TAP Services of Portugal Selects Magic s HERMES Cargo System in a Four Year, \$1.4 Million Contract

Magic s HERMES provides greater management control, increased efficiency and improved integration for airline businesses

Houten, The Netherlands, (March 23, 2005) - Magic Software Enterprises (Nasdaq: MGIC), a leading provider of state-of-the-art business integration and development technology, announced today the successful implementation of HERMES, its air cargo handling system at TAP Serviços Portugueses de Handling, S.A. (SPdH) in a deal valued at \$ 1.4 million over a four year period. The part of the deal pertaining to 2004 was already recognized in 2004.

Portugal based SPdH is the privatized ground handling division of Transportes Aéreos Portugueses (TAP), the airline of Portugal. Since privatization last year, SPdH has worked to increase both its customer base and the volume of cargo it handles. To compete successfully in the air cargo market, SPdH required a system that would modernize its entire cargo handling operation to achieve its goal of becoming the top performing cargo handler in the Iberian Peninsula and other Portuguese speaking countries.

Magic is already providing a hosted version of Hermes for several other customers proving that hosting is the ideal solution for SPdH. The first site went live in Porto, Portugal in January 2005 and a second implementation is scheduled for completion in Lisbon in April 2005.

The successful implementation of HERMES will enable SPdH to handle an estimated four-fold increase in volumes of cargo without any further increase in staff, while at the same time, further strengthen cargo tracking and management. Ultimately, this will help SPdH increase its service standards and reduce failures. Customers of SPdH are already benefiting from the improved level of customer service.

Chris Notter, Operations Director of Lufthansa Cargo, one of SPdH s key customers said, The HERMES system provided us with a powerful IT solution that will help us overcome the current stumbling blocks, such as IT shortfalls and infrastructure of our major airports. With the upcoming roll out at Lisbon Airport, we anticipate further success.

Magic s HERMES is a comprehensive solution for cargo handling and inventory control designed to increase a company s productivity and efficiency. It is already in use by cargo handlers worldwide including Menzies World Cargo, Europe s fastest growing independent cargo handling company, PACTL, the leading cargo handler to Shanghai Airport and Icelandair Cargo, Iceland s number one cargo handler.

Regev Yativ, Managing Director Magic EMEA said, The combination of Magic s expertise in the cargo handling market, the customer orientated approach of HERMES and our proven integration technology that is critical for the deployment of solutions like HERMES, are helping us deliver business solutions that yield significant and immediate return on investment.
