**DOT HILL SYSTEMS CORP.  
EXPLANATORY NOTE**

We are filing this Amendment No. 1 on Form 10-K/A to amend Item 9A. *Controls and Procedures* of our Form 10-K originally filed on March 16, 2006 to include additional disclosure as requested by the SEC. No revisions have been made to our financial statements or any other disclosure contained in our Form 10-K originally filed on March 16, 2006.

**PART II**

**Item 9A. *Controls and Procedures***

Our chief executive officer and chief financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Securities Exchange Act of 1934, as amended, Rule 13a-15(e)) as of the end of the period covered by this Annual Report on Form 10-K, have concluded that as of the end of such period, our disclosure controls and procedures are effective and ensure that information required to be disclosed by us in the reports that we file under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time period specified in the SEC's rules and forms and is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow for timely decisions regarding required disclosure.

During the three months ended December 31, 2005, in connection with the remediation of our material weaknesses previously identified by management's assessment of the effectiveness of our internal control over financial reporting as of December 31, 2004, we implemented improvements to our internal controls related to accounting and financial reporting, fixed assets and inventory that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Specifically, we hired two certified public accountants with relevant experience to lead the finance department and communicated to accounting personnel formal policies and procedures. Our fixed asset internal control improvements during the fourth quarter consisted of a physical observation of substantially all of our fixed assets, improvements in our policies and procedures surrounding asset identification, asset tracking, and the procurement of fixed assets. Improvements in inventory internal controls were attributed to the hiring of a cost accountant with relevant experience and improvements in policies and procedures related to inventory costing, valuation and recording.

**Dot Hill Systems Corp.'s Report on Internal Control Over Financial Reporting**

Our management is responsible for establishing and maintaining effective internal control over financial reporting. Our internal control system was designed to provide reasonable assurance to the company's management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

An internal control material weakness is a significant deficiency, or combination of significant deficiencies, that results in a more than remote likelihood that a material misstatement of the financial statements will not be prevented or detected on a timely basis by employees in the normal course of their work. A control deficiency, or combination of control deficiencies, that adversely affects the company's ability to initiate, authorize, record, process, or report external financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the company's annual or interim financial statements that is more than inconsequential will not be prevented or detected.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the company's internal control over financial reporting was effective as of December 31, 2005. Deloitte & Touche LLP has audited this assessment of our internal control over financial reporting; their report is included herein.

In order to address the material weaknesses previously identified by management's assessment of the effectiveness of the company's internal control over financial reporting as of December 31, 2004, management completed the following corrective measures which it believes have remediated the material weaknesses.

In 2004, a material weakness was identified related to entity-level controls resulting from (i) an inadequate number of accounting and finance personnel with sufficient technical expertise in the area of U.S. GAAP and financial

reporting at

**Table of Contents**

both our corporate headquarters and foreign subsidiaries, (ii) failure to document with sufficient support the prior application of our accounting policies, practices and procedures, and (iii) lack of effective deterrent controls and detective controls to properly apply U.S. GAAP to our financial reporting process. We have strengthened our accounting and financial reporting function by adding two certified public accountants with recent relevant experience, one of which is a senior management position. At our subsidiaries, we have hired a senior finance director for our subsidiary in Japan and added additional accounting resources to our subsidiary in the Netherlands. We have also hired additional staff in various areas of the company including, but not limited to, general accounting, order entry and materials management. The addition of these individuals has allowed us to perform and review the necessary internal control activities pertaining to our financial close and reporting process on a timely basis. Additionally, accounting policies and procedures were formally documented and communicated.

In 2004, a material weakness was identified related to internal controls over fixed assets resulting from (i) inadequate documentation within our fixed asset accounting system to assist in the identification and location of certain fixed assets, (ii) failure to apply identification tags to fixed assets located outside of our corporate headquarters and, (iii) failure to document with sufficient support the prior application of our accounting policies, practices and procedures pertaining to the classification of certain expenditures as fixed assets. We have improved our controls over the processing of fixed assets. Such improvements consist of revised documentation and additional review of the authorization and accounting treatment related to the acquisition of fixed assets. We have also improved our ability to better identify and track our fixed assets by implementing controls over self constructed assets and we have assigned asset identification tags to all of our assets located outside of our corporate headquarters. Additionally, we performed a physical count of substantially all of our fixed assets during the second half of 2005.

In 2004, a material weakness was identified related to internal controls over inventory resulting from inadequate understanding and documentation of a reconciling item between our general ledger and perpetual inventory listing, the use of our general ledger to process customer support transactions that should not impact our financial statements and limitations present in our historical enterprise resource planning software requiring a significant number of manual processing steps. Improvements in inventory internal controls were attributed to the hiring of a cost accountant with relevant experience and improvements in policies and procedures related to inventory costing, valuation and recording.

**PART IV**

**Item 15. Exhibits and Financial Statement Schedules**

(a) The following documents are filed as part of this report:

(3) Exhibits:

**Exhibit
