**Item 2.02. Results of Operations and Financial Condition**

On April 21, 2010, QUALCOMM Incorporated ( Qualcomm or the Company ) issued a press release regarding the Company's financial results for its second fiscal quarter ended March 28, 2010. The full text of the Company's press release is attached hereto as Exhibit 99.1.

The attached press release presents pro forma financial information that is used by management (i) to evaluate, assess and benchmark the Company's operating results on a consistent and comparable basis; (ii) to measure the performance and efficiency of the Company's ongoing core operating businesses, including the Qualcomm CDMA Technologies, Qualcomm Technology Licensing and Qualcomm Wireless & Internet segments; and (iii) to compare the performance and efficiency of these segments against each other and against competitors outside the Company. Pro forma measurements of the following financial data are used by the Company's management: revenues, research and development (R&D) expenses, selling, general and administrative (SG&A) expenses, total operating expenses, operating income (loss), net investment income (loss), income (loss) before income taxes, effective tax rate, net income (loss), diluted earnings (loss) per share, operating cash flow and free cash flow. Management is able to assess what it believes is a more meaningful and comparable set of financial performance measures for the Company and its business segments by using pro forma information. As a result, management compensation decisions and the review of executive compensation by the Compensation Committee of the Board of Directors focus primarily on pro forma financial measures applicable to the Company and its business segments.

Pro forma information used by management, as presented in the attached press release, excludes the Qualcomm Strategic Initiatives (QSI) segment, certain share-based compensation, certain tax items and acquired in-process R&D. The QSI segment is excluded because the Company expects to exit its strategic investments at various times, and the effects of fluctuations in the value of such investments are viewed by management as unrelated to the Company's operational performance. Share-based compensation, other than amounts related to share-based awards granted under a bonus program that may result in the issuance of unrestricted shares of the Company's common stock, is excluded because management views such share-based compensation as unrelated to the Company's operational performance. Moreover, it is generally not an expense that requires or will require cash payment by the Company. Further, share-based compensation related to stock options is affected by factors that are subject to change, including the Company's stock price, stock market volatility, expected option life, risk-free interest rates and expected dividend payouts in future years. Certain tax items that were recorded in reported earnings in each fiscal year presented, but were unrelated to the fiscal year in which they were recorded, are excluded in order to provide a clearer understanding of the Company's ongoing pro forma tax rate and after tax earnings. Acquired in-process R&D is excluded because such expense is viewed by management as unrelated to the operating activities of the Company's ongoing core businesses.

The attached press release presents free cash flow, defined as net cash provided by operating activities less capital expenditures, to facilitate an understanding of the amount of cash flow generated that is available to grow the Company's business and to create long-term shareholder value. The Company believes that this presentation is useful in evaluating its operating performance and financial strength. In addition, management uses this measure to evaluate the Company's performance, to value the Company and to compare its operating performance with other companies in the industry.

The non-GAAP pro forma financial information presented in the attached press release should be considered in addition to, not as a substitute for, or superior to, financial measures calculated in accordance with generally accepted accounting principles (GAAP). In addition, pro forma is not a term defined by GAAP, and, as a result, the Company's measure of pro forma results might be different than similarly titled measures used by other companies. Reconciliations between GAAP results and pro forma results are presented in the attached press release.
