Press Release

2001 Capex and Capex Budget for 2002

Rio de Janeiro, April 4, 2002 - Companhia Vale do Rio Doce invested US\$ 1.537 billion in 2001, almost the same amount reached in the previous year, of US\$ 1.602 billion, the highest in the Company's history. Capital allocation decision making is based on rigorous analysis, with the essential goal of creating shareholder value.

Total investments in mining and metals amounted to US\$ 1.361 billion, representing 88.5% of capital expenditure in 2001.

In 2001, 60% of total investment, US\$ 911.7 million, was dedicated to acquisitions. The main acquisitions were: Ferteco for US\$ 566 million, 50% of Caemi's common share capital for US\$ 278.7 million and 50% of Mineracao Sossego for US\$ 42.5 million.

Project investments amounted to US\$ 264.4 million. US\$ 84.1 million was spent on construction of the Sao Luis pelletizing plant and US\$ 55.1 million on the infrastructure needed for its installation. US\$ 3.8 million was also spent on the initial investments to increase the capacity of the pelletizing plants in Tubarao, from 25 to 28.2 million tpy.

On iron ore logistics, US\$ 20.6 million was invested in the purchase of wagons and locomotives, US\$ 6.3 million, in the construction of a stock yard in the Northern System and was begun the construction of Pier III in the port of Ponta da Madeira in Sao Luis, with US\$ 4.1 million spent in 2001. The capex budget for this project is US\$ 29.7 million and it is due for completion in 2003.

## Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

The main investments in logistics were: purchase of locomotives and wagons for general cargo transportation, for US\$ 9 million; the expansion of the Praia Mole maritime terminal, US\$ 2.9 million; expansion of the pig-iron stock yard, US\$ 2.6 million; and equipment for the Vila Velha terminal - TVV, US\$ 2.3 million.

A capital injection of US\$ 12.6 million was made into the Mineracao Sossego, responsible for the implementation of the Sossego project.

Investment in the construction of hydroelectric power plants amounted to US\$ 50.3 million. A large part of these funds, US\$ 21.2 million, was spent on the construction of the Aimores plant, where we have a 51% stake and start up is due to December 2003 with a capacity of 300 MW.

Expenditure on maintenance and environmental protection measures amounted to US\$ 231.9 million, mainly in the Southern System in order to bring it into line with the already excellent standards in the Northern System.

### Mineral Exploration

The Company's mineral exploration program, carried out by its subsidiary Docegeo, involved US\$ 45.2 million, from which US\$ 29.8 million was made by National Social and Economic Development Bank - BNDES under the Mineral Risk Contract drawn up in 1997. In 2001, the focus was on copper, nickel, gold, platinum group metals (PGM), diamonds, and industrial minerals (kaolin, potash and limestone) exploration. Most of the effort was concentrated in the mineral province of Carajas, which allows it to be conducted at very low cost.

Vale do Rio Doce

Press Release

CVRD's mineral exploration program has four important competitive advantages: the technical knowledge and focus of Docegeo, similar to a good junior exploration; financial and technical capability of a large mining company; the extraordinary mineral potential of Carajas, where the Company has substantial mineral rights and geological data base; and the availability of railroad and electrical infrastructure. This exploration strategy has produced very good results, with the discovery of world-class copper and gold deposits between 1996 and 1998. At the same time it implies in very low development costs

The mineral exploration program also includes prospecting in the states of Minas Gerais and Alagoas, where efforts have located promising deposits of zinc and copper with gold, respectively. Prospecting for kaolin, carried out in the region of the Capim river, in the state of Para, has identified fresh mineral deposits.

Initial prospecting work was also carried out in Chile, Peru and Equator, examining the geological potential for copper mining.

Press Release

### CAPEX BUDGET FOR 2002

Exploiting profitable organic growth opportunities

The capital expenditure budget for 2002 provides for total investment of US\$ 956.3 million. This amount does not include provisions for acquisition opportunities that may arise.

In line with strategic guidelines, US\$ 602.6 million is allocated to mining, 63% of the total budget - US\$ 411.2 million for ferrous minerals and US\$ 191.4 million for non-ferrous minerals. US\$ 112.5 million is budgeted for investment in logistics and US\$ 138.7 million in electricity generation.

Most of the budget, US\$ 400.6 million, is allocated for projects in the areas of iron ore, pellets and electricity generation.

CVRD is finalizing the works on the new pelletizing plant at Sao Luis in the Northern System, which will require investments of US\$ 90.8 million in 2002 - US\$ 50 million on the plant itself and US\$ 40.8 million on supporting infra-structure.

CVRD is expected to invest US\$ 82 million to increase the capacity for the production and transportation of iron ore.

For the electricity generation area, capex budget for 2002 is US\$ 138.7 million. Most of it will be spent on six hydro-electric projects which are in different phases of construction or environmental licensing procedures (Aimores, Candonga, Funil, Capim Branco I & II and Foz do Chapeco).

Continuing the focus on increasing freight carried for third parties, in 2002 CVRD is to invest US\$ 25 million in a series of projects to increase port capacity.

In the non-ferrous area, the Company is investing US\$ 17 million to expand the production capacity of potash from 600,000 to 800,000 tpy by 2005.

Most of the capital injections will be allocated to non-ferrous minerals. US\$

## Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

111.3 million will be spent on the development of the Sossego copper project, due to come on stream in mid-2004, and US\$ 4.6 million on pre-feasibility studies for the Salobo copper project.

Maintenance and environmental protection expenses are estimated at US\$ 202.9 million. Most of this will be spent on the Southern System - US\$ 115.4 million - mainly for the replacement of parts and equipment and a series of other improvements to cut costs and improve ore quality. In the Northern System, maintenance expenses are linked to increasing production capacity.

CVRD's expenditure on mineral exploration will be 35% higher than realized in 2001, representing 4% of total investment - US\$ 40.2 million. This amount, added with the US\$ 21.2 million to be spent by BNDES under the Mineral Risk Contract, will result in US\$ 61.4 million budgeted for mineral exploration in 2002. It will be spent on exploration of ferrous minerals, copper, gold, diamonds, platinum, nickel and kaolin.
