PROSPECTUS SUMMARY

The Company

Pure Cycle Corporation is a water and wastewater service provider engaged in the design, construction, operation and maintenance of water and wastewater systems. We contract with land owners, land developers, home builders, cities, and municipalities to design, construct, operate and maintain water and wastewater systems using our water portfolio, which includes surface water and groundwater supplies, surface water storage, alluvial aquifer storage, and reclaimed water supplies. We generate cash flows and revenues primarily from (i) water and wastewater tap (connection) charges and (ii) monthly service fees and consumption charges. Water and wastewater tap fee charges are one-time fees paid by developers or other customers for the right to obtain service from us. A portion of the tap fee revenue is used by us to construct various facilities to withdraw, store, treat, and distribute potable water; to collect and treat wastewater and to store, treat, and distribute reclaimed and raw water for irrigation and other non-potable uses. Monthly water service fees, consumption charges (based on metered deliveries of potable water and irrigation water, which are billed at different rates), flat monthly wastewater service fees, and other service related fees are paid by our customers (e.g., homeowners, businesses, institutional facilities, etc.). We currently provide water services to approximately 247 single-family-equivalent water connections and 157 single-family-equivalent wastewater connections located in the southeastern Denver metropolitan area. We also provide contract operating services to other water providers, land owners, etc., where we manage specific functions of their water and/or wastewater systems.

We have a vertically integrated business model which provides us with control and efficiency in the provision of water and wastewater services by owning all components necessary to offer complete water and wastewater services. Having a vertically integrated system means we own all assets required to provide water and wastewater services, including the following:

Water rights used to provide domestic and irrigation water to customers;

Infrastructure required to withdraw, treat, store and deliver domestic water to customers;

Infrastructure required to collect, treat, store and reuse wastewater; and

Infrastructure required to treat and deliver reclaimed water for irrigation customers.

Our water rights are described in more detail in Part I Item I *Business: Our Water Assets* of our 2009 Annual Report on Form 10-K filed with the SEC on November 13, 2009. In summary we own over 12,000 acre-feet of decreed groundwater and surface water rights in the Denver area and have the exclusive right to use, through the year 2081, approximately 13,400 acre-feet of decreed groundwater and surface water located at the Lowry Range (defined in Part I Item I *Business: Our Water Assets The Lowry Range Property* of our 2009 Annual Report on Form 10-K). In addition to these Denver based assets, we also own approximately 60,000 acre-feet of Arkansas River water which is currently being used to irrigate approximately 17,500 acres of land we own in southeastern Colorado, and 70,000 acre-feet of conditionally decreed Colorado River water rights on the western slope of Colorado. Along the Front Range of Colorado, there are over 70 separate water providers with varying needs for replacement and new water supplies. We believe that we are well positioned to assist area water providers in meeting their future water needs. Based on independent engineering estimates, our Denver portfolio together with our Arkansas River supplies can provide water service to approximately 180,000 single family equivalent connections.

Our corporate offices are located at 500 E. 8th Ave, Suite 201, Denver, CO 80203. Our telephone number is (303) 292-3456. Our web site is <http://www.purecyclewater.com>. The information on our website does not constitute part of this prospectus or the documents incorporated herein by reference.

Additional risks and uncertainties of which we are not currently aware or which we currently do not believe are material may also exist. The occurrence of any of these risks could materially and adversely affect our business, financial condition, results of operations or cash flows. In any such case, the trading price of our common stock could decline, and you could lose all, or a part, of your investment.

Any underwriters, broker-dealers or agents that participate in the sale of the offered shares may be deemed to be underwriters within the meaning of Section 2(11) of the Securities Act. Any commissions paid, or discounts or concessions allowed, to any broker-dealer in connection with any distribution of the offered shares may be deemed to be underwriting discounts and commissions under the Securities Act. At the time a particular offering of the shares is made, a prospectus supplement, if required, will be distributed which will set forth the aggregate number of shares of common stock being offered and the terms of the offering, including the name or names of any broker-dealers or agents, any discounts, commissions and other terms constituting compensation from us and any discounts or commissions allowed or paid to broker-dealers.

Underwriters and agents may be entitled to indemnification by us against some civil liabilities, including liabilities under the Securities Act, or to contributions with respect to payments which the underwriters or agents may be required to make relating to these liabilities. Underwriters and agents may be customers of, engage in transactions with, or perform services for us in the ordinary course of business.

There can be no assurance that we will sell any or all of the shares of common stock registered pursuant to the registration statement of which this prospectus is a part.
