Magic Software Announces Third Quarter Results

Showing Continued Profitability

Magic Announces Plans To Repurchase Up To Two Million Dollars Of Its Stock

OR YEHUDA, ISRAEL (November 4, 2004) - Magic Software Enterprises Ltd. (Nasdaq: MGIC), a leading provider of state-of-the-art business integration and development technology, reported today its results for the quarter and nine-months ending September 30, 2004, showing for the first nine months of 2004 an increase in License Sales and Net Profit over the comparable period in 2003.

Magic s Board of Directors has authorized the repurchase of up to two million dollars of its ordinary shares. In approving the stock buyback, the Board stated that it believes its stock is significantly undervalued and represents an attractive investment opportunity as a result of current market conditions.

Third Quarter Results

Third quarter revenue reached \$15.02 million, a 4% decrease from the \$15.67 million achieved in the comparable quarter of 2003. License sales for the quarter reached \$4.71 million, a 1% decrease from \$4.75 million recorded in the same quarter in 2003. Application sales were \$1.32 million, a decrease of 22% from the \$1.70 million achieved in the comparable 2003 quarter, while revenue from maintenance and support, at \$3.21 million, increased 16% from \$2.76 million achieved in the same period in 2003. Revenue from consulting and other services, at \$5.77 million, decreased 11% from \$6.46 million achieved in the comparable 2003 quarter.

Gross profit in the third quarter of 2004 reached \$9.30 million, a decrease of 5% compared to \$9.83 million recorded in the comparable quarter of 2003. Net profit for the third quarter was \$746,000 (or \$0.02 per), an 8% decrease compared to a net profit of \$813,000 (or \$0.03 per) in the third quarter of 2003.

Results of First Three Ouarters

Total revenue reached \$48.14 million, an increase of 4% from \$46.10 million achieved in the first three quarters of last year. License sales increased 17% over the same period last year, reaching \$15.65 million. Application revenue reached \$4.76 million a decrease of 5% over the same period last year. Maintenance and support revenue was \$9.08 million, a 14% increase from the \$8.00 million achieved in the comparable 2003 period. Revenue from consulting and other services totaled \$18.65 million, a 5% decrease compared with the same period of last year.

Gross profit reached \$29.50 million, an increase of 5% over the comparable period of last year, while gross margin was 61%, identical to the same period in 2003. Net profit totaled \$2.38 million (or \$0.08 per share), an increase of 29% over \$1.84 million (or \$0.06 per share) in the first 9 months of 2003.

In the third quarter of 2004, Europe accounted for 38% of total revenue, while North America, Japan and rest of the world accounted for 34%, 18% and 10%, respectively. In the first three quarters of 2004, Europe accounted for 40% of total revenue, while North America, Japan and the rest of the world accounted for 32%, 18% and 10% respectively. The fastest growing territory in the first three quarters of 2004 was Japan with a 22% increase in revenues over the same period in 2003, followed by Europe with a 10% growth in revenue.

Our performance during the quarter suffered from last minute decision-making delays on the part of some of our customers, rather than deals lost to our competitors. While revenue in the quarter was below our expectations, we are encouraged by our ability to maintain continued profitability due to our disciplined spending. On the positive side, the growth we have achieved in the first nine months of the year, especially in license sales which grew at 17% and

maintenance and support, which grew at 14%, reflect the accelerated efforts we have been making in customer retention and support to increase customer loyalty, commented Menachem Hasfari, CEO of Magic Software.

Our iBOLT program is moving forward. The average iBOLT deal is getting bigger in volume and 25 new iBOLT partners have been recruited during the quarter. The revolutionary new version of iBOLT was released in October 2004 and I am certain it will increase our competitive edge significantly, noted Hasfari. Hermes, our fully owned eCargo activity, is growing and I expect it soon to become the cargo industry s standard.

"The Board's stock buy-back decision reflects management's confidence in our company's future and its commitment to building shareholder value and is based upon our portfolio of current business opportunities, new strategic partnerships, and our aggressive product development efforts, " said Hasfari.

Magic plans to repurchase the shares from time to time in the open market subject to, among other things, general market conditions and the market price of its ordinary shares.

Accomplishments

The following highlights were announced or occurred since Magic Software Enterprises last earnings statement:

Magic released iBOLT V2, designed to deliver enhanced features and functionality that streamlines business connectivity and automation while simplifying and reducing the potential risks of the integration process.

Magic announced the signing of a joint Marketing Agreement with IDS Scheer AG. Magic will work with IDS Scheer AG to market IDS software products from the ARIS product line for business process management.

Magic Software improved its rating in Software Magazine s Software 500 List.

Conference Call
