Statements. The Company's U.K. variable annuities business is included in the Talcott Resolution reporting segment.

Sale of Retirement Plans

On January 1, 2013, the Company completed the sale of its Retirement Plans business to MassMutual for a ceding commission of \$355. The business sold included products and services provided to corporations pursuant to Section 401(k) of the Internal Revenue Code of 1986, as amended (the “Code”), and products and services provided to municipalities and not-for-profit organizations under Sections 457 and 403(b) of the Code, collectively referred to as government plans. The sale was structured as a reinsurance transaction and resulted in an after-tax loss of \$24 for the year ended December 31, 2013. The after-tax loss is primarily driven by the reduction in goodwill that is non-deductible for income tax purposes. The Company recognized \$634 in reinsurance loss on disposition offset by \$634 in net realized capital gains for the year ended December 31, 2013.

Upon closing, the Company reinsured \$9.2 billion of policyholder liabilities and \$26.3 billion of separate account liabilities under an indemnity reinsurance arrangement. The reinsurance transaction does not extinguish the Company's primary liability on the insurance policies issued under the Retirement Plans business. The Company also transferred invested assets with a carrying value of \$9.3 billion, net of the ceding commission, to MassMutual and recognized other non-cash decreases in assets totaling \$200 relating to deferred acquisition costs, deferred income taxes, goodwill, property and equipment and other assets associated with the disposition. The Company will continue to sell retirement plans during a transition period of 18-24 months and MassMutual will assume all expenses and risk for these sales through the reinsurance agreement.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Business Dispositions (continued)

Sale of Individual Life

On January 2, 2013, the Company completed the sale of its Individual Life insurance business to Prudential for consideration of \$615 consisting primarily of a ceding commission. The business sold included variable universal life, universal life, and term life insurance. The sale was structured as a reinsurance transaction and resulted in a loss on business disposition consisting of a reinsurance loss partially offset by realized capital gains. The Company recognized a reinsurance loss on business disposition of \$533, pre-tax, which included a goodwill impairment charge of \$342 and a loss accrual for premium deficiency of \$191 for the year ended December 31, 2012. For additional information, see Note 2 - Business Dispositions and Note 9 - Goodwill and Other Intangible Assets in The Hartford's 2013 Annual Report on Form 10-K. Upon closing the Company recognized an additional \$940 in reinsurance loss on disposition offset by \$940 in realized capital gains for a \$0 impact on income, pre-tax.

Upon closing, the Company reinsured \$8.7 billion of policyholder liabilities and \$5.3 billion of separate account liabilities under indemnity reinsurance arrangements. The reinsurance transaction does not extinguish the Company's primary liability on the insurance policies issued under the Individual Life business. The Company also transferred invested assets with a carrying value of \$8.0 billion, exclusive of \$1.4 billion of assets supporting the modified coinsurance agreement, net of cash transferred in place of short-term investments, to Prudential and recognized other non-cash decreases in assets totaling \$1.8 billion relating to deferred acquisition costs, deferred income taxes, property and equipment and other assets and other non-cash decreases in liabilities totaling \$1.5 billion relating to other liabilities including the \$191 loss accrual for premium deficiency, associated with the disposition. The Company will continue to sell life insurance products and riders during a transition period of 18-24 months and Prudential will assume all expenses and risk for these sales through the reinsurance agreement.

Composition of Invested Assets Transferred

The following table summarizes invested assets transferred by the Company in January 2013 in connection with the sale of the Retirement Plans and Individual Life businesses.

	As of December 31, 2012 Carrying Value
Fixed maturities, at fair value (amortized cost of \$13,916) [1]	\$15,349
Equity securities, AFS, at fair value (cost of \$35) [2]	37
Fixed maturities, at fair value using the FVO [3]	16
Mortgage loans (net of allowances for loan losses of \$1)	1,364
Policy loans, at outstanding balance	582
Total invested assets transferred	\$17,348

[1]Includes \$14.7 billion and \$670 of securities in level 2 and 3 of the fair value hierarchy, respectively.

[2]All equity securities transferred are included in level 2 of the fair value hierarchy.

[3]All FVO securities transferred are included in level 3 of the fair value hierarchy.

Sale of Catalyst 360

On December 31, 2013, the Company completed the sale of its member contact center for health insurance products offered through the AARP Health Program ("Catalyst 360") to Optum, Inc., a division of UnitedHealth Group. The impact of this transaction was not material to the Company's results of operations, financial position or liquidity. The Company will provide limited transition services for 18-24 months. Catalyst 360 is included in the Consumer Markets reporting segment.

Purchase Agreement with Forethought Financial Group, Inc.

On December 31, 2012, the Company completed the sale of its U.S. individual annuity new business capabilities to Forethought Financial Group. Effective May 1, 2012, all new U.S. annuity policies sold by the Company were

reinsured to Forethought Life Insurance Company. The Company ceased the sale of such annuity policies and the reinsurance agreement terminated as to new business in the second quarter of 2013. The reinsurance agreement has no impact on in-force policies issued on or before April 27, 2012 and the impact of this transaction was not material to the Company's results of operations, financial position or liquidity. The Individual Annuity business is included in the Talcott Resolution reporting segment.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

3. Earnings (Loss) Per Common Share

The following table presents a reconciliation of net income (loss) and shares used in calculating basic earnings (loss) per common share to those used in calculating diluted earnings (loss) per common share.

(In millions, except for per share data)	Three Months Ended March	
	2014	2013
Earnings		
Income (loss) from continuing operations		
Income (loss) from continuing operations, net of tax	\$495	\$(240)
Less: Preferred stock dividends	—	10
Income (loss) from continuing operations, net of tax, available to common shareholders	\$495	\$(250)
Income (loss) from discontinued operations, net of tax	\$—	\$(1)
Net income (loss)		
Net income (loss)	\$495	\$(241)
Less: Preferred stock dividends	—	10
Net income (loss) available to common shareholders	\$495	\$(251)
Shares		
Weighted average common shares outstanding, basic	449.8	436.3
Dilutive effect of warrants	22.6	—
Dilutive effect of stock compensation plans	6.2	—
Weighted average shares outstanding and dilutive potential common shares	478.6	436.3
Earnings (loss) per common share		
Basic		
Income (loss) from continuing operations, net of tax, available to common shareholders	\$1.10	\$(0.57)
Income (loss) from discontinued operations, net of tax	—	(0.01)
Net income (loss) available to common shareholders	\$1.10	\$(0.58)
Diluted		
Income (loss) from continuing operations, net of tax, available to common shareholders	\$1.03	\$(0.57)
Income (loss) from discontinued operations, net of tax	—	(0.01)
Net income (loss) available to common shareholders	\$1.03	\$(0.58)

For the three months ended March 31, 2013, mandatory convertible preferred shares, along with the related dividend adjustment, of 21.2 million, would have been antidilutive to the earnings per share calculations. Assuming the impact of the mandatory convertible preferred shares was not antidilutive, weighted average common shares outstanding and dilutive potential common shares would have totaled 493.1 million for the three months ended March 31, 2013.

As a result of the losses available to common shareholders for the three months ended March 31, 2013, the Company was required to use basic weighted average common shares outstanding in the calculation of diluted loss per share, since the inclusion of shares for warrants of 31.7 million, stock compensation plans of 3.9 million and mandatory convertible preferred shares, along with the related dividend adjustment, of 21.2 million, would have been antidilutive to the earnings (loss) per share calculations. Had there been income available to common shareholders during the period, weighted average common shares outstanding and dilutive potential common shares would have totaled 493.1 million.

4. Segment Information

The Company currently conducts business principally in six reporting segments, as well as a Corporate category. The Company's reporting segments, as well as the Corporate category, are as follows:

Property & Casualty Commercial

Property & Casualty Commercial provides workers' compensation, property, automobile, marine, livestock, liability and umbrella coverages primarily throughout the U.S., along with a variety of customized insurance products and risk management services including professional liability, fidelity, surety, and specialty casualty coverages.

Consumer Markets

Consumer Markets provides standard automobile, homeowners and personal umbrella coverages to individuals across the U.S., including a special program designed exclusively for members of AARP. Consumer Markets previously operated a member contact center for health insurance products offered through the AARP Health program ("Catalyst 360"). For further information regarding the sale of Catalyst 360 in 2013, see Note 2 -Business Dispositions of Notes to Condensed Consolidated Financial Statements.

Property & Casualty Other Operations

Property & Casualty Other Operations includes certain property and casualty operations, managed by the Company, that have discontinued writing new business and substantially all of the Company's asbestos and environmental exposures.

Group Benefits

Group Benefits provides employers, associations, affinity groups and financial institutions with group life, accident and disability coverage, along with other products and services, including voluntary benefits, and group retiree health.

Mutual Funds

Mutual Funds offers mutual funds for retail and retirement accounts and provides investment-management and administrative services such as product design, implementation and oversight. This business also includes the runoff of the mutual funds supporting the Company's variable annuity products.

Talcott Resolution

Talcott Resolution is comprised of runoff business from the Company's U.S. annuity, international (primarily in Japan) annuity, and institutional and private-placement life insurance businesses, as well as the Retirement Plans and Individual Life businesses that were sold in January 2013 and the Company's discontinued U.K. variable annuity business. For further information regarding the sale of these businesses, see Note 2 - Business Dispositions and Note 14 - Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

Corporate

The Company includes in the Corporate category the Company's debt financing and related interest expense, as well as other capital raising activities; and certain purchase accounting adjustments and other charges not allocated to the segments.

Financial Measures and Other Segment Information

Certain transactions between segments occur during the year that primarily relate to tax settlements, insurance coverage, expense reimbursements, services provided, security transfers and capital contributions. Also, one segment may purchase group annuity contracts from another to fund pension costs and annuities to settle casualty claims. In addition, certain inter-segment transactions occur that relate to interest income on allocated surplus. Consolidated net investment income is unaffected by such transactions.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Fair Value Measurements

The following section applies the fair value hierarchy and disclosure requirements for the Company's financial instruments that are carried at fair value. The fair value hierarchy prioritizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2 or 3).

Level 1 Observable inputs that reflect quoted prices for identical assets or liabilities in active markets that the Company has the ability to access at the measurement date. Level 1 securities include highly liquid U.S. Treasuries, money market funds and exchange traded equity securities, open-ended mutual funds reported in separate account assets and exchange-traded derivative instruments.

Level 2 Observable inputs, other than quoted prices included in Level 1, for the asset or liability or prices for similar assets and liabilities. Most fixed maturities and preferred stocks, including those reported in separate account assets, are model priced by vendors using observable inputs and are classified within Level 2. Also included are limited partnerships and other alternative assets measured at fair value where an investment can be redeemed, or substantially redeemed, at the NAV at the measurement date or in the near-term, not to exceed 90 days.

Level 3 Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Level 3 securities include less liquid securities, guaranteed product embedded and reinsurance derivatives and other complex derivative instruments, as well as limited partnerships and other alternative investments carried at fair value that cannot be redeemed in the near-term at the NAV. Because Level 3 fair values, by their nature, contain one or more significant unobservable inputs as there is little or no observable market for these assets and liabilities, considerable judgment is used to determine the Level 3 fair values. Level 3 fair values represent the Company's best estimate of an amount that could be realized in a current market exchange absent actual market exchanges.

In many situations, inputs used to measure the fair value of an asset or liability position may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value. Transfers of securities among the levels occur at the beginning of the reporting period. For the three months ended March 31, 2014 and 2013, transfers from Level 1 to Level 2 were \$1.3 billion and \$115, respectively, which represented previously on-the-run U.S. Treasury securities that are now off-the-run, and there were no transfers from Level 2 to Level 1. In most cases, both observable (e.g., changes in interest rates) and unobservable (e.g., changes in risk assumptions) inputs are used in the determination of fair values that the Company has classified within Level 3. Consequently, these values and the related gains and losses are based upon both observable and unobservable inputs. The Company's fixed maturities included in Level 3 are classified as such because these securities are primarily priced by independent brokers and/or within illiquid markets.

The following tables present assets and (liabilities) carried at fair value by hierarchy level. These disclosures provide information as to the extent to which the Company uses fair value to measure financial instruments and information about the inputs used to value those financial instruments to allow users to assess the relative reliability of the measurements.

U.S Macro hedge program	30	—	—	30
International program hedging instruments	(305)—	(245)(60)
Total derivative liabilities [4]	(1,223)—	(1,247)24
Consumer notes [5]	(2)—	—	(2)
Total liabilities accounted for at fair value on a recurring basis	\$(1,273)\$ —	\$(1,247)(26)

[1] Includes over-the-counter ("OTC") and OTC-cleared derivative instruments in a net asset value position after consideration of the impact of collateral posting requirements which may be imposed by agreements, clearing house rules and applicable law. As of March 31, 2014 and December 31, 2013, \$114 and \$128, respectively, of cash collateral liability was netted against the derivative asset value in the Condensed Consolidated Balance Sheet and is excluded from the table above. See footnote 4 below for derivative liabilities.

[2] Represents hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value.

[3] Approximately \$1.5 billion and \$2.4 billion of investment sales receivable that are not subject to fair value accounting are excluded as of March 31, 2014 and December 31, 2013, respectively.

[4] Includes OTC and OTC-cleared derivative instruments in a net negative market value position (derivative liability) after consideration of the impact of collateral posting requirements which may be imposed by agreements, clearing house rules and applicable law. In the Level 3 roll-forward table included below in this Note 4, the derivative asset and liability are referred to as "freestanding derivatives" and are presented on a net basis.

[5] Represents embedded derivatives associated with non-funding agreement-backed consumer equity linked notes.

Determination of Fair Values

The valuation methodologies used to determine the fair values of assets and liabilities under the "exit price" notion, reflect market participant objectives and are based on the application of the fair value hierarchy that prioritizes relevant observable market inputs over unobservable inputs. The Company determines the fair values of certain financial assets and financial liabilities based on quoted market

prices where available and where prices represent a reasonable estimate of fair value. The Company also determines fair value based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's default spreads, liquidity and, where appropriate, risk margins on unobservable parameters. The following is a discussion of the methodologies used to determine fair values for the financial instruments listed in the above tables.

The fair value process is monitored by the Valuation Committee, which is a cross-functional group of senior management within the Company that meets at least quarterly. The Valuation Committee is co-chaired by the Heads of Investment Operations and Accounting, and has representation from various investment sector professionals, accounting, operations, legal, compliance and risk management. The purpose of the committee is to oversee the pricing policy and procedures by ensuring objective and reliable valuation practices and pricing of financial instruments, as well as addressing fair valuation issues and approving changes to valuation methodologies and pricing sources. There are also two working groups under the Valuation Committee, a Securities Fair Value Working Group ("Securities Working Group") and a Derivatives Fair Value Working Group ("Derivatives Working Group"), which include the Heads of Investment Operations and Accounting, as well as other investment, operations, accounting and risk management professionals that meet monthly to review market data trends, pricing and trading statistics and results, and any proposed pricing methodology changes described in more detail in the following paragraphs.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Fair Value Measurements (continued)

The Company also has an enterprise-wide Operational Risk Management function, led by the Chief Operational Risk Officer, which is

responsible for establishing, maintaining and communicating the framework, principles and guidelines of the Company's operational risk

management program. This includes model risk management which provides an independent review of the suitability, characteristics and reliability of model inputs as well as, an analysis of significant changes to current models.

AFS Securities, Fixed Maturities, FVO, Equity Securities, Trading, and Short-term Investments

The fair value of AFS securities, fixed maturities, FVO, equity securities, trading, and short-term investments in an active and orderly market (e.g. not distressed or forced liquidation) are determined by management after considering one of three primary sources of information: third-party pricing services, independent broker quotations or pricing matrices. Security pricing is applied using a "waterfall" approach whereby publicly available prices are first sought from third-party pricing services, the remaining unpriced securities are submitted to independent brokers for prices, or lastly, securities are priced using a pricing matrix. Typical inputs used by these pricing methods include, but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flows, prepayment speeds and default rates. Based on the typical trading volumes and the lack of quoted market prices for fixed maturities, third-party pricing services will normally derive the security prices from recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information as outlined above. If there are no recently reported trades, the third-party pricing services and independent brokers may use matrix or model processes to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Included in the pricing of ABS and RMBS are estimates of the rate of future prepayments of principal over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral. Actual prepayment experience may vary from these estimates.

Prices from third-party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

A pricing matrix is used to price private placement securities for which the Company is unable to obtain a price from a third-party pricing service by discounting the expected future cash flows from the security by a developed market discount rate utilizing current credit spreads. Credit spreads are developed each month using market based data for public securities adjusted for credit spread differentials between public and private securities which are obtained from a survey of multiple private placement brokers. The appropriate credit spreads determined through this survey approach are based upon the issuer's financial strength and term to maturity, utilizing an independent public security index and trade information and adjusting for the non-public nature of the securities.

The Securities Working Group performs ongoing analysis of the prices and credit spreads received from third parties to ensure that the prices represent a reasonable estimate of the fair value. This process involves quantitative and qualitative analysis and is overseen by investment and accounting professionals. As a part of this analysis, the Company considers trading volume, new issuance activity and other factors to determine whether the market activity is significantly different than normal activity in an active market, and if so, whether transactions may not be orderly considering the weight of available evidence. If the available evidence indicates that pricing is based upon transactions that are stale or not orderly, the Company places little, if any, weight on the transaction price and will estimate fair value utilizing an internal pricing model. In addition, the Company ensures that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models developed based on spreads, and when available, market indices. As a result of this analysis, if the Company determines that there is a more appropriate fair value based upon the available market data, the price received from the

third party is adjusted accordingly and approved by the Valuation Committee. The Company's internal pricing model utilizes the Company's best estimate of expected future cash flows discounted at a rate of return that a market participant would require. The significant inputs to the model include, but are not limited to, current market inputs, such as credit loss assumptions, estimated prepayment speeds and market risk premiums.

The Company conducts other specific monitoring controls around pricing. Daily analyses identify price changes over 3-5%, sale trade prices that differ over 3% from the prior day's price and purchase trade prices that differ more than 3% from the current day's price. Weekly analyses identify prices that differ more than 5% from published bond prices of a corporate bond index. Monthly analyses identify price changes over 3%, prices that haven't changed and missing prices. Also on a monthly basis, a second source validation is performed on most sectors. Analyses are conducted by a dedicated pricing unit that follows up with trading and investment sector professionals and challenges prices with vendors when the estimated assumptions used differ from what the Company feels a market participant would use. Any changes from the identified pricing source are verified by further confirmation of assumptions used. Examples of other procedures performed include, but are not limited to, initial and on-going review of third-party pricing services' methodologies, review of pricing statistics and trends and back testing recent trades.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Fair Value Measurements (continued)

The Company has analyzed the third-party pricing services' valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Most prices provided by third-party pricing services are classified into Level 2 because the inputs used in pricing the securities are market observable. Due to a general lack of transparency in the process that brokers use to develop prices, most valuations that are based on brokers' prices are classified as Level 3. Some valuations may be classified as Level 2 if the price can be corroborated with observable market data.

Derivative Instruments, including embedded derivatives within investments

Derivative instruments are fair valued using pricing valuation models for OTC derivatives that utilize independent market data inputs, quoted market prices for exchange-traded and OTC-cleared derivatives, or independent broker quotations. Excluding embedded and reinsurance related derivatives, as of March 31, 2014 and December 31, 2013, 98% and 97%, respectively, of derivatives, based upon notional values, were priced by valuation models or quoted market prices. The remaining derivatives were priced by broker quotations.

The Derivatives Working Group performs ongoing analysis of the valuations, assumptions and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. The Company performs various controls on derivative valuations which include both quantitative and qualitative analysis. Analyses are conducted by a dedicated derivative pricing team that works directly with investment sector professionals to analyze impacts of changes in the market environment and investigate variances. There is a monthly analysis to identify market value changes greater than pre-defined thresholds, stale prices, missing prices and zero prices. Also on a monthly basis, a second source validation, typically to broker quotations, is performed for certain of the more complex derivatives as well as for any existing deals with a market value greater than \$10 and all new deals during the month. A model validation review is performed on any new models, which typically includes detailed documentation and validation to a second source. The model validation documentation and results of validation are presented to the Valuation Committee for approval. There is a monthly control to review changes in pricing sources to ensure that new models are not moved to production until formally approved.

The Company utilizes derivative instruments to manage the risk associated with certain assets and liabilities.

However, the derivative instrument may not be classified with the same fair value hierarchy level as the associated assets and liabilities. Therefore the realized and unrealized gains and losses on derivatives reported in Level 3 may not reflect the offsetting impact of the realized and unrealized gains and losses of the associated assets and liabilities.

Limited partnerships and other alternative investments

Limited partnerships and other alternative investments include hedge funds where investment company accounting has been applied to a wholly-owned fund of funds measured at fair value. These funds are fair valued using the net asset value per share or equivalent ("NAV"), as a practical expedient, calculated on a monthly basis and is the amount at which a unit or shareholder may redeem their investment, if redemption is allowed. Certain impediments to redemption include, but are not limited to the following: 1) redemption notice periods vary and may be as long as 90 days, 2) redemption may be restricted (e.g. only be allowed on a quarter-end), 3) a holding period referred to as a lock-up may be imposed whereby an investor must hold their investment for a specified period of time before they can make a notice for redemption, 4) gating provisions may limit all redemptions in a given period to a percentage of the entities' equity interests, or may only allow an investor to redeem a portion of their investment at one time and 5) early redemption penalties may be imposed that are expressed as a percentage of the amount redeemed. The Company will assess impediments to redemption and current market conditions that will restrict the redemption at the end of the notice period. Any funds that are subject to significant liquidity restrictions are reported in Level 3; all others are classified as Level 2.

5. Fair Value Measurements (continued)

Valuation Techniques and Inputs for Investments

Generally, the Company determines the estimated fair value of its AFS securities, fixed maturities, FVO, equity securities, trading, and short-term investments using the market approach. The income approach is used for securities priced using a pricing matrix, as well as for derivative instruments. Certain limited partnerships and other alternative investments are measured at fair value using a NAV as a practical expedient. For Level 1 investments, which are comprised of on-the-run U.S. Treasuries, exchange-traded equity securities, short-term investments, and exchange traded futures and option contracts, valuations are based on observable inputs that reflect quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

For most of the Company's debt securities, the following inputs are typically used in the Company's pricing methods: reported trades, benchmark yields, bids and/or estimated cash flows. For securities except U.S. Treasuries, inputs also include issuer spreads, which may consider credit default swaps. Derivative instruments are valued using mid-market inputs that are predominantly observable in the market.

A description of additional inputs used in the Company's Level 2 and Level 3 measurements is listed below:

The fair values of most of the Company's Level 2 investments are determined by management after considering prices received from third party pricing services. These investments include most fixed maturities and preferred stocks, including those reported in separate account assets, as well as certain limited partnerships and other alternative investments and derivative instruments.

ABS, CDOs, CMBS and RMBS – Primary inputs also include monthly payment information, collateral performance, which varies by vintage year and includes delinquency rates, collateral valuation loss severity rates, collateral refinancing assumptions, credit default swap indices and, for ABS and RMBS, estimated prepayment rates.

Corporates, including investment grade private placements – Primary inputs also include observations of credit default swap curves related to the issuer.

Foreign government/government agencies—Primary inputs also include observations of credit default swap curves related to the issuer and political events in emerging market economies.

Municipals – Primary inputs also include Municipal Securities Rulemaking Board reported trades and material event notices, and issuer financial statements.

Short-term investments – Primary inputs also include material event notices and new issue money market rates.

Equity securities, trading – Consist of investments in mutual funds. Primary inputs include net asset values obtained from third party pricing services.

Credit derivatives – Primary inputs include the swap yield curve and credit default swap curves.

Foreign exchange derivatives – Primary inputs include the swap yield curve, currency spot and forward rates, and cross currency basis curves.

Interest rate derivatives – Primary input is the swap yield curve.

Limited partnerships and other alternative investments — Primary inputs include a NAV for investment companies with no redemption restrictions as reported on their U.S. GAAP financial statements.

Level 3 Most of the Company's securities classified as Level 3 include less liquid securities such as lower quality ABS, CMBS, commercial real estate ("CRE") CDOs and RMBS primarily backed by sub-prime loans. Securities included in level 3 are primarily valued based on broker prices or broker spreads, without adjustments.

Primary inputs for non-broker priced investments, including structured securities, are consistent with the typical inputs used in Level 2 measurements noted above, but are Level 3 due to their less liquid markets.

Additionally, certain long-dated securities are priced based on third party pricing services, including municipal securities, foreign government/government agencies, bank loans and below investment grade private placement securities. Primary inputs for these long-dated securities are consistent with the typical inputs used in Level 1 and Level 2 measurements noted above, but include benchmark interest rate or credit spread assumptions that are not observable in the marketplace. Level 3 investments also include certain limited partnerships and other alternative investments measured at fair value where the Company does not have the

ability to redeem the investment in the near-term at the NAV. Also included in Level 3 are certain derivative instruments that either have significant unobservable inputs or are valued based on broker quotations. Significant inputs for these derivative contracts primarily include the typical inputs used in the Level 1 and Level 2 measurements noted above; but also include equity and interest rate volatility and swap yield curves beyond observable limits.

5. Fair Value Measurements (continued)

Significant Unobservable Inputs for Level 3 Assets Measured at Fair Value

The following table presents information about significant unobservable inputs used in Level 3 assets measured at fair value.

Securities Assets accounted for at fair value on a recurring basis	As of March 31, 2014		Significant Unobservable Input	Minimum	Maximum	Weighted Average [1]	Impact of Increase in Input on Fair Value [2]
	Fair Value	Predominant Valuation Method					
CMBS	\$592	Discounted cash flows	Spread (encompasses prepayment, default risk and loss severity)	98	bps 3,096	bps 391	bps Decrease
Corporate [3]	777	Discounted cash flows	Spread	118	bps 697	bps 142	bps Decrease
Municipal [3]	30	Discounted cash flows	Spread	189	bps 189	bps 189	bps Decrease
RMBS	1,328	Discounted cash flows	Spread	58	bps 1,763	bps 202	bps Decrease
			Constant prepayment rate	—	% 10.0	% 3.0	% Decrease [4]
			Constant default rate	1.0	% 22.0	% 7.0	% Decrease
			Loss severity	—	% 100.0	% 80.0	% Decrease
	As of December 31, 2013						
CMBS	\$663	Discounted cash flows	Spread (encompasses prepayment, default risk and loss severity)	99	bps 3,000	bps 527	bps Decrease
Corporate [3]	665	Discounted cash flows	Spread	119	bps 5,594	bps 344	bps Decrease
Municipal [3]	29	Discounted cash flows	Spread	184	bps 184	bps 184	bps Decrease
RMBS	1,272	Discounted cash flows	Spread	62	bps 1,748	bps 232	bps Decrease
			Constant prepayment rate	—	% 10.0	% 3.0	% Decrease [4]
			Constant default rate	1.0	% 22.0	% 8.0	% Decrease
			Loss severity	—	% 100.0	% 80.0	% Decrease

[1] The weighted average is determined based on the fair value of the securities.

[2] Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in the table above.

[3] Level 3 corporate and municipal securities excludes those for which the Company bases fair value on broker quotations as discussed below.

[4] Decrease for above market rate coupons and increase for below market rate coupons.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Fair Value Measurements (continued)

Freestanding Derivatives	As of March 31, 2014					
	Fair Value	Predominant Valuation Method	Significant Unobservable Input	Minimum	Maximum	Impact of Increase in Input on Fair Value [1]
Interest rate derivative						
Interest rate swaptions	28	Option model	Interest rate volatility	3.0	% 4.0	% Decrease
U.S. GMWB hedging instruments						
Equity options	52	Option model	Equity volatility	20	% 30	% Increase
Customized swaps	71	Discounted cash flows	Equity volatility	10	% 50	% Increase
U.S. macro hedge program						
Equity options	133	Option model	Equity volatility	23	% 34	% Increase
International program hedging [2]						
Equity options	(32)	Option model	Equity volatility	28	% 36	% Increase
Long interest rate swaptions	61	Option model	Interest rate volatility	—	% 3	% Increase
		As of December 31, 2013				
Interest rate derivative						
Interest rate swaps	(24)	Discounted cash flows	Swap curve beyond 30 years	4.0	% 4.0	% Increase
Long interest rate swaptions	42	Option model	Interest rate volatility	1	% 1	% Increase
U.S. GMWB hedging instruments						
Equity options	72	Option model	Equity volatility	21	% 29	% Increase
Customized swaps	74	Discounted cash flows	Equity volatility	10	% 50	% Increase
U.S. macro hedge program						
Equity options	139	Option model	Equity volatility	24	% 31	% Increase
International program hedging [2]						
Equity options	(35)	Option model	Equity volatility	24	% 37	% Increase
Short interest rate swaptions	(13)	Option model	Interest rate volatility	—	% 1	% Decrease
Long interest rate swaptions	50	Option model	Interest rate volatility	1	% 1	% Increase

Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in [1] the table. Changes are based on long positions, unless otherwise noted. Changes in fair value will be inversely impacted for short positions.

[2] Level 3 international program hedging instruments excludes those for which the Company bases fair value on broker quotations.

Securities and derivatives for which the Company bases fair value on broker quotations predominately include ABS, CDOs, corporate, fixed maturities and FVO. Due to the lack of transparency in the process brokers use to develop prices for these investments, the Company does not have access to the significant unobservable inputs brokers use to price these securities and derivatives. The Company believes however, the types of inputs brokers may use would likely be similar to those used to price securities and derivatives for which inputs are available to the Company, and

therefore may include, but not be limited to, loss severity rates, constant prepayment rates, constant default rates and counterparty credit spreads. Therefore, similar to non broker priced securities and derivatives, generally, increases in these inputs would cause fair values to decrease. For the three months ended March 31, 2014, no significant adjustments were made by the Company to broker prices received.

As of March 31, 2014 and December 31, 2013, excluded from the tables above are limited partnerships and other alternative investments which total \$107 and \$108, respectively, of level 3 assets measured at fair value. The predominant valuation method uses a NAV calculated on a monthly basis and represents funds where the Company does not have the ability to redeem the investment in the near-term at that NAV, including an assessment of the investee's liquidity.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Fair Value Measurements (continued)

Product Derivatives

The Company formerly offered certain variable annuity products with GMWB riders in the U.S. and Japan. The GMWB provides the policyholder with a guaranteed remaining balance (“GRB”) which is generally equal to premiums less withdrawals. If the policyholder’s account value is reduced to the specified level through a combination of market declines and withdrawals but the GRB still has value, the Company is obligated to continue to make annuity payments to the policyholder until the GRB is exhausted. Certain contract provisions can increase the GRB at contractholder election or after the passage of time. The GMWB represents an embedded derivative in the variable annuity contract. When it is determined that (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host for measurement purposes. The embedded derivative is carried at fair value, with changes in fair value reported in net realized capital gains and losses. The Company’s GMWB liability is reported in other policyholder funds and benefits payable in the Condensed Consolidated Balance Sheets. The notional value of the embedded derivative is the GRB.

In valuing the embedded derivative, the Company attributes to the derivative a portion of the expected fees to be collected over the expected life of the contract from the contract holder equal to the present value of future GMWB claims (the “Attributed Fees”). The excess of fees collected from the contract holder in the current period over the current period’s Attributed Fees are associated with the host variable annuity contract and reported in fee income.

U.S. GMWB Reinsurance Derivative

The Company has reinsurance arrangements in place to transfer a portion of its risk of loss due to GMWB. These arrangements are recognized as derivatives and carried at fair value in reinsurance recoverables. Changes in the fair value of the reinsurance agreements are reported in net realized capital gains and losses.

The fair value of the U.S. GMWB reinsurance derivative is calculated as an aggregation of the components described in the Living Benefits Required to be Fair Valued discussion below and is modeled using significant unobservable policyholder behavior inputs, identical to those used in calculating the underlying liability, such as lapses, fund selection, resets and withdrawal utilization and risk margins.

Living Benefits Required to be Fair Valued (in Other Policyholder Funds and Benefits Payable)

Living benefits required to be fair valued include U.S. GMWB, international GMWB and international other guaranteed living benefits.

Fair values for GMWB and guaranteed minimum accumulation benefit (“GMAB”) contracts are calculated using the income approach based upon internally developed models because active, observable markets do not exist for those items. The fair value of the Company’s guaranteed benefit liabilities, classified as embedded derivatives, and the related reinsurance and customized freestanding derivatives are calculated as an aggregation of the following components: Best Estimate Claim Payments; Credit Standing Adjustment; and Margins. The resulting aggregation is reconciled or calibrated, if necessary, to market information that is, or may be, available to the Company, but may not be observable by other market participants, including reinsurance discussions and transactions. The Company believes the aggregation of these components, as necessary and as reconciled or calibrated to the market information available to the Company, results in an amount that the Company would be required to transfer or receive, for an asset, to or from market participants in an active liquid market, if one existed, for those market participants to assume the risks associated with the guaranteed minimum benefits and the related reinsurance and customized derivatives. The fair value is likely to materially diverge from the ultimate settlement of the liability as the Company believes settlement will be based on our best estimate assumptions rather than those best estimate assumptions plus risk margins. In the absence of any transfer of the guaranteed benefit liability to a third party, the release of risk margins is likely to be reflected as realized gains in future periods’ net income. Each component described below is unobservable in the marketplace and requires judgment by the Company in determining their value.

Oversight of the Company’s valuation policies and processes for product and U.S. GMWB reinsurance derivatives is performed by a multidisciplinary group comprised of finance, actuarial and risk management professionals. This

multidisciplinary group reviews and approves changes and enhancements to the Company's valuation model as well as associated controls.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Fair Value Measurements (continued)

Best Estimate

Claim Payments

The Best Estimate Claim Payments are calculated based on actuarial and capital market assumptions related to projected cash flows, including the present value of benefits and related contract charges, over the lives of the contracts, incorporating expectations concerning policyholder behavior such as lapses, fund selection, resets and withdrawal utilization. For the customized derivatives, policyholder behavior is prescribed in the derivative contract. Because of the dynamic and complex nature of these cash flows, best estimate assumptions and a Monte Carlo stochastic process is used in valuation. The Monte Carlo stochastic process involves the generation of thousands of scenarios that assume risk neutral returns consistent with swap rates and a blend of observable implied index volatility levels. Estimating these cash flows involves numerous estimates and subjective judgments regarding a number of variables –including expected market rates of return, market volatility, correlations of market index returns to funds, fund performance, discount rates and assumptions about policyholder behavior which emerge over time.

At each valuation date, the Company assumes expected returns based on:

- risk-free rates as represented by the Eurodollar futures, LIBOR deposits and swap rates to derive forward curve rates;
- market implied volatility assumptions for each underlying index based primarily on a blend of observed market “implied volatility” data;
- correlations of historical returns across underlying well known market indices based on actual observed returns over the ten years preceding the valuation date; and
- three years of history for fund indexes compared to separate account fund regression.

On a daily basis, the Company updates capital market assumptions used in the GMWB liability model such as interest rates, equity indices and the blend of implied equity index volatilities. The Company monitors various aspects of policyholder behavior and may modify certain of its assumptions, including living benefit lapses and withdrawal rates, if credible emerging data indicates that changes are warranted. The Company continually monitors policyholder behavior assumptions in response to initiatives intended to reduce the size of the variable annuity business. At a minimum, all policyholder behavior assumptions are reviewed and updated, as appropriate, in conjunction with the completion of the Company’s comprehensive study to refine its estimate of future gross profits during the third quarter of each year.

Credit Standing Adjustment

This assumption makes an adjustment that market participants would make, in determining fair value, to reflect the risk that guaranteed benefit obligations or the GMWB reinsurance recoverables will not be fulfilled (commonly referred to as “nonperformance risk”). The Company incorporates a blend of observable Company and reinsurer credit default spreads from capital markets, adjusted for market recoverability. The credit standing adjustment assumption, net of reinsurance, resulted in pre-tax realized gains/(losses) of \$(1) and \$(10), for the three months ended March 31, 2014 and 2013. As of March 31, 2014 and December 31, 2013 the credit standing adjustment was \$(2) and \$(1), respectively.

Margins

The behavior risk margin adds a margin that market participants would require, in determining fair value, for the risk that the Company’s assumptions about policyholder behavior could differ from actual experience. The behavior risk margin is calculated by taking the difference between adverse policyholder behavior assumptions and best estimate assumptions.

Assumption updates, including policyholder behavior assumptions, affected best estimates and margins for total pre-tax realized gains of \$0 and \$1 for the three months ended March 31, 2014 and 2013. As of March 31, 2014 and December 31, 2013 the behavior risk margin was \$101 and \$108, respectively.

In addition to the non-market-based updates described above, the Company recognized non-market-based updates driven by the relative outperformance (underperformance) of the underlying actively managed funds as compared to their respective indices resulting in pre-tax realized gains/(losses) of approximately \$14 and \$8, for the three months

ended March 31, 2014 and 2013, respectively.

28

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Fair Value Measurements (continued)

Significant unobservable inputs used in the fair value measurement of living benefits required to be fair valued and the U.S. GMWB reinsurance derivative are withdrawal utilization and withdrawal rates, lapse rates, reset elections and equity volatility. The following table provides quantitative information about the significant unobservable inputs and is applicable to all of the Living Benefits Required to be Fair Valued and the U.S. GMWB Reinsurance Derivative. Significant increases in any of the significant unobservable inputs, in isolation, will generally have an increase or decrease correlation with the fair value measurement, as shown in the table.

Significant Unobservable Input	Unobservable Inputs (Minimum)	Unobservable Inputs (Maximum)	Impact of Increase in Input on Fair Value Measurement [1]
Withdrawal Utilization[2]	20%	100%	Increase
Withdrawal Rates [2]	—%	8%	Increase
Lapse Rates [3]	—%	75%	Decrease
Reset Elections [4]	20%	75%	Increase
Equity Volatility [5]	10%	50%	Increase

[1] Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in the table.

[2] Ranges represent assumed cumulative percentages of policyholders taking withdrawals and the annual amounts withdrawn.

[3] Range represents assumed annual percentages of full surrender of the underlying variable annuity contracts across all policy durations for in force business.

[4] Range represents assumed cumulative percentages of policyholders that would elect to reset their guaranteed benefit base.

[5] Range represents implied market volatilities for equity indices based on multiple pricing sources.

Generally, a change in withdrawal utilization assumptions would be accompanied by a directionally opposite change in lapse rate assumptions, as the behavior of policyholders that utilize GMWB or GMAB riders is typically different from policyholders that do not utilize these riders.

Separate Account Assets

Separate account assets are primarily invested in mutual funds. Other separate account assets include fixed maturities, limited partnerships, equity securities, short-term investments and derivatives that are valued in the same manner, and using the same pricing sources and inputs, as those investments held by the Company. Separate account assets classified as Level 3 primarily include limited partnerships in which fair value represents the separate account's share of the fair value of the equity in the investment ("net asset value") and are classified in level 3 based on the Company's ability to redeem its investment.

Assets and Liabilities Measured at Fair Value on a Recurring Basis Using Significant Unobservable Inputs (Level 3)

The tables below provide fair value roll-forwards for the three months ended March 31, 2014 and 2013, for the financial instruments classified as Level 3.

[7]

The Company classifies gains and losses on GMWB reinsurance derivatives and Guaranteed Living Benefit embedded derivatives as unrealized gains (losses) for purposes of disclosure in this table because it is impracticable to track on a contract-by-contract basis the realized gains (losses) for these derivatives and embedded derivatives.

All amounts in these rows are reported in net realized capital gains/(losses). The realized/unrealized gains (losses) included in net income for separate account assets are offset by an equal amount for separate account liabilities, which results in a net zero impact on net income for the Company. All amounts are before income taxes and amortization DAC.

[3] All amounts are before income taxes and amortization of DAC.

[4] Transfers in and/or (out) of Level 3 are primarily attributable to the availability of market observable information and the re-evaluation of the observability of pricing inputs.

[5] Derivative instruments are reported in this table on a net basis for asset/(liability) positions and reported in the Condensed Consolidated Balance Sheet in other investments and other liabilities.

[6] Includes both market and non-market impacts in deriving realized and unrealized gains (losses).

[7] Amounts presented are for Level 3 only and therefore may not agree to other disclosures included herein.

5. Fair Value Measurements (continued)

Fair Value Option

The Company holds fair value option investments in foreign government securities that align with the accounting for yen-based fixed annuity liabilities, which are adjusted for changes in foreign-exchange spot rates through realized gains and losses. Also included are securities that contain an embedded credit derivative with underlying credit risk primarily related to corporate bonds and commercial real estate. Income earned from FVO securities is recorded in net investment income and changes in fair value are recorded in net realized capital gains and losses.

The Company also elected the fair value option for certain investments held within consolidated VIE investment funds. The Company elected the fair value option in order to report investments of consolidated investment companies at fair value with changes in the fair value of these securities recognized in net realized capital gains and losses, which is consistent with accounting requirements for investment companies. The investment funds hold fixed income securities and the Company has management and control of the funds as well as a significant ownership interest. The following table presents the changes in fair value of those assets and liabilities accounted for using the fair value option reported in net realized capital gains and losses in the Company's Condensed Consolidated Statements of Operations.

	Three Months Ended March 31,

Financial Instruments Not Carried at Fair Value

The following table presents carrying amounts and fair values of the Company's financial instruments not carried at fair value and not included in the above fair value discussion.

	Fair Value Hierarchy Level	March 31, 2014		December 31, 2013	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets					
Policy loans	Level 3	\$1,429	\$1,478	\$1,420	\$1,480
Mortgage loans	Level 3	5,707	5,786	5,598	5,641
Liabilities					
Other policyholder funds and benefits payable [1]	Level 3	\$8,968	\$9,218	\$9,152	\$9,352
Senior notes [2]	Level 2	5,007	5,770	5,206	5,845
Junior subordinated debentures [2]	Level 2	1,100	1,298	1,100	1,271
Revolving Credit Facility	Level 2	243	243	238	238
Consumer notes [3]	Level 3	78	76	82	82

[1] Excludes guarantees on variable annuities, group accident and health and universal life insurance contracts, including corporate owned life insurance.

[2] Included in long-term debt in the Condensed Consolidated Balance Sheets, except for current maturities, which are included in short-term debt.

[3] Excludes amounts carried at fair value and included in disclosures above.

The Company has not made any changes in its valuation methodologies for the following assets and liabilities since December 31, 2013.

Fair value for policy loans and consumer notes were estimated using discounted cash flow calculations using current interest rates adjusted for estimated loan durations.

Fair values for mortgage loans were estimated using discounted cash flow calculations based on current lending rates for similar type loans. Current lending rates reflect changes in credit spreads and the remaining terms of the loans.

Fair values for other policyholder funds and benefits payable, not carried at fair value, are estimated based on the cash surrender values of the underlying policies or by estimating future cash flows discounted at current interest rates adjusted for credit risk.

Fair values for senior notes and junior subordinated debentures are determined using the market approach based on reported trades, benchmark interest rates and issuer spread for the Company which may consider credit default swaps.

Total results of variable annuity hedge program	(27)	(209)
Other, net [4]	(80)	204
Net realized capital gains (losses)	\$(86)	\$1,606

[1] Includes \$1.5 billion of gains relating to the sales of the Retirement Plans and Individual Life businesses for the three months ended March 31, 2013.

[2] Includes for the three months ended March 31, 2014 and 2013, transactional foreign currency re-valuation related to the Japan fixed annuity product of \$(30) and \$151, respectively, as well as the change in value related to the derivative hedging instruments and the Japan government FVO securities of \$21 and \$(148), respectively.

[3] Includes \$6 and (34) of transactional foreign currency re-valuation for the three months ended March 31, 2014 and 2013, respectively.

[4] For the three months ended March 31, 2014 and 2013, other, net gains and losses includes \$(11) and \$134, respectively, of transactional foreign currency re-valuation associated with the internal reinsurance of the Japan GMIB variable annuity business, which is offset in AOCI. Also includes for the three months ended March 31, 2014 and 2013, \$(28) and \$116, respectively, of other transactional foreign currency revaluation, primarily associated with the internal reinsurance of the Japan 3 wins variable annuity business, of which a portion is offset within realized gains and losses by the change in value of the associated hedging derivatives. Includes \$71 of gains relating to the sales of the Retirement Plans and Individual Life businesses for the three months ended March 31, 2013.

Net realized capital gains and losses from investment sales are reported as a component of revenues and are determined on a specific identification basis. Before tax, net gains and losses on sales and impairments previously reported as unrealized gains in AOCI were \$28 and \$1.6 billion, respectively, for the three months ended March 31, 2014 and 2013. Proceeds from sales of AFS securities totaled \$8.6 billion and \$8.7 billion, respectively, for the three months ended March 31, 2014 and 2013.

Other-Than-Temporary Impairment Losses

[1] Represents the amount of cumulative non-credit OTTI losses recognized in OCI on securities that also had credit impairments. These losses are included in gross unrealized losses as of March 31, 2014 and December 31, 2013.

[2] Gross unrealized gains (losses) exclude the change in fair value of bifurcated embedded derivative features of certain securities. Subsequent changes in fair value will be recorded in net realized capital gains (losses).

The following table presents the Company's fixed maturities, AFS, by contractual maturity year.

Contractual Maturity	March 31, 2014	
	Amortized Cost	Fair Value
One year or less	\$2,580	\$2,618
Over one year through five years	11,931	12,526
Over five years through ten years	10,294	10,770
Over ten years	22,107	23,655
Subtotal	46,912	49,569
Mortgage-backed and asset-backed securities	13,543	13,770
Total fixed maturities, AFS	\$60,455	\$63,339

Estimated maturities may differ from contractual maturities due to security call or prepayment provisions. Due to the potential for variability in payment speeds (i.e. prepayments or extensions), mortgage-backed and asset-backed securities are not categorized by contractual maturity.

[1] Unrealized losses exclude the change in fair value of bifurcated embedded derivative features of certain securities.

Changes in fair value are recorded in net realized capital gains (losses).

As of March 31, 2014, AFS securities in an unrealized loss position, consisted of 2,713 securities, primarily related to corporate securities, municipal securities, and foreign government and government agencies, which are depressed primarily due to an increase in interest rates since the securities were purchased and/or declines in the value of the currency in which the assets are denominated. As of March 31, 2014, 94% of these securities were depressed less than 20% of cost or amortized cost. The decrease in unrealized losses during 2014 was primarily attributable to a decrease in interest rates and tighter credit spreads.

38

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

Most of the securities depressed for twelve months or more relate to certain floating rate corporate securities with greater than 10 years to maturity concentrated in the financial services sector, foreign government and government agencies, and structured securities with exposure to commercial and residential real estate. Corporate financial services securities are primarily depressed because the securities have floating-rate coupons and/or long-dated maturities. Unrealized losses on foreign government securities are primarily due to depreciation of the Japanese yen in relation to the U.S. dollar. Although credit spreads have continued to tighten over the past five years, current market spreads continue to be wider than spreads at the securities' respective purchase dates for structured securities with exposure to commercial and residential real estate largely due to reduced liquidity as a result of economic and market uncertainties regarding future performance of certain commercial and residential real estate backed securities. The majority of these securities have a floating-rate coupon referenced to a market index that has declined substantially. In addition, equity securities include investment grade perpetual preferred securities that contain "debt-like" characteristics where the decline in fair value is not attributable to issuer-specific credit deterioration, none of which have, nor are expected to, miss a periodic dividend payment. These securities have been depressed due to the securities' floating-rate coupon in the current low interest rate environment, general market credit spread widening since the date of purchase and the long-dated nature of the securities. The Company neither has an intention to sell nor does it expect to be required to sell the securities outlined above.

Mortgage Loans

	March 31, 2014			December 31, 2013		
	Amortized Cost [1]	Valuation Allowance	Carrying Value	Amortized Cost [1]	Valuation Allowance	Carrying Value
Total commercial mortgage loans	\$5,724	\$(17)	\$5,707	\$5,665	\$(67)	\$5,598

[1] Amortized cost represents carrying value prior to valuation allowances, if any.

As of March 31, 2014 and December 31, 2013, the carrying value of mortgage loans associated with the valuation allowance was \$198 and \$191, respectively. Included in the table above are mortgage loans held-for-sale with a carrying value and valuation allowance of \$48 and \$1, respectively, as of March 31, 2014 and \$61 and \$3, respectively, as of December 31, 2013. The carrying value of these loans is included in mortgage loans in the Company's Condensed Consolidated Balance Sheets. As of March 31, 2014, loans within the Company's mortgage loan portfolio that have had extensions or restructurings other than what is allowable under the original terms of the contract are immaterial.

The following table presents the activity within the Company's valuation allowance for mortgage loans. These loans have been evaluated both individually and collectively for impairment. Loans evaluated collectively for impairment are immaterial.

	2014	2013
Balance, as of January 1	\$(67)	\$(68)
(Additions)/Reversals	—	(2)
Deductions	50	2
Balance, as of March 31	\$(17)	\$(68)

The decline in the valuation allowance as compared to December 31, 2013 resulted from the sale of the underlying collateral supporting a commercial mortgage loan. The loan was fully reserved for and the Company did not recover any funds as a result of the sale.

The weighted-average LTV ratio of the Company's commercial mortgage loan portfolio was 58% as of March 31, 2014, while the weighted-average LTV ratio at origination of these loans was 63%. LTV ratios compare the loan amount to the value of the underlying property collateralizing the loan. The loan values are updated no less than annually through property level reviews of the portfolio. Factors considered in the property valuation include, but are not limited to, actual and expected property cash flows, geographic market data and capitalization rates. DSCR

compare a property's net operating income to the borrower's principal and interest payments. The weighted average DSCR of the Company's commercial mortgage loan portfolio was 2.35x as of March 31, 2014. The Company held no delinquent commercial mortgage loans as of March 31, 2014.

Variable Interest Entities

The Company is involved with various special purpose entities and other entities that are deemed to be VIEs primarily as a collateral or investment manager and as an investor through normal investment activities, as well as a means of accessing capital through a contingent capital facility. For further information on the contingent capital facility, see Note 15 - Debt of Notes to Condensed Consolidated Financial Statements.

A VIE is an entity that either has investors that lack certain essential characteristics of a controlling financial interest or lacks sufficient funds to finance its own activities without financial support provided by other entities.

40

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

The Company performs ongoing qualitative assessments of its VIEs to determine whether the Company has a controlling financial interest in the VIE and therefore is the primary beneficiary. The Company is deemed to have a controlling financial interest when it has both the ability to direct the activities that most significantly impact the economic performance of the VIE and the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE. Based on the Company's assessment, if it determines it is the primary beneficiary, the Company consolidates the VIE in the Company's Condensed Consolidated Financial Statements.

Consolidated VIEs
The following table presents the carrying value of assets and liabilities, and the maximum exposure to loss relating to the VIEs for which the Company is the primary beneficiary. Creditors have no recourse against the Company in the event of default by these VIEs nor does the Company have any implied or unfunded commitments to these VIEs. The Company's financial or other support provided to these VIEs is limited to its collateral or investment management services and original investment.

	March 31, 2014			December 31, 2013		
	Total Assets	Total Liabilities [1]	Maximum Exposure to Loss [2]	Total Assets	Total Liabilities [1]	Maximum Exposure to Loss [2]
CDOs [3]	\$18	\$20	\$—	\$31	\$33	\$—
Investment funds [4]	167	—	175	164	—	173
Limited partnerships	3	—	3	4	—	4
Total	\$188	\$20	\$178	\$199	\$33	\$177

[1] Included in other liabilities in the Company's Condensed Consolidated Balance Sheets.

[2] The maximum exposure to loss represents the maximum loss amount that the Company could recognize as a reduction in net investment income or as a realized capital loss and is the cost basis of the Company's investment.

[3] Total assets included in fixed maturities, AFS, in the Company's Condensed Consolidated Balance Sheets.

[4] Total assets included in fixed maturities, FVO, short-term investments, and equity, AFS in the Company's Condensed Consolidated Balance Sheets.

CDOs represent structured investment vehicles for which the Company has a controlling financial interest as it provides collateral management services, earns a fee for those services and also holds investments in the securities issued by these vehicles. Investment funds represent wholly-owned fixed income funds for which the Company has management and control of the investments which is the activity that most significantly impacts its economic performance. Limited partnerships represent one hedge fund of funds for which the Company holds a majority interest in the fund as an investment.

Non-Consolidated VIEs

The Company holds a significant variable interest for one VIE for which it is not the primary beneficiary and, therefore, was not consolidated on the Company's Condensed Consolidated Balance Sheets. This VIE represents a contingent capital facility that has been held by the Company since February 2007 for which the Company has no implied or unfunded commitments. Assets and liabilities recorded for the contingent capital facility were \$16 and \$16, respectively as of March 31, 2014 and \$17 and \$19, respectively, as of December 31, 2013. Additionally, the Company has a maximum exposure to loss of \$3 and \$3, respectively, as of March 31, 2014 and December 31, 2013, which represents the issuance costs that were incurred to establish the facility. The Company does not have a controlling financial interest as it does not manage the assets of the facility nor does it have the obligation to absorb losses or the right to receive benefits that could potentially be significant to the facility, as the asset manager has significant variable interest in the vehicle. The Company's financial or other support provided to the facility is limited to providing ongoing support to cover the facility's operating expenses. For further information on the facility, see Note 15 of Notes to Condensed Consolidated Financial Statements included in The Hartford's 2013 Form 10-K Annual Report.

In addition, the Company, through normal investment activities, makes passive investments in structured securities issued by VIEs for which the Company is not the manager which are included in ABS, CDOs, CMBS and RMBS in the Available-for-Sale Securities table and fixed maturities, FVO, in the Company's Condensed Consolidated Balance Sheets. The Company has not provided financial or other support with respect to these investments other than its original investment. For these investments, the Company determined it is not the primary beneficiary due to the relative size of the Company's investment in comparison to the principal amount of the structured securities issued by the VIEs, the level of credit subordination which reduces the Company's obligation to absorb losses or right to receive benefits and the Company's inability to direct the activities that most significantly impact the economic performance of the VIEs. The Company's maximum exposure to loss on these investments is limited to the amount of the Company's investment.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

Repurchase Agreements and Dollar Roll Agreements and Other Collateral Transactions

The Company enters into repurchase agreements and dollar roll transactions to manage liquidity or to earn incremental spread income. A repurchase agreement is a transaction in which one party (transferor) agrees to sell securities to another party (transferee) in return for cash (or securities), with a simultaneous agreement to repurchase the same securities at a specified price at a later date. A dollar roll is a type of repurchase agreement where a mortgage backed security is sold with an agreement to repurchase substantially the same security at a specified time in the future. These transactions are generally short-term in nature, and therefore, the carrying amounts of these instruments approximate fair value.

As part of repurchase agreements and dollar roll transactions, the Company transfers collateral of U.S. government and government agency securities and receives cash. For the repurchase agreements, the Company obtains cash in an amount equal to at least 95% of the fair value of the securities transferred. The agreements contain contractual provisions that require additional collateral to be transferred when necessary and provide the counterparty the right to sell or re-pledge the securities transferred. The cash received from the repurchase program is typically invested in short-term investments or fixed maturities. Repurchase agreements include master netting provisions that provide the counterparties the right to offset claims and apply securities held by them in respect of their obligations in the event of a default. Although the Company has the contractual right to offset claims, fixed maturities do not meet the specific conditions for net presentation under U.S. GAAP. The Company accounts for the repurchase agreements and dollar roll transactions as collateralized borrowings. The securities transferred under repurchase agreements and dollar roll transactions are included in fixed maturities, AFS with the obligation to repurchase those securities recorded in other liabilities on the Company's Condensed Consolidated Balance Sheets.

As of March 31, 2014, the Company reported financial collateral pledged relating to repurchase agreements of \$50 in fixed maturities, AFS on the Condensed Consolidated Balance sheets. The Company reported a corresponding obligation to repurchase these securities of \$50 in other liabilities on the Condensed Consolidated Balance sheets.

With respect to dollar roll transactions, the Company reported financial collateral pledged with a fair value of \$97 in fixed maturities, AFS with a corresponding obligation to repurchase \$97 reported in other liabilities, as of March 31, 2014. The Company had no outstanding repurchase agreements or dollar roll transactions as of December 31, 2013. The Company is required by law to deposit securities with government agencies in states where it conducts business. As of March 31, 2014 and December 31, 2013, the fair value of securities on deposit was approximately \$2.4 billion and \$1.9 billion, respectively.

As of March 31, 2014 and December 31, 2013, the Company has pledged as collateral \$282 and \$272, respectively, in Japan government bonds reported in fixed maturities, AFS, associated with short-term debt of \$243 and \$238, respectively.

As of March 31, 2014 and December 31, 2013, the Company has pledged as collateral \$34 and \$34, respectively, of U.S. government securities and government agency securities or cash for letters of credit.

Refer to Derivative Collateral Arrangements section of this note for disclosure of collateral in support of derivative transactions.

Derivative Instruments

The Company utilizes a variety of OTC, OTC-cleared and exchange traded derivative instruments as a part of its overall risk management strategy as well as to enter into replication transactions. Derivative instruments are used to manage risk associated with interest rate, equity market, credit spread, issuer default, price, and currency exchange rate risk or volatility. Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that would be permissible investments under the Company's investment policies. The Company also may enter into and has previously issued financial instruments and products that either are accounted for as free-standing derivatives, such as certain reinsurance contracts, or may contain features that are deemed to be embedded derivative instruments, such as the GMWB rider included with certain variable annuity products.

Strategies that qualify for hedge accounting

Certain derivatives that the Company enters into satisfy the hedge accounting requirements as outlined in Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements, included in The Hartford's 2013 Form 10-K Annual Report. Typically, these hedge relationships include interest rate and foreign currency swaps where the terms or expected cash flows of the hedged item closely match the terms of the swap. The swaps are typically used to manage interest rate duration of certain fixed maturity securities or liability contracts. The Company also formerly entered into swaps to convert securities or liabilities denominated in a foreign currency to U.S. dollars. The hedge strategies by hedge accounting designation include:

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

Cash flow hedges

Interest rate swaps are predominantly used to manage portfolio duration and better match cash receipts from assets with cash disbursements required to fund liabilities. These derivatives primarily convert interest receipts on floating-rate fixed maturity securities to fixed rates. The Company also enters into forward starting swap agreements primarily to hedge interest rate risk inherent in the assumptions used to price certain liabilities.

Foreign currency swaps are used to convert foreign currency-denominated cash flows related to certain investment receipts and liability payments to U.S. dollars in order to reduce cash flow fluctuations due to changes in currency rates.

Fair value hedges

Interest rate swaps are used to hedge the changes in fair value of fixed maturity securities due to fluctuations in interest rates. Foreign currency swaps were formally used to hedge the changes in fair value of certain foreign currency-denominated fixed rate liabilities due to changes in foreign currency rates by swapping the fixed foreign payments to floating rate U.S. dollar denominated payments.

Non-qualifying strategies

Derivative relationships that do not qualify for hedge accounting ("non-qualifying strategies") primarily include the hedge programs for the Company's U.S. and international variable annuity products as well as the hedging and replication strategies that utilize credit default swaps. In addition, hedges of interest rate and foreign currency risk of certain fixed maturities and liabilities do not qualify for hedge accounting. The non-qualifying strategies include:

Interest rate swaps, swaptions and futures

The Company uses interest rate swaps, swaptions and futures to manage duration between assets and liabilities in certain investment portfolios. In addition, the Company enters into interest rate swaps to terminate existing swaps, thereby offsetting the changes in value of the original swap. As of March 31, 2014 and December 31, 2013 the notional amount of interest rate swaps in offsetting relationships was \$6.9 billion.

Foreign currency swaps and forwards

The Company enters into foreign currency swaps and forwards to convert the foreign currency exposures of certain foreign currency-denominated fixed maturity investments to U.S. dollars.

Japan 3Win foreign currency swaps

The Company formerly offered certain variable annuity products with a guaranteed minimum income benefit ("GMIB") rider through a wholly-owned Japanese subsidiary. The GMIB rider is reinsured to a wholly-owned U.S. subsidiary which invests in U.S. dollar denominated assets to support the liability. The U.S. subsidiary entered into pay U.S. dollar, receive yen swap contracts to hedge the currency and yen interest rate exposure between the U.S. dollar denominated assets and the yen denominated fixed liability reinsurance payments.

Japanese fixed annuity hedging instruments

The Company formerly offered a yen denominated fixed annuity product through a wholly-owned Japanese subsidiary and reinsured to a wholly-owned U.S. subsidiary. The U.S. subsidiary invests in U.S. dollar denominated securities to support the yen denominated fixed liability payments and entered into currency rate swaps to hedge the foreign currency exchange rate and yen interest rate exposures that exist as a result of U.S. dollar assets backing the yen denominated liability.

Credit contracts

Credit default swaps are used to purchase credit protection on an individual entity or referenced index to economically hedge against default risk and credit-related changes in value on fixed maturity securities. Credit default swaps are also used to assume credit risk related to an individual entity or referenced index as a part of replication transactions. These contracts require the Company to pay or receive a periodic fee in exchange for compensation from the counterparty should the referenced security issuers experience a credit event, as defined in the contract. The Company is also exposed to credit risk related to credit derivatives embedded within certain fixed maturity securities. These securities are primarily comprised of structured securities that contain credit derivatives that reference a standard

index of corporate securities. In addition, the Company enters into credit default swaps to terminate existing credit default swaps, thereby offsetting the changes in value of the original swap going forward.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

Equity index swaps and options

The Company formerly offered certain equity indexed products which may contain an embedded derivative that requires bifurcation. The Company has entered into equity index swaps and options to economically hedge the equity volatility risk associated with these embedded derivatives. The Company also enters into equity index options and futures with the purpose of hedging the impact of an adverse equity market environment on the investment portfolio.

U.S. GMWB derivatives, net

The Company formerly offered certain variable annuity products with GMWB riders in the U.S. The GMWB product is a bifurcated embedded derivative ("U.S. GMWB product derivatives") that has a notional value equal to the guaranteed remaining balance ("GRB"). The Company uses reinsurance contracts to transfer a portion of its risk of loss due to U.S GMWB. The reinsurance contracts covering U.S. GMWB ("U.S. GMWB reinsurance contracts") are accounted for as free-standing derivatives with a notional amount equal to the GRB amount.

The Company utilizes derivatives ("U.S. GMWB hedging instruments") as part of an actively managed program designed to hedge a portion of the capital market risk exposures of the non-reinsured GMWB riders due to changes in interest rates, equity market levels, and equity volatility. These derivatives include customized swaps, interest rate swaps and futures, and equity swaps, options and futures, on certain indices including the S&P 500 index, EAFE index and NASDAQ index. The following table presents notional and fair value for U.S. GMWB hedging instruments.

	Notional Amount		Fair Value	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Customized swaps	\$7,561	\$ 7,839	\$71	\$ 74
Equity swaps, options, and futures	3,888	4,237	32	44
Interest rate swaps and futures	3,975	6,615	(2)(77
Total	\$15,424	\$ 18,691	\$101	\$ 41

U.S. macro hedge program

The Company utilizes equity options and swaps to partially hedge against a decline in the equity markets and the resulting statutory surplus and capital impact primarily arising from GMDB and GMWB obligations. The following table presents notional and fair value for the U.S. macro hedge program.

	Notional Amount		Fair Value	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Equity options and swaps	7,596	9,934	133	139
Total	\$7,596	\$ 9,934	\$133	\$ 139

International program

The Company formerly offered certain variable annuity products in Japan with GMWB or GMAB riders, which are bifurcated embedded derivatives ("International program product derivatives"). The GMWB provides the policyholder with a guaranteed remaining balance ("GRB") which is generally equal to premiums less withdrawals. If the policyholder's account value is reduced to the specified level through a combination of market declines and withdrawals but the GRB still has value, the Company is obligated to continue to make annuity payments to the policyholder until the GRB is exhausted. The GMAB provides the policyholder with their initial deposit in a lump sum after a specified waiting period. The notional amount of the International program product derivatives are the foreign currency denominated GRBs converted to U.S. dollars at the current foreign spot exchange rate as of the reporting period date.

The Company enters into derivative contracts ("International program hedging instruments") to hedge a portion of the capital market risk exposures associated with the guaranteed benefits associated with the international variable annuity contracts. The hedging derivatives are comprised of equity futures, options, swaps and currency forwards and options

to hedge against a decline in the debt and equity markets or changes in foreign currency exchange rates and the resulting statutory surplus and capital impact primarily arising from guaranteed minimum death benefits ("GMDB"), GMIB and GMWB obligations issued in Japan. The Company also enters into foreign currency denominated interest rate swaps and swaptions to hedge the interest rate exposure related to the potential annuitization of certain benefit obligations.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

The following table presents notional and fair value for the international program hedging instruments.

	Notional Amount		Fair Value	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Credit derivatives	\$350	\$350	\$—	\$5
Currency forwards [1]	15,474	13,410	44	(60)
Currency options	5,432	12,066	(12)(54)
Equity futures	473	999	—	—
Equity options	2,912	3,051	(30)(30)
Equity swaps	2,120	4,269	(50)(119)
Interest rate futures	551	952	—	—
Interest rate swaps and swaptions	34,216	37,951	146	225
Total	\$61,528	\$73,048	\$98	\$(33)

As of March 31, 2014 and December 31, 2013 net notional amounts are \$(0.9) billion and \$(1.8) billion, [1] respectively, which include \$7.3 billion and \$5.8 billion, respectively, related to long positions and \$8.2 billion and \$7.6 billion, respectively, related to short positions.

Contingent capital facility put option

The Company entered into a put option agreement that provides the Company the right to require a third-party trust to purchase, at any time, The Hartford's junior subordinated notes in a maximum aggregate principal amount of \$500. Under the put option agreement, The Hartford will pay premiums on a periodic basis and will reimburse the trust for certain fees and ordinary expenses.

Modified coinsurance reinsurance contracts

As of March 31, 2014 and December 31, 2013 the Company had approximately \$1.3 billion of invested assets supporting other policyholder funds and benefits payable reinsured under a modified coinsurance arrangement in connection with the sale of the Individual Life business structured as a reinsurance transaction. The assets are primarily held in a trust established by the Company. The Company pays or receives cash quarterly to settle the results of the reinsured business, including the investment results. As a result of this modified coinsurance arrangement, the Company has an embedded derivative that transfers to the reinsurer certain unrealized changes in fair value due to interest rate and credit risks of these assets. The notional amounts of the reinsurance contracts are the invested assets that are carried at fair value supporting the reinsured reserves.

Derivative Balance Sheet Classification

The following table summarizes the balance sheet classification of the Company's derivative related fair value amounts as well as the gross asset and liability fair value amounts. For reporting purposes, the Company has elected to offset the fair value amounts, income accruals, and related cash collateral receivables and payables of OTC derivative instruments executed in a legal entity and with the same counterparty under a master netting agreement, which provides the Company with the legal right of offset. The Company has also elected to offset the fair value amounts, income accruals and related cash collateral receivables and payables of OTC-cleared derivative instruments based on clearing house agreements. The fair value amounts presented below do not include income accruals or related cash collateral receivables and payables, which are netted with derivative fair value amounts to determine balance sheet presentation. Derivative fair value reported as liabilities after taking into account the master netting agreements, is \$0.9 billion and \$1.3 billion as of March 31, 2014, and December 31, 2013, respectively. Derivatives in the Company's separate accounts, where the associated gains and losses accrue directly to policyholders, are not included. The Company's derivative instruments are held for risk management purposes, unless otherwise noted in the following table. The notional amount of derivative contracts represents the basis upon which pay or receive amounts are calculated and is presented in the table to quantify the volume of the Company's derivative activity. Notional amounts are not necessarily reflective of credit risk. The tables below exclude investments that contain an embedded credit

derivative for which the Company has elected the fair value option. For further discussion, see the Fair Value Option section in Note 5 - Fair Value Measurements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

Change in Notional Amount

The net decrease in notional amount of derivatives since December 31, 2013 was primarily due to the following:

The decrease in notional amount related to the international program hedging instruments resulted from a reduction in the liability position due to continued elevated surrender and withdrawal rates as well as portfolio re-balancing including the termination of offsetting positions and the expiration of certain out-of-the-money options.

The decrease in notional amount related to the U.S. GMWB hedging instruments was primarily driven by the expiration of certain out-of-the-money options.

These declines in notional amount were partially offset by an increase in notional amount related to non-qualifying interest rate swaps and futures related to duration shortening positions.

Change in Fair Value

The net increase in the total fair value of derivative instruments since December 31, 2013 was primarily related to the following:

The fair value associated with the international program hedging instruments increased primarily from re-balancing of the portfolio, partially offset by a decrease in volatility and interest rates.

The fair value related to the combined U.S. GMWB hedging program, which includes the GMWB product, reinsurance, and hedging derivatives, was primarily driven by outperformance of underlying actively managed funds compared to their respective indices.

Offsetting of Derivative Assets/Liabilities

The following tables present the gross fair value amounts, the amounts offset, and net position of derivative instruments eligible for

offset in the Company's Condensed Consolidated Balance Sheets. Amounts offset include fair value amounts, income accruals and related cash collateral receivables and payables associated with derivative instruments that are traded under a common master netting agreement, as described above. Also included in the tables are financial collateral receivables and payables, which are contractually permitted to be offset upon an event of default, although are disallowed for offsetting under U.S. GAAP.

As of March 31, 2014

[2] Included in other assets in the Company's Condensed Consolidated Balance Sheets and is limited to the net derivative receivable associated with each counterparty.

[3] Included in other liabilities in the Company's Condensed Consolidated Balance Sheets and is limited to the net derivative payable associated with each counterparty.

[4] Excludes collateral associated with exchange-traded derivative instruments.

Cash Flow Hedges

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of OCI and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing hedge ineffectiveness are recognized in current period earnings. All components of each derivative's gain or loss were included in the assessment of hedge effectiveness.

The following table presents the components of the gain or loss on derivatives that qualify as cash flow hedges:

Derivatives in Cash Flow Hedging Relationships

Gain (Loss) Recognized in OCI on Derivative (Effective Portion)	Net Realized Capital Gains(Losses) Recognized in Income on Derivative (Ineffective Portion)
Three Months Ended March 31, 2014	Three Months Ended March 31, 2014
2013	2013

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

Derivatives in Cash Flow Hedging Relationships

	Location	Gain or (Loss) Reclassified from AOCI into Income (Effective Portion) Three Months Ended March 31,	
		2014	2013
Interest rate swaps	Net realized capital gain/(loss)	\$1	\$73
Interest rate swaps	Net investment income	23	24
Foreign currency swaps	Net realized capital gain/(loss)	—	(3
Total		\$24	\$94

As of March 31, 2014 the before-tax deferred net gains on derivative instruments recorded in AOCI that are expected to be reclassified to earnings during the next twelve months are \$78. This expectation is based on the anticipated interest payments on hedged investments in fixed maturity securities that will occur over the next twelve months, at which time the Company will recognize the deferred net gains (losses) as an adjustment to interest income over the term of the investment cash flows. The maximum term over which the Company is hedging its exposure to the variability of future cash flows (for forecasted transactions, excluding interest payments on existing variable-rate financial instruments) is approximately two years.

During the three months ended March 31, 2014 and March 31, 2013 the Company had no net reclassifications from AOCI to earnings resulting from the discontinuance of cash-flow hedges due to forecasted transactions that were no longer probable of occurring.

Fair Value Hedges

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. The Company includes the gain or loss on the derivative in the same line item as the offsetting loss or gain on the hedged item. All components of each derivative's gain or loss were included in the assessment of hedge effectiveness. The Company recognized in income gains (losses) representing the ineffective portion of fair value hedges as follows:

Derivatives in Fair-Value Hedging Relationships

	Gain or (Loss) Recognized in Income [1] Three Months Ended March 31,			
	2014		2013	
	Derivative	Hedge Item	Derivative	Hedge Item
Interest rate swaps				
Net realized capital gain/(loss)	\$(2)\$2	\$6	\$(8
Foreign currency swaps				
Net realized capital gain/(loss)	—	—	(2)2
Benefits, losses and loss adjustment expenses	—	—	(1)1
Total	\$(2)\$2	\$3	\$(5

The amounts presented do not include the periodic net coupon settlements of the derivative or the coupon income [1](expense) related to the hedged item. The net of the amounts presented represents the ineffective portion of the hedge.

Non-qualifying Strategies

For non-qualifying strategies, including embedded derivatives that are required to be bifurcated from their host contracts and accounted for as derivatives, the gain or loss on the derivative is recognized currently in earnings within net realized capital gains (losses). The following table presents the gain or loss recognized in income on non-qualifying strategies:

Derivatives Used in Non-Qualifying Strategies

Gain or (Loss) Recognized within Net Realized Capital Gains and Losses

	Three Months Ended March 31,

Total [3]	\$(80)(432)

[1] The associated liability is adjusted for changes in foreign exchange spot rates through realized capital gains and was \$(28) and \$116 for the three months ended March 31, 2014 and 2013, respectively.

[2] The associated liability is adjusted for changes in foreign exchange spot rates through realized capital gains and was \$(30) and \$151 for the three months ended March 31, 2014 and 2013, respectively.

[3] Excludes investments that contain an embedded credit derivative for which the Company has elected the fair value option. For further discussion, see the Fair Value Option section in Note 5 - Fair Value Measurements.

For the three months ended March 31, 2014 the net realized capital gain (loss) related to derivatives used in non-qualifying strategies was primarily comprised of the following:

- The net losses related to interest rate contracts were driven by a decline in U.S interest rates.

- The net losses associated with the international program hedging instruments were primarily driven by a decrease in volatility and interest rates.

- The net loss on the U.S. macro hedge program was primarily due to decreased volatility and an improvement in domestic equity markets.

-

The loss associated with modified coinsurance reinsurance contracts, which are accounted for as embedded derivatives and transfer to the reinsurer the investment experience related to the assets supporting the reinsured policies, was driven by a decline in interest rates and credit spread tightening during the quarter. The assets remain on the Company's books and the Company recorded an offsetting gain in AOCI as a result of the increase in market value of the bonds.

The net gain related to the combined U.S. GMWB hedging program, which includes the U.S. GMWB product, reinsurance, and hedging derivatives, was primarily due to outperformance of underlying actively managed funds compared to their respective indices.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

6. Investments and Derivative Instruments (continued)

In addition, for the three months ended March 31, 2014, the Company received gains of \$7 on derivative instruments as a result of prior counterparty losses related to the bankruptcy of Lehman Brothers Inc. The losses were the result of the contractual collateral threshold amounts and open collateral calls prior to the bankruptcy filing as well as interest rate and credit spread movements from the date of the last collateral call to the date of the bankruptcy filing. For the three months ended March 31, 2013 the net realized capital gain (loss) related to derivatives used in non-qualifying strategies was primarily comprised of the following:

- The net loss associated with the international program hedging instruments was primarily driven by an improvement in global equity markets and depreciation of the Japanese yen in relation to the euro and the U.S. dollar. These losses were partially offset by gains due to a decrease in Japanese interest rates.

The net loss related to the Japanese fixed annuity hedging instruments and the Japan 3Win foreign currency swaps was primarily due to a depreciation of the Japanese yen in relation to the U.S. dollar.

The net gain related to the combined U.S. GMWB hedging program, which includes the U.S. GMWB product, reinsurance, and hedging derivatives, was primarily a result of a favorable policyholder behavior.

The net loss on the U.S. macro hedge program was primarily due to an improvement in domestic equity markets, passage of time and lower equity volatility.

For additional disclosures regarding contingent credit related features in derivative agreements, see Note 10 - Separate Accounts, Death Benefits and Other Insurance Benefit Features of Notes to Condensed Consolidated Financial Statements.

Credit Risk Assumed through Credit Derivatives

The Company enters into credit default swaps that assume credit risk of a single entity or referenced index in order to synthetically replicate investment transactions. The Company will receive periodic payments based on an agreed upon rate and notional amount and will only make a payment if there is a credit event. A credit event payment will typically be equal to the notional value of the swap contract less the value of the referenced security issuer's debt obligation after the occurrence of the credit event. A credit event is generally defined as a default on contractually obligated interest or principal payments or bankruptcy of the referenced entity. The credit default swaps in which the Company assumes credit risk primarily reference investment grade single corporate issuers and baskets, which include standard and customized diversified portfolios of corporate issuers. The diversified portfolios of corporate issuers are established within sector concentration limits and may be divided into tranches that possess different credit ratings.

The following tables present the notional amount, fair value, weighted average years to maturity, underlying referenced credit obligation type and average credit ratings, and offsetting notional amounts and fair value for credit derivatives in which the Company is assuming credit risk as of March 31, 2014 and December 31, 2013.

The average credit ratings are based on availability and the midpoint of the applicable ratings among Moody's, [1] S&P, Fitch and Morningstar. If no rating is available from a rating agency, then an internally developed rating is used.

[2] Notional amount is equal to the maximum potential future loss amount. These derivatives are governed by agreements and clearing house rules and applicable law which include collateral posting requirements. There is no additional specific collateral related to these contracts or recourse provisions included in the contracts to offset

losses.

[3] The Company has entered into offsetting credit default swaps to terminate certain existing credit default swaps, thereby offsetting the future changes in value of, or losses paid related to, the original swap.

[4] Includes \$4.1 billion and \$4.1 billion as of March 31, 2014 and December 31, 2013, respectively, of standard market indices of diversified portfolios of corporate issuers referenced through credit default swaps. These swaps are subsequently valued based upon the observable standard market index.

[5] Excludes investments that contain an embedded credit derivative for which the Company has elected the fair value option. For further discussion, see the Fair Value Option section in Note 5 - Fair Value Measurements.

6. Investments and Derivative Instruments (continued)

Derivative Collateral Arrangements

The Company enters into various collateral arrangements in connection with its derivative instruments, which require both the pledging and accepting of collateral. As of March 31, 2014 and December 31, 2013 the Company pledged securities collateral associated with derivative instruments with a fair value of \$1.1 billion and \$1.3 billion, respectively, which have been included in fixed maturities on the Consolidated Balance Sheets. The counterparties have the right to sell or re-pledge these securities. The Company also pledged cash collateral associated with derivative instruments with a fair value of \$107 and \$347, respectively, as of March 31, 2014 and December 31, 2013 which have been primarily included within other assets on the Company's Condensed Consolidated Balance Sheets. As of March 31, 2014 and December 31, 2013 the Company accepted cash collateral associated with derivative instruments with a fair value of \$235 and \$180, respectively, which was invested and recorded in the Consolidated Balance Sheets in fixed maturities and short-term investments with corresponding amounts recorded in other liabilities. The Company also accepted securities collateral as of March 31, 2014 and December 31, 2013 of \$184 and \$243, respectively, of which the Company has the ability to sell or repledge \$136 and \$191, respectively. As of March 31, 2014 and December 31, 2013 the fair value of repledged securities totaled \$0 and \$39, respectively, and the Company did not sell any securities. In addition, as of March 31, 2014 and December 31, 2013 non-cash collateral accepted was held in separate custodial accounts and was not included in the Company's Consolidated Balance Sheets.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

7. Reinsurance

The Company cedes insurance to affiliated and unaffiliated insurers to enable the Company to manage capital and risk exposure. Such arrangements do not relieve the Company of its primary liability to policyholders. Failure of reinsurers to honor their obligations could result in losses to the Company. The Company's procedures include careful initial selection of its reinsurers, structuring agreements to provide collateral funds where necessary, and regularly monitoring the financial condition and ratings of its reinsurers. The Company entered into two reinsurance transactions in connection with the sales of its Retirement Plans and Individual Life businesses in January 2013. For further discussion of these transactions, see Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements.

Reinsurance Recoverables

Reinsurance recoverables include balances due from reinsurance companies and are presented net of an allowance for uncollectible reinsurance. Reinsurance recoverables include an estimate of the amount of gross losses and loss adjustment expense reserves that may be ceded under the terms of the reinsurance agreements, including incurred but not reported unpaid losses. The Company's estimate of losses and loss adjustment expense reserves ceded to reinsurers is based on assumptions that are consistent with those used in establishing the gross reserves for business ceded to the reinsurance contracts. The Company calculates its ceded reinsurance projection based on the terms of any applicable facultative and treaty reinsurance, including an estimate of how incurred but not reported losses will ultimately be ceded by reinsurance agreements. Accordingly, the Company's estimate of reinsurance recoverables is subject to similar risks and uncertainties as the estimate of the gross reserve for unpaid losses and loss adjustment expenses. The Company's reinsurance recoverables are summarized as follows:

	As of March 31, 2014	As of December 31, 2013
Property and Casualty Insurance Products:		
Paid loss and loss adjustment expenses	\$ 115	\$ 138
Unpaid loss and loss adjustment expenses	2,862	2,841
Gross reinsurance recoverable	2,977	2,979
Allowance for uncollectible reinsurance	(245)(244)
Net reinsurance recoverables	\$2,732	\$2,735
Life Insurance Products:		
Future policy benefits and unpaid loss and loss adjustment expenses and other policyholder funds and benefits payable		
Sold businesses (MassMutual and Prudential)	\$ 19,146	\$ 19,374
Other reinsurers	1,261	1,221
Net reinsurance recoverables	\$20,407	\$20,595
Reinsurance recoverables, net	\$23,139	\$23,330

As of March 31, 2014, the Company has reinsurance recoverables from MassMutual and Prudential of \$9.1 billion and \$10.0 billion, respectively. These reinsurance recoverables are secured by invested assets held in trust for the benefit of the Company in the event of a default by the reinsurers. As of March 31, 2014, the fair value of assets held in trust securing the reinsurance recoverables from MassMutual and Prudential were \$9.7 billion and \$8.1 billion, respectively. As of March 31, 2014, the Company has no reinsurance-related concentrations of credit risk greater than 10% of the Company's consolidated stockholders' equity.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

7. Reinsurance (continued)

The allowance for uncollectible reinsurance reflects management's best estimate of reinsurance cessions that may be uncollectible in the future due to reinsurers' unwillingness or inability to pay. The Company analyzes recent developments in commutation activity between reinsurers and cedants, recent trends in arbitration and litigation outcomes in disputes between reinsurers and cedants and the overall credit quality of the Company's reinsurers. Based on this analysis, the Company may adjust the allowance for uncollectible reinsurance or charge off reinsurer balances that are determined to be uncollectible. Where its contracts permit, the Company secures future claim obligations with various forms of collateral, including irrevocable letters of credit, secured trusts, funds held accounts and group-wide offsets.

Due to the inherent uncertainties as to collection and the length of time before reinsurance recoverables become due, it is possible that future adjustments to the Company's reinsurance recoverables, net of the allowance, could be required, which could have a material adverse effect on the Company's consolidated results of operations or cash flows in a particular quarter or annual period.

Insurance Revenues

The effect of reinsurance on property and casualty premiums written and earned is as follows:

	Three Months Ended March 31,	
	2014	2013
Premiums Written		
Direct	\$2,718	\$2,796
Assumed	69	62
Ceded	(189)	(335)
Net	\$2,598	\$2,523
Premiums Earned		
Direct	\$2,606	\$2,573
Assumed	65	60
Ceded	(202)	(208)
Net	\$2,469	\$2,425

Ceded losses, which reduce losses and loss adjustment expenses incurred, were \$105 and \$133 for the three months ended March 31, 2014 and 2013.

The effect of reinsurance on life insurance earned premiums and fee income is as follows:

	Three Months Ended March 31,	
	2014	2013
Gross earned premiums and fee income	\$1,666	\$1,703
Reinsurance assumed	48	33
Reinsurance ceded	(438)	(392)
Net	\$1,276	\$1,344

The Company reinsures certain of its risks to other reinsurers under yearly renewable term, coinsurance, and modified coinsurance arrangements, and variations thereto. Yearly renewable term and coinsurance arrangements result in passing all or a portion of the risk to the reinsurer. Generally, the reinsurer receives a proportionate amount of the premiums less an allowance for commissions and expenses and is liable for a corresponding proportionate amount of all benefit payments. Modified coinsurance is similar to coinsurance except that the cash and investments that support the liabilities for contract benefits are not transferred to the assuming company, and settlements are made on a net basis between the companies. Coinsurance with funds withheld is a form of coinsurance except that the investment assets that support the liabilities are withheld by the ceding company.

The cost of reinsurance related to long-duration contracts is accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies. Insurance recoveries on ceded reinsurance agreements, which reduce death and other benefits, were \$215 and \$232 for the three months ended

March 31, 2014, and 2013, respectively.

In addition, the Company has reinsured a portion of the risk associated with U.S. variable annuities and the associated GMDB and GMWB riders, and of the risks associated with variable annuity contract and rider benefits issued by Hartford Life Insurance KK (“HLIKK”), an indirect wholly owned subsidiary.

8. Deferred Policy Acquisition Costs and Present Value of Future Profits

Changes in the DAC balance are as follows:

	Three Months Ended March	
	31, 2014	2013
Balance, beginning of period	\$2,161	\$5,725
Deferred costs	350	332
Amortization — DAC	(408)	(432)
Amortization — Unlock benefit (charge), pre-tax [1]	12	(904)
Amortization — DAC related to business dispositions [2] [3]	—	(2,229)
Adjustments to unrealized gains and losses on securities AFS and other	(23)	25
Effect of currency translation	—	(86)
Balance, end of period	\$2,092	\$2,431

Includes Unlock charge of \$887 related to elimination of future estimated gross profits on the Japan variable [1] annuity block in the first quarter of 2013 due to the increased costs associated with expanding the Japan variable annuity hedging program.

Includes accelerated amortization of \$352 and \$2,374 recognized upon the sale of the Retirement Plans and [2] Individual Life businesses, respectively, in 2013. For further information, see Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements.

[3] Includes previously unrealized gains on securities AFS of \$148 and \$349 recognized upon the sale of the Retirement Plans and Individual Life businesses, respectively, in 2013.

9. Sales Inducements

Changes in sales inducement activity are as follows:

	Three Months Ended March	
	31, 2014	2013
Balance, beginning of period	\$149	\$325
Amortization — Unlock benefit (charge) [1]	1	(56)
Amortization charged to income	(7)	(11)
Amortization related to business dispositions [2]	—	(71)
Balance end of period	\$143	\$187

Includes Unlock charge of \$52 in the first quarter of 2013 related to elimination of future estimated gross profits on [1] the Japan variable annuity block due to the increased costs associated with expanding the Japan variable annuity hedging program.

Represents accelerated amortization of \$22 and \$49 in the first quarter of 2013 recognized upon the sale of the [2] Retirement Plans and Individual Life businesses, respectively. For further information, see Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements.

10. Separate Accounts, Death Benefits and Other Insurance Benefit Features (continued)

The following table provides details concerning GMDB and GMIB exposure as of March 31, 2014:
Individual Variable and Group Annuity Account Value by GMDB/GMIB Type

Maximum anniversary value ("MAV") [1]	Account Value ("AV") [8]	Net Amount at Risk ("NAR") [10]	Retained Net Amount at Risk ("RNAR") [10]	Weighted Average Attained Age of Annuitant
MAV only	\$18,971	\$2,836	\$492	69
With 5% rollup [2]	1,563	227	64	69
With Earnings Protection Benefit Rider ("EPB") [3]	4,735	615	85	68
With 5% rollup & EPB	576	117	26	70
Total MAV	25,845	3,795	667	
Asset Protection Benefit ("APB") [4]	17,717	256	174	68
Lifetime Income Benefit ("LIB") — Death Benefit [5]	733	8	8	67
Reset [6] (5-7 years)	3,205	66	65	69
Return of Premium ("ROP") [7]/Other	12,047	67	57	67
Subtotal U.S. GMDB	59,547	4,192	971	68
Less: General Account Value with U.S. GMDB	4,249			
Subtotal Separate Account Liabilities with GMDB	55,298			
Separate Account Liabilities without U.S. GMDB	83,194			
Total Separate Account Liabilities	\$138,492			
Japan GMDB [9], [11]	\$17,800	\$955	\$668	71
Japan GMIB [9], [11]	\$16,309	\$164	\$164	71

[1] MAV GMDB is the greatest of current AV, net premiums paid and the highest AV on any anniversary before age 80 years (adjusted for withdrawals).

[2] Rollup GMDB is the greatest of the MAV, current AV, net premium paid and premiums (adjusted for withdrawals) accumulated at generally 5% simple interest up to the earlier of age 80 years or 100% of adjusted premiums.

EPB GMDB is the greatest of the MAV, current AV, or contract value plus a percentage of the contract's growth.

[3] The contract's growth is AV less premiums net of withdrawals, subject to a cap of 200% of premiums net of withdrawals.

[4] APB GMDB is the greater of current AV or MAV, not to exceed current AV plus 25% times the greater of net premiums and MAV (each adjusted for premiums in the past 12 months).

[5] LIB GMDB is the greatest of current AV, net premiums paid, or for certain contracts a benefit amount that ratchets over time, generally based on market performance.

[6] Reset GMDB is the greatest of current AV, net premiums paid and the most recent five to seven year anniversary AV before age 80 years (adjusted for withdrawals).

[7] ROP GMDB is the greater of current AV or net premiums paid.

[8] AV includes the contract holder's investment in the separate account and the general account.

[9] GMDB includes a ROP and MAV (before age 80 years) paid in a single lump sum. GMIB is a guarantee to return initial investment, adjusted for earnings liquidity which allows for free withdrawal of earnings, paid through a fixed payout annuity, after a minimum deferral period of 10 years, 15 years or 20 years. The GRB related to the Japan GMIB was \$15.1 billion as of March 31, 2014. The GRB related to the Japan GMAB and GMWB was \$353 as of March 31, 2014. These liabilities are not included in the Separate Account as they are not legally insulated from the general account liabilities of the insurance enterprise. As of March 31, 2014, 30% of the GMDB RNAR and 74% of the GMIB NAR is reinsured to a Hartford affiliate, as a result, the effects of the reinsurance are not

reflected in this disclosure.

[10] NAR is defined as the guaranteed benefit in excess of the current AV. RNAR represents NAR reduced for reinsurance. NAR and RNAR are highly sensitive to equity markets movements and increase when equity markets decline. Additionally Japan's NAR and RNAR are highly sensitive to currency movements and increase when the Yen strengthens.

[11] Policies with a guaranteed living benefit (GMIB in Japan) also have a guaranteed death benefit. The NAR for each benefit is shown in the table above, however these benefits are not additive. When a policy terminates due to death, any NAR related to GMWB or GMIB is released. Similarly, when a policy goes into benefit status on a GMWB or GMIB, its GMDB NAR is released.

In the U.S., account balances of contracts with guarantees were invested in variable separate accounts as follows:

Asset type	As of March 31, 2014	As of December 31, 2013
Equity securities (including mutual funds)	\$50,866	\$52,858
Cash and cash equivalents	4,432	4,605
Total	\$55,298	\$57,463

As of March 31, 2014 and December 31, 2013, approximately 17% of the equity securities above were invested in fixed income securities through these funds and approximately 83% were invested in equity securities through these funds.

For further information on guaranteed living benefits that are accounted for at fair value, such as GMWB, see Note 5 - Fair Value Measurements of Notes to Condensed Consolidated Financial Statements.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

11. Commitments and Contingencies

Litigation

The Hartford is involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending or providing indemnity for third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Hartford accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. Subject to the uncertainties discussed below under the caption “Asbestos and Environmental Claims,” management expects that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to the consolidated financial condition, results of operations or cash flows of The Hartford.

The Hartford is also involved in other kinds of legal actions, some of which assert claims for substantial amounts. These actions include, among others, and in addition to the matters described below, putative state and federal class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, underpayment of claims or improper underwriting practices in connection with various kinds of insurance policies, such as personal and commercial automobile, property, disability, life and inland marine. The Hartford also is involved in individual actions in which punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims or other allegedly unfair or improper business practices. Like many other insurers, The Hartford also has been joined in actions by asbestos plaintiffs asserting, among other things, that insurers had a duty to protect the public from the dangers of asbestos and that insurers committed unfair trade practices by asserting defenses on behalf of their policyholders in the underlying asbestos cases. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to the consolidated financial condition of The Hartford. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, the outcome in certain matters could, from time to time, have a material adverse effect on the Company’s results of operations or cash flows in particular quarterly or annual periods.

Apart from the inherent difficulty of predicting litigation outcomes, the Mutual Funds Litigation identified below purports to seek substantial damages for unsubstantiated conduct spanning a multi-year period based on novel applications of complex legal theories. The alleged damages are not quantified or factually supported in the complaint, and, in any event, the Company’s experience shows that demands for damages often bear little relation to a reasonable estimate of potential loss. The matter is in the earliest stages of litigation, with no substantive legal decisions by the court defining the scope of the claims or the potentially available damages; fact discovery is also in its early stages. Accordingly, management cannot reasonably estimate the possible loss or range of loss, if any, or predict the timing of the eventual resolution of this matter.

Mutual Funds Litigation — In February 2011, a derivative action was brought on behalf of six Hartford retail mutual funds in the United States District Court for the District of New Jersey, alleging that Hartford Investment Financial Services, LLC (“HIFSCO”), an indirect subsidiary of the Company, received excessive advisory and distribution fees in violation of its statutory fiduciary duty under Section 36(b) of the Investment Company Act of 1940. HIFSCO moved to dismiss and, in September 2011, the motion was granted in part and denied in part, with leave to amend the complaint. In November 2011, plaintiffs filed an amended complaint on behalf of The Hartford Global Health Fund, The Hartford Conservative Allocation Fund, The Hartford Growth Opportunities Fund, The Hartford Inflation Plus Fund, The Hartford Advisors Fund, and The Hartford Capital Appreciation Fund. Plaintiffs seek to rescind the investment management agreements and distribution plans between HIFSCO and these funds and to recover the total fees charged thereunder or, in the alternative, to recover any improper compensation HIFSCO received, in addition to lost earnings. HIFSCO filed a partial motion to dismiss the amended complaint and, in December 2012, the court dismissed without prejudice the claims regarding distribution fees and denied the motion with respect to the advisory fees claims. In March 2014, the plaintiffs filed a new complaint that, among other things, added as new plaintiffs The Hartford Floating Rate Fund and The Hartford Small Company Fund and named as a defendant Hartford Funds

Management Company, LLC (“HFMC”), an indirect subsidiary of the Company which assumed the role as advisor to the funds as of January 2013. HFMC and HIFSCO dispute the allegations and intend to defend vigorously.

Asbestos and Environmental Claims – As discussed in Note 12, Commitments and Contingencies, of Notes to Condensed Consolidated Financial Statements under the caption “Asbestos and Environmental Claims”, included in the Company’s 2013 Form 10-K Annual Report, The Hartford continues to receive asbestos and environmental claims that involve significant uncertainty regarding policy coverage issues. Regarding these claims, The Hartford continually reviews its overall reserve levels and reinsurance coverages, as well as the methodologies it uses to estimate its exposures. Because of the significant uncertainties that limit the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid losses and related expenses, particularly those related to asbestos, the ultimate liabilities may exceed the currently recorded reserves. Any such additional liability cannot be reasonably estimated now but could be material to The Hartford’s consolidated operating results and liquidity.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

11. Commitments and Contingencies (continued)

Derivative Commitments

Certain of the Company's derivative agreements contain provisions that are tied to the financial strength ratings of the individual legal entity that entered into the derivative agreement as set by nationally recognized statistical rating agencies. If the legal entity's financial strength were to fall below certain ratings, the counterparties to the derivative agreements could demand immediate and ongoing full collateralization and in certain instances demand immediate settlement of all outstanding derivative positions traded under each impacted bilateral agreement. The settlement amount is determined by netting the derivative positions transacted under each agreement. If the termination rights were to be exercised by the counterparties, it could impact the legal entity's ability to conduct hedging activities by increasing the associated costs and decreasing the willingness of counterparties to transact with the legal entity. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position as of March 31, 2014 is \$1.0 billion. Of this \$1.0 billion the legal entities have posted collateral of \$1.1 billion in the normal course of business. In addition, the Company has posted collateral of \$44 associated with a customized GMWB derivative. Based on derivative market values as of March 31, 2014 a downgrade of one level below the current financial strength ratings by either Moody's or S&P could require approximately an additional \$10 to be posted as collateral. Based on derivative market values as of March 31, 2014 a downgrade by either Moody's or S&P of two levels below the legal entities' current financial strength ratings could require approximately an additional \$30 of assets to be posted as collateral. These collateral amounts could change as derivative market values change, as a result of changes in our hedging activities or to the extent changes in contractual terms are negotiated. The nature of the collateral that we would post, if required, would be primarily in the form of U.S. Treasury bills, U.S. Treasury notes and government agency securities.

On March 6, 2014, Moody's lowered its counterparty credit and insurer financial strength ratings on Hartford Life Insurance Company to Baa2. Given this downgrade action, termination rating triggers of four derivative counterparty relationships were impacted. The counterparties have the right to terminate the relationships and would have to settle the outstanding derivatives prior to exercising termination rights. The Company is in the process of re-negotiating the rating triggers which it expects to successfully complete.

Accordingly, the Company's hedging programs have not been adversely impacted by the announcement of the downgrade of Hartford

Life Insurance Company. As of March 31, 2014 the notional amount and fair value related to these counterparties are \$10.3 billion and \$(34), respectively.

12. Employee Benefit Plans

Components of Net Periodic Benefit Cost

Net periodic benefit cost includes the following components:

	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2014	2013	2014	2013
Service cost	\$—	\$—	\$—	\$—
Interest cost	64	60	3	3
Expected return on plan assets	(81)	(79)	(4)	(3)
Amortization of prior service credit	—	—	(2)	(2)
Amortization of actuarial loss	11	14	1	—
Net periodic benefit cost	\$(6)	\$(5)	\$(2)	\$(2)

13. Stock Compensation Plans

The Company has four stock-based compensation plans which are described in Note 19 - Stock Compensation Plans of Notes to Consolidated Financial Statements included in The Hartford's 2013 Annual Report on Form 10-K. Shares

issued in satisfaction of stock-based compensation may be made available from authorized but unissued shares, shares held by the Company in treasury or from shares purchased in the open market. In 2014 and 2013, the Company issued shares from treasury in satisfaction of stock-based compensation.

	Three Months Ended March	
	2014	2013
Stock-based compensation plans expense	\$19	\$14
Income tax benefit	(7)(5
Total stock-based compensation plans expense, after-tax	\$12	\$9

The Company did not capitalize any cost of stock-based compensation. As of March 31, 2014, the total compensation cost related to non-vested awards not yet recognized was \$144, which is expected to be recognized over a weighted average period of 2.4 years.

15. Debt

The Company's long-term debt securities are issued by either HFSG Holding Company or HLI, and are unsecured obligations of HFSG Holding Company or HLI, and rank on a parity with all other unsecured and unsubordinated indebtedness of HFSG Holding Company or HLI. The Company's revolving credit facility debt is secured by Japan government bonds and is drawn by HLIKK.

Debt is carried net of discount. Short-term and long-term debt by issuance are as follows:

	As of	
	March 31, 2014	December 31, 2013
Revolving Credit Facility	\$243	\$238
Senior Notes and Debentures		
4.75% Notes, due 2014	—	200
4.0% Notes, due 2015	289	289
7.3% Notes, due 2015	167	167
5.5% Notes, due 2016	275	275
5.375% Notes, due 2017	415	415
4.0% Notes, due 2017	295	295

6.1% Notes, due 2041	326	326
6.625% Notes, due 2042	178	178
4.3% Notes, due 2043	298	298
Junior Subordinated Debentures		
7.875% Notes, due 2042	600	600
8.125% Notes, due 2068	500	500
Total Notes and Debentures	\$6,107	\$6,306
Less: Current maturities	289	200
Long-term Debt	\$5,818	\$6,106
Total Debt	\$6,350	\$6,544
Revolving Credit Facilities		

The Company has a senior unsecured revolving credit facility (the "Credit Facility") that provides for borrowing capacity up to \$1.75 billion (which is available in U.S. dollars, and in Euro, Sterling, Canadian dollars and Japanese Yen) through January 6, 2016. Of the total availability under the Credit Facility, up to \$250 is available to support letters of credit issued on behalf of the Company or subsidiaries of the Company. Under the Credit Facility, the Company must maintain a minimum level of consolidated net worth of \$14.9 billion. The definition of consolidated net worth under the terms of the Credit Facility, excludes AOCI and includes the Company's outstanding junior subordinated debentures and perpetual preferred securities, net of discount. In addition, the Company's maximum ratio of consolidated total debt to consolidated total capitalization is 35%, and the ratio of consolidated total debt of subsidiaries to consolidated total capitalization is limited to 10%. As of March 31, 2014, the Company was in compliance with all financial covenants under the Credit Facility.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

15. Debt (continued)

HLIKK has four revolving credit facilities in support of operations. Two of the credit facilities have no amounts drawn as of March 31, 2014 with borrowing limits of approximately ¥5 billion, or \$49 each, and individually have expiration dates of September 30, 2014 and January 5, 2015. In December 2013, HLIKK entered into two new revolving credit facility agreements with two Japanese banks in order to finance certain withholding taxes on mutual fund gains, that are subsequently credited to HLIKK's tax liability when HLIKK files its income tax returns. As of March 31, 2014, HLIKK had drawn the total borrowing limits of ¥5 billion, or \$49, and ¥20 billion, or \$194 on these credit facilities. The ¥5 billion credit facility accrues interest at a variable rate based on the one month Tokyo Interbank Offering Rate ("TIBOR") plus 3 bps; as of March 31, 2014 the interest rate was 17 bps. The ¥20 billion credit facility accrues interest at a variable rate based on TIBOR plus 3 bps, or the actual cost of funding; as of March 31, 2014 the interest rate was 18 bps. Both of the credit facilities expire on September 30, 2014.

16. Equity

In January 2014, the Board of Directors approved an increase in the Company's authorized equity repurchase program that provides the Company with the ability to repurchase \$2 billion in equity during the period commencing on January 1, 2014 and ending on December 31, 2015.

During the three months ended March 31, 2014, the Company repurchased 8.8 million common shares for \$300. In addition, the Company repurchased 8.7 million common shares, for \$300, from April 1, 2014 to April 23, 2014. The warrants outstanding at March 31, 2014 were 22.6 million.

The declaration of a quarterly common stock dividend of \$0.15 during the first quarter of 2014 triggered a provision in The Hartford's Warrant Agreement with The Bank of New York Mellon, relating to warrants to purchase common stock issued in connection with the Company's participation in the Capital Purchase Program, resulting in an adjustment to the warrant exercise price. The warrant exercise price at March 31, 2014 was \$9.478.

17. Restructuring and Other Costs

As a result of a strategic business realignment announced in 2012, the Company is currently focusing on its Property & Casualty, Group Benefits and Mutual Fund businesses. In addition, the Company implemented restructuring activities in 2011 across several areas aimed at reducing overall expense levels. The Company intends to substantially complete the related restructuring activities over the next 15 months. For related discussion of the Company's business disposition transactions, see Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements.

Termination benefits related to workforce reductions and lease and other contract terminations have been accrued through March 31, 2014. Additional costs, mainly severance benefits and other related costs and professional fees, expected to be incurred subsequent to March 31, 2014, and asset impairment and related charges, will be expensed as appropriate.

In 2013, the Company initiated a plan to consolidate its real estate operations, including the intention to exit certain facilities and relocate employees. The consolidation of real estate is consistent with the Company's strategic business realignment and follows the completion of sales of the Retirement Plans and Individual Life businesses. Asset related charges will be incurred over the remaining estimated useful life of facilities, and relocation and other maintenance charges will be recognized as incurred. The program costs will be recognized in the Corporate category for segment reporting.

Restructuring costs and other costs of approximately \$313, pre-tax have been incurred by the Company to date in connection with these activities. As the Company executes on its operational and strategic initiatives, the Company's estimate of and actual costs incurred for restructuring activities may differ from these estimates.

Estimated restructuring and other costs, including costs incurred to date, as of March 31, 2014 are as follows:

Property & Casualty Commercial	\$9
Consumer Markets	3
Group Benefits	1
Mutual Funds	4

Talcott Resolution	70
Corporate	287
Total restructuring and other costs, pre-tax	\$374

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

19. Subsequent Event

On April 28, 2014, the Company announced it had entered into an agreement to sell HLIKK in a cash transaction to Orix Life Insurance Company ("Buyer"), a subsidiary of Orix Corporation, a Japanese company for \$895, subject to a purchase price adjustment based primarily on the effect of changes in market indices on the fair value of liabilities until the date of close. HLIKK sold variable and fixed annuity policies in Japan from 2001 to 2009 and has been in runoff since 2009. The Company's Japan business is included in the Talcott Resolution reporting segment.

Concurrently with the sale, HLIKK will recapture certain risks reinsured to the Company's U.S. subsidiaries by terminating intercompany agreements. Upon closing, Buyer will be responsible for all liabilities for the recaptured business. The Company will, however, continue to be obligated for approximately \$1.1 billion of fixed payout annuities related to the 3Win product reinsured from HLIKK to the Company.

Based on the adjusted net worth of HLIKK as defined and fair value of liabilities as of March 31, 2014, the sale transaction is expected to result in a reduction in stockholders' equity of approximately \$740, including an after-tax loss on disposition of approximately \$675, subject to the effect of purchase price adjustments and hedging gains or losses realized through the closing date. The Company will continue to hedge its Japan risks until closing. The operating results of the business and the estimated loss on sale will be reported in discontinued operations beginning in the second quarter of 2014. Closing of the transaction, expected in the third quarter of 2014, is subject to regulatory approvals from the Japan Financial Services Agency and other regulators. The after-tax loss on disposition could differ materially from the estimate as of March 31, 2014 due to purchase price adjustments and the Company's hedging programs, which are sensitive to changes in equity, fixed income and foreign currency markets.

The Japan business to be disposed of includes the following major classes of assets and liabilities:

	As of March 31, 2014 Carrying Value
Assets	
Cash and investments	\$21,801
Reinsurance recoverables	\$30
Property and equipment, net	\$19
Other assets	\$802
Liabilities	
Reserve for future policy benefits and unpaid loss and loss adjustment expenses	\$343
Other policyholder funds and benefits payable	\$2,679
Other policyholder funds and benefits payable - international variable annuities	\$17,406
Short-term debt	\$243
Other liabilities	\$134

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Dollar amounts in millions except share data unless otherwise stated)

The Hartford provides projections and other forward-looking information in the following discussions, which contain many forward-looking statements, particularly relating to the Company's future financial performance. These forward-looking statements are estimates based on information currently available to the Company, are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and are subject to the cautionary statements set forth on pages 3 and 4 of this Form 10-Q. Actual results are likely to differ, and in the past have differed, materially from those forecast by the Company, depending on the outcome of various factors, including, but not limited to, those set forth in each discussion below and in Part I, Item 1A, Risk Factors in The Hartford's 2013 Form 10-K Annual Report. The Hartford undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future developments or otherwise.

Certain reclassifications have been made to prior year financial information presented in Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") to conform to the current year presentation. This discussion should be read in conjunction with MD&A in The Hartford's 2013 Form 10-K Annual Report. The Hartford defines increases or decreases greater than or equal to 200% as "NM" or not meaningful.

Table of Contents

THE HARTFORD'S OPERATIONS OVERVIEW

The Hartford is a financial holding company for a group of subsidiaries that provide property and casualty and investment products to both individual and business customers in the United States and continues to administer life and annuity products previously sold.

On April 28, 2014, the Company announced it had entered into an agreement to sell HLIKK in a cash transaction to Orix Life Insurance Company ("Buyer"), a subsidiary of Orix Corporation, a Japanese company for \$895, subject to a purchase price adjustment based primarily on the effect of changes in market indices on the fair value of liabilities until the date of close. HLIKK sold variable and fixed annuity policies in Japan from 2001 to 2009 and has been in runoff since 2009. The Company's Japan business is included in the Talcott Resolution reporting segment. For further discussion of this transaction, see Note 19 - Subsequent Event.

On January 1, 2013, the Company completed the sale of its Retirement Plans business to Massachusetts Mutual Life Insurance Company ("MassMutual") and on January 2, 2013 the Company completed the sale of its Individual Life insurance business to The Prudential Insurance Company of America ("Prudential"), a subsidiary of Prudential Financial, Inc. On December 12, 2013, the Company completed the sale of Hartford Life International Limited ("HLIL"), which comprised the Company's U.K. variable annuity business, to Columbia Insurance Company, a Berkshire Hathaway company. For further discussion of these and other such transactions, see Note 2 - Business Dispositions, Note 7 - Reinsurance and Note 14 - Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

The Company derives its revenues principally from: (a) premiums earned for insurance coverages provided to insureds; (b) fee income, including asset management fees, on separate account and mutual fund assets and mortality and expense fees, as well as cost of insurance charges; (c) net investment income; (d) fees earned for services provided to third parties; and (e) net realized capital gains and losses. Premiums charged for insurance coverages are earned principally on a pro rata basis over the terms of the related policies in-force. Asset management fees and mortality and expense fees are primarily generated from separate account assets. Cost of insurance charges are assessed on the net amount at risk for investment-oriented life insurance products.

The profitability of the Company's property and casualty insurance businesses over time is greatly influenced by the Company's underwriting discipline, which seeks to manage exposure to loss through favorable risk selection and diversification, its management of claims, its use of reinsurance, the size of its in force block, actual mortality and morbidity experience, and its ability to manage its expense ratio which it accomplishes through economies of scale and its management of acquisition costs and other underwriting expenses. Pricing adequacy depends on a number of factors, including the ability to obtain regulatory approval for rate changes, proper evaluation of underwriting risks, the ability to project future loss cost frequency and severity based on historical loss experience adjusted for known trends, the Company's response to rate actions taken by competitors, and expectations about regulatory and legal developments and expense levels. The Company seeks to price its insurance policies such that insurance premiums and future net investment income earned on premiums received will cover underwriting expenses and the ultimate cost of paying claims reported on the policies and provide for a profit margin. For many of its insurance products, the Company is required to obtain approval for its premium rates from state insurance departments.

The financial results in the Company's variable annuity and mutual fund businesses depend largely on the amount of the contract holder or shareholder account value or assets under management on which it earns fees and the level of fees charged. Changes in account value or assets under management are driven by two main factors: net flows, which measure the success of the Company's asset gathering and retention efforts, and the market return of the funds, which is heavily influenced by the return realized in the equity markets. Net flows are comprised of deposits less surrenders, death benefits, policy charges and annuitizations of investment type contracts, such as variable annuity contracts. In the mutual fund business, net flows are known as net sales. Net sales are comprised of new sales less redemptions by mutual fund customers. The Company uses the average daily value of the S&P 500 Index as an indicator for evaluating market returns of the underlying account portfolios in the United States. Relative financial results of variable products are highly correlated to the growth in account values or assets under management since these products generally earn fee income on a daily basis. Equity market movements could also result in benefits for or charges against deferred acquisition costs.

The profitability of fixed annuities and other “spread-based” products depends largely on the Company’s ability to earn target spreads between earned investment rates on its general account assets and interest credited to policyholders.

The investment return, or yield, on invested assets is an important element of the Company’s earnings since insurance products are priced with the assumption that premiums received can be invested for a period of time before benefits, loss and loss adjustment expenses are paid. Due to the need to maintain sufficient liquidity to satisfy claim obligations, the majority of the Company’s invested assets have been held in available-for-sale securities, including, among other asset classes, corporate bonds, municipal bonds, government debt, short-term debt, mortgage-backed securities and asset-backed securities.

The primary investment objective for the Company is to maximize economic value, consistent with acceptable risk parameters, including the management of credit risk and interest rate sensitivity of invested assets, while generating sufficient after-tax income to meet policyholder and corporate obligations. Investment strategies are developed based on a variety of factors including business needs, regulatory requirements and tax considerations.

Loss from discontinued operations, net of tax	—	(1))(100	%)
Net income (loss)	\$495	\$(241))NM	

Includes investment income and mark-to-market effects of equity securities, trading, supporting the international [1] variable annuity business, which are classified in net investment income with corresponding amounts credited to policyholders within benefits, losses and loss adjustment expenses.

[2]Includes net realized gains (losses) on business dispositions of \$1,574 for the three months ended March 31, 2013. Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net income, compared to the prior year period, increased for the three months ended March 31, 2014 primarily due to the following:

An increase in the Unlock benefit to \$22, before tax, for the three months ended March 31, 2014 compared to a charge of \$832, before tax, for the prior year period, primarily due to actual separate account returns being above our aggregated estimated returns during the period. The Unlock charge in 2013 was primarily due to Japan hedge cost assumption changes. For further discussion of Unlocks, see MD&A - Critical Accounting Estimates, Estimated Gross Profits Used in the Valuation and Amortization of Assets and Liabilities Associated with Variable Annuity and Other Universal Life-Type Contracts and MD&A - Talcott Resolution.

A loss on extinguishment of debt of \$213, before tax, for the three months ended March 31, 2013 related to the repurchase of approximately \$800 of senior notes at a premium to the face amount of the then outstanding debt. The resulting loss on extinguishment of debt consists of the repurchase premium, the write-off of the unamortized discount and debt issuance and other costs related to the repurchase transaction. The decrease in interest expense for the three months ended March 31, 2014 is largely due to this debt repurchase.

- Net realized capital losses of \$86 for the three months ended March 31, 2014, compared to net realized capital gains of \$32 for the prior year period, excluding the realized capital gains on business dispositions. For further discussion of investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net

Realized Capital Gains (Losses).

70

Table of Contents

A \$1,574 before tax realized capital gain in 2013 on the disposition of the Individual Life business and a \$1,574 before tax reinsurance loss in 2013 consisting of a reduction in goodwill and a loss accrual for premium deficiency related to the disposition of the Individual Life business and losses from the operations of the Retirement Plans and Individual Life businesses sold in the first quarter of 2013. For further discussion of the sale of these businesses, see Note 2 - Business Dispositions of Condensed Consolidated Financial Statements.

A \$99 before tax improvement in underwriting results before catastrophes and prior accident years development, driven by higher underwriting margins in Small Commercial, Middle Market and Consumer Markets, including a \$49 benefit related to a reduction in the Company's estimated liability for NY State Workers' Compensation Board assessments due to a change in legislation effective January 1, 2014. Contributing to the improvement in underwriting results is an increase in earned premiums of 2% or \$44, before tax, for the three months ended March 31, 2014, compared to the prior year period, reflecting written premium growth of 1% in P&C Commercial and 6% in Consumer Markets. For a discussion of the Company's operating results by segment, see the segment sections of MD&A.

Current accident year catastrophe losses of \$86, before tax, for the three months ended March 31, 2014, compared to \$32, before tax, for the prior year period. The increase in current accident year catastrophe losses was primarily due to unfavorable winter storm frequency and severity across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance. Prior accident years reserve release of \$40, before tax, for the three months ended March 31, 2014, compared to reserve strengthening of \$14, before tax, for the prior year period. Reserve releases in 2014 were primarily related to favorable development on accident year 2013 catastrophes and professional liability claims, and favorable development on accident year 2013 homeowners claims. Reserve strengthening in 2013 was primarily related to higher than expected loss frequency in commercial auto liability and workers' compensation. For additional information, see MD&A - Critical Accounting Estimates, Reserve Roll-forwards and Development.

Differences between the Company's effective income tax rate and the U.S. statutory rate of 35% are due primarily to tax-exempt interest earned on invested assets and the dividends received deduction ("DRD"). Income tax expense for the three months ended March 31, 2014 increased by \$357 from an income tax benefit of \$197 in the prior year period, primarily due to the \$1.1 billion, before tax, increase in income from continuing operations. Income tax expense (benefit) in 2014 and 2013, includes separate account DRD benefits of \$27 and \$32, respectively.

The following table presents net income (loss) for each reporting segment, as well as the Corporate category.

Net income (loss) by segment	Three months ended March 31,		
	2014	2013	Increase (Decrease) From 2013 to 2014

Short-term investments	4,042	5.1	% 4,008	5.1	%
Total investments excluding equity securities, trading	79,666	100	% 78,656	100	%
Equity securities, trading, at fair value [2]	17,418		19,745		
Total investments	\$97,084		\$98,401		

[1] Primarily relates to derivative instruments.

As of March 31, 2014 and December 31, 2013, approximately \$17.4 billion and \$19.7 billion, respectively, of equity securities, trading, support Japan variable annuities. Those equity securities, trading, were invested in [2] mutual funds, which, in turn, invested in the following asset classes as of March 31, 2014 and December 31, 2013, respectively, Japan equity 22% and 22%, Japan fixed income (primarily government securities) 15% and 15%, global equity 23% and 22%, global government bonds 39% and 40%, and cash and other 1% and 1%.

Total investments decreased since December 31, 2013, primarily due to decreases in equity securities, trading and other investments, partially offset by increases in fixed maturities, AFS and FVO as well as mortgage loans. The decline in equity securities, trading was primarily due to variable annuity policy surrenders and declining values of the underlying investments, partially offset by the appreciation of the Japanese Yen as compared to the U.S. dollar. The increases in fixed maturities, AFS and FVO were due to higher valuations as a result of decreasing interest rates and credit spread tightening. Mortgage loans increased due to the Company increasing its allocation to this asset class.

Yields calculated using annualized net investment income (excluding income related to equity securities, trading) before investment expenses divided by the monthly average invested assets at cost, or adjusted carrying value, as applicable, excluding equity securities, trading and repurchase agreement and dollar roll collateral. Yield

[1] calculations for the three months ended March 31, 2013 exclude assets transferred due to the sale of the Retirement Plans and Individual Life businesses. Yield calculations for the three months ended March 31, 2013 exclude income and assets associated with the disposal of the HLIL business. Yields by asset type exclude investment expenses.

[2] Includes net investment income on short-term investments.

[3] Primarily includes income from derivatives that qualify for hedge accounting and hedge fixed maturities.

Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Total net investment income decreased primarily due to a decrease in income from equity securities, trading, which is a result of Japanese variable annuity policy surrenders and a decline in value of the underlying investment funds supporting the variable annuity product due to a decline in Japanese equity markets, partially offset by appreciation of the Japanese Yen as compared to the U.S. dollar. In addition, there was lower income from fixed maturities as a result of a decline in assets levels, primarily in Talcott Resolution, and lower income from repurchase agreements. These decreases were partially offset by an increase in income from limited partnerships and other alternative investments which resulted primarily from an increase in valuations of underlying funds.

The annualized net investment income yield, excluding limited partnerships and other alternative investments, has declined to 4.0% in the first quarter of 2014 versus 4.1% in the first quarter of 2013. The decline was primarily attributable to lower income from repurchase agreements. Refer to Note 6 - Investments and Derivative Instruments of Notes to Condensed Consolidated Financial Statements for further discussion of repurchase agreements. The average reinvestment rate for three months ended March 31, 2014, was approximately 3.9%, excluding certain treasury securities, which approximated the average yield of sales and maturities for the same period. Based upon current reinvestment rates, we expect the annualized net investment income yield, excluding limited partnerships and other alternative investments, for 2014, to remain relatively consistent with the current net investment income yield. The estimated impact on net investment income is subject to change as the composition of the portfolio changes through normal portfolio management and trading activities and changes in market conditions.

Net realized capital gains (losses)	\$(86)	\$1,606

Relates to the Japanese fixed annuity product (adjustment of product liability for changes in spot currency [1] exchange rates, related derivative hedging instruments, excluding net periodic coupon settlements, and Japan FVO securities).

Primarily consists of changes in value of non-qualifying derivatives, Japan 3Win related foreign currency swaps, [2] and transactional foreign currency re-valuation associated with the internal reinsurance of the Japan variable annuity business, which is offset in AOCI.

Details on the Company's net realized capital gains and losses are as follows:

Gross gains and losses on sales

- Gross gains on sales for the three months ended March 31, 2014 were primarily due to gains on the sale of corporate, CMBS, and RMBS. Gross losses on sales for the three months ended March 31, 2014 were the result of losses on sales of emerging market securities, primarily within the foreign government and corporate sectors. The sales were primarily a result of duration and liquidity management, as well as tactical changes to the portfolio as a result of changing market conditions.
- Gross gains and losses on sales for three months ended March 31, 2013 were predominately from the sale of the Retirement Plans and Individual Life businesses resulting in a gain of \$1.5 billion.

Net OTTI losses

- See Other-Than-Temporary Impairments within the Investment Portfolio Risks and Risk Management section of the MD&A.

Variable annuity hedge program

- For the three months ended March 31, 2014 the net gain related to the combined U.S. GMWB derivatives, net, which includes the U.S. GMWB product, reinsurance, and hedging derivatives, was primarily driven by gains of \$14 related to outperformance of underlying actively managed funds compared to their respective indices. For the three months ended March 31, 2014 the loss on the U.S. macro hedge program was primarily due to losses of \$9 related to decreased volatility, and losses of \$4 driven by an improvement in domestic equity markets.
- For the three months ended March 31, 2014 the losses associated with the international program were primarily driven by losses of \$20 related to decreased volatility and losses of \$9 due to a decrease in interest rates.
- For the three months ended March 31, 2013 the gain on U.S. GMWB derivatives, net, was primarily driven by gains of \$46 on favorable policyholder behavior. For the three months ended March 31, 2013 the loss on the U.S. macro hedge program was primarily due to losses of \$56 related to an improvement in domestic equity markets, losses of \$15 related to the passage of time, and losses of \$15 due to lower equity volatility.

- For the three months ended March 31, 2013 the loss associated with the international program was primarily driven by losses of \$227 due to an improvement in global equity markets, and losses of \$69 due to a depreciation of the Japanese yen. These losses were partially offset by gains of \$71 due to a decrease in Japanese interest rates.

Table of Contents

Other, net

- Other, net loss for the three months ended March 31, 2014 was primarily due to losses of \$56 on interest derivatives due to a decline in U.S. interest rates, and losses of \$13 related to the Japan 3Win foreign currency swaps primarily driven by a decline in U.S. interest rates. An additional loss of \$11 was related to transactional foreign currency re-valuation associated with the internal reinsurance of the Japan variable annuity business, which is offset in AOCI, due to appreciation of the Japanese yen versus the U.S. dollar.
- Other, net gain for the three months ended March 31, 2013 was primarily due to gains of \$141 on transactional foreign currency re-valuation associated with the internal reinsurance of the Japan variable annuity business, which is offset in AOCI, due to depreciation of the Japanese yen versus the U.S. dollar. Additional gains of \$86 on interest derivatives were primarily associated with fixed rate bonds sold as part of the Individual Life and Retirement Plans business dispositions. For further information on the business dispositions, see Note 2 of Notes to Condensed Consolidated Financial Statements.

Table of Contents

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements, in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”), requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ, and in the past have differed, from those estimates.

The Company has identified the following estimates as critical in that they involve a higher degree of judgment and are subject to a significant degree of variability:

- property and casualty insurance product reserves, net of reinsurance;
- estimated gross profits used in the valuation and amortization of assets and liabilities associated with variable annuity and other universal life-type contracts;
- evaluation of other-than-temporary impairments on available-for-sale securities and valuation allowances on mortgage loans;
- living benefits required to be fair valued (in other policyholder funds and benefits payable);
- goodwill impairment;
- valuation of investments and derivative instruments;
- valuation allowance on deferred tax assets; and
- contingencies relating to corporate litigation and regulatory matters.

Certain of these estimates are particularly sensitive to market conditions, and deterioration and/or volatility in the worldwide debt or equity markets could have a material impact on the Condensed Consolidated Financial Statements. In developing these estimates management makes subjective and complex judgments that are inherently uncertain and subject to material change as facts and circumstances develop. Although variability is inherent in these estimates, management believes the amounts provided are appropriate based upon the facts available upon compilation of the financial statements.

Table of Contents

Property and Casualty Insurance Product Reserves, Net of Reinsurance

Based on the results of the quarterly reserve review process, the Company determines the appropriate reserve adjustments, if any, to record. Recorded reserve estimates are changed after consideration of numerous factors, including but not limited to, the magnitude of the difference between the actuarial indication and the recorded reserves, improvement or deterioration of actuarial indications in the period, the maturity of the accident year, trends observed over the recent past and the level of volatility within a particular line of business. In general, adjustments are made more quickly to more mature accident years and less volatile lines of business. Such adjustments of reserves are referred to as “reserve development”. Reserve development that increases previous estimates of ultimate cost is called “reserve strengthening”. Reserve development that decreases previous estimates of ultimate cost is called “reserve releases”. Reserve development can influence the comparability of year over year underwriting results and is set forth in the paragraphs and tables that follow.

Reserve Roll Forwards and Development

A roll-forward of property and casualty insurance product liabilities for unpaid losses and loss adjustment expenses for the three months ended March 31, 2014 follows:

Three Months Ended March 31, 2014

	Property & Casualty Commercial	Consumer Markets	Property & Casualty Other Operations	Total Property and Casualty Insurance
Beginning liabilities for unpaid losses and loss adjustment expenses, gross	\$16,293	\$1,864	\$3,547	\$21,704
Reinsurance and other recoverables	2,442	13	573	3,028
Beginning liabilities for unpaid losses and loss adjustment expenses, net	13,851	1,851	2,974	18,676
Provision for unpaid losses and loss adjustment expenses				
Current accident year before catastrophes	934	590	—	1,524
Current accident year catastrophes [3]	60	26	—	86
Prior accident years	(7)(34)1	(40
Total provision for unpaid losses and loss adjustment expenses	987	582	1	1,570
Less: Payments	912	613	120	1,645
Ending liabilities for unpaid losses and loss adjustment expenses, net	13,926	1,820	2,855	18,601
Reinsurance and other recoverables	2,469	15	567	3,051
Ending liabilities for unpaid losses and loss adjustment expenses, gross	\$16,395	\$1,835	\$3,422	\$21,652
Earned premiums	\$1,541	\$928		
Loss and loss expense paid ratio [1]	59.2	66.1		
Loss and loss expense incurred ratio	64.0	62.7		
Prior accident years development (pts) [2]	(0.5)(3.7)	

[1] The “loss and loss expense paid ratio” represents the ratio of paid losses and loss adjustment expenses to earned premiums.

[2] “Prior accident years development (pts)” represents the ratio of prior accident years development to earned premiums.

[3] Contributing to the current accident year catastrophes losses were the following events:

Three Months Ended March 31, 2014

Category	Property &	Consumer Markets	Total
----------	------------	------------------	-------

	Casualty Commercial		Property and Casualty Insurance
Wind and Hail [1]	\$5	\$8	\$13
Winter Storm [1]	55	18	73
Total	\$60	\$26	\$86

[1] These amounts represent an aggregation of multiple catastrophes.

Table of Contents

Prior accident years development recorded in 2014

Included within prior accident years development for the three months ended March 31, 2014 were the following reserve strengthenings (releases):

Three Months Ended March 31, 2014

	Property & Casualty Commercial	Consumer Markets	Property & Casualty Other Operations	Total Property and Casualty Insurance
Auto liability	\$5	\$—	\$—	\$5
Homeowners	—	(13)—	(13)
Professional liability	(8)—	—	(8)
Package business	(3)—	—	(3)
General liability	—	—	—	—
Fidelity and surety	—	—	—	—
Commercial property	(3)—	—	(3)
Net environmental reserves	—	—	—	—
Workers' compensation	—	—	—	—
Change in workers' compensation discount, including accretion	8	—	—	8
Catastrophes	(12)(21)—	(33)
Other reserve re-estimates, net	6	—	1	7
Total prior accident years development	\$(7)\$(34)\$1	\$(40)

During the three months ended March 31, 2014, the Company's re-estimates of prior accident years reserves included the following significant reserve changes:

• Homeowner results emerged favorably for accident year 2013, primarily related to favorable development on fire and water-related claims in homeowners

• Released reserves in professional liability for accident year 2013 due to lower frequency of reported claims.

• Released reserves for accident year 2013 catastrophes as fourth quarter catastrophes have developed favorably.

• Refer to the Property & Casualty Other Operations Claims section for further discussion on net asbestos and net environmental reserves.

Table of Contents

A roll-forward of property and casualty insurance product liabilities for unpaid losses and loss adjustment expenses for the three months ended March 31, 2013 follows:

Three Months Ended March 31, 2013

	Property & Casualty Commercial	Consumer Markets	Property & Casualty Other Operations	Total Property and Casualty Insurance
Beginning liabilities for unpaid losses and loss adjustment expenses, gross	\$16,020	\$1,926	\$3,770	\$21,716
Reinsurance and other recoverables	2,365	16	646	3,027
Beginning liabilities for unpaid losses and loss adjustment expenses, net	13,655	1,910	3,124	18,689
Provision for unpaid losses and loss adjustment expenses				
Current accident year before catastrophes	968	568	—	1,536
Current accident year catastrophes [3]	6	26	—	32
Prior accident years	8	4	2	14
Total provision for unpaid losses and loss adjustment expenses	982	598	2	1,582
Less: Payments	989	653	89	1,731
Ending liabilities for unpaid losses and loss adjustment expenses, net	13,648	1,855	3,037	18,540
Reinsurance and other recoverables	2,387	8	615	3,010
Ending liabilities for unpaid losses and loss adjustment expenses, gross	\$16,035	\$1,863	\$3,652	\$21,550
Earned premiums	\$1,529	\$896		
Loss and loss expense paid ratio [1]	64.6	72.8		
Loss and loss expense incurred ratio	64.2	66.7		
Prior accident years development (pts) [2]	0.5	0.4		

[1] The “loss and loss expense paid ratio” represents the ratio of paid losses and loss adjustment expenses to earned premiums.

[2] “Prior accident years development (pts)” represents the ratio of prior accident years development to earned premiums.

[3] Contributing to the current accident year catastrophes losses were the following events:

Three Months Ended March 31, 2013

Category	Property & Casualty Commercial	Consumer Markets	Total Property and Casualty Insurance
Wind and Hail [1]	\$3	\$20	\$23
Winter Storm	3	6	9
Total	\$6	\$26	\$32

[1] These amounts represent an aggregation of multiple catastrophes.

Table of Contents

Prior accident years development recorded in 2013

Included within prior accident years development for the three months ended March 31, 2013 were the following reserve strengthenings (releases):

Three Months Ended March 31, 2013

	Property & Casualty Commercial	Consumer Markets	Property & Casualty Other Operations	Total Property and Casualty Insurance
Auto liability	\$15	\$—	\$—	\$15
Homeowners	—	(8)—	(8)
Professional liability	1	—	—	1
Package business	(11)—	—	(11)
General liability	(19)—	—	(19)
Fidelity and surety	(5)—	—	(5)
Commercial property	(4)—	—	(4)
Net environmental reserves	—	—	1	1
Workers' compensation	18	—	—	18
Change in workers' compensation discount, including accretion	8	—	—	8
Catastrophes	—	2	—	2
Other reserve re-estimates, net	5	10	1	16
Total prior accident years development	\$8	\$4	\$2	\$14

During the three months ended March 31, 2013, the Company's re-estimates of prior accident years reserves included the following significant reserve changes:

Strengthened reserves in commercial auto liability, primarily related to specialty program lines claims in accident years 2010 and 2011. Higher than expected bodily injury severity, driven by large loss activity, has been observed for these accident years.

Released reserves in package business liability coverages and general liability, primarily for accident years 2006 through 2011. Claim severity emergence for these years was lower than expected and management has placed more weight on the emerged experience.

Strengthened reserves in workers' compensation related to specialty captive lines claims for the 2010 and 2011 accident years. Higher than expected loss frequency has been observed in these accident years.

Refer to the Property & Casualty Other Operations Claims section for further discussion on net asbestos and net environmental reserves.

Table of Contents

Property & Casualty Other Operations Claims

Reserve Activity

Reserves and reserve activity in Property & Casualty Other Operations are categorized and reported as asbestos, environmental, or “all other”. The “all other” category of reserves covers a wide range of insurance and assumed reinsurance coverages, including, but not limited to, potential liability for construction defects, lead paint, silica, pharmaceutical products, molestation and other long-tail liabilities.

The following table presents reserve activity, inclusive of estimates for both reported and incurred but not reported claims, net of reinsurance, categorized by asbestos, environmental and all other claims, for the three months ended March 31, 2014.

Property & Casualty Other Operations Losses and Loss Adjustment Expenses

Three Months Ended March 31, 2014	Asbestos	Environmental	All Other [1]	Total
Beginning liability—net [2][3]	\$1,714	\$270	\$990	\$2,974
Losses and loss adjustment expenses incurred	—	—	1	1
Less: losses and loss adjustment expenses paid	67	7	46	120
Ending liability – net [2][3]	\$1,647	[4] \$263	\$945	\$2,855

In addition to various insurance and assumed reinsurance exposures, “All Other” includes unallocated loss adjustment expense reserves. “All Other” also includes The Company's allowance for uncollectible reinsurance.

[1] When the Company commutes a ceded reinsurance contract or settles a ceded reinsurance dispute, the portion of the allowance for uncollectible reinsurance attributable to that commutation or settlement, if any, is reclassified to the appropriate cause of loss.

[2] Excludes amounts reported in Property & Casualty Commercial and Consumer Markets reporting segments (collectively “Ongoing Operations”) for asbestos and environmental net liabilities of \$16 and \$8, respectively, as of March 31, 2014. Total net losses and loss adjustment expenses incurred for the three months ended March 31, 2014 includes \$4 related to asbestos and environmental claims. Total net losses and loss adjustment expenses paid for the three months ended March 31, 2014 includes \$3 related to asbestos and environmental claims.

[3] Gross of reinsurance, asbestos and environmental reserves, including liabilities in Ongoing Operations, were \$2,107 and \$306.

[4] The one year and average three year net paid amounts for asbestos claims, including Ongoing Operations, are \$216 and \$195, respectively, resulting in a one year net survival ratio of 7.7 and a three year net survival ratio of 8.5. Net survival ratio is the quotient of the net carried reserves divided by the average annual payment amount and is an indication of the number of years that the net carried reserve would last (i.e. survive) if the future annual claim payments were consistent with the calculated historical average.

For paid and incurred losses and loss adjustment expenses reporting, the Company classifies its asbestos and environmental reserves into three categories: Direct, Assumed Reinsurance and London Market. Direct insurance includes primary and excess coverage. Assumed reinsurance includes both “treaty” reinsurance (covering broad categories of claims or blocks of business) and “facultative” reinsurance (covering specific risks or individual policies of primary or excess insurance companies). London Market business includes the business written by one or more of the Company’s subsidiaries in the United Kingdom, which are no longer active in the insurance or reinsurance business. Such business includes both direct insurance and assumed reinsurance.

Of the three categories of claims (Direct, Assumed Reinsurance and London Market), direct policies tend to have the greatest factual development from which to estimate the Company’s exposures.

Assumed reinsurance exposures are inherently less predictable than direct insurance exposures because the Company may not receive notice of a reinsurance claim until the underlying direct insurance claim is mature. This causes a delay in the receipt of information at the reinsurer level and adds to the uncertainty of estimating related reserves. London Market exposures are the most uncertain of the three categories of claims. As a participant in the London Market (comprised of both Lloyd's of London and London Market companies), certain subsidiaries of the Company wrote business on a subscription basis, with those subsidiaries' involvement being limited to a relatively small percentage of a total contract placement. Claims are reported, via a broker, to the “lead” underwriter and, once agreed to,

are presented to the following markets for concurrence. This reporting and claim agreement process makes estimating liabilities for this business the most uncertain of the three categories of claims.

81

Table of Contents

The following table sets forth, for the three months ended March 31, 2014, paid and incurred loss activity by the three categories of claims for asbestos and environmental.

Paid and Incurred Losses and Loss Adjustment Expenses (“LAE”) Development – Asbestos and Environmental

	Asbestos [1]		Environmental [1]	
	Paid Losses & LAE	Incurred Losses & LAE	Paid Losses & LAE	Incurred Losses & LAE
Three Months Ended March 31, 2014				
Gross				
Direct	\$57	\$—	\$4	\$—
Assumed Reinsurance	11	—	—	—
London Market	5	—	3	—
Total	73	—	7	—
Ceded	(6)—	—	—
Net	\$67	\$—	\$7	\$—

[1] Excludes asbestos and environmental paid and incurred loss and LAE reported in Ongoing Operations. Total gross losses and LAE incurred in Ongoing Operations for the three months ended March 31, 2014 includes \$6 related to asbestos and environmental claims. Total gross losses and LAE paid in Ongoing Operations for the three months ended March 31, 2014 includes \$5 related to asbestos and environmental claims.

Uncertainties Regarding Adequacy of Asbestos and Environmental Reserves

A number of factors affect the variability of estimates for asbestos and environmental reserves including assumptions with respect to the frequency of claims, the average severity of those claims settled with payment, the dismissal rate of claims with no payment and the expense to indemnity ratio. The uncertainty with respect to the underlying reserve assumptions for asbestos and environmental adds a greater degree of variability to these reserve estimates than reserve estimates for more traditional exposures. While this variability is reflected in part in the size of the range of reserves developed by the Company, that range may still not be indicative of the potential variance between the ultimate outcome and the recorded reserves. The recorded net reserves as of March 31, 2014 of \$1.9 billion (\$1.67 billion and \$272 for asbestos and environmental, respectively) is within an estimated range, unadjusted for covariance, of \$1.6 billion to \$2.3 billion. The process of estimating asbestos and environmental reserves remains subject to a wide variety of uncertainties, which are detailed in the Company's 2013 Form 10-K Annual Report. The Company believes that its current asbestos and environmental reserves are appropriate. However, analyses of future developments could cause the Company to change its estimates and ranges of its asbestos and environmental reserves, and the effect of these changes could be material to the Company's consolidated operating results and liquidity.

Consistent with the Company's long-standing reserve practices, the Company will continue to review and monitor its reserves in Property & Casualty Other Operations regularly, including its annual reviews of asbestos liabilities, reinsurance recoverables and the allowance for uncollectible reinsurance, and environmental liabilities, and where future developments indicate, make appropriate adjustments to the reserves. For a discussion of the Company's reserving practices, see the Critical Accounting Estimates - Property and Casualty Insurance Product Reserves, Net of Reinsurance section of the MD&A included in the Company's 2013 Form 10-K Annual Report.

Table of Contents

Estimated Gross Profits Used in the Valuation and Amortization of Assets and Liabilities Associated with Variable Annuity and Other Universal Life-Type Contracts

Estimated gross profits are used in the amortization of: the deferred policy acquisition costs ("DAC") asset, which includes the present value of future profits; sales inducement assets ("SIA"); and unearned revenue reserves ("URR"). Portions of EGPs are also used in the valuation of reserves for death and other insurance benefit features on variable annuity and other universal life type contracts.

The most significant EGP based balances are as follows:

	Talcott Resolution	
	As of March 31, 2014	As of December 31, 2013
DAC [1]	\$1,470	\$1,552
SIA [1]	\$143	\$149
URR	\$47	\$50
Death and Other Insurance Benefit Reserves, net of reinsurance [2]	\$581	\$565

For additional information on DAC and SIA, see Note 8 - Deferred Policy Acquisition Costs and Present Value of [1] Future Profits and Note 9 - Sales Inducements, respectively, of Notes to Condensed Consolidated Financial Statements.

For additional information on death and other insurance benefit reserves, see Note 10 - Separate Accounts, Death [2] Benefits and Other Insurance Benefit Features of Notes to Condensed Consolidated Financial Statements.

Unlocks

The (charge) benefit to net income (loss) by asset and liability as a result of the Unlocks is as follows:

	Talcott Resolution	
	Three Months Ended March 31, 2014	2013
DAC	\$12	\$(904)
SIA	1	(56)
URR	—	2
Death and Other Insurance Benefit Reserves	9	126
Total (before tax)	\$22	\$(832)
Income tax effect	8	(291)
Total (after-tax)	\$14	\$(541)

The Unlock benefit, after-tax, for the three months ended March 31, 2014 was primarily due to actual separate account returns being above our aggregated estimated returns during the period. The Unlock charge, after-tax for the three months ended March 31, 2013 was primarily due to Japan hedge cost assumption changes of \$577 (\$887 pre-tax), partially offset by actual separate account returns being above our aggregated estimated returns during the period. An Unlock revises EGPs, on a quarterly basis, to reflect the Company's current best estimate assumptions and market updates of policyholder account value. Modifications to the Company's hedging programs may impact EGPs, and correspondingly impact DAC recoverability. After each quarterly Unlock, the Company also tests the aggregate recoverability of DAC by comparing the DAC balance to the present value of future EGPs. The margin between the DAC balance and the present value of future EGPs for U.S. individual variable annuities was 39% as of March 31, 2014. If the margin between the DAC asset and the present value of future EGPs is exhausted, then further reductions in EGPs would cause portions of DAC to be unrecoverable and the DAC asset would be written down to equal future EGPs.

Goodwill Impairment

Goodwill balances are reviewed for impairment at least annually or more frequently if events occur or circumstances change that would indicate that a triggering event for a potential impairment has occurred. The goodwill impairment test follows a two-step process. In the first step, the fair value of a reporting unit is compared to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the second step of the impairment test is performed for purposes of measuring the impairment. In the second step, the fair value of the reporting unit is allocated to all of the

assets and liabilities of the reporting unit to determine an implied goodwill value. If the carrying amount of the reporting unit's goodwill exceeds the implied goodwill value, an impairment loss is recognized in an amount equal to that excess.

Table of Contents

Management's determination of the fair value of each reporting unit incorporates multiple inputs into discounted cash flow calculations including assumptions that market participants would make in valuing the reporting unit. Assumptions include levels of economic capital, future business growth, earnings projections, assets under management for Mutual Funds, and the weighted average cost of capital used for purposes of discounting. Decreases in the amount of economic capital allocated to a reporting unit, decreases in business growth, decreases in earnings projections and increases in the weighted average cost of capital will all cause a reporting unit's fair value to decrease. A reporting unit is defined as an operating segment or one level below an operating segment. The Company's reporting units, for which goodwill has been allocated, are equivalent to the Company's operating segments as there is no discrete financial information available for the separate components of the operating segment, all of the components of the segment have similar economic characteristics, and it is the segment level that management reviews. The Group Benefits, Consumer Markets and Mutual Funds operating segments all have equivalent reporting units. Goodwill associated with the June 30, 2000 buyback of Hartford Life, Inc. was allocated to each of Hartford Life's reporting units based on the reporting unit's fair value of in-force business at the time of the buyback. Although this goodwill was allocated to each reporting unit it is held in Corporate for segment reporting. In 2013, the Company completed the sale of its Retirement Plans business to Mass Mutual. Accordingly, the carrying value of the reporting unit's goodwill of \$156 was eliminated and included in reinsurance loss on disposition in the Company's Consolidated Statements of Operations. The annual goodwill assessment for the Mutual Funds, Group Benefits, and Consumer Markets reporting units was completed during the fourth quarter of 2013, which resulted in no write-downs of goodwill for the year ended December 31, 2013. All reporting units passed the first step of their annual impairment test with a significant margin.

Table of Contents

KEY PERFORMANCE MEASURES AND RATIOS

The Company considers several measures and ratios to be the key performance indicators for its businesses. The following discussions include the more significant ratios and measures of profitability for the three months ended March 31, 2014 and 2013. Management believes that these ratios and measures are useful in understanding the underlying trends in The Hartford's businesses. However, these key performance indicators should only be used in conjunction with, and not in lieu of, the results presented in the segment discussions that follow in this MD&A. These ratios and measures may not be comparable to other performance measures used by the Company's competitors. For additional information on key performance measures and ratios, see Definitions of Non-GAAP and other measures and ratios within MD&A of The Hartford's 2013 Form 10-K Annual Report.

Definitions of Non-GAAP and other measures and ratios

Account Value

Account value includes policyholders' balances for investment contracts and reserves for future policy benefits for insurance contracts. Account value is a measure used by the Company because a significant portion of the Company's fee income is based upon the level of account value. These revenues increase or decrease with a rise or fall in the amount of account value whether caused by changes in the market or through net flows.

After-tax Margin, excluding buyouts and realized gains (losses)

After-tax margin, excluding buyouts and realized gains (losses), is a non-GAAP financial measure that the Company uses to evaluate, and believes is an important measure of, the Group Benefits segment's operating performance.

After-tax margin is the most directly comparable U.S. GAAP measure. The Company believes that after-tax margin, excluding buyouts and realized gains (losses), provides investors with a valuable measure of the performance of Group Benefits because it reveals trends in the business that may be obscured by the effect of buyouts and realized gains (losses). After-tax margin, excluding buyouts and realized gains (losses), should not be considered as a substitute for after-tax margin and does not reflect the overall profitability of Group Benefits. Therefore, the Company believes it is important for investors to evaluate both after-tax margin, excluding buyouts and realized gains (losses), and after-tax margin when reviewing performance. After-tax margin, excluding buyouts and realized gains (losses) is calculated by dividing core earnings excluding buyouts and realized gains (losses) by total core revenues excluding buyouts and realized gains (losses). A reconciliation of after-tax margin to after-tax margin, core earnings excluding buyouts and realized gains (losses) for the three months ended March 31, 2014 and 2013 is set forth in the After-tax Margin section within MD&A - Group Benefits.

Assets Under Management

Assets under management ("AUM") include account values and mutual fund assets. AUM is a measure used by the Company because a significant portion of the Company's revenues are based upon asset values. These revenues increase or decrease with a rise or fall in the amount of account value whether caused by changes in the market or through net flows.

Catastrophe ratio

The catastrophe ratio (a component of the loss and loss adjustment expense ratio) represents the ratio of catastrophe losses incurred in the current calendar year (net of reinsurance) to earned premiums and includes catastrophe losses incurred for both the current and prior accident years. A catastrophe is an event that causes \$25 or more in industry insured property losses and affects a significant number of property and casualty policyholders and insurers. The catastrophe ratio includes the effect of catastrophe losses, but does not include the effect of reinstatement premiums.

Combined ratio

The combined ratio is the sum of the loss and loss adjustment expense ratio, the expense ratio and the policyholder dividend ratio. This ratio is a relative measurement that describes the related cost of losses and expenses for every \$100 of earned premiums. A combined ratio below 100 demonstrates underwriting profit; a combined ratio above 100 demonstrates underwriting losses.

Combined ratio before catastrophes and prior accident year development

The combined ratio before catastrophes and prior accident year development, a non-GAAP financial measure, represents the combined ratio for the current accident year, excluding the impact of catastrophes. Combined ratio is the most directly comparable U.S. GAAP measure. A reconciliation of combined ratio to combined ratio before prior

accident year reserve development for the three months ended March 31, 2014 and 2013 is set forth in MD&A - Property & Casualty Commercial and Consumer Markets.

85

Table of Contents

Core Earnings

Core earnings, a non-GAAP measure, is an important measure of the Company's operating performance. The Company believes that core earnings provides investors with a valuable measure of the performance of the Company's ongoing businesses because it reveals trends in our insurance and financial services businesses that may be obscured by including the net effect of certain realized capital gains and losses, discontinued operations, loss on extinguishment of debt, gains and losses on business disposition transactions, certain restructuring charges and the impact of Unlocks to DAC, SIA, URR and death and other insurance benefit reserve balances. Some realized capital gains and losses are primarily driven by investment decisions and external economic developments, the nature and timing of which are unrelated to the insurance and underwriting aspects of our business. Accordingly, core earnings excludes the effect of all realized gains and losses (net of tax and the effects of DAC) that tend to be highly variable from period to period based on capital market conditions. The Company believes, however, that some realized capital gains and losses are integrally related to our insurance operations, so core earnings includes net realized gains and losses such as net periodic settlements on credit derivatives and net periodic settlements on the Japan fixed annuity cross-currency swap. These net realized gains and losses are directly related to an offsetting item included in the income statement such as net investment income. Net income (loss) is the most directly comparable U.S. GAAP measure. Core earnings should not be considered as a substitute for net income (loss) and does not reflect the overall profitability of the Company's business. Therefore, the Company believes that it is useful for investors to evaluate both net income (loss) and core earnings when reviewing the Company's performance.

A reconciliation of net income (loss) to core earnings is set forth below.

	Three Months Ended March 31,	
	2014	2013
Net income (loss)	\$495	\$(241)
Less: Unlock benefit (charge), after-tax	14	(541)
Less: Restructuring and other costs, after-tax	(13)(12)
Less: Loss from discontinued operations, after-tax	—	(1)
Less: Loss on extinguishment of debt, after-tax	—	(138)
Less: Net reinsurance loss on dispositions, after-tax	—	(25)
Less: Net realized capital gains (losses), after-tax and DAC, excluded from core earnings [1]	(70)19
Core earnings	\$564	\$457

Excludes net realized gain on dispositions of \$1.0 billion, after-tax, for the three months ended March 31, 2013 [1] relating to the sales of the Retirement Plans and Individual Life businesses which are included in net reinsurance loss on dispositions, after-tax.

Current accident year loss and loss adjustment expense ratio before catastrophes

The current accident year loss and loss adjustment expense ratio before catastrophes is a measure of the cost of non-catastrophe claims incurred in the current accident year divided by earned premiums. Management believes that the current accident year loss and loss adjustment expense ratio before catastrophes is a performance measure that is useful to investors as it removes the impact of volatile and unpredictable catastrophe losses and prior accident year reserve development.

Expense ratio

The expense ratio for the underwriting segments of Property & Casualty Commercial and Consumer Markets is the ratio of underwriting expenses, excluding bad debt expense and certain corporate expenses, to earned premiums. Underwriting expenses include the amortization of deferred policy acquisition costs and insurance operating costs and expenses. Deferred policy acquisition costs include commissions, taxes, licenses and fees and other underwriting expenses and are amortized over the policy term.

The expense ratio for Group Benefits is expressed as a ratio of insurance operating costs and other expenses and amortization of deferred policy acquisition costs, to premiums and other considerations, excluding buyout premiums.

Fee Income

Fee income is largely driven from amounts collected as a result of contractually defined percentages of assets under management. These fees are generally collected on a daily basis. Therefore, the growth in assets under management either through positive net flows or net sales, or favorable equity market performance will have a favorable impact on fee income. Conversely, either negative net flows or net sales, or unfavorable equity market performance will reduce fee income.

Full Surrender Rates

Full surrender rates are an internal measure of contract surrenders calculated using annualized full surrenders divided by a two-point average of annuity account values. The full surrender rate represents full contract liquidation and excludes partial withdrawals. Japan full surrender rates also do not include policies that lapse upon reaching their annuity commencement date.

Table of Contents

Loss and loss adjustment expense ratio

The loss and loss adjustment expense ratio is a measure of the cost of claims incurred in the calendar year divided by earned premium and includes losses incurred for both the current and prior accident years, as well as the costs of mortality and morbidity and other contractholder benefits to policyholders. Among other factors, the loss and loss adjustment expense ratio needed for the Company to achieve its targeted return on equity fluctuates from year to year based on changes in the expected investment yield over the claim settlement period, the timing of expected claim settlements and the targeted returns set by management based on the competitive environment.

The loss and loss adjustment expense ratio is affected by claim frequency and claim severity, particularly for shorter-tail property lines of business, where the emergence of claim frequency and severity is credible and likely indicative of ultimate losses. Claim frequency represents the percentage change in the average number of reported claims per unit of exposure in the current accident year compared to that of the previous accident year. Claim severity represents the percentage change in the estimated average cost per claim in the current accident year compared to that of the previous accident year. As one of the factors used to determine pricing, the Company's practice is to first make an overall assumption about claim frequency and severity for a given line of business and then, as part of the ratemaking process, adjust the assumption as appropriate for the particular state, product or coverage.

Loss ratio, excluding buyouts

The loss ratio is utilized for the Group Benefits segment and is expressed as a ratio of benefits, losses and loss adjustment expenses to premiums and other considerations, excluding buyout premiums. Since Group Benefits occasionally buys a block of claims for a stated premium amount, the Company excludes this buyout from the loss ratio used for evaluating the underwriting results of the business as buyouts may distort the loss ratio. Buyout premiums represent takeover of open claim liabilities and other non-recurring premium amounts.

Mutual Fund Assets

Mutual fund assets are owned by the shareholders of those funds and not by the Company and therefore are not reflected in the Company's consolidated financial statements. Mutual fund assets are a measure used by the Company because a significant portion of the Company's revenues are based upon asset values. These revenues increase or decrease with a rise or fall in the amount of account value whether caused by changes in the market or through net flows.

New business written premium

New business written premium represents the amount of premiums charged for policies issued to customers who were not insured with the Company in the previous policy term. New business written premium plus renewal policy written premium equals total written premium.

Policies in force

Policies in force represent the number of policies with coverage in effect as of the end of the period. The number of policies in force is a growth measure used for Consumer Markets and standard commercial lines within Property & Casualty Commercial and is affected by both new business growth and premium renewal retention.

Policy count retention

Policy count retention represents the ratio of the number of policies renewed during the period divided by the number of policies from the previous policy term period. The number of policies available to renew from the previous policy term represents the number of policies written in the previous policy term net of any cancellations of those policies. Policy count retention is affected by a number of factors, including the percentage of renewal policy quotes accepted and decisions by the Company to non-renew policies because of specific policy underwriting concerns or because of a decision to reduce premium writings in certain classes of business or states. Policy count retention is also affected by advertising and rate actions taken by competitors.

Policyholder dividend ratio

The policyholder dividend ratio is the ratio of policyholder dividends to earned premium.

Prior accident year loss and loss adjustment expense ratio

The prior year loss and loss adjustment expense ratio represents the increase (decrease) in the estimated cost of settling catastrophe and non-catastrophe claims incurred in prior accident years as recorded in the current calendar year divided by earned premiums.

Reinstatement premiums

Reinstatement premium represents additional ceded premium paid for the reinstatement of the amount of reinsurance coverage that was reduced as a result of a reinsurance loss payment.

87

Table of Contents

Renewal earned price increase (decrease)

Written premiums are earned over the policy term, which is six months for certain personal lines auto business and 12 months for substantially all of the remainder of the Company's property and casualty business. Because the Company earns premiums over the 6 to 12 month term of the policies, renewal earned price increases (decreases) lag renewal written price increases (decreases) by 6 to 12 months.

Renewal written price increase (decrease)

Renewal written price increase (decrease) represents the combined effect of rate changes, amount of insurance and individual risk pricing decisions per unit of exposure since the prior year. The rate component represents the change in rate filings during the period and the amount of insurance represents the change in the value of the rating base, such as model year/vehicle symbol for auto, building replacement costs for property and wage inflation for workers' compensation. A number of factors affect renewal written price increases (decreases) including expected loss costs as projected by the Company's pricing actuaries, rate filings approved by state regulators, risk selection decisions made by the Company's underwriters and marketplace competition. Renewal written price changes reflect the property and casualty insurance market cycle. Prices tend to increase for a particular line of business when insurance carriers have incurred significant losses in that line of business in the recent past or the industry as a whole commits less of its capital to writing exposures in that line of business. Prices tend to decrease when recent loss experience has been favorable or when competition among insurance carriers increases. Renewal written price statistics are subject to change from period to period, based on a number of factors, including changes in actuarial estimates and the effect of subsequent cancellations and non-renewals on rate achieved, and modifications made to better reflect ultimate pricing achieved.

Return on Assets ("ROA"), core earnings

ROA, core earnings, is a non-GAAP financial measure that the Company uses to evaluate, and believes is an important measure of, certain of the segment's operating performance. ROA is the most directly comparable U.S. GAAP measure. The Company believes that ROA, core earnings, provides investors with a valuable measure of the performance of certain of the Company's on-going businesses because it reveals trends in our businesses that may be obscured by the effect of realized gains (losses). ROA, core earnings, should not be considered as a substitute for ROA and does not reflect the overall profitability of our businesses. Therefore, the Company believes it is important for investors to evaluate both ROA, core earnings, and ROA when reviewing the Company's performance. ROA is calculated by dividing core earnings by a two-point average AUM. A reconciliation of ROA to ROA, core earnings for the three months ended March 31, 2014 and 2013 is set forth in the ROA section within MD&A - Mutual Funds.

Underwriting gain (loss)

The Company's management evaluates profitability of the P&C businesses primarily on the basis of underwriting gain (loss). Underwriting gain (loss) is a before tax measure that represents earned premiums less incurred losses, loss adjustment expenses and underwriting expenses. Underwriting gain (loss) is influenced significantly by earned premium growth and the adequacy of the Company's pricing. Underwriting profitability over time is also greatly influenced by the Company's underwriting discipline, which seeks to manage exposure to loss through favorable risk selection and diversification, its management of claims, its use of reinsurance and its ability to manage its expense ratio, which it accomplishes through economies of scale and its management of acquisition costs and other underwriting expenses. The Company believes that underwriting gain (loss) provides investors with a valuable measure of before tax profitability derived from underwriting activities, which are managed separately from the Company's investing activities. A reconciliation of underwriting gain (loss) to net income for Property & Casualty Commercial and Consumer Markets is set forth in their respective discussions herein.

Written and earned premiums

Written premium is a statutory accounting financial measure which represents the amount of premiums charged for policies issued, net of reinsurance, during a fiscal period. Earned premium is a U.S. GAAP and statutory measure. Premiums are considered earned and are included in the financial results on a pro rata basis over the policy period. Management believes that written premium is a performance measure that is useful to investors as it reflects current trends in the Company's sale of property and casualty insurance products. Written and earned premium are recorded net of ceded reinsurance premium.

Traditional life insurance type products, such as those sold by Group Benefits, collect premiums from policyholders in exchange for financial protection for the policyholder from a specified insurable loss, such as death or disability. These premiums together with net investment income earned from the overall investment strategy are used to pay the contractual obligations under these insurance contracts. Two major factors, new sales and persistency, impact premium growth. Sales can increase or decrease in a given year based on a number of factors, including but not limited to, customer demand for the Company's product offerings, pricing competition, distribution channels and the Company's reputation and ratings. Persistency refers to the percentage of policies remaining in-force from year-to-year.

Table of Contents

Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net income, compared to the prior year period, decreased for the three months ended March 31, 2014 primarily due to unfavorable current accident year catastrophes and realized capital losses, partially offset by a lower current accident year loss and loss adjustment expense ratio before catastrophes and a reduction in underwriting expenses.

Earned premiums, compared to the prior year period, increased for the three months ended March 31, 2014 reflecting written premium growth over the preceding twelve months. Written premiums, compared to the prior year period, increased for the three months ended March 31, 2014 in small commercial and middle market, partially offset by a decline in premiums in specialty commercial. Written premium increases in small commercial were driven primarily by higher renewal premium in all lines, particularly workers' compensation. Written premium increases in middle market were driven primarily by higher renewal premium in general liability and property and higher new business premium. Written premium decreases in specialty commercial were primarily the result of continued underwriting actions to reposition the business and exit unprofitable programs, partially offset by growth in national accounts and financial products.

Losses and loss adjustment expenses reflect lower current accident year losses before catastrophes in all three lines of business and favorable prior accident years development, partially offset by an increase in current accident year catastrophes.

Favorable current accident year losses and loss adjustment expenses before catastrophes were primarily driven by lower loss and loss adjustment expenses in workers' compensation due to favorable frequency and severity trends and lower non-catastrophe property losses in middle market. The current accident year loss and loss adjustment expense ratio before catastrophes decreased accordingly by 2.7 points to 60.6 in 2014 from 63.3 in 2013.

Current accident year catastrophe losses of \$60, before tax, for the three months ended March 31, 2014, compared to \$6, before tax, for the three months ended March 31, 2013. Increased losses for the three months ended March 31, 2014 were primarily due to unfavorable winter storm frequency and severity across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.

Prior accident years reserve release of \$7, before tax, for the three months ended March 31, 2014, compared to reserve strengthening of \$8, before tax, for the three months ended March 31, 2013. Development for the three months ended March 31, 2014 was primarily due to reserve releases related to 2013 catastrophes and professional liability, partially offset by workers' compensation discount accretion. Development for the three months ended March 31, 2013 was primarily due to strengthening related to workers' compensation and auto liability, partially offset by a release of general liability and package business reserves. For additional information, see MD&A - Critical Accounting Estimates, Reserve Roll-forwards and Development.

Underwriting expenses, compared to the prior year period, reflect a reduction of \$49 in the Company's estimated liability for NY State Workers' Compensation Board assessments due to a change in legislation effective January 1, 2014.

The combined ratio, before catastrophes and prior year development, improved 5.4 points to 87.7 for the three months ended March 31, 2014 from 93.1 for the three months ended March 31, 2013. The decrease primarily reflects a favorable decrease in the expense ratio and the current accident year loss and loss adjustment expense ratio before catastrophes.

For discussion of investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses).

The effective tax rates in 2014 and 2013 differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see the Income Taxes section within Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements.

Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net income, compared to the prior year period, increased for the three months ended March 31, 2014 primarily due to improved underwriting gains driven by earned premium growth, lower underwriting expenses and favorable prior year development partially offset by higher current accident year losses before catastrophes.

Earned premiums increased for the three months ended March 31, 2014 reflecting new business written premium growth in auto and home across all channels and premium retention in auto and home due to earned pricing increases and policy retention.

Losses and loss adjustment expenses reflect favorable prior accident years development partially offset by higher current accident year losses before catastrophes.

Unfavorable current accident year losses and loss adjustment expenses before catastrophes were primarily driven by the impact of higher homeowners and auto physical damage claims due to a harsh winter. However, the current accident year loss and loss adjustment expense ratio before catastrophes of 63.6 in 2014 is comparable with 63.4 in 2013.

Table of Contents

Current accident year catastrophe losses of \$26, before tax, for the three months ended March 31, 2014 remained consistent with the prior year period. Losses for the three months ended March 31, 2014 were primarily driven by unfavorable winter storm frequency and severity across various U.S. geographic regions. Losses for the three months ended March 31, 2013 were primarily driven by multiple wind and hail events across various U.S. geographic regions. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.

Prior accident years reserve release of \$34, before tax, for the three months ended March 31, 2014 compared to a strengthening of \$4, before tax, for the prior year period. Reserve releases for the three months ended March 31, 2014 were primarily related to favorable development on accident year 2013 fire and water-related homeowners claims, and reserve releases related to fourth quarter 2013 catastrophes. For additional information, see MD&A - Critical Accounting Estimates, Property and Casualty Insurance Product Reserves, Net of Reinsurance.

The combined ratio, before current accident year catastrophes and prior year development, improved 1.2 points to 87.4 for the three months ended March 31, 2014. The improvement primarily reflects a decrease in the expense ratio due to higher earned premiums as well as reduced AARP marketing costs.

For discussion of investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses).

The effective tax rates in 2014 and 2013 differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see the Income Taxes section within Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements.

[1] Group Benefits has a block of Association - Financial Institutions business that is subject to a profit sharing arrangement with third parties. The Association - Financial Institutions business represented \$44 and \$72 of premiums and other considerations, and \$1 and \$0 of net income (loss) for the three months ended March 31, 2014 and 2013, respectively.

Table of Contents

Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net income, compared to the prior year period, increased for the three months ended March 31, 2014 and was driven primarily by lower benefits, losses and loss adjustment expenses and insurance operating costs and other expenses, partially offset by a decrease in premiums and other considerations.

Premiums and other considerations decreased for the three months ended March 31, 2014, compared to the prior year period, due to management actions related to the Association - Financial Institutions block of business. Insurance operating costs and other expenses decreased for the three months ended March 31, 2014, compared to the prior year period, due to lower commission payments as a result of overall lower premiums.

The improvement in the loss ratio for the three months ended March 31, 2014 was primarily attributable to the long-term disability product reflecting improved incidence trends, continued strong claim recoveries and improved pricing. The increase in after-tax margin, excluding buyouts and net realized capital gains (losses), was primarily due to the improved loss ratio.

For discussion of investment results, see MD&A - Investment Results, Investment Income (Loss) and Net Realized Capital Gains (Losses).

The effective tax rates in 2014 and 2013 differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in tax exempt securities. For further discussion of income taxes, see the Income Taxes section within Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements.

Retrospectively adjusted to conform to the current year method of reporting revenues and expenses. Fee income and directly related expenses previously reported as gross amounts are being reported as a net amount in insurance [1] operating costs and other expenses. This change in the method of reporting revenues and expenses did not have a material impact on the segment's operating results.

[2] Includes mutual funds offered within 529 college savings plans.

[3] Includes mutual funds offered within employee directed retirement plans including on-going business related to the Company's Retirement Plans and Individual Life businesses sold in January 2013.

[4] Includes Company-sponsored mutual fund assets held in separate accounts supporting variable insurance and investment products.

Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net income, compared to the prior year period, increased for the three months ended March 31, 2014 primarily due to higher fee income driven by higher average AUM, partially offset by increased variable expenses (primarily sub-advisory and distribution). Average AUM for the three months ended March 31, 2014 increased 8% compared to average AUM for the three months ended March 31, 2013 due to favorable market performance of the Company's funds somewhat offset by net outflows.

Total mutual funds sales, compared to the prior year period, decreased for the three months ended March 31, 2014 due to a decline in retail mutual funds sales, partially offset by an increase in retirement fund sales. Net flows for retail and retirement funds were positive in the three months ended March 31, 2014 as sales outpaced redemptions. Redemptions in the period improved over the prior year period and drove positive net flows for the first time since 2011.

Includes investment income and mark-to-market effects of equity securities, trading, supporting the international [1] variable annuity business, which are classified in net investment income with corresponding amounts credited to policyholders within benefits, losses and loss adjustment expenses.

Included in the total account value is approximately \$(1.0) billion as of March 31, 2014 and \$(1.2) billion as of [2] March 31, 2013 related to a Talcott Resolution intra-segment funding agreement which is eliminated in consolidation.

Other account value includes \$54.3 billion, \$14.7 billion, and \$39.0 billion as of March 31, 2014 and \$51.8 billion, \$13.2 billion, and \$37.8 billion at March 31, 2013 for the Retirement Plans, Individual Life, and Private Placement [3] Life Insurance, respectively. Account values associated with the Retirement Plans, and Individual Life businesses no longer generate asset-based fee income due to the sales of these businesses.

[4]

Represents the loss from operations and sale of Hartford Life International Limited ("HLIL"). For additional information, see Note 14 Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

Table of Contents

Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net income (loss), compared to the prior year period, increased for the three months ended March 31, 2014. Net income for the three months ended March 31, 2014 was primarily driven by the effect of a \$832 Unlock charge in 2013, higher returns on limited partnerships and other alternative investments, and lower costs associated with the U.S. variable annuity enhanced surrender value program, partially offset by a change to realized capital losses in 2014 and the effect of a decline in fee income due to variable annuity surrender activity.

The Unlock benefit increased to \$22, before tax, for the three months ended March 31, 2014 from a charge of \$832 before tax for the three months ended March 31, 2013. The Unlock charge of \$832, before tax, for three months ended March 31, 2013 was due to hedge cost assumption changes associated with expanding the Japan variable annuity hedging program in the first quarter of 2013. Within other net realized capital gains (losses), variable annuity hedge program losses for the three months ended March 31, 2014 were \$27, before tax, including international losses of \$32, compared to losses of \$209, including international losses of \$171, for the prior year period.

For further discussion of investment results and the results of the variable annuity hedge program, see MD&A – Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses). For further discussion of Unlocks, see MD&A - Critical Accounting Estimates, Estimated Gross Profits Used in the Valuation and Amortization of Assets and Liabilities Associated with Variable Annuity and Other Universal Life-Type Contracts. The 2014 and 2013 effective tax rates differ from the U.S. Federal statutory rate of 35% primarily due to permanent differences related to investments in separate account DRD. For further discussion of income taxes, see the Income Taxes section within Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements.

Account values for Talcott Resolution decreased to approximately \$214 billion at March 31, 2014 from approximately \$228 billion at March 31, 2013 due primarily to increased net outflows offset by positive currency translation impacts, and market value appreciation in variable annuities. For the three months ended March 31, 2014 variable annuity net outflows increased by approximately \$1.1 billion as compared to the prior year period driven by increased net outflows in Japan variable annuities with an increase in policy surrenders as a result of market appreciation and the expiration of the surrender charge period as the block of business ages.

For the three months ended March 31, 2014 the annualized full surrender rate on U.S. variable annuities declined to 12.3% compared to 14.5% for the three months ended March 31, 2013. For the three months ended March 31, 2014 the annualized full surrender rate on Japan variable annuities rose to 38.1% compared to 9.6% for the three months ended March 31, 2013. Surrender activity in Japan has increased significantly over the past year as market appreciation has resulted in an increased number of contracts with account values exceeding guaranteed amounts. Contract counts decreased 14% and 33% for U.S. and Japan variable annuities, respectively, at March 31, 2014 compared to March 31, 2013. In addition, 72% of Japan policyholders who reached their annuity commencement date chose the lump sum option. This represents \$264 of account value that chose a lump sum. The Company expects annuity account values and consequently earnings to continue to decline over time as fee income decreases due to surrenders, policyholder initiatives or potential transactions with third parties that will reduce the size of the related book of business.

Table of Contents

CORPORATE

	Three Months Ended March 31,			
	2014	2013	Change	
Operating Summary				
Fee income [1]	\$3	\$3	—	%
Net investment income	2	13	(85	%)
Net realized capital losses	(9)(96)(91	%)
Total revenues	(4)(80)(95	%)
Insurance operating costs and other expenses [1]	32	42	(24	%)
Loss on extinguishment of debt	—	213	(100	%)
Reinsurance loss on disposition	—	69	(100	%)
Interest expense	95	107	(11	%)
Total benefits, losses and expenses	127	431	(71	%)
Loss from continuing operations before income taxes	(131)(511)(74	%)
Income tax benefit	(46)(153)(70	%)
Net loss	\$(85)\$ (358)(76	%)

Fee income includes the income associated with the sales of non-proprietary insurance products in the Company's [1] broker-dealer subsidiaries that has an offsetting commission expense in insurance operating costs and other expenses.

Three months ended March 31, 2014 compared to the three months ended March 31, 2013

Net loss decreased for the three months ended March 31, 2014 compared to the prior period primarily due to decreases in net realized capital losses, losses on extinguishment of debt and, reinsurance losses on dispositions in 2013 and lower interest expense. For discussion of investment results, see MD&A - Investment Results, Net Investment Income (Loss) and Net Realized Capital Gains (Losses).

In March 2013, the Company repurchased approximately \$800 of senior notes at a premium to the face amount of the then outstanding debt. The resulting loss on extinguishment of debt of \$213 consists of the repurchase premium, the write-off of the unamortized discount, and debt issuance and other costs related to the repurchase transaction. The decrease in interest expense for the three months ended March 31, 2014 is largely due to this debt repurchase.

In connection with the disposition of the Retirement Plans business in January 2013, the Company also wrote off goodwill of \$69 representing all of the goodwill held in Corporate and allocated to Retirement Plans related to the Hartford Life, Inc. buyback in 2000.

For a reconciliation of the tax provision at the U.S. Federal statutory rate of 35% to the provision (benefit) for income taxes, see the Income Taxes section of Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements.

Table of Contents

ENTERPRISE RISK MANAGEMENT

The Company has an enterprise risk management function (“ERM”) that is charged with providing analysis of the Company’s risks on an individual and aggregated basis and with ensuring that the Company’s risks remain within its risk appetite and tolerances. The Company has established the Enterprise Risk and Capital Committee (“ERCC”) that includes the Company’s CEO, Chief Financial Officer (“CFO”), Chief Investment Officer (“CIO”), Chief Risk Officer, the divisional Presidents and the General Counsel. The ERCC is responsible for managing the Company’s risks and overseeing the enterprise risk management program.

The Company categorizes its main risks as follows:

Insurance Risk

Operational Risk

Financial Risk

Refer to the MD&A in The Hartford’s 2013 Form 10-K Annual Report for an explanation of the Company’s Operational Risk.

Insurance Risk Management

The Company categorizes its insurance risks across both property-casualty and life products. The Company establishes risk limits to control potential loss and actively monitors the risk exposures as a percent of statutory surplus. The Company also uses reinsurance to transfer insurance risk to well-established and financially secure reinsurers.

Reinsurance as a Risk Management Strategy

The Company utilizes reinsurance to transfer risk to affiliated and unaffiliated insurers in order to limit its maximum losses and to diversify its exposures and provide statutory surplus relief. Such arrangements do not relieve the Company of its primary liability to policyholders. Failure of reinsurers to honor their obligations could result in losses to the Company. Reinsurance is used to manage aggregation of risk as well as to transfer certain risk to reinsurance companies based on specific geographic or risk concentrations.

The Company is a member of and participates in several reinsurance pools and associations. The Company evaluates the financial condition of its reinsurers and concentrations of credit risk. Reinsurance is placed with reinsurers that meet strict financial criteria established by the Company.

Reinsurance for Catastrophes

The Company has several catastrophe reinsurance programs, including reinsurance treaties that cover property and workers' compensation losses aggregating from single catastrophe events. The following table summarizes the primary catastrophe treaty reinsurance coverages that the Company has in place as of January 1, 2014:

Coverage	Treaty term	% of layer(s) reinsurance	Per occurrence limit	Retention
Principal property catastrophe program covering property catastrophe losses from a single event	1/1/2014 to 1/1/2015	90%	\$850	\$350
Reinsurance with the FHCF covering Florida Personal Lines property catastrophe losses from a single event	6/1/2013 to 6/1/2014	90%	119	[1] 43
Workers compensation losses arising from a single catastrophe event [2]	7/1/2013 to 7/1/2014	80%	350	100

The per occurrence limit on the FHCF treaty is \$119 for the 6/1/2013 to 6/1/2014 treaty year based on the [1] Company's election to purchase the required coverage from FHCF. Coverage is based on the best available information from FHCF, which was updated in January 2014.

[2] In addition, to the limit shown above, the workers compensation reinsurance includes a non-catastrophe, industrial accident layer, 80% of \$30 excess a \$20 retention.

Table of Contents

Reinsurance Recoverables

Reinsurance Security

To manage reinsurer credit risk, a reinsurance security review committee evaluates the credit standing, financial performance, management and operational quality of each potential reinsurer. Through this process, the Company maintains a centralized list of reinsurers approved for participation in reinsurance transactions. Only reinsurers approved through this process are eligible to participate in new reinsurance transactions. The Company's approval designations reflect the differing credit exposure associated with various classes of business. Participation eligibility is categorized based upon the nature of the risk reinsured, including the expected liability payout duration. In addition to defining participation eligibility, the Company regularly monitors credit risk exposure to each reinsurance counterparty and has established limits tiered by counterparty credit rating. For further discussions on how the Company manages and mitigates third party credit risk, refer to the Credit Risk section.

Property and Casualty Insurance Product Reinsurance Recoverable

Property and casualty insurance product reinsurance recoverables represent loss and loss adjustment expense recoverables from a number of entities, including reinsurers and pools. The components of the gross and net reinsurance recoverable are as follows:

Reinsurance Recoverable	As of March 31, 2014	As of December 31, 2013
Paid loss and loss adjustment expenses	\$ 115	\$ 138
Unpaid loss and loss adjustment expenses	2,862	2,841
Gross reinsurance recoverable	\$2,977	\$2,979
Less: Allowance for uncollectible reinsurance	(245)(244
Net reinsurance recoverable	\$2,732	\$2,735

Life Insurance Product Reinsurance Recoverable

Life insurance product reinsurance recoverables represent future policy benefits and unpaid loss and loss adjustment expenses and other policyholder funds and benefits payable that are recoverable from a number of reinsurers. The components of the gross and net reinsurance recoverable are as follows:

Reinsurance Recoverable	As of March 31, 2014	As of December 31, 2013
Future policy benefits and unpaid loss and loss adjustment expenses and other policyholder funds and benefits payable	20,407	20,595
Gross reinsurance recoverable [1]	\$20,407	\$20,595

[1] No allowance for uncollectible reinsurance is required as of period end.

As of March 31, 2014, the Company has reinsurance recoverables from MassMutual and Prudential of \$9.1 billion and \$10.0 billion, respectively. These reinsurance recoverables are secured by invested assets held in trust for the benefit of the Company in the event of a default by the reinsurers. As of March 31, 2014, the fair value of assets held in trust securing the reinsurance recoverables from MassMutual and Prudential were \$9.7 billion and \$8.1 billion, respectively. As of March 31, 2014, the Company has no other reinsurance-related concentrations of credit risk greater

than 10% of the Company's stockholders' equity.

For further explanation of the Company's Insurance Risk Management strategy, see MD&A - Enterprise Risk Management - Insurance Risk Management in The Hartford's 2013 Form 10-K Annual Report.

Financial Risk Management

The Company identifies the following categories of financial risk:

• Liquidity Risk

• Interest Rate Risk

• Foreign Currency Exchange Risk

• Equity Risk

• Credit Risk

Table of Contents

Financial risks include direct, and indirect risks to the Company's financial objectives coming from events that impact market conditions or prices. Financial risk also includes exposure to events that may cause correlated movement in multiple risk factors. The primary source of financial risks are the Company's general account assets and the liabilities which those assets back, together with the guarantees which the company has written over various liability products, particularly its portfolio of variable annuities. The Company assesses its financial risk on a U.S. GAAP, statutory and economic basis. The Hartford has developed a disciplined approach to financial risk management that is well integrated into the Company's underwriting, pricing, hedging, claims, asset and liability management, new product, and capital management processes. Consistent with its risk appetite, the Company establishes financial risk limits to control potential loss. Exposures are actively monitored, and mitigated where appropriate. The Company uses various risk management strategies, including reinsurance and over-the-counter and exchange traded derivatives to counterparties meeting the appropriate regulatory and due diligence requirements.

Liquidity Risk

Liquidity risk is the risk to current or prospective earnings or capital arising from the Company's inability or perceived inability to meet its contractual cash obligations at the legal entity level when they come due over given time horizons without incurring unacceptable costs and without relying on uncommitted funding sources. Liquidity risk includes the inability to manage unplanned increases or accelerations in cash outflows, decreases or changes in funding sources, and changes in market conditions that affect the ability to liquidate assets quickly to meet obligations with minimal loss in value. Components of liquidity risk include funding risk, company specific liquidity risk and market liquidity risk. Funding risk is the gap between sources and uses of cash under normal and stressed conditions taking into consideration structural, regulatory and legal entity constraints. Changes in institution-specific conditions that affect the Company's ability to sell assets or otherwise transact business without incurring a significant loss in value is company specific liquidity risk. Changes in general market conditions that affect the institution's ability to sell assets or otherwise transact business without incurring a significant loss in value is market liquidity risk.

The Company has defined ongoing monitoring and reporting requirements to assess liquidity across the enterprise. The Company measures and manages liquidity risk exposures and funding needs within prescribed limits and across legal entities, business lines and currencies, taking into account legal, regulatory and operational limitations to the transferability of liquidity. The Company also monitors internal and external conditions, identifies material risk changes and emerging risks that may impact liquidity. The Company's CFO has primary responsibility for liquidity risk.

For further discussion on liquidity see the section on Capital Resources and Liquidity.

Interest Rate Risk

Interest rate risk is the risk of financial loss due to adverse changes in the value of assets and liabilities arising from movements in interest rates. Interest rate risk encompasses exposures with respect to changes in the level of interest rates, the shape of the term structure of rates and the volatility of interest rates. Interest rate risk does not include exposure to changes in credit spreads. The Company has exposure to interest rates arising from its fixed maturity securities, interest sensitive liabilities and discount rate assumptions associated with the Company's pension and other post retirement benefit obligations.

An increase in interest rates from current levels is generally a favorable development for the Company. Interest rate increases are expected to provide additional net investment income, reduce the cost of the variable annuity hedging program, and limit the potential risk of margin erosion due to minimum guaranteed crediting rates in certain Talcott Resolution products. Conversely, a rise in interest rates will reduce the fair value of the investment portfolio and if long-term interest rates rise dramatically within a six to twelve month time period, certain Talcott Resolution businesses may be exposed to disintermediation risk. Disintermediation risk refers to the risk that policyholders will surrender their contracts in a rising interest rate environment requiring the Company to liquidate assets in an unrealized loss position. In conjunction with the interest rate risk measurement and management techniques, certain of Talcott Resolution's fixed income product offerings have market value adjustment provisions at contract surrender. An increase in interest rates may also impact the Company's tax planning strategies and in particular its ability to utilize tax benefits to offset certain previously recognized realized capital losses.

A decline in interest rates results in certain mortgage-backed and municipal securities being more susceptible to paydowns and prepayments or calls. During such periods, the Company generally will not be able to reinvest the proceeds at comparable yields. Lower interest rates will also likely result in lower net investment income, increased hedging cost associated with variable annuities and, if declines are sustained for a long period of time, it may subject the Company to reinvestment risk and possibly reduced profit margins associated with guaranteed crediting rates on certain Talcott Resolution products. Conversely, the fair value of the investment portfolio will increase when interest rates decline and the Company's interest expense will be lower on its variable rate debt obligations.

Table of Contents

The Company manages its exposure to interest rate risk by constructing investment portfolios that maintain asset allocation limits and asset/liability duration matching targets which may include the use of derivatives. The Company analyzes interest rate risk using various models including parametric models and cash flow simulation under various market scenarios of the liabilities and their supporting investment portfolios, which may include derivative instruments. Measures the Company uses to quantify its exposure to interest rate risk inherent in its invested assets and interest rate sensitive liabilities include duration, convexity and key rate duration. Duration is the price sensitivity of a financial instrument or series of cash flows to a parallel change in the underlying yield curve used to value the financial instrument or series of cash flows. For example, a duration of 5 means the price of the security will change by approximately 5% for a 100 basis point change in interest rates. Convexity is used to approximate how the duration of a security changes as interest rates change in a parallel manner. Key rate duration analysis measures the price sensitivity of a security or series of cash flows to each point along the yield curve and enables the Company to estimate the price change of a security assuming non-parallel interest rate movements.

To calculate duration, convexity, and key rate durations, projections of asset and liability cash flows are discounted to a present value using interest rate assumptions. These cash flows are then revalued at alternative interest rate levels to determine the percentage change in fair value due to an incremental change in the entire yield curve for duration and convexity, or a particular point on the yield curve for key rate duration. Cash flows from corporate obligations are assumed to be consistent with the contractual payment streams on a yield to worst basis. Yield to worst is a basis that represents the lowest potential yield that can be received without the issuer actually defaulting. The primary assumptions used in calculating cash flow projections include expected asset payment streams taking into account prepayment speeds, issuer call options and contract holder behavior. Mortgage-backed and asset-backed securities are modeled based on estimates of the rate of future prepayments of principal over the remaining life of the securities. These estimates are developed by incorporating collateral surveillance and anticipated future market dynamics. Actual prepayment experience may vary from these estimates.

The Company is also exposed to interest rate risk based upon the discount rate assumption associated with the Company's pension and other postretirement benefit obligations. The discount rate assumption is based upon an interest rate yield curve comprised of bonds rated AA with maturities primarily between zero and thirty years. For further discussion of discounting pension and other postretirement benefit obligations, see the Critical Accounting Estimates Section of the MD&A under Pension and Other Postretirement Benefit Obligations and Note 18- Employee Benefit Plans of Notes to Consolidated Financial Statements in The Hartford's 2013 Form 10-K Annual Report. In addition, management evaluates performance of certain Talcott Resolution products based on net investment spread which is, in part, influenced by changes in interest rates. For further discussion, see the Talcott Resolution section of the MD&A.

Foreign Currency Exchange Risk

Foreign currency exchange risk is defined as the risk of financial loss due to changes in the relative value between currencies. The Company's foreign currency exchange risk is related to non-U.S. dollar denominated liability contracts, including its GMDB, GMAB, GMWB and GMIB benefits associated with its Japanese variable annuities, the investment in and net income of the Japanese operations, non-U.S. dollar denominated investments, which primarily consist of fixed maturity investments, and a yen denominated individual fixed annuity product. In addition, the Company's Talcott Resolution operations issued non-U.S. dollar denominated funding agreement liability contracts. A portion of the Company's foreign currency exposure is mitigated through the use of derivatives.

Liabilities

The Company manages the market risk, including foreign currency exchange risk, associated with the guaranteed benefits related to the Japanese variable annuities through its comprehensive International Hedge Program. For more information on the International Hedge Program, including the foreign currency exchange risk sensitivity analysis, see the Variable Product Guarantee Risks and Risk Management section.

The yen denominated individual fixed annuity product was written by Hartford Life Insurance K.K. ("HLIKK"), a wholly-owned Japanese subsidiary of Hartford Life, Inc. ("HLI"), and subsequently reinsured to Hartford Life Insurance Company, a U.S. dollar based wholly-owned indirect subsidiary of HLI. The underlying investment involves investing in U.S. securities markets, which offer favorable credit spreads. The yen denominated fixed annuity product ("yen fixed

annuities”) is recorded in the consolidated balance sheets with invested assets denominated in dollars while policyholder liabilities are denominated in yen and converted to U.S. dollars based upon the March 31, 2014 yen to U.S. dollar spot rate. The difference between U.S. dollar denominated investments and yen denominated liabilities exposes the Company to currency risk. The Company manages this currency risk associated with the yen fixed annuities primarily with pay variable U.S. dollar and receive fixed yen currency swaps.

The Company’s Talcott Resolution operations issued non-U.S. dollar denominated funding agreement liability contracts. The Company hedges the foreign currency risk associated with these liability contracts with currency rate swaps.

Fixed Maturity Investments

The risk associated with the non-U.S. dollar denominated fixed maturities relates to potential decreases in value and income resulting from unfavorable changes in foreign exchange rates. In order to manage currency exposures, the Company enters into foreign currency swaps to hedge the variability in cash flows as the fair value associated with certain foreign denominated fixed maturities decline. These foreign currency swaps are structured to match the foreign currency cash flows of the hedged foreign denominated securities.

Table of Contents

Variable Product Guarantee Risks and Risk Management

The Company's variable products are significantly influenced by the U.S., Japanese, and other equity markets. Increases or declines in equity markets impact certain assets and liabilities related to the Company's variable products and the Company's earnings derived from those products. The Company's variable products include variable annuity contracts and mutual funds.

Generally, declines in equity markets will:

- reduce the value of assets under management and the amount of fee income generated from those assets;
 - reduce the value of equity securities trading supporting the international variable annuities, the related policyholder funds and benefits payable, and the amount of fee income generated from those variable annuities;
 - increase the liability for GMWB benefits resulting in realized capital losses;
 - increase the value of derivative assets used to hedge product guarantees resulting in realized capital gains;
 - increase the costs of the hedging instruments we use in our hedging program;
 - increase the Company's net amount at risk for GMDB and GMIB benefits;
 - decrease the Company's actual gross profits, resulting in increased DAC amortization;
 - increase the amount of required assets to be held backing variable annuity guarantees to maintain required regulatory reserve levels and targeted risk based capital ratios; and
- decrease the Company's estimated future gross profits. See Estimated Gross Profits Used in the Valuation and Amortization of Assets and Liabilities Associated with Variable Annuity and Other Universal Life-Type Contracts within the Critical Accounting Estimates section of the MD&A for further information.

Generally, increases in equity markets will reduce the value of the hedge derivative assets, resulting in realized capital losses, and will generally have the inverse impact of those listed above. For additional information, see Risk Hedging - Variable Annuity Hedging Program section.

Variable Annuity Guaranteed Benefits

The Company's U.S. and Japan variable annuities include guaranteed minimum death benefit and certain contracts include optional living benefit features. A majority of the Company's GMDB benefits, both direct and assumed, are reinsured with an affiliate captive reinsurer and an external reinsurer. Effective April 1, 2014, the Company recaptured all reinsured risks from this affiliated captive reinsurer. The net amount at risk ("NAR") is generally defined as the guaranteed minimum benefit amount in excess of the contract holder's current account value. Variable annuity account values with guarantee features were \$77.3 billion and \$81.9 billion as of March 31, 2014 and December 31, 2013, respectively.

The Company's U.S. variable annuities include a GMWB rider. Declines in the equity markets will increase the Company's liability for these benefits. A GMWB contract is 'in the money' if the contract holder's guaranteed remaining benefit ("GRB") becomes greater than the account value. Until April 1, 2014 the Company reinsured a majority of the GMWB benefits with a captive reinsurer. Effective April 1, 2014, the Company recaptured all reinsured risks from this affiliated captive reinsurer.

Table of Contents

The following table summarizes the account values of the Company's U.S., and Japan variable annuities with guarantee features and the NAR split between various guarantee features (retained net amount at risk does not take into consideration the effects of the variable annuity hedge programs in place as of each balance sheet date):

Total Variable Annuity Guarantees

As of March 31, 2014

(\$ in billions)	Account Value	Gross Net Amount at Risk	Retained Net Amount at Risk	% of Contracts In the Money [4]	% In the Money [4] [5]	
U. S. Variable Annuity [1]						
GMDB [2]	\$59.5	\$4.2	\$1.0	17	%23	%
GMWB	29.0	0.2	0.1	6	%12	%
Japan Variable Annuity [1]						
GMDB	17.8	1.0	0.7	36	%10	%
GMIB [3]	16.3	0.2	0.2	26	%4	%

Total Variable Annuity Guarantees

As of December 31, 2013

(\$ in billions)	Account Value	Gross Net Amount at Risk	Retained Net Amount at Risk	% of Contracts In the Money [4]	% In the Money [4] [5]	
U. S. Variable Annuity [1]						
GMDB [2]	\$61.8	\$4.3	\$1.0	16	%26	%
GMWB	30.3	0.2	0.1	5	%12	%
Japan Variable Annuity [1]						
GMDB	20.1	0.8	0.6	31	%8	%
GMIB [3]	18.5	0.1	0.1	20	%3	%

Policies with a guaranteed living benefit (a GMWB in the US, or a GMIB in Japan) also have a guaranteed death benefit. The net amount at risk ("NAR") for each benefit is shown; however these benefits are not additive. When a [1] policy terminates due to death, any NAR related to GMWB or GMIB is released. Similarly, when a policy goes into benefit status on a GMWB or GMIB, the GMDB NAR is reduced to zero. When a policy goes into benefit status on a GMIB, its GMDB NAR is released

Excludes group annuity contracts with GMDB benefits previously sold by Retirement Plans business. For further [2] discussion of the sale of the Retirement Plans business, see Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements.

[3] Includes small amount of GMWB and GMAB.

[4] Excludes contracts that are fully reinsured.

[5] For all contracts that are "in the money", this represents the percentage by which the average contract was in the money.

Many policyholders with a GMDB also have a GMWB in the U.S. or GMIB in Japan. Policyholders that have a product that offer both guarantees can only receive the GMDB or the GMIB benefit in Japan or the GMDB or GMWB in the U.S. The GMDB NAR disclosed in the tables above is a point in time measurement and assumes that all participants utilize the GMDB benefit on that measurement date. For additional information on the Company's GMDB liability, see Note 10 - Separate Accounts, Death Benefits and Other Insurance Benefit Features of Notes to Condensed Consolidated Financial Statements.

The Company expects to incur GMDB payments in the future only if the policyholder has an "in the money" GMDB at their death or their account value is reduced to a specified level, through contractually permitted withdrawals and/or market declines. If the account value is reduced to a specified level, the the contract holder will receive an annuity equal to the guaranteed remaining benefit ("GRB"). For the Company's "life-time" GMWB products, this annuity can exceed the GRB. As the account value fluctuates with equity market returns on a daily basis and the "life-time" GMWB payments may exceed the GRB, the ultimate amount to be paid by the Company, if any, is uncertain and could be

significantly more or less than the Company's current carried liability. For additional information on the Company's GMWB liability, see Note 5 - Fair Value Measurements of Notes to Condensed Consolidated Financial Statements. For GMIB contracts, in general, the policyholder has the right to elect to annuitize benefits, beginning (for certain products) on the tenth or fifteenth anniversary year of contract commencement, receive lump sum payment of the then current account value, or remain in the variable sub-account. For GMIB contracts, if the policyholder makes the annuitization election, the policyholder is entitled to receive the original investment value over a 10- to 15- year annuitization period. If the policyholder defers this election, the policyholder has the right to revisit the election annually on the policy anniversary date. A small percentage of the contracts first became eligible to elect annuitization beginning in the third quarter of 2013. The remainder of the contracts will first become eligible to elect annuitization from 2014 to 2022. Because policyholders have various contractual rights to defer their annuitization election, the period over which annuitization election can take place is subject to policyholder behavior and therefore indeterminate. In addition, upon annuitization the contractholder surrenders access to the account value and the account value is transferred to the Company's general account where it is invested and the additional investment proceeds are used towards payment of the original investment value. If the original investment value exceeds the account value upon annuitization then the contract is "in the money".

Table of Contents

As of March 31, 2014, approximately 74% of the Japan GMIB contracts were "out of the money". Until April 1, 2014 the Company reinsured a majority of the GMIB benefits with an affiliated captive reinsurer. Effective April 1, 2014, the Company recaptured all reinsured risks from this affiliated captive reinsurer. For additional information on the Company's GMIB liability, see Note 10 - Separate Accounts, Death Benefits and Other Insurance Benefit Features of Notes to Condensed Consolidated Financial Statements.

The following table represents the timing of account values eligible for annuitization under the Japan GMIB as well as the NAR. The account values reflect 100% annuitization at the earliest point allowed by the contract and no adjustments for future market returns and policyholder behaviors. Thus far, the majority of contract holders eligible for annuitization have either selected a lump sum payout at the annuitization commencement date or have surrendered prior to that date. Future market returns, changes in the value of the Japanese yen and policyholder behaviors will impact account values eligible for annuitization in the years presented.

GMIB [1] (\$ in billions)	As of March 31, 2014	
	Account Value	Net Amount at Risk
2014	\$1.6	\$—
2015	3.7	—
2016	1.8	—
2017	2.4	0.1
2018	1.0	—
2019 & beyond [2]	3.8	—
Total	\$14.3	\$0.1

[1] Excludes certain non-GMIB living benefits of \$2.0 billion of account value and \$0.1 billion of NAR.

[2] In 2019 & beyond, \$1.8 billion of the \$3.8 billion is primarily associated with account value that is eligible in 2021.

Variable Annuity Market Risk Exposures

The following table summarizes the broad Variable Annuity Guarantees offered by the Company and the market risks to which the guarantee is most exposed from a U.S. GAAP accounting perspective.

Variable Annuity Guarantees [1]	U.S. GAAP Treatment [1]	Primary Market Risk Exposures [1]
U.S. Variable Guarantees		
GMDB	Accumulation of the portion of fees required to cover expected claims, less Equity Market Levels accumulation of actual claims paid	
GMWB	Fair Value	Equity Market Levels / Implied Volatility / Interest Rates
For Life Component of GMWB	Accumulation of the portion of fees required to cover expected claims, less Equity Market Levels accumulation of actual claims paid	
International Variable Guarantees		
GMDB & GMIB	Accumulation of the portion of fees required to cover expected claims, less accumulation of actual claims paid	Equity Market Levels / Interest Rates / Foreign Currency
GMWB	Fair Value	Equity Market Levels / Implied Volatility / Interest Rates / Foreign Currency
GMAB	Fair Value	Equity Market Levels / Implied Volatility / Interest Rates / Foreign Currency

[1]

Each of these guarantees and the related U.S. GAAP accounting volatility will also be influenced by actual and estimated policyholder behavior.

Risk Hedging

Variable Annuity Hedging Program

The Company's variable annuity hedging is primarily focused on reducing the economic exposure to market risks associated with guaranteed benefits that are embedded in our global VA contracts through the use of reinsurance and capital market derivative instruments. The variable annuity hedging also considers the potential impacts on Statutory accounting results.

Table of Contents

Reinsurance

The Company uses reinsurance for a portion of contracts with GMWB riders issued prior to the third quarter of 2003 and GMWB risks associated with a block of business sold between the third quarter of 2003 and the second quarter of 2006. The Company also uses reinsurance for a majority of the GMDB issued in the U.S. and a portion of the GMDB issued in Japan.

Capital Market Derivatives

GMWB Hedge Program

The Company enters into derivative contracts to hedge market risk exposures associated with the GMWB liabilities that are not reinsured. These derivative contracts include customized swaps, interest rate swaps and futures, and equity swaps, options, and futures, on certain indices including the S&P 500 index, EAFE index, and NASDAQ index. Additionally, the Company holds customized derivative contracts to provide protection from certain capital market risks for the remaining term of specified blocks of non-reinsured GMWB riders. These customized derivative contracts are based on policyholder behavior assumptions specified at the inception of the derivative contracts. The Company retains the risk for differences between assumed and actual policyholder behavior and between the performance of the actively managed funds underlying the separate accounts and their respective indices. While the Company actively manages this dynamic hedging program, increased U.S. GAAP earnings volatility may result from factors including, but not limited to: policyholder behavior, capital markets, divergence between the performance of the underlying funds and the hedging indices, changes in hedging positions and the relative emphasis placed on various risk management objectives.

Macro Hedge Program

The Company's macro hedging program uses derivative instruments such as options and futures on equities and interest rates to provide protection against the statutory tail scenario risk arising from U.S., GMWB and GMDB liabilities, on the Company's statutory surplus. These macro hedges cover some of the residual risks not otherwise covered by specific dynamic hedging programs. Management assesses this residual risk under various scenarios in designing and executing the macro hedge program. The macro hedge program will result in additional U.S. GAAP earnings volatility as changes in the value of the macro hedge derivatives, which are designed to reduce statutory reserve and capital volatility, may not be closely aligned to changes in U.S. GAAP liabilities.

International Hedge Program

The Company enters into derivative contracts to hedge market risk exposures associated with the guaranteed benefits which are embedded in the international variable annuity contracts. These derivative contracts include foreign currency forwards and options, interest rate swaps, swaptions and futures, and equity swaps, options, and futures on certain broadly traded global equity indices including the S&P500 index, Nikkei 225 index, Topix index, FTSE 100 index, Euro Stoxx 50. During 2013, the Company expanded its hedging program to substantially reduce equity and foreign currency exchange risk. Currently, the program is primarily focused on the risks that have been reinsured to the Company's U.S. legal entities although certain hedges, predominantly options, are also held directly in HLIKK. While the Company actively manages these dynamic hedging programs, increased U.S. GAAP earnings volatility may result from factors including, but not limited to: focus on reducing the economic exposure to market risks associated with guaranteed benefits, capital markets, changes in hedging positions and the relative emphasis placed on various risk management objectives.

Variable Annuity Hedging Program Sensitivities

The following table presents the accounting treatment of the underlying guaranteed living benefits and the related hedge assets by hedge program.

U.S. Programs		International Program			
GMWB [1]		Macro		Japan	
Hedge Assets	Liabilities	Hedge Assets	Liabilities	Hedge Assets	Liabilities [2]
Fair Value	Fair Value	Fair Value	Not Fair Value	Fair Value	Not Fair Value

[1]Excludes life contingent GMWB Contracts.

[2] The liabilities for international variable annuity are primarily not measured on a fair value basis. However there is an immaterial portion of the international variable annuity with a GMWB or GMAB which is measured on a fair value

basis.

109

Table of Contents

The following table presents our estimates of the potential instantaneous impacts from sudden market stresses related to equity market prices, interest rates, implied market volatilities, and foreign currency exchange rates. The sensitivities below represent: (1) the net estimated difference between the change in the fair value of GMWB liabilities and the underlying hedge instruments and (2) the estimated change in fair value of the hedge instruments for the macro and international hedge programs, before the impacts of amortization of DAC, and taxes. As noted in the table above, certain hedge assets are used to hedge liabilities that are not carried at fair value and will not have a liability offset in the U.S. GAAP sensitivity analysis. All sensitivities are measured as of March 31, 2014, and are related to the fair value of liabilities and hedge instruments in place as of March 31, 2014 for the Company's variable annuity hedge programs. The impacts presented in the table below are estimated individually and measured without consideration of any correlation among market risk factors.

U.S. GAAP Sensitivity Analysis (pre Tax/DAC) [1]	As of March 31, 2014									
	U.S. Programs GMWB			Macro			International Program Japan			
	-20	%-10	% 10	%-20	%-10	% 10	%-20	%-10	% 10	%
Equity Market Return Potential Net Fair Value Impact	\$(6)	\$(6)	\$10	\$58	\$24	\$(19)	\$361	\$175	\$(170)	
Interest Rates Potential Net Fair Value Impact	-50 bps	-25 bps	+25 bps	-50 bps	-25 bps	+25 bps	-50 bps	-25 bps	+25 bps	
Implied Volatilities Potential Net Fair Value Impact	10	%2	%-10	% 10	%2	%-10	% 10	%2	%-10	%
Yen Strengthens +/ Weakens - Potential Net Fair Value Impact	20	%10	%-10	%20	%10	%-10	%20	%10	%-10	%
	N/A	N/A	N/A	N/A	N/A	N/A	\$15	\$(1)	\$7	

These sensitivities are based on the following key market levels as of March 31, 2014: 1) S&P of 1872; 2) 10yr US [1] swap rate of 2.97%; 3) S&P 10yr volatility of 23.83% and 4) FX rates of USDJPY @ 103.23 and EURJPY @ 142.13.

The above sensitivity analysis is an estimate and should not be used to predict the future financial performance of the Company's variable annuity hedge programs. The actual net changes in the fair value liability and the hedging assets illustrated in the above table may vary materially depending on a variety of factors which include but are not limited to:

- The sensitivity analysis is only valid as of the measurement date and assumes instantaneous changes in the capital market factors and no ability to rebalance hedge positions prior to the market changes;
- Changes to the underlying hedging program, policyholder behavior, and variation in underlying fund performance relative to the hedged index, which could materially impact the liability; and
- The impact of elapsed time on liabilities or hedge assets, any non-parallel shifts in capital market factors, or correlated moves across the sensitivities.

As a result of the April 28, 2014 announcement to sell HLIKK, the Company will maintain a hedging program to mitigate the effect on the expected statutory capital benefit that changes in the economic value of the business could have between signing and closing of the transaction. The table above reflects sensitivities based on the hedging program in place as of March 31, 2014. For further discussion of this transaction, see Note 19 - Subsequent Event of Notes to Condensed Consolidated Financial Statements.

Financial Risk on Statutory Capital

Statutory surplus amounts and risk-based capital ("RBC") ratios may increase or decrease in any period depending upon a variety of factors and may be compounded in extreme scenarios or if multiple factors occur at the same time. At

times the impact of changes in certain market factors or a combination of multiple factors on RBC ratios can be counterintuitive. Factors include:

In general, as equity market levels and interest rates decline, the amount and volatility of both our actual potential obligation, as well as the related statutory surplus and capital margin for death and living benefit guarantees associated with U.S. variable annuity contracts can be materially negatively affected, sometimes at a greater than linear rate. Other market factors that can impact statutory surplus, reserve levels and capital margin include differences in performance of variable subaccounts relative to indices and/or realized equity and interest rate volatilities. In addition, as equity market levels increase, generally surplus levels will increase. RBC ratios will also tend to increase when equity markets increase. However, as a result of a number of factors and market conditions, including the level of hedging costs and other risk transfer activities, reserve requirements for death and living benefit guarantees and RBC requirements could increase with rising equity markets, resulting in lower RBC ratios.

Non-market factors, which can also impact the amount and volatility of both our actual potential obligation, as well as the related statutory surplus and capital margin, include actual and estimated policyholder behavior experience as it pertains to lapsation, partial withdrawals, and mortality.

Table of Contents

For guaranteed benefits (GMDB, GMIB, and GMWB) reinsured from our international operations to our U.S. insurance subsidiaries, or guaranteed by our U.S. insurance subsidiaries, the Company hedges its aggregate economic exposure to the various risks arising out of the product guarantees, with a focus on the underlying economics of the exposure to the entire Company, rather than the direct liability of the underlying issuer of the related products. The Company believes that hedging economic exposure in this manner is consistent with certain intercompany reinsurance agreements and guarantees, results in increased capital efficiency and results in a better risk profile than taking alternative approaches to hedging that might emphasize statutory or GAAP measures or considerations. The amount and volatility of both our actual potential obligation, as well as the related statutory surplus and capital margin can be materially affected by a variety of factors, both market and non-market. Market factors include declines in various equity market indices and interest rates, changes in value of the yen versus other global currencies, difference in the performance of variable subaccounts relative to indices, and increases in realized equity, interest rate, and currency volatilities. Non-market factors include actual and estimated policyholder behavior experience as it pertains to lapsation, withdrawals, mortality, and annuitization. Risk mitigation activities, such as hedging, may also result in material and sometimes counterintuitive impacts on statutory surplus and capital margin. Notably, as changes in these market and non-market factors occur, both our potential obligation and the related statutory reserves and/or required capital can increase or decrease at a greater than linear rate.

As the value of certain fixed-income and equity securities in our investment portfolio decreases, due in part to credit spread widening, statutory surplus and RBC ratios may decrease.

As the value of certain derivative instruments that do not get hedge accounting decreases, statutory surplus and RBC ratios may decrease.

The life insurance subsidiaries' exposure to foreign currency exchange risk exists with respect to non-U.S. dollar denominated assets and liabilities. Assets and liabilities denominated in foreign currencies are accounted for at their U.S. dollar equivalent values using exchange rates at the balance sheet date. As foreign currency exchange rates vary in comparison to the U.S. dollar, the remeasured value of those non-dollar denominated assets or liabilities will also vary, causing an increase or decrease to statutory surplus.

Our statutory surplus is also impacted by widening credit spreads as a result of the accounting for the assets and liabilities in our fixed market value adjusted ("MVA") annuities. Statutory separate account assets supporting the fixed MVA annuities are recorded at fair value. In determining the statutory reserve for the fixed MVA annuities, we are required to use current crediting rates in the U.S. and Japanese LIBOR in Japan. In many capital market scenarios, current crediting rates in the U.S. are highly correlated with market rates implicit in the fair value of statutory separate account assets. As a result, the change in statutory reserve from period to period will likely substantially offset the change in the fair value of the statutory separate account assets. However, in periods of volatile credit markets, such as we have experienced, actual credit spreads on investment assets may increase sharply for certain sub-sectors of the overall credit market, resulting in statutory separate account asset market value losses. As actual credit spreads are not fully reflected in the current crediting rates in the U.S. or Japanese LIBOR in Japan, the calculation of statutory reserves will not substantially offset the change in fair value of the statutory separate account assets resulting in reductions in statutory surplus. This has resulted and may continue to result in the need to devote significant additional capital to support the product.

- With respect to our fixed annuity business, sustained low interest rates may result in a reduction in statutory surplus and an increase in NAIC required capital.

Most of these factors are outside of the Company's control. The Company's financial strength and credit ratings are significantly influenced by the statutory surplus amounts and RBC ratios of our insurance company subsidiaries. In addition, rating agencies may implement changes to their internal models that have the effect of increasing or decreasing the amount of statutory capital we must hold in order to maintain our current ratings.

The Company has reinsured approximately 21% of its risk associated with U.S. GMWB and 77% of its risk associated with the aggregate U.S. GMDB exposure. These reinsurance agreements serve to reduce the Company's exposure to changes in the statutory reserves and the related capital and RBC ratios associated with changes in the capital markets. The Company also continues to explore other solutions for mitigating the capital market risk effect on surplus, such as internal and external reinsurance solutions, modifications to our hedging program, changes in product design,

increasing pricing and expense management.

111

Table of Contents

Credit Risk

Credit risk is defined as the risk of financial loss due to uncertainty of an obligor's or counterparty's ability or willingness to meet its obligations in accordance with contractually agreed upon terms. The majority of the Company's credit risk is concentrated in its investment holdings but is also present in reinsurance and insurance portfolios. Credit risk is comprised of three major factors: the risk of change in credit quality, or credit migration risk; the risk of default; and the risk of a change in value of a financial instrument due to changes in credit spread that are unrelated to changes in obligor credit quality. A decline in creditworthiness is typically associated with an increase in an investment's credit spread, potentially resulting in an increase in other-than-temporary impairments and an increased probability of a realized loss upon sale.

The objective of the Company's enterprise credit risk management strategy is to identify, quantify, and manage credit risk on an aggregate portfolio basis and to limit potential losses in accordance with an established credit risk appetite. The Company manages to its risk appetite by primarily holding a diversified mix of investment grade issuers and counterparties across its investment, reinsurance, and insurance portfolios. Potential losses are also limited within portfolios by diversifying across geographic regions, asset types, and sectors.

The Company manages a credit exposure from its inception to its maturity or sale. Both the investment and reinsurance areas have formulated procedures for counterparty approvals and authorizations. Although approval processes may vary by area and type of credit risk, approval processes establish minimum levels of creditworthiness and financial stability. Eligible credits are subjected to prudent and conservative underwriting reviews. Within the investment portfolio, private securities, such as commercial mortgages, and private placements, must be presented to their respective review committees for approval.

Credit risks are managed on an on-going basis through the use of various processes and analyses. At the investment, reinsurance, and insurance product levels, fundamental credit analyses are performed at the issuer/counterparty level on a regular basis. To provide a holistic review within the investment portfolio, fundamental analyses are supported by credit ratings, assigned by nationally recognized rating agencies or internally assigned, and by quantitative credit analyses. The Company utilizes a credit value at risk ("VaR") to measure default and migration risk on a monthly basis. Issuer and security level risk measures are also utilized. In the event of deterioration in credit quality, the Company maintains watch lists of problem counterparties within the investment and reinsurance portfolios. The watch lists are updated based on regular credit examinations and management reviews. The Company also performs quarterly assessments of probable expected losses in the investment portfolio. The process is conducted on a sector basis and is intended to promptly assess and identify potential problems in the portfolio and to recognize necessary impairments.

Credit risk policies at the enterprise and operation level ensure comprehensive and consistent approaches to quantifying, evaluating, and managing credit risk under expected and stressed conditions. These policies define the scope of the risk, authorities, accountabilities, terms, and limits, and are regularly reviewed and approved by senior management and ERM. Aggregate counterparty credit quality and exposure is monitored on a daily basis utilizing an enterprise-wide credit exposure information system that contains data on issuers, ratings, exposures, and credit limits. Exposures are tracked on a current and potential basis. Credit exposures are reported regularly to the ERCC and to the Finance, Investment and Risk Management Committee ("FIRMCo"). Exposures are aggregated by ultimate parent across investments, reinsurance receivables, insurance products with credit risk, and derivative counterparties. The credit database and reporting system are available to all key credit practitioners in the enterprise.

The Company exercises various and differing methods to mitigate its credit risk exposure within its investment and reinsurance portfolios. Some of the reasons for mitigating credit risk include financial instability or poor credit, avoidance of arbitration or litigation, future uncertainty, and exposure in excess of risk tolerances. Credit risk within the investment portfolio is most commonly mitigated through the use of derivative instruments or asset sales. Counterparty credit risk is mitigated through the practice of entering into contracts only with highly creditworthy institutions and through the practice of holding and posting of collateral. Systemic credit risk is mitigated through the construction of high-quality, diverse portfolios that are subject to regular underwriting of credit risks. For further discussion of the Company's investment and derivative instruments, see the Portfolio Risks and Risk Management section and Note 6 - Investments and Derivative Instruments of Notes to Condensed Consolidated Financial

Statements. Further discussion on managing and mitigating credit risk from the use of reinsurance via an enterprise security review process, see the Reinsurance as a Risk Management Strategy within the Insurance Risk Management section.

As of March 31, 2014, the Company's exposure to any credit concentration risk of a single issuer or counterparty greater than 10% of the Company's stockholders' equity, other than the U.S. government and certain U.S. government securities, was the Government of Japan. The Government of Japan securities represented \$2.8 billion, or 14% of stockholders' equity, and 4% of total invested assets excluding equity securities, trading. For further discussion of concentration of credit risk, see the Concentration of Credit Risk section in Note 6 - Investments and Derivative Instruments of Notes to Condensed Consolidated Financial Statements in The Hartford's 2013 Form 10-K Annual Report.

Table of Contents

Derivative Instruments

The Company utilizes a variety of over-the-counter ("OTC"), OTC-cleared and exchange-traded derivative instruments as a part of its overall risk management strategy, as well as to enter into replication transactions. Derivative instruments are used to manage risk associated with interest rate, equity market, credit spread, issuer default, price, and currency exchange rate risk or volatility. Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that would otherwise be permissible investments under the Company's investment policies. For further information on the Company's use of derivatives, see Note 6 - Investments and Derivative Instruments of Notes to Condensed Consolidated Financial Statements. Derivative activities are monitored and evaluated by the Company's compliance and risk management teams and reviewed by senior management. In addition, the Company monitors counterparty credit exposure on a monthly basis to ensure compliance with Company policies and statutory limitations. The notional amounts of derivative contracts represent the basis upon which pay or receive amounts are calculated and are not reflective of credit risk. Downgrades to the credit ratings of The Hartford's insurance operating companies may have adverse implications for its use of derivatives including those used to hedge benefit guarantees of variable annuities. In some cases, downgrades may give derivative counterparties for OTC derivatives the unilateral contractual right to cancel and settle outstanding derivative trades or require additional collateral to be posted. In addition, downgrades may result in counterparties becoming unwilling to engage in additional OTC derivatives or may require collateralization before entering into any new trades. This will restrict the supply of derivative instruments commonly used to hedge variable annuity guarantees, particularly long-dated equity derivatives and interest rate swaps. Under these circumstances, the Company's operating subsidiaries could conduct hedging activity using a combination of cash and exchange-traded instruments, in addition to using the available OTC derivatives.

The Company uses various derivative counterparties in executing its derivative transactions. The use of counterparties creates credit risk that the counterparty may not perform in accordance with the terms of the derivative transaction. The Company has derivative counterparty exposure policies which limit the Company's exposure to credit risk. The Company's policies with respect to derivative counterparty exposure establishes market-based credit limits, favors long-term financial stability and creditworthiness of the counterparty and typically requires credit enhancement/credit risk reducing agreements. The Company minimizes the credit risk of derivative instruments by entering into transactions with high quality counterparties primarily rated A or better, which are monitored and evaluated by the Company's risk management team and reviewed by senior management. The Company also generally requires that derivative contracts, other than exchange-traded contracts, OTC-cleared swaps, certain forward contracts, and certain embedded and reinsurance derivatives, be governed by an International Swaps and Derivatives Association ("ISDA") Master Agreement, which is structured by legal entity and by counterparty and permits right of offset.

The Company has developed credit exposure thresholds which are based upon counterparty ratings. Credit exposures are measured using the market value of the derivatives, resulting in amounts owed to the Company by its counterparties or potential payment obligations from the Company to its counterparties. The Company generally enters into credit support annexes in conjunction with the ISDA agreements, which require daily collateral settlement based upon agreed upon thresholds. For purposes of daily derivative collateral maintenance, credit exposures are generally quantified based on the prior business day's market value and collateral is pledged to and held by, or on behalf of, the Company to the extent the current value of the derivatives exceed the contractual thresholds. In accordance with industry standard and the contractual agreements, collateral is typically settled on the next business day. The Company has exposure to credit risk for amounts below the exposure thresholds which are uncollateralized, as well as for market fluctuations that may occur between contractual settlement periods of collateral movements. For the Company's domestic derivative programs, the maximum uncollateralized threshold for a derivative counterparty for a single legal entity is \$10. The Company currently transacts OTC derivatives in five legal entities that have a threshold greater than zero; and therefore the maximum combined threshold for a single counterparty across all legal entities that use derivatives is \$50. In addition, the Company may have exposure to multiple counterparties in a single corporate family due to a common credit support provider. As of March 31, 2014 for the Company's domestic derivative programs, the maximum combined threshold for all counterparties under a single credit support provider across all legal entities that use derivatives is \$100. Based on the contractual terms of the

collateral agreements, these thresholds may be immediately reduced due to a downgrade in either party's credit rating. The Company hedges a portion of its Japan exposures within the legal entity HLIKK. The counterparty credit exposures at HLIKK generally follow the maximum uncollateralized threshold of the domestic program, however, for one counterparty, maximum uncollateralized exposure is higher. This counterparty maintains credit ratings of A3 or better, and the Company actively monitors its credit standing. For further discussion, see the Derivative Commitments section of Note 11 - Commitments and Contingencies of the Notes to Condensed Consolidated Financial Statements.

113

Table of Contents

For the three months ended March 31, 2014, the Company has incurred no losses on derivative instruments due to counterparty default.

In addition to counterparty credit risk, the Company may also introduce credit risk through the use of credit default swaps that are entered into to manage credit exposure. Credit default swaps involve a transfer of credit risk of one or many referenced entities from one party to another in exchange for periodic payments. The party that purchases credit protection will make periodic payments based on an agreed upon rate and notional amount, and for certain transactions there will also be an upfront premium payment. The second party, who assumes credit risk, will typically only make a payment if there is a credit event as defined in the contract and such payment will be typically equal to the notional value of the swap contract less the value of the referenced security issuer's debt obligation. A credit event is generally defined as default on contractually obligated interest or principal payments or bankruptcy of the referenced entity.

The Company uses credit derivatives to purchase credit protection and to assume credit risk with respect to a single entity, referenced index, or asset pool. The Company purchases credit protection through credit default swaps to economically hedge and manage credit risk of certain fixed maturity investments across multiple sectors of the investment portfolio. The Company also enters into credit default swaps that assume credit risk as part of replication transactions. Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that would be permissible investments under the Company's investment policies. These swaps reference investment grade single corporate issuers and baskets, which include customized diversified portfolios of corporate issuers, which are established within sector concentration limits and may be divided into tranches which possess different credit ratings.

Investment Portfolio Risks and Risk Management

Investment Portfolio Composition

The following table presents the Company's fixed maturities, AFS, by credit quality. The average credit ratings referenced below and throughout this section are based on availability and the midpoint of the applicable ratings among Moody's, S&P, Fitch and Morningstar. If no rating is available from a rating agency, then an internally developed rating is used.

Fixed Maturities by Credit Quality

	March 31, 2014			December 31, 2013			
	Amortized Cost	Fair Value	Percent of Total Fair Value	Amortized Cost	Fair Value	Percent of Total Fair Value	
United States Government/Government agencies	\$8,063	\$8,194	12.9	%\$8,231	\$8,208	13.2	%

BB & below	3,578	3,715	5.9	%3,809	3,915	6.3	%
Total fixed maturities, AFS	\$60,455	\$63,339	100	%\$60,641	\$62,357	100	%

Overall, the credit quality profile of the Company's portfolio has remained relatively consistent as compared to December 31, 2013. The value of securities in the BBB and BB & below categories has declined, primarily due to sales of certain emerging market securities. Fixed maturities, FVO, are not included in the above table. For further discussion on fair value option securities, see Note 5 - Fair Value Measurements of Notes to Condensed Consolidated Financial Statements.

[1] Gross unrealized gains (losses) exclude the fair value of bifurcated embedded derivative features of certain securities. Changes in value are recorded in net realized capital gains (losses).

[2] Includes securities with pools of loans issued by the Small Business Administration which are backed by the full faith and credit of the U.S. government.

Table of Contents

The increase in the fair value of AFS and FVO securities as compared to December 31, 2013 is attributable to higher valuations as a result of a decrease in interest rates and tighter credit spreads, partially offset by the effect of net outflows as a result of the continued runoff of Talcott Resolution. Overall, the composition of the AFS and FVO portfolio has remained relatively consistent as compared to December 31, 2013. The holdings reflect tactical changes to the portfolio as a result of changing market conditions, including modest increases in financial services and CMBS sectors while the Company reduced exposure from emerging market securities, primarily within the foreign government and corporate sectors.

Fixed maturities, FVO, primarily represents Japan government securities supporting the Japan fixed annuity product, as well as securities containing an embedded credit derivative for which the Company elected the fair value option. The underlying credit risk of the securities containing credit derivatives are primarily investment grade CRE CDOs. For further discussion on fair value option securities, see Note 5 - Fair Value Measurements of Notes to Condensed Consolidated Financial Statements.

Emerging Market Exposure

Emerging market securities have been negatively impacted by increased political tension in eastern Europe, softer-than-expected economic growth, as well as trade and budget deficits, raising the potential for destabilizing capital outflows and rapid currency depreciation, causing bondholders to demand a higher yield which has depressed the fair value of securities held. We expect continued sensitivity to geopolitical events, the ongoing evolution of Fed policy and other economic factors, including contagion risk.

The Company has limited direct exposure within its investment portfolio to emerging market issuers, totaling only 2% of total invested assets as of March 31, 2014, and is primarily comprised of sovereign and corporate debt issued in US dollars. The Company identifies exposures with the issuers' ultimate parent country of domicile, which may not be the country of the security issuer. The following table presents the Company's exposure to securities within certain emerging markets currently under the greatest stress, defined as countries that have a sovereign S&P credit rating of B- or below; or countries that have had a current account deficit and have an inflation level greater than 5%, for the past six months or more.

	March 31, 2014		December 31, 2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Argentina	\$3	\$3	\$38	\$40
Brazil	192	189	274	257
India	54	55	62	62
Indonesia	94	87	107	93
Lebanon	22	22	26	26
South Africa	57	55	65	60
Turkey	74	71	88	79
Ukraine	4	4	50	50
Uruguay	22	21	27	25
Venezuela	5	4	67	60
Total	\$527	\$511	\$804	\$752

The Company manages the credit risk associated with emerging market securities within the investment portfolio on an on-going basis using macroeconomic analysis and issuer credit analysis subject to diversification and individual credit risk management limits. For additional details regarding the Company's management of credit risk, see the Credit Risk section of this MD&A. Due to increased political tensions in Argentina, Ukraine, and Venezuela, the Company substantially reduced its exposure to these economies during the three months ended March 31, 2014. In addition, the Company has limited exposure to the Russian Federation, with a total amortized cost and fair value of \$102 million and \$96 million, respectively, as of March 31, 2014. The exposure is primarily comprised of government and government agency bonds, but also includes corporate bonds.

Table of Contents

Financial Services

The Company's exposure to the financial services sector is predominantly through investment grade banking and insurance institutions. The following table presents the Company's exposure to the financial services sector included in the Securities by Type table above.

	March 31, 2014			December 31, 2013		
	Amortized Cost	Fair Value	Net Unrealized	Amortized Cost	Fair Value	Net Unrealized
AAA	\$39	\$42	\$ 3	\$49	\$52	\$ 3
AA	473	506	33	468	493	25
A	2,769	2,906	137	2,518	2,616	98
BBB	1,926	1,953	27	1,978	1,952	(26)
BB & below	278	312	34	264	288	24
Total	\$5,485	\$5,719	\$ 234	\$5,277	\$5,401	\$ 124

The overall increase in the financial services sector is primarily due to a modest increase in the allocation to the sector as well as higher valuations as a result of decreasing interest rates and credit spread tightening. Credit spreads for corporate financial services securities have narrowed during 2014 as the overall economy continues to improve.

Commercial Real Estate

The commercial real estate market continues to show signs of improving fundamentals such as firming property prices, increases in transaction volume and modestly easing financial conditions. While delinquencies still remain at elevated levels as compared to the previous cycle, they have improved since cycle highs. In addition, the availability of credit has increased and there is now less concern about the ability of borrowers to refinance as loans come due.

The following table presents the Company's exposure to CMBS bonds by current credit quality and vintage year, included in the Securities by Type table above. Credit protection represents the current weighted average percentage of the outstanding capital structure subordinated to the Company's investment holding that is available to absorb losses before the security incurs the first dollar loss of principal and excludes any equity interest or property value in excess of outstanding debt.

[1] The vintage year represents the year the pool of loans was originated.

The Company also has AFS exposure to CRE CDOs with an amortized cost and fair value of \$163 and \$236, respectively, as of March 31, 2014 and \$176 and \$248 respectively, as of December 31, 2013. These securities are comprised of diversified pools of commercial mortgage loans or equity positions of other CMBS securitizations. We continue to monitor these investments as economic and market uncertainties regarding future performance impact market liquidity and security premiums.

In addition to CMBS bonds and CRE CDOs, the Company has exposure to commercial mortgage loans as presented in the following table. These loans are collateralized by a variety of commercial properties and are diversified both geographically throughout the United States and by property type. These loans are primarily in the form of a whole loan, where the Company is the sole lender, or may include a loan participation. Loan participations are loans where the Company has purchased or retained a portion of an outstanding loan or package of loans and participates on a pro-rata basis in collecting interest and principal pursuant to the terms of the participation agreement. In general, A-Note participations have senior payment priority, followed by B-Note participations and then mezzanine loan participations. As of March 31, 2014, loans within the Company's mortgage loan portfolio that have had extensions or restructurings, other than what is allowable under the original terms of the contract, are immaterial.

Commercial Mortgage Loans

	March 31, 2014			December 31, 2013		
	Amortized Cost [1]	Valuation Allowance	Carrying Value	Amortized Cost [1]	Valuation Allowance	Carrying Value
Agricultural	\$96	\$(7)	\$89	\$132	\$(7)	\$125
Whole loans	5,402	(10)	5,392	5,223	(10)	5,213
A-Note participations	190	—	190	192	—	192
B-Note participations	17	—	17	99	(50)	49
Mezzanine loans	19	—	19	19	—	19
Total	\$5,724	\$(17)	\$5,707	\$5,665	\$(67)	\$5,598

[1] Amortized cost represents carrying value prior to valuation allowances, if any.

The overall increase in mortgage loans is attributable to the increased allocation to this asset class. Since December 31, 2013, the Company funded \$203 of commercial whole loans with a weighted average loan-to-value ("LTV") ratio of 60% and a weighted average yield of 4.13%. The Company continues to originate commercial whole

loans within primary markets, office, industrial and multi-family, focusing on loans with strong LTV ratios and high quality property collateral. The decline in the valuation allowance as compared to December 31, 2013 resulted from the sale of the underlying collateral supporting a B-note participation. The loan was fully reserved for and the Company did not recover any funds as a result of the sale. As of March 31, 2014, the Company had mortgage loans held-for-sale with a carrying value and valuation allowance of \$48 and \$1, respectively, and \$61 and \$3, respectively, as of December 31, 2013.

[1] Pre-refunded bonds are bonds for which an irrevocable trust containing sufficient U.S. treasury, agency, or other securities has been established to fund the remaining payment of principal and interest.

Leasing revenue bonds are generally the obligations of a financing authority established by the municipality that leases municipal facilities to a municipality. The notes are typically secured by lease payments made by the [2] municipality that is leasing the facilities financed by the issue. Lease payments may be subject to annual appropriation by the municipality or the municipality may be obligated to appropriate general tax revenues to make lease payments.

As of March 31, 2014 the largest issuer concentrations were the states of Illinois, California and Massachusetts, which each comprised less than 3% of the municipal bond portfolio and were primarily comprised of general obligation and taxable bonds. As of December 31, 2013, the largest issuer concentrations were the states of Illinois, California and Massachusetts, which each comprised less than 3% of the municipal bond portfolio and were primarily comprised of general obligation and taxable bonds.

Limited Partnerships and Other Alternative Investments

The following table presents the Company's investments in limited partnerships and other alternative investments which include hedge funds, mortgage and real estate funds, mezzanine debt funds, and private equity and other funds. Hedge funds include investments in funds of funds and direct funds. These hedge funds invest in a variety of strategies including global macro and long/short credit and equity. Mortgage and real estate funds consist of investments in funds whose assets consist of mortgage loans, mortgage loan participations, mezzanine loans or other notes which may be below investment grade, as well as equity real estate and real estate joint ventures. Mezzanine debt funds include investments in funds whose assets consist of subordinated debt that often incorporates equity-based options such as warrants and a limited amount of direct equity investments. Private equity and other funds primarily consist of investments in funds whose assets typically consist of a diversified pool of investments in small to mid-sized non-public businesses with high growth potential.

Table of Contents

Available-for-Sale Securities — Unrealized Loss Aging

The total gross unrealized losses were \$638 as of March 31, 2014, and have decreased \$439, or 41%, from December 31, 2013 due to decreases in interest rates and tighter credit spreads. As of March 31, 2014, \$497 of the gross unrealized losses were associated with securities depressed less than 20% of cost or amortized cost.

The remaining \$141 of gross unrealized losses were associated with securities depressed greater than 20%, which includes \$4 associated with securities depressed over 50% for twelve months or more. The securities depressed more than 20% are primarily foreign government securities, floating rate corporate financial services securities, and securities with exposure to commercial real estate that have market spreads that continue to be wider than the spreads at the securities' respective purchase dates. Unrealized losses on foreign government securities are primarily due to depreciation of the Japanese yen in relation to the U.S. dollar. Corporate financial securities are primarily depressed because the securities have floating-rate coupons and/or have long-dated maturities. Unrealized losses on securities with exposure to commercial real estate are largely due to the continued market and economic uncertainties surrounding the performance of certain structures or vintages. Based upon the Company's cash flow modeling and current market and collateral performance assumptions, these securities with exposure to commercial real estate have sufficient credit protection levels to receive contractually obligated principal and interest payments.

As part of the Company's ongoing security monitoring process, the Company has reviewed its AFS securities in an unrealized loss position and concluded that these securities are temporarily depressed and are expected to recover in value as the securities approach maturity or as market spreads continue to improve. For these securities in an unrealized loss position where a credit impairment has not been recorded, the Company's best estimate of expected future cash flows are sufficient to recover the amortized cost basis of the security. Furthermore, the Company neither has an intention to sell nor does it expect to be required to sell these securities. For further information regarding the Company's impairment analysis, see Other-Than-Temporary Impairments in the Investment Portfolio Risks and Risk Management section of this MD&A.

The following table presents the Company's unrealized loss aging for AFS securities by length of time the security was in a continuous unrealized loss position.

Consecutive Months	March 31, 2014				December 31, 2013			
	Items	Cost or Amortized Cost	Fair Value	Unrealized Loss [1]	Items	Cost or Amortized Cost	Fair Value	Unrealized Loss [1]

Other-Than-Temporary Impairments

The following table presents the Company's impairments recognized in earnings by security type.

	Three Months Ended March 31,	
	2014	2013
ABS	\$—	\$4
CRE CDOs	—	2
CMBS Bonds	—	3
Corporate	18	5
Equity	2	6
RMBS		
Agency	2	—
Sub-prime	—	1
Other	—	—
Total	\$22	\$21

Three months ended March 31, 2014

For the three months ended March 31, 2014, impairments recognized in earnings were comprised of credit impairments of \$18, securities the Company intends to sell of \$2, and impairments on equity securities of \$2.

For the three months ended March 31, 2014, credit impairments were primarily concentrated in private placements and corporate securities. The private placements were impaired due to declines in expected cash flows related to money market interest only strips, as a result of the low interest rate environment. The corporate bonds and equity were impaired due to one issuer that has experienced financial difficulty and the Company has determined that it is more-likely-than-not that the issuer will not be able to repay a portion of the principal and interest that are owed to the Company and that the decline in the value of equity issued by the entity is other than temporary. The Company's determination of expected future cash flows used to calculate the credit loss amount is a quantitative and qualitative process. The Company incorporates its best estimate of future performance using internal assumptions and judgments that are informed by economic and industry specific trends, as well as our expectation with respect to security specific developments. Credit impairments for the three months ended March 31, 2014 were primarily identified through a security specific review and resulted from changes in the financial condition and near term prospects of certain issuers.

In addition to the credit impairments recognized in earnings, the Company recognized non-credit impairments in other comprehensive income of \$(1) for the three months ended March 31, 2014. These non-credit impairments represent the difference between fair value and the Company's best estimate of expected future cash flows discounted at the

security's effective yield prior to impairment, rather than at current market implied credit spreads. These non-credit impairments primarily represent increases in market liquidity premiums and credit spread widening that occurred after the securities were purchased, as well as a discount for variable-rate coupons which are paying less than at purchase date. In general, larger liquidity premiums and wider credit spreads are the result of deterioration of the underlying collateral performance of the securities.

121

Table of Contents

Future impairments may develop as the result of changes in intent to sell of specific securities or if actual results underperform current modeling assumptions, which may be the result of, but are not limited to, macroeconomic factors and security-specific performance below current expectations. Ultimate loss formation will be a function of macroeconomic factors and idiosyncratic security-specific performance.

Three months ended March 31, 2013

Impairments recognized in earnings were comprised of credit impairments of \$10 , impairments on equity securities of \$6 , and securities that the Company intends to sell of \$5. Credit impairments were primarily concentrated in high yield corporate securities, ABS, CRE CDOs, RMBS and fixed-rate CMBS bonds. Impairments on high yield corporate securities were due to one issuer that defaulted on a payment of interest and filed for bankruptcy in 2013. Impairments on equity securities were comprised of one security that has been in an unrealized loss position for more than six months and the Company no longer believes that the security will recover within the foreseeable future. Intent-to-sell impairments were primarily related to one ABS collateralized by student loans as market pricing continued to improve and the Company would like the ability to reduce exposure.

122

Table of Contents

CAPITAL RESOURCES AND LIQUIDITY

The following section discusses the overall financial strength of The Hartford and its insurance operations including their ability to generate cash flows from each of their business segments, borrow funds at competitive rates and raise new capital to meet operating and growth needs over the next twelve months.

Liquidity Requirements and Sources of Capital

The Hartford Financial Services Group, Inc. (Holding Company)

The liquidity requirements of the holding company of The Hartford Financial Services Group, Inc. ("HFSG Holding Company") have been and will continue to be met by HFSG Holding Company's fixed maturities, short-term investments and cash, dividends from its insurance operations, as well as the issuance of common stock, debt or other capital securities and borrowings from its credit facilities, as needed.

As of March 31, 2014, HFSG Holding Company held fixed maturities, short-term investments and cash of \$1.4 billion.

The Hartford has an intercompany liquidity agreement that allows for short-term advances of funds among the HFSG Holding Company and certain affiliates of up to \$2.0 billion for liquidity and other general corporate purposes. The Connecticut Insurance Department granted approval for certain affiliated insurance companies that are parties to the agreement to treat receivables from a parent, including the HFSG Holding Company, as admitted assets for statutory accounting purposes. On April 29, 2013 Hartford Life Insurance Company, a subsidiary of the Company, issued a Revolving Note (the "Note") in the principal amount of \$100 to Hartford Life and Accident Insurance Company, a subsidiary of the Company, under the intercompany liquidity agreement. The Note bore interest at 0.92% and matured on April 29, 2014. On May 29, 2013 Hartford Life and Annuity Insurance Company, a subsidiary of the Company, issued a Note in the principal amount of \$225 to Hartford Life and Accident Insurance Company, under the intercompany liquidity agreement. The Note bears interest at 1.00% and matures on May 29, 2014. On February 28, 2014, the total outstanding balances on these notes were repaid in full.

Until April 1, 2014, HLAI ceded certain variable annuity contracts and their associated riders as well as certain payout annuities issued by HLAI or assumed by it to White River Life Reinsurance Company ("WRR"), an affiliate captive reinsurer. This arrangement provided the Company with a vehicle to provide more efficient financing of the risk associated with this business with internal funds. The reinsurance arrangement between HLAI and WRR did not impact the Company's reserving methodology or the amount of required regulatory capital associated with the reinsured business. The effects of this intercompany arrangement are eliminated in consolidation.

Pursuant to an intercompany note agreement between WRR and HFSG Holding Company, WRR was able to borrow up to \$1 billion from the HFSG Holding Company in order to maintain certain statutory capital levels required by its plan of operations and which could have been used by WRR to settle outstanding intercompany payables with HLAI. WRR borrowed \$655 under the intercompany note agreement as of March 31, 2014. The effects of this intercompany arrangement are eliminated in consolidation. Effective April 1, 2014, the Company recaptured all reinsured risks from WRR to HLAI. On April 30, 2014, the Company dissolved WRR which resulted in WRR paying off the \$655 surplus note and returning \$367 in capital, all of which will be contributed as capital to HLAI to support the recaptured risks. This transaction has received required regulatory approvals.

In January 2014, the Board of Directors approved an increase in the Company's authorized equity repurchase program that provides the Company with the ability to repurchase \$2 billion in equity during the period commencing on January 1, 2014 and ending on December 31, 2015.

Expected liquidity requirements of the HFSG Holding Company for the next twelve months include interest on debt of approximately \$370 and common stockholder dividends, subject to the discretion of the Board of Directors, of approximately \$260.

Equity

During the three months ended March 31, 2014, the Company repurchased 8.8 million common shares for \$300, under the equity repurchase program. In addition, the Company repurchased 8.7 million common shares, for \$300, from April 1, 2014 to April 23, 2014.

Debt

For additional information regarding debt, see Note 15 - Debt of Notes to Condensed Consolidated Financial Statements.

Dividends

On February 27, 2014, The Hartford's Board of Directors declared a quarterly dividend of \$0.15 per common share payable on April 1, 2014 to common shareholders of record as of March 10, 2014.

123

Table of Contents

There are no current restrictions on the HFSG Holding Company's ability to pay dividends to its shareholders. For a discussion of restrictions on dividends to the HFSG Holding Company from its insurance subsidiaries, see "Dividends from Insurance Subsidiaries" below. For a discussion of potential restrictions on the HFSG Holding Company's ability to pay dividends, see the risk factor "Our ability to declare and pay dividends is subject to limitations" in Item 1A of Part I of the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Pension Plans and Other Postretirement Benefits

While the Company has significant discretion in making voluntary contributions to the U. S. qualified defined benefit pension plan, the Employee Retirement Income Security Act of 1974, as amended by the Pension Protection Act of 2006, the Worker, Retiree, and Employer Recovery Act of 2008, the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010, the Moving Ahead for Progress in the 21st Century Act of 2012 (MAP-21), and Internal Revenue Code regulations mandate minimum contributions in certain circumstances. The Company does not have a 2014 required minimum funding contribution for the U.S. qualified defined benefit pension plan and the funding requirements for all pension plans are expected to be immaterial. The Company has not determined whether, and to what extent, contributions may be made to the U. S. qualified defined benefit pension plan in 2014. The Company will monitor the funded status of the U.S. qualified defined benefit pension plan during 2014 to make this determination.

Dividends from Insurance Subsidiaries

Dividends to the HFSG Holding Company from its insurance subsidiaries are restricted by insurance regulation. The payment of dividends by Connecticut-domiciled insurers is limited under the insurance holding company laws of Connecticut. These laws require notice to and approval by the state insurance commissioner for the declaration or payment of any dividend, which, together with other dividends or distributions made within the preceding twelve months, exceeds the greater of (i) 10% of the insurer's policyholder surplus as of December 31 of the preceding year or (ii) net income (or net gain from operations, if such company is a life insurance company) for the twelve-month period ending on the thirty-first day of December last preceding, in each case determined under statutory insurance accounting principles. In addition, if any dividend of a Connecticut-domiciled insurer exceeds the insurer's earned surplus, it requires the prior approval of the Connecticut Insurance Commissioner. The insurance holding company laws of the other jurisdictions in which The Hartford's insurance subsidiaries are incorporated (or deemed commercially domiciled) generally contain similar (although in certain instances somewhat more restrictive) limitations on the payment of dividends. Dividends paid to HFSG Holding Company by its life insurance subsidiaries are further dependent on cash requirements of HLI and other factors. In addition to statutory limitations on paying dividends, the Company also takes other items into consideration when determining dividends from subsidiaries. These considerations include, but are not limited to expected earnings and capitalization of the subsidiary, regulatory capital requirements and liquidity requirements of the individual operating company.

The Company's property-casualty insurance subsidiaries are permitted to pay up to a maximum of approximately \$1.5 billion in dividends to HFSG Holding Company in 2014 without prior approval from the applicable insurance commissioner. Before considering the transactions discussed below, the domestic life insurance subsidiaries' dividend limitation under the holding company laws of Connecticut is \$560 in 2014. In 2014, HFSG Holding Company anticipates receiving approximately \$800 in dividends from its property-casualty insurance subsidiaries, net of dividends to fund interest payments on an intercompany note between Hartford Holdings, Inc. and Hartford Fire Insurance Company and no ordinary dividends from the life insurance subsidiaries.

Effective March 3, 2014, The Hartford made HLA the single nationwide underwriting company for its Group Benefits business by capitalizing HLA to support the Group Benefits business and separating it from the legal entities that support the Talcott Resolution operating segment. On January 30, 2014, The Hartford received approval from the State of Connecticut Insurance Department ("CTDOI") for HLAI and HLIC to dividend approximately \$800 of cash and invested assets to HLA and this dividend was paid on February 27, 2014. All of the issued and outstanding equity of the Company was then distributed from HLA to Hartford Life, Inc. As a result, HLA and HLIC have no remaining ordinary dividend capacity for the twelve months following this transaction. Any additional dividends from HLA and HLIC in 2014 would be extraordinary in nature and require prior approval from the CTDOI. The Company believes this initiative will allow for greater operational efficiencies and financial transparency to Group Benefits'

customers. Given the Company's announcement of a transaction to sell HLIKK, the Company no longer expects to receive a dividend from HLIKK in the second half of 2014.

On February 5, 2013 the Company received approval from the State of Connecticut Insurance Department for a \$1.2 billion extraordinary dividend from its Connecticut domiciled life insurance subsidiaries. This dividend was paid on February 22, 2013. For the three months ended March 31, 2014, HFSG Holding Company received \$238 in dividends from its property-casualty insurance subsidiaries. The amounts received from its property-casualty insurance subsidiaries included \$38 related to funding interest payments on an intercompany note between Hartford Holdings Inc. and Hartford Fire Insurance Company and \$200 used in conjunction with other resources at the HFSG Holding Company.

Table of Contents

Other Sources of Capital for the HFSG Holding Company

The Hartford endeavors to maintain a capital structure that provides financial and operational flexibility to its insurance subsidiaries, ratings that support its competitive position in the financial services marketplace (see the “Ratings” section below for further discussion), and shareholder returns. As a result, the Company may from time to time raise capital from the issuance of equity, equity-related debt or other capital securities and is continuously evaluating strategic opportunities. The issuance of common equity, equity-related debt or other capital securities could result in the dilution of shareholder interests or reduced net income due to additional interest expense.

Shelf Registrations

On August 9, 2013, The Hartford filed with the Securities and Exchange Commission (the “SEC”) an automatic shelf registration statement (Registration No. 333-190506) for the potential offering and sale of debt and equity securities. The registration statement allows for the following types of securities to be offered: debt securities, junior subordinated debt securities, preferred stock, common stock, depositary shares, warrants, stock purchase contracts, and stock purchase units. Because The Hartford is a well-known seasoned issuer, as defined in Rule 405 under the Securities Act of 1933, the registration statement went effective immediately upon filing and The Hartford may offer and sell an unlimited amount of securities under the registration statement during its three-year life.

Contingent Capital Facility

The Hartford is party to a put option agreement that provides The Hartford with the right to require the Glen Meadow ABC Trust, a Delaware statutory trust, at any time and from time to time, to purchase The Hartford’s junior subordinated notes in a maximum aggregate principal amount not to exceed \$500. Under the Put Option Agreement, The Hartford will pay the Glen Meadow ABC Trust premiums on a periodic basis, calculated with respect to the aggregate principal amount of Notes that The Hartford had the right to put to the Glen Meadow ABC Trust for such period. The Hartford has agreed to reimburse the Glen Meadow ABC Trust for certain fees and ordinary expenses. The Company holds a variable interest in the Glen Meadow ABC Trust where the Company is not the primary beneficiary. As a result, the Company did not consolidate the Glen Meadow ABC Trust. As of March 31, 2014, The Hartford has not exercised its right to require Glen Meadow ABC Trust to purchase the Notes. As a result, the Notes remain a source of capital for the HFSG Holding Company.

Commercial Paper and Revolving Credit Facility

Commercial Paper

While The Hartford’s maximum borrowings available under its commercial paper program are \$2.0 billion, the Company is dependent upon market conditions to access short-term financing through the issuance of commercial paper to investors. As of March 31, 2014 there is no commercial paper outstanding.

Revolving Credit Facilities

The Company has a senior unsecured revolving credit facility (the “Credit Facility”) that provides for borrowing capacity up to \$1.75 billion (which is available in U.S. dollars, and in Euro, Sterling, Canadian dollars and Japanese Yen) through January 6, 2016. Of the total availability under the Credit Facility, up to \$250 is available to support letters of credit issued on behalf of the Company or subsidiaries of the Company. Under the Credit Facility, the Company must maintain a minimum level of consolidated net worth of \$14.9 billion. The definition of consolidated net worth under the terms of the Credit Facility, excludes AOCI and includes the Company’s outstanding junior subordinated debentures and perpetual preferred securities, net of discount. In addition, the Company’s maximum ratio of consolidated total debt to consolidated total capitalization is 35%, and the ratio of consolidated total debt of subsidiaries to consolidated total capitalization is limited to 10%. As of March 31, 2014, the Company was in compliance with all financial covenants under the Credit Facility.

HLIKK has four revolving credit facilities in support of operations. Two of the credit facilities have no amounts drawn as of March 31, 2014 with borrowing limits of approximately ¥5 billion, or \$49 each, and individually have expiration dates of September 30, 2014 and January 5, 2015. In December 2013, HLIKK entered into two new revolving credit facility agreements with two Japanese banks in order to finance certain withholding taxes on mutual fund gains, that are subsequently credited to HLIKK’s tax liability when HLIKK files its income tax returns. As of March 31, 2014, HLIKK had drawn the total borrowing limits of ¥5 billion, or \$49, and ¥20 billion, or \$194 on these credit facilities. The ¥5 billion credit facility accrues interest at a variable rate based on the one month Tokyo

Interbank Offering Rate ("TIBOR") plus 3 bps; as of March 31, 2014 the interest rate was 17 bps. The ¥20 billion credit facility accrues interest at a variable rate based on TIBOR plus 3 bps, or the actual cost of funding; as of March 31, 2014 the interest rate was 18 bps. Both of the credit facilities expire on September 30, 2014.

125

Table of Contents

Derivative Commitments

Certain of the Company's derivative agreements contain provisions that are tied to the financial strength ratings of the individual legal entity that entered into the derivative agreement as set by nationally recognized statistical rating agencies. If the legal entity's financial strength were to fall below certain ratings, the counterparties to the derivative agreements could demand immediate and ongoing full collateralization and in certain instances demand immediate settlement of all outstanding derivative positions traded under each impacted bilateral agreement. The settlement amount is determined by netting the derivative positions transacted under each agreement. If the termination rights were to be exercised by the counterparties, it could impact the legal entity's ability to conduct hedging activities by increasing the associated costs and decreasing the willingness of counterparties to transact with the legal entity. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position as of March 31, 2014 is \$1.0 billion. Of this \$1.0 billion the legal entities have posted collateral of \$1.1 billion in the normal course of business. In addition, the Company has posted collateral of \$44 associated with a customized GMWB derivative. Based on derivative market values as of March 31, 2014 a downgrade of one level below the current financial strength ratings by either Moody's or S&P could require approximately an additional \$10 to be posted as collateral. Based on derivative market values as of March 31, 2014 a downgrade by either Moody's or S&P of two levels below the legal entities' current financial strength ratings could require approximately an additional \$30 of assets to be posted as collateral. These collateral amounts could change as derivative market values change, as a result of changes in our hedging activities or to the extent changes in contractual terms are negotiated. The nature of the collateral that we would post, if required, would be primarily in the form of U.S. Treasury bills, U.S. Treasury notes and government agency securities.

As of March 31, 2014, the aggregate notional amount and fair value of derivative relationships that could be subject to immediate termination in the event of rating agency downgrades to either BBB+ or Baa1 was \$414 and \$(11), respectively.

On March 6, 2014, Moody's lowered its counterparty credit and insurer financial strength ratings on Hartford Life Insurance Company to Baa2. Given this downgrade action, termination rating triggers of four derivative counterparty relationships were impacted. The counterparties have the right to terminate the relationships and would have to settle the outstanding derivatives prior to exercising termination rights. The Company is in the process of re-negotiating the rating triggers which it expects to successfully complete.

Accordingly, the Company's hedging programs have not been adversely impacted by the announcement of the downgrade of Hartford

Life Insurance Company. As of March 31, 2014 the notional amount and fair value related to these counterparties are \$10.3 billion and \$(34), respectively.

Insurance Operations

Current and expected patterns of claim frequency and severity or surrenders may change from period to period but continue to be within historical norms and, therefore, the Company's insurance operations' current liquidity position is considered to be sufficient to meet anticipated demands over the next twelve months, including any obligations related to the Company's restructuring activities. For a discussion and tabular presentation of the Company's current contractual obligations by period, refer to Off-Balance Sheet Arrangements and Aggregate Contractual Obligations within the Capital Resources and Liquidity section of the MD&A included in The Hartford's 2013 Form 10-K Annual Report.

The principal sources of operating funds are premiums, fees earned from assets under management and investment income, while investing cash flows originate from maturities and sales of invested assets. The primary uses of funds are to pay claims, claim adjustment expenses, commissions and other underwriting expenses, to purchase new investments and to make dividend payments to the HFSG Holding Company.

The Company's insurance operations consist of property and casualty insurance products (collectively referred to as "Property & Casualty Operations") and life insurance and legacy annuity products (collectively referred to as "Life Operations").

Property & Casualty Operations

Property & Casualty Operations holds fixed maturity securities including a significant short-term investment position (securities with maturities of one year or less at the time of purchase) to meet liquidity needs.

As of March 31, 2014 Property & Casualty Operations' fixed maturities, short-term investments, and cash are summarized as follows:

Fixed maturities	\$25,393
Short-term investments	1,008
Cash	176
Less: Derivative collateral	237
Total	\$26,340

Liquidity requirements that are unable to be funded by Property & Casualty Operation's short-term investments would be satisfied with current operating funds, including premiums received or through the sale of invested assets. A sale of invested assets could result in significant realized losses.

Table of Contents

Life Operations

Life Operations' total general account contractholder obligations are supported by \$49 billion of cash and total general account invested assets, excluding equity securities, trading, which includes a significant short-term investment position to meet liquidity needs.

As of March 31, 2014 Life Operations' fixed maturities, short-term investments, and cash are summarized as follows:

Fixed maturities	\$37,958
Short-term investments	2,612
Cash	1,106
Less: Derivative collateral	1,063
Less: Cash associated with Japan variable annuities	265
Total	\$40,348

Capital resources available to fund liquidity upon contractholder surrender are a function of the legal entity in which the liquidity requirement resides. Generally, obligations of Group Benefits will be funded by Hartford Life and Accident Insurance Company. Obligations of Talcott Resolution will generally be funded by Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company, while obligations of the Company's international annuity subsidiaries will generally be funded by the legal entity in the country in which the obligation was generated. Contractholder obligations of the former Retirement Plans business were funded by Hartford Life Insurance Company and of the former Individual Life business were funded by both Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company. See Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements as to the sale of the Retirement Plans and Individual Life businesses and related transfer of invested assets in January 2013.

Hartford Life Insurance Company ("HLIC"), an indirect wholly-owned subsidiary, became a member of the Federal Home Loan Bank of Boston ("FHLBB") in May 2011. Membership allows HLIC access to collateralized advances, which may be used to support various spread-based businesses and enhance liquidity management. The Connecticut Department of Insurance ("CTDOI") will permit HLIC to pledge up to \$1.25 billion in qualifying assets to secure FHLBB advances for 2014. The amount of advances that can be taken are dependent on the asset types pledged to secure the advances. The pledge limit is recalculated annually based on statutory admitted assets and capital and surplus. HLIC would need to seek the prior approval of the CTDOI if there were a desire to exceed these limits. As of March 31, 2014, HLIC had no advances outstanding under the FHLBB facility.

Contractholder Obligations	March 31, 2014
Total Life contractholder obligations	\$214,215
Less: Separate account assets [1]	138,492
Less: International statutory separate accounts [1]	17,406
General account contractholder obligations	\$58,317
Composition of General Account Contractholder Obligations	
Contracts without a surrender provision and/or fixed payout dates [2]	\$25,114
U.S. Fixed MVA annuities and Other [3]	9,917
International Fixed MVA annuities	1,424
Guaranteed investment contracts ("GIC") [4]	30
Other [5]	21,832
General account contractholder obligations	\$58,317

In the event customers elect to surrender separate account assets or international statutory separate accounts, Life Operations will use the proceeds from the sale of the assets to fund the surrender, and Life Operations' liquidity position will not be impacted. In many instances Life Operations will receive a percentage of the surrender amount as compensation for early surrender (surrender charge), increasing Life Operations' liquidity position. In addition, a surrender of variable annuity separate account or general account assets (see below) will decrease Life Operations' obligation for payments on guaranteed living and death benefits.

[2] Relates to contracts such as payout annuities or institutional notes, other than guaranteed investment products with an MVA feature (discussed below) or surrenders of term life, group benefit contracts or death and living benefit

reserves for which surrenders will have no current effect on Life Operations' liquidity requirements.

Table of Contents

Relates to annuities that are recorded in the general account (under U.S. GAAP), although these annuities are held in a statutory separate account, as the contractholders are subject to the Company's credit risk. In the statutory separate account, Life Operations is required to maintain invested assets with a fair value greater than or equal to the MVA surrender value of the Fixed MVA contract. In the event assets decline in value at a greater rate than the MVA surrender value of the Fixed MVA contract, Life Operations is required to contribute additional capital to the [3] statutory separate account. Life Operations will fund these required contributions with operating cash flows or short-term investments. In the event that operating cash flows or short-term investments are not sufficient to fund required contributions, the Company may have to sell other invested assets at a loss, potentially resulting in a decrease in statutory surplus. As the fair value of invested assets in the statutory separate account are generally equal to the MVA surrender value of the Fixed MVA contract, surrender of Fixed MVA annuities will have an insignificant impact on the liquidity requirements of Life Operations.

GICs are subject to discontinuance provisions which allow the policyholders to terminate their contracts prior to scheduled maturity at the lesser of the book value or market value. Generally, the market value adjustment reflects [4] changes in interest rates and credit spreads. As a result, the market value adjustment feature in the GIC serves to protect the Company from interest rate risks and limit Life Operations' liquidity requirements in the event of a surrender.

Surrenders of, or policy loans taken from, as applicable, these general account liabilities, which include the general account option for Talcott Resolution's individual variable annuities and the variable life contracts of the former Individual Life business, the general account option for annuities of the former Retirement Plans business and universal life contracts sold by the former Individual Life business, may be funded through operating cash flows of Life Operations, available short-term investments, or Life Operations may be required to sell fixed maturity [5] investments to fund the surrender payment. Sales of fixed maturity investments could result in the recognition of realized losses and insufficient proceeds to fully fund the surrender amount. In this circumstance, Life Operations may need to take other actions, including enforcing certain contract provisions which could restrict surrenders and/or slow or defer payouts. See Note 2 - Business Dispositions of Notes to Condensed Consolidated Financial Statements as to the sale of the Retirement Plans and Individual Life businesses and related transfer of invested assets in January 2013.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Off-Balance Sheet Arrangements

There have been no material changes to the Company's off-balance sheet arrangements since the filing of the Company's 2013 Form 10-K Annual Report.

Aggregate Contractual Obligations

There have been no material changes to the Company's aggregate contractual obligations since the filing of the Company's 2013 Form 10-K Annual Report.

Capitalization

The capital structure of The Hartford as of March 31, 2014 and December 31, 2013 consisted of debt and stockholders' equity, summarized as follows:

	March 31, 2014	December 31, 2013	Change	
Short-term debt (includes current maturities of long-term debt)	\$289	\$200	45	%
Short-term due on revolving credit facility	243	238	2	%
Long-term debt	5,818	6,106	(5))%
Total debt [1]	6,350	6,544	(3))%
Stockholders' equity excluding accumulated other comprehensive income (loss) net of tax ("AOCI")	19,115	18,984	1	%
AOCI, net of tax	659	(79))	NM
Total stockholders' equity	\$19,774	\$18,905	5	%
Total capitalization including AOCI	\$26,124	\$25,449	3	%
Debt to stockholders' equity	32	% 35	%	

Debt to capitalization	24	% 26	%
------------------------	----	------	---

[1] Total debt of the Company excludes \$78 and \$84 of consumer notes as of March 31, 2014 and December 31, 2013, respectively.

The Hartford's total capitalization increased \$0.7 billion, or 3%, from December 31, 2013 to March 31, 2014 primarily due to an increase in AOCI, net of tax. AOCI, net of tax, increased from December 31, 2013 to March 31, 2014 primarily due to net unrealized capital gains from securities.

For additional information on AOCI, net of tax, and unrealized capital gains from securities, see Note 18 - Changes in and Reclassifications From Accumulated Other Comprehensive Income of Notes to Condensed Consolidated Financial Statements and Note 6 - Investments and Derivative Instruments of Notes to Condensed Consolidated Financial Statements.

Table of Contents

Cash Flows

	Three Months Ended March 31,	
	2014	2013
Net cash provided by operating activities	\$349	\$186
Net cash provided by used for investing activities	\$196	\$307
Net cash used for financing activities	\$(685	\$(852
Cash – end of period	\$1,285	\$1,985

Cash provided by operating activities increased in 2014 primarily due to a decrease in income taxes paid and a decrease in loss and loss adjustment expenses.

Cash provided by investing activities in 2014 primarily relates to net proceeds from available for sale securities of \$451, partially offset by a decrease in change in mortgage loans of \$108. Cash provided by investing activities in 2013 primarily relates to net proceeds from available for sale securities of \$462, proceeds from businesses sold of \$485, and net proceeds from mortgage loans of \$131, partially offset by net purchases of derivatives of \$776.

Cash used for financing activities in 2014 consists primarily of \$289 related to net activity for investments and universal life products, repayment of debt of \$200, and acquisition of treasury stock of \$300. Cash used for financing activities in 2013 consists primarily of repurchases of long-term debt of \$1.0 billion, partially offset by net increases in securities loaned or sold of \$472.

Operating cash flows for the three months ended March 31, 2014 and 2013 have been adequate to meet liquidity requirements.

Equity Markets

For a discussion of the potential impact of the equity markets on capital and liquidity, see the Enterprise Risk Management section of the MD&A.

Ratings

Ratings impact the Company's cost of borrowing and its ability to access financing and are an important factor in establishing competitive position in the insurance and financial services marketplace. There can be no assurance that the Company's ratings will continue for any given period of time or that they will not be changed. In the event the Company's ratings are downgraded, the Company's cost of borrowing and ability to access financing, as well as the level of revenues or the persistency of its business may be adversely impacted.

On March 6, 2014, Moody's Investors Service ("Moody's") affirmed the debt ratings of The Hartford Financial Services Group, Inc. and the insurance financial strength ratings of its property and casualty subsidiaries and Hartford Life and Accident Insurance Company. The outlook on these entities was changed to positive from stable. Moody's downgraded the insurance financial strength rating of Hartford Life Insurance Company to Baa2 from A3. Moody's affirmed the insurance financial strength rating of Hartford Life and Annuity Insurance Company. The outlook for Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company is stable.

On April 3, 2014, A.M. Best revised the outlook to positive from stable and affirmed the issuer credit ratings and debt ratings of The Hartford Financial Services Group, Inc. and the financial strength ratings and issuer credit ratings of the property and casualty subsidiaries. A.M. Best upgraded the financial strength rating of Hartford Life and Accident Insurance Company to A from A- and affirmed the ratings of Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company. The outlook for Hartford Life and Accident Insurance Company, Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company is stable.

On April 15, 2014 Standard & Poor's ("S&P") raised its long-term financial strength rating and counterparty credit ratings on Hartford Life and Accident Insurance Company to A from A-. At the same time S&P raised the rating on Hartford Life Inc. to BBB from BBB-. The outlook for Hartford Life and Accident Insurance Company and Hartford Life, Inc. is stable.

On April 22, 2014, Fitch upgraded the insurer financial strength rating of Hartford Life and Accident Insurance Company to A from A- with a stable outlook. Fitch downgraded the insurer financial strength rating of Hartford Life Insurance Company and Hartford Life and Annuity Insurance Company to BBB+ from A- with a stable outlook.

Table of Contents

The following table summarizes The Hartford's significant member companies' financial strength ratings from the major independent rating organizations as of April 23, 2014.

Insurance Financial Strength Ratings:	A.M. Best	Fitch	Standard & Poor's	Moody's
Hartford Fire Insurance Company	A	A+	A	A2
Hartford Life Insurance Company	A-	BBB+	BBB+	Baa2
Hartford Life and Accident Insurance Company	A	A	A	A3
Hartford Life and Annuity Insurance Company	A-	BBB+	BBB+	Baa2
Other Ratings:				
The Hartford Financial Services Group, Inc.:				
Senior debt	bbb+	BBB	BBB	Baa3
Commercial paper	AMB-2	F2	A-2	P-3

These ratings are not a recommendation to buy or hold any of The Hartford's securities and they may be revised or revoked at any time at the sole discretion of the rating organization.

The agencies consider many factors in determining the final rating of an insurance company. One consideration is the relative level of statutory surplus necessary to support the business written. Statutory surplus represents the capital of the insurance company reported in accordance with accounting practices prescribed by the applicable state insurance department.

Statutory Surplus

The table below sets forth statutory surplus for the Company's insurance companies as of March 31, 2014 and December 31, 2013:

	March 31, 2014	December 31, 2013
U.S. life insurance subsidiaries, includes domestic captive insurance subsidiaries	\$7,016	\$6,639
Property and casualty insurance subsidiaries	8,294	8,022
Total	\$15,310	\$14,661

Statutory capital and surplus for the U.S. life insurance subsidiaries, including domestic captive insurance subsidiaries, increased by \$377, primarily due to variable annuity surplus impacts of \$170, change in deferred income tax of \$104, net income from non-variable annuity business of \$96, change of unrealized gains from other invested assets carrying values of \$58, and partially offset by the decreases in other surplus changes of \$51.

Statutory capital and surplus for property and casualty increased by \$272, primarily due to net income of \$466, capital contributions of \$6, and unrealized gains of \$26, partially offset by an increase of statutory nonadmitted assets of \$16, a reduction of deferred tax assets of \$9, and dividends to HFSG Holding Company of \$201. Both net income and dividends are net of interest payments and dividends, respectively, on an intercompany note between Hartford Holdings, Inc. and Hartford Fire Insurance Company.

The Company also holds regulatory capital and surplus for its operations in Japan. Under the accounting practices and procedures governed by Japanese regulatory authorities, the Company's statutory capital and surplus was \$1.3 billion and \$1.2 billion as of March 31, 2014 and December 31, 2013. The statutory surplus amount as of March 31, 2014 is an estimate, as the quarter ended March 31, 2014 statutory filings have not yet been made.

Sale of Hartford Life Insurance K.K.

The Company estimates a March 31, 2014 pro forma capital benefit from the transaction of approximately \$1.4 billion, including the net sales proceeds of approximately \$860 and an estimated reduction in capital required in the Company's U.S. life insurance subsidiaries of approximately \$540 due to the termination of reinsurance agreements with those subsidiaries supporting the Japan annuity business. Dividends from the U.S. life insurance subsidiaries would be extraordinary in nature and require prior approval of the CTDOI. For further discussion of this transaction, see Note 19 - Subsequent Event of Notes to Condensed Consolidated Financial Statements.

Contingencies

Legal Proceedings – For a discussion regarding contingencies related to The Hartford's legal proceedings, please see the information contained under "Litigation" in Note 11 of the Notes to Condensed Consolidated Financial Statements and

Part II, Item 1 Legal Proceedings, which are incorporated herein by reference.

Table of Contents

Legislative Developments

Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”)

Since it was enacted in 2010, the Dodd-Frank act has resulted in significant changes to the regulation of the financial services industry, including changes to the rules governing derivatives, restrictions on proprietary trading by certain entities, the creation of a Federal Insurance Office within the U.S. Treasury, and enhancements to corporate governance rules, among other things. The Dodd-Frank Act requires significant rulemaking across numerous agencies within the federal government. Rulemaking, and implementation of newly-adopted rules, is ongoing and may affect our operations and governance in ways that could adversely affect our financial condition and results of operations. Patient Protection and Affordable Care Act of 2010 (the "Affordable Care Act")

On March 23, 2010, the President signed the Affordable Care Act. Implementation of the Affordable Care Act will impact The Hartford in the same way it impacts other large employers. The Hartford’s core business does not involve the issuance of health insurance. We do not issue any products that insure customers under the Affordable Care Act’s individual mandate. It is too early to tell how the Affordable Care Act will impact The Hartford’s businesses as key aspects of the law are still not fully implemented. For example, private exchanges may provide The Hartford additional opportunities to market our group benefit products and services. Similarly, access to medical care and medical costs are a substantial component of both disability and workers compensation products offered by The Hartford. We are currently analyzing how the Affordable Care Act may impact consumer, broker and medical provider behavior.

Terrorism Risk Insurance Program Reauthorization Act of 2007 (“TRIPRA”)

On December 26, 2007, the President signed TRIPRA extending the Terrorism Risk Insurance Act of 2002 (“TRIA”) through the end of 2014. The Company's principal reinsurance protection against large-scale terrorist attacks is the coverage currently provided through TRIPRA, as private sector catastrophe reinsurance is extremely limited and generally unavailable for terrorism losses caused by attacks with nuclear, biological, chemical or radiological weapons. TRIPRA is due to expire at the end of 2014 unless Congress takes legislative action to reauthorize it. If Congress fails to act, the Company may be required to take actions to reduce its exposure to terrorism risks, which could negatively impact its business. Even if Congress extends TRIPRA beyond 2014, it could make changes that would negatively impact the Company. For example, legislation introduced in the Senate on April 10, 2014 would extend TRIA for seven years, but would also raise the deductible for insurers and reduce the total amount of losses covered by the federal government. For additional information on TRIPRA see “Terrorism” under the Insurance Risk Management section of the MD&A.

Budget of the United States Government

On March 4, 2014, the Obama Administration released its “Fiscal Year 2015, Budget of the U.S. Government” (the “Budget”). Although the Administration has not released proposed statutory language, the Budget includes proposals that, if enacted, would affect the taxation of life insurance companies and certain life insurance products. In particular, the proposals would change the method used to determine the amount of dividend income received by a life insurance company on assets held in separate accounts used to support products, including variable life insurance and variable annuity contracts, which are eligible for the dividends received deduction (“DRD”). The DRD reduces the amount of dividend income subject to tax and is a significant component of the difference between the Company's actual tax expense and expected amount determined using the federal statutory tax rate of 35%. If this proposal were enacted, the Company's actual tax expense could increase, reducing earnings.

IMPACT OF NEW ACCOUNTING STANDARDS

For a discussion of accounting standards, see Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements included in The Hartford's 2013 Form 10-K Annual Report and Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements in this Form 10-Q.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information contained in the Financial Risk Management section of Management's Discussion and Analysis of Financial Condition and Results of Operations is incorporated herein by reference.

Item 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures

The Company's principal executive officer and its principal financial officer, based on their evaluation of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) have concluded that the Company's disclosure controls and procedures are effective for the purposes set forth in the definition thereof in Exchange Act Rule 13a-15(e) as of March 31, 2014.

Changes in internal control over financial reporting

On January 1, 2013, the Company implemented a new enterprise general ledger designed to create a simplified and standardized financial reporting environment while enhancing management's decision effectiveness and improving the control environment surrounding the Company's financial data and information. Effective January 1, 2013, the Company's Property and Casualty businesses began accounting and reporting from the enterprise general ledger. Effective January 1, 2014, the Group Benefits, Mutual Funds and Talcott Resolution businesses have begun accounting and reporting from the enterprise general ledger.

Table of Contents

Part II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Litigation

The Hartford is involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending or providing indemnity for third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Hartford accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. Subject to the uncertainties discussed below under the caption “Asbestos and Environmental Claims,” management expects that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to the consolidated financial condition, results of operations or cash flows of The Hartford.

The Hartford is also involved in other kinds of legal actions, some of which assert claims for substantial amounts. These actions include, among others, and in addition to the matters described below, putative state and federal class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, underpayment of claims or improper underwriting practices in connection with various kinds of insurance policies, such as personal and commercial automobile, property, disability, life and inland marine. The Hartford also is involved in individual actions in which punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims or other allegedly unfair or improper business practices. Like many other insurers, The Hartford also has been joined in actions by asbestos plaintiffs asserting, among other things, that insurers had a duty to protect the public from the dangers of asbestos and that insurers committed unfair trade practices by asserting defenses on behalf of their policyholders in the underlying asbestos cases. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to the consolidated financial condition of The Hartford. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, the outcome in certain matters could, from time to time, have a material adverse effect on the Company’s results of operations or cash flows in particular quarterly or annual periods.

Apart from the inherent difficulty of predicting litigation outcomes, the Mutual Funds Litigation identified below purports to seek substantial damages for unsubstantiated conduct spanning a multi-year period based on novel applications of complex legal theories. The alleged damages are not quantified or factually supported in the complaint, and, in any event, the Company’s experience shows that demands for damages often bear little relation to a reasonable estimate of potential loss. The matter is in the earliest stages of litigation, with no substantive legal decisions by the court defining the scope of the claims or the potentially available damages; fact discovery is also in its early stages. Accordingly, management cannot reasonably estimate the possible loss or range of loss, if any, or predict the timing of the eventual resolution of this matter.

Mutual Funds Litigation — In February 2011, a derivative action was brought on behalf of six Hartford retail mutual funds in the United States District Court for the District of New Jersey, alleging that Hartford Investment Financial Services, LLC (“HIFSCO”), an indirect subsidiary of the Company, received excessive advisory and distribution fees in violation of its statutory fiduciary duty under Section 36(b) of the Investment Company Act of 1940. HIFSCO moved to dismiss and, in September 2011, the motion was granted in part and denied in part, with leave to amend the complaint. In November 2011, plaintiffs filed an amended complaint on behalf of The Hartford Global Health Fund, The Hartford Conservative Allocation Fund, The Hartford Growth Opportunities Fund, The Hartford Inflation Plus Fund, The Hartford Advisors Fund, and The Hartford Capital Appreciation Fund. Plaintiffs seek to rescind the investment management agreements and distribution plans between HIFSCO and these funds and to recover the total fees charged thereunder or, in the alternative, to recover any improper compensation HIFSCO received, in addition to lost earnings. HIFSCO filed a partial motion to dismiss the amended complaint and, in December 2012, the court dismissed without prejudice the claims regarding distribution fees and denied the motion with respect to the advisory fees claims. In March 2014, the plaintiffs filed a new complaint that, among other things, added as new plaintiffs The Hartford Floating Rate Fund and The Hartford Small Company Fund and named as a defendant Hartford Funds Management Company, LLC (“HFMC”), an indirect subsidiary of the Company which assumed the role as advisor to the funds as of January 2013. HFMC and HIFSCO dispute the allegations and intend to defend vigorously.

Asbestos and Environmental Claims – As discussed in Item 2, Management’s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Estimates - Property and Casualty Insurance Product Reserves, Net of Reinsurance - Property & Casualty Other Operations Claims, The Hartford continues to receive asbestos and environmental claims that involve significant uncertainty regarding policy coverage issues. Regarding these claims, The Hartford continually reviews its overall reserve levels and reinsurance coverages, as well as the methodologies it uses to estimate its exposures. Because of the significant uncertainties that limit the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid losses and related expenses, particularly those related to asbestos, the ultimate liabilities may exceed the currently recorded reserves. Any such additional liability cannot be reasonably estimated now but could be material to The Hartford’s consolidated operating results and liquidity.

133

Table of Contents

Item 1A. RISK FACTORS

Investing in The Hartford involves risk. In deciding whether to invest in The Hartford, you should carefully consider the risk factors disclosed in Item 1A of Part I of the Company's Annual Report on Form 10-K for the year ended December 31, 2013, any of which could have a significant or material adverse effect on the business, financial condition, operating results or liquidity of The Hartford. This information should be considered carefully together with the other information contained in this report and the other reports and materials filed by The Hartford with the SEC.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Purchases of Equity Securities by the Issuer

The following table summarizes the Company's repurchases of its common stock for the three months ended March 31, 2014:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs [1] (in millions)
January 1, 2014 - January 31, 2014	3,430,163	\$ 34.36	3,430,163	\$ 1,882
February 1, 2014 - February 28, 2014	4,993,411	\$ 33.70	4,993,411	\$ 1,714
March 1, 2014 - March 31, 2014	754,988	\$ 35.25	397,351	\$ 1,700
Total	9,178,562	\$ 34.08	8,820,925	

In January 2014, the Board of Directors approved an increase in the Company's authorized equity repurchase program that provides the Company with the ability to repurchase \$2 billion in equity during the period commencing on January 1, 2014 and ending on December 31, 2015. The Company's repurchase authorization, which expires on December 31, 2015, permits purchases of common stock, as well as warrants or other derivative securities. Repurchases may be made in the open market, through derivative, accelerated share repurchase and other privately negotiated transactions, and through plans designed to comply with Rule 10b5-1(c) under the Securities Exchange Act of 1934, as amended. The timing of any future repurchases will be dependent upon several factors, including the market price of the Company's securities, the Company's capital position, consideration of the effect of any repurchases on the Company's financial strength or credit ratings, and other corporate considerations. The repurchase program may be modified, extended or terminated by the Board of Directors at any time.
