SAFE HARBOR STATEMENT

This Quarterly Report on Form 10-Q, including the Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements which constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements relating to trends in operations and financial results and the business and the products of the Registrant and its subsidiaries, which include words such as "anticipate", "believe", "plan", "estimate", "expect", "intend", and other similar expressions. Forward-looking statements are made based upon management's current expectations and beliefs concerning future developments and their potential effects on the Company. Such forward-looking statements are not guarantees of future performance. Factors that may cause our actual results to differ materially from those contemplated by these forward-looking statements include, among others, the following possibilities: (a) general economic conditions and other factors, including prevailing interest rate levels and stock and bond market performance, which may affect our ability to sell our products, the market value of our investments and the lapse rate and profitability of policies; (b) our ability to achieve anticipated levels of operational efficiencies and cost-saving initiatives and to meet cash requirements based upon projected liquidity sources; (c) customer response to new products, distribution channels and marketing initiatives; (d) mortality, morbidity, and other factors which may affect the profitability of our insurance products; (e) our ability to develop and maintain effective risk management policies and procedures and to maintain adequate reserves for future policy benefits and claims; (f) changes in the federal income tax and other federal laws, regulations, and interpretations, including federal regulatory measures that may significantly affect the insurance business including limitations on antitrust immunity, the applicability of securities laws to insurance products, minimum solvency requirements, and changes to the tax advantages offered by life insurance and annuity products or programs with which they are used; (g) increasing competition in the sale of insurance and annuities and the recruitment of sales representatives; (h) regulatory changes, interpretations, initiatives or pronouncements, including those relating to the regulation of insurance companies and the regulation and sale of their products and the programs in which they are used; (i) our ratings and those of our subsidiaries by independent rating organizations which we believe are particularly important to the sale of our products; (j) the performance of our investment portfolios; (k) the impact of changes in standards of accounting; (l) our ability to integrate the business and operations of acquired entities; (m) expected protection products and accumulation products margins; (n) the impact of anticipated investment transactions; and (o) litigation or regulatory investigations or examinations.

There can be no assurance that other factors not currently anticipated by us will not materially and adversely affect our results of operations. You are cautioned not to place undue reliance on any forward-looking statements made by us or on our behalf. Forward-looking statements speak only as of the date the statement was made. We undertake no obligation to update or revise any forward-looking statement.

AMERUS GROUP CO.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

(1) CONSOLIDATION AND BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for annual financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All adjustments were of a normal recurring nature, unless otherwise noted in the Notes to Consolidated Financial Statements. Operating results for the nine months ended September 30, 2005 are not necessarily indicative of the results that may be expected for the year ending December 31, 2005. The consolidated balance sheet at December 31, 2004 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. For further information and for capitalized terms not defined in this Form 10-Q, refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2004.

The accompanying consolidated financial statements include the accounts and operations of the Company and its wholly-owned subsidiaries, principally AmerUs Life Insurance Company (ALIC), AmerUs Annuity Group Co. and its subsidiaries (collectively, AAG), AmerUs Capital Management Group, Inc. (ACM), and ILICO Holdings, Inc., the holding company of Indianapolis Life Insurance Company (ILIC) and its subsidiaries (collectively, ILICO). All significant intercompany transactions and balances have been eliminated in consolidation.

The Company has certain stock-based employee compensation plans which are accounted for under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. The majority of the plans are stock option plans for which no stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. There is also a long-term incentive plan that provides for payment in the Company's common stock. Stock-based employee compensation expense for this plan is reflected in net income using variable accounting under APB Opinion No. 25. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) 123, Accounting for Stock-Based Compensation, to stock-based employee compensation:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2005	2004	2005	2004
	(\$ in thousands, except share data)			
Net income available to common stockholders, as reported	\$ 38,619	\$ 42,862	\$ 135,674	\$ 124,767
Add: Stock-based compensation expense included in reported net income, net of related tax effects	1,439		\$ 2,185	
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(1,027)	(926)	(2,780)	(3,007)
Pro forma net income available to common stockholders	\$ 39,031	\$ 41,936	\$ 135,079	\$ 121,760

Earnings per common share:

Basic pro forma	\$ 1.01	\$ 1.07	\$ 3.45	\$ 3.10
Diluted as reported	\$ 0.91	\$ 1.04	\$ 3.17	\$ 3.06
Diluted pro forma	\$ 0.92	\$ 1.02	\$ 3.16	\$ 2.98

Table of Contents

Certain amounts in the 2004 financial statements have been reclassified to conform to the 2005 financial statement presentation.

(2) EARNINGS PER SHARE

Basic earnings per share of common stock are computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted earnings per share assumes the issuance of common shares applicable to stock options, PRIDESSM and the Company's Optionally Convertible Equity-Linked Accreting Notes (OCEANsSM) and is calculated using the treasury stock method.

Diluted earnings per share applicable to the Company's PRIDES securities are determined using the treasury stock method as it is currently anticipated that holders of the PRIDES are more likely to tender cash in the future for the securities' forward contract. The PRIDES added 1,969,535 and 1,683,794 shares to the diluted earnings per share calculation for the three and nine months ended September 30, 2005, respectively, and 859,038 and 720,035 shares for the three and nine months ended September 30, 2004, respectively.

Diluted earnings per share applicable to the Company's OCEANs are determined using the guidance of the Financial Accounting Standards Board's Emerging Issues Task Force Issue 04-8 (EITF 04-8), "The Effect of Contingently Convertible Debt on Diluted Earnings per Share," which was effective for periods ending after December 15, 2004. EITF 04-8 requires diluted earnings per share to be computed following the guidance of EITF 90-19, "Convertible Bonds with Issuer Option to Settle for Cash upon Conversion," for securities such as the OCEANs which are considered to be Instrument C securities. The conversion spread portion of an Instrument C security should be included in diluted earnings per share based on the number of shares that would be required to be delivered if the instrument had been converted at the end of the period. The OCEANs added 1,119,235 and 1,061,545 shares for the diluted earnings per share calculation for the three and nine months ended September 30, 2005, respectively, and 284,879 shares and 177,647 shares for the three and nine months ended September 30, 2004, respectively. As of September 13, 2005, all of the OCEANs were converted with settlement in cash and common stock.

Table of Contents**(3) CLOSED BLOCK**

The Company has established two closed blocks, which we refer to collectively as the Closed Block. The first was established on June 30, 1996 in connection with the reorganization of ALIC from a mutual company to a stock company. The second was established as of March 31, 2000 in connection with the reorganization of ILIC from a mutual company to a stock company. Insurance policies which had a dividend scale in effect as of each Closed Block establishment date were included in the Closed Block. The Closed Block was designed to provide reasonable assurance to owners of insurance policies included therein that, after the reorganization of ALIC and ILIC, assets would be available to maintain the dividend scales and interest credits in effect prior to the reorganization if the experience underlying such scales and credits continues.

Summarized financial information of the Closed Block as of September 30, 2005 and December 31, 2004 and for the three and nine months ended September 30, 2005 and 2004 are as follows:

	September 30, 2005	December 31, 2004

(4) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company accounts for derivatives, including certain derivative instruments embedded in other contracts, at fair value. Accounting for gains and losses resulting from changes in the values of derivatives is dependent upon the use of the derivative and its qualification for special hedge accounting. In addition, we also have trading securities that back our total return strategy traditional annuity products. During the first nine months of 2005 and 2004, an unrealized loss has been recognized amounting to \$14.9 million and \$4.9 million, respectively, primarily from the change in fair value on the trading securities backing the total return strategy products. Additionally, realized/unrealized gains (losses) on investments included an unrealized loss of \$1.7 million and an unrealized loss of \$5.3 million for the first nine months of 2005 and 2004, respectively, primarily from the change in fair value on call options used as a natural hedge of embedded options within indexed products. Policyowner benefits included an offsetting adjustment to contract liabilities for fair value changes in options embedded within the indexed products and fair value changes on total return strategy annuity contracts. The total adjustment to policyowner benefits amounted to a decrease in expense of \$19.4 million and \$5.9 million for the first nine months of 2005 and 2004, respectively.

Table of Contents

The Company repaid the \$125.0 million senior notes in June 2005 with a borrowing on its revolving credit agreement. On August 5, 2005, the Company issued \$300.0 million of senior notes under its shelf registration filed with the Securities and Exchange Commission. The senior notes bear interest at 5.95% per year payable semi-annually on February 15 and August 15 of each year commencing on February 15, 2006. The senior notes mature on August 15, 2015 and may be redeemed at the Company's option at any time, in whole or in part, subject to payment of a redemption premium. The net proceeds from the issuance were used to repay the revolving credit agreement borrowing, repurchase common stock and convert the \$185.0 million OCEANs securities.

In September 2005, holders of the \$185.0 million aggregate original principal amount of OCEANs exercised their conversion rights which resulted in the Company's issuance of 1.7 million shares of common stock and a cash payment of \$203 million, including a \$12.7 million prepayment premium. The prepayment premium and a write-off of \$6.4 million of remaining unamortized debt issuance costs have been reported as early extinguishment of debt expense in the consolidated statement of income. In addition, the conversion resulted in the reclassification of an associated deferred tax liability of \$10.7 million to additional paid-in capital on common stock.

(6) EQUITY TRANSACTIONS

On September 26, 2005, the Company issued 6.0 million shares of Series A Non-Cumulative Perpetual Preferred Stock under its shelf registration with the Securities and Exchange Commission. Net proceeds amounted to \$145.3 million after the related underwriting discount and other costs. Dividends on the preferred stock are non-cumulative and are payable quarterly, when, as and if declared by the board of directors, in whole or in part out of legally available funds. Dividends on the preferred stock accrued from September 26, 2005 with the first dividend payable on December 15, 2005 at a fixed rate of 7.25% per annum of the liquidation preference of \$25 per share. Subject to certain restrictions, the Company may redeem the preferred stock at any time in whole, prior to September 15, 2010, at a cash redemption price equal to the greater of \$25 per share or the sum of the present values of \$25 per share plus any declared and unpaid dividends to the redemption date, without accumulation of any undeclared dividends, and any undeclared dividends for the dividend periods from the redemption date to and including the dividend payment date on September 15, 2010. On or after the dividend payment date in September 2010, the shares may be redeemed in whole or in part at a price of \$25 per share or \$150.0 million in the aggregate plus declared and unpaid dividends to the redemption date without accumulation of any undeclared dividends. The preferred stock has no stated maturity and is not convertible into any other security.

The Company purchased 2.2 million common shares under an accelerated stock repurchase agreement effective August 18, 2005. The initial purchase price of the shares including commission amounted to \$114.5 million. The repurchase program allows the Company to purchase the shares immediately, with the counterparty purchasing the shares in the open market. The initial purchase price was \$51.32 per share, including commission, and is subject to a market price adjustment feature, which can be net-share settled, based on the actual cost of the shares purchased.

(7) FEDERAL INCOME TAXES

The effective income tax rate for the nine months ended September 30, 2005 and the three and nine months ended September 30, 2004 varied from the prevailing corporate rate primarily as a result of tax exempt interest, dividends received deductions, a reduction in the income tax accrual and a reduction in the deferred tax valuation allowance. The accrual reduction was for the release of provisions originally established for potential tax adjustments which have been settled or eliminated and for overpayment of tax in prior years for which a refund is expected. The accrual was reduced \$0.3 million and \$13.4 million for the third quarter and first nine months of 2005, respectively. The accrual was reduced \$3.7 million and \$11.6 million, for the third quarter and first nine months of 2004, respectively. In addition, during the second quarter of 2004, a deferred tax valuation allowance was reduced \$10.4 million as a result of the

Table of Contents

realization of capital loss carry forwards. The effective income tax rate for the third quarter of 2005 varied from the prevailing corporate rate primarily due to additional income tax expense of \$6.6 million incurred in the restructuring of the Company's joint venture with Ameritas Life Insurance Corp. in which the Company's interest in Ameritas Variable Life Insurance Company was sold to Ameritas Life Insurance Corp. The additional tax expense related to the reversal of taxable temporary differences during the quarter without the benefit of previously anticipated dividends received deductions. The effective income tax rate excluding the accrual changes, the additional tax on the joint venture sale and the valuation allowance reduction was 33.14% and 32.58% for the nine months ended September 30, 2005 and 2004, respectively.

(8) COMMITMENTS AND CONTINGENCIES

In recent years, the life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is routinely involved in litigation and other proceedings, including class actions, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive and exemplary damages. In addition, regulatory bodies, such as state insurance departments and attorneys general, periodically make inquiries and conduct examinations concerning the Company's compliance with insurance and other laws. The Company responds to such inquiries and cooperates with regulatory examinations in the ordinary course of business.

On September 23, 2005, the general terms of a settlement of a statewide class action, *Cheves v. American Investors Life Insurance Company, Family First Advanced Estate Planning and Family First Insurance Services et al.*, discussed in the Company's Report on Form 10-Q for the Quarterly Period ended June 30, 2005, were preliminarily approved by the trial court and a hearing on the final approval is scheduled in November of 2005. A charge was taken with respect to this pending settlement during the three months ended September 30, 2005.

On August 29, 2005, a nationwide class action lawsuit was filed against the Company and certain of its subsidiaries in the United States District Court for the Middle District of Florida on behalf of certain purchasers of insurance products who were over the age of 65 at the time of purchase. The plaintiffs allege that the defendants used improper practices in selling annuities to senior citizens because annuity payments allegedly begin only after the annuitant's actuarial life expectancy and the plaintiffs seek class certification, injunctive and equitable relief, a variety of damages, including punitive damages, and attorneys fees. This case and other lawsuits discussed in the Company's Annual Report on Form 10-K for the period ended December 31, 2004 and/or Quarterly Reports on Form 10-Q for the periods ended March 31, 2005 and June 30, 2005 have been consolidated and transferred to the United States District Court for the Eastern District of Pennsylvania.

The Company's pending litigation is subject to many uncertainties, and given its complexity and scope, the outcomes cannot be predicted. Given these uncertainties, the Company is unable to estimate the possible loss or range of loss that may result from all of the Company's pending litigation. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to the Company's pending claims and legal actions, would have no material effect on its operations and financial position.

Table of Contents**(9) EMPLOYEE BENEFIT PLANS**

The Company has a frozen defined benefit pension plan and also has defined benefit plans which provide supplemental retirement benefits to certain agents and executives. In addition to pension benefits, the Company also provides certain health care and life insurance benefits for retired employees. The following is a summary of net periodic benefit cost for these plans for the nine months ended September 30, 2005 and 2004:

	Nine Months Ended September 30,	
	2005	2004
	(\$ in thousands)	
Components of net periodic benefit cost:		
Service cost	\$ 235	\$ 200
Interest cost	4,416	4,595
Expected return on plan assets	(3,647)	(3,642)
Amortization of prior service cost	66	66
Amortization of actuarial loss	535	191
Net periodic benefit cost	1,605	1,410
Curtailment		(951)
Total expense	\$ 1,605	\$ 459

(10) ACCOUNTING DEVELOPMENTS

In December 2004, the FASB issued SFAS 123 (revised 2004), Share-Based Payment, (SFAS 123R) which is a revision of SFAS 123, Accounting for Stock-Based Compensation, (SFAS 123). SFAS 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on fair values. Pro forma disclosure of fair value information is no longer an alternative. The implementation date of the statement has been delayed to be effective for the fiscal year beginning after June 15, 2005. Adoption is to be made using either the modified prospective method or the modified retrospective method. The modified prospective method recognizes cost based on the requirements for all share-based payments granted after the effective date and for awards granted prior to the effective date that remain unvested prior to the effective date. The modified retrospective method includes the requirements of the modified prospective method but also permits restatement of financial statements based on pro forma amounts previously recognized under SFAS 123. Restatement can either be for all prior periods presented or prior interim periods of the year of adoption. Early adoption is permitted. The Company plans to adopt SFAS 123R effective January 1, 2006 using the modified prospective method. The pro forma impacts of recognizing fair value as permitted by SFAS 123 are disclosed in note 1 to the consolidated financial statements.

(11) OPERATING SEGMENTS

The Company has two operating segments: Protection Products and Accumulation Products. Products generally distinguish a segment. A brief description of each segment follows:

Protection Products. The primary product offerings consist of interest-sensitive whole life, term life, universal life and indexed life insurance policies. Indexed life is a type of universal life or interest-sensitive whole life product. These products are marketed on a national basis primarily through a Career Marketing Organization (CMO) system, a Personal Producing General Agent (PPGA) system, Independent Marketing Organizations (IMOs) and a New York distribution system.

Table of Contents

Accumulation Products. The primary product offerings consist of individual fixed annuities (comprised of traditional fixed annuities and indexed annuities), marketed on a national basis primarily through IMOs and independent brokers, and insurance contracts issued through funding agreements.

The product offerings within each segment are of a very similar nature. Insurance premiums of the protection products segment are primarily from term life products. Product charges of the protection products segment are from interest-sensitive whole life, universal life and indexed life insurance products. Product charges of the accumulation products segment are from traditional fixed and indexed annuities. Due to the similarity of products within each segment, premiums and product charges are shown by segment and not by specific product type.

The Company uses the same accounting policies and procedures to measure operating segment income and assets as it uses to measure its consolidated income from operations and assets with the exception of the elimination of certain items which management believes are not necessarily indicative of overall operating trends. These items are shown between segment pre-tax operating income and net income on the following operating segment tables and are as follows:

- 1) Realized/unrealized gains and losses on open block assets.
- 2) Market value changes and amortization of assets and liabilities associated with the accounting for derivatives, such as:
 - Unrealized gains and losses on open block options and securities held for trading.
 - Change in option value of indexed products and market value adjustments on total return strategy annuities.
 - Cash flow hedge amortization.
- 3) Amortization of deferred policy acquisition costs (DAC) and value of business acquired (VOBA) related to the unrealized and realized gains and losses on the open block investments and the derivative adjustments.
- 4) Other income from non-insurance operations.
- 5) Litigation accruals following class certification, net of insurance recoveries.
- 6) Interest expense.
- 7) Early extinguishment of debt.
- 8) Income tax expense.
- 9) Income from discontinued operations.
- 10) Cumulative effect of changes in accounting.

These items will fluctuate from period to period depending on the prevailing interest rate and economic environment or are not part of the core insurance operations. As a result, management believes they do not reflect the ongoing earnings capacity of the Company's operating segments.

Premiums; product charges; policyowner benefits; insurance expenses; amortization of DAC, deferred sales inducements and VOBA; and dividends to policyowners are attributed directly to each operating segment. Net investment income and closed block realized capital gains and losses are allocated based on directly-related assets required for transacting the business of that segment. Other revenues and benefits and expenses which are deemed not to be associated with any specific segment are grouped together in the All Other category. These items primarily consist of holding company revenues and expenses, operations of the Company's real estate management subsidiary, and accident and health insurance.

Assets are segmented based on policy liabilities directly attributable to each segment. There are no significant intersegment transactions. Depreciation and amortization, excluding amortization of DAC, deferred sales inducements, and VOBA as previously discussed, are not significant. There have been no material changes in segment assets since December 31, 2004.

Table of Contents**Item 2. Management's Discussion And Analysis Of Financial Condition And Results Of Operations**

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) addresses the consolidated financial condition of AmerUs Group Co. as of September 30, 2005, compared with December 31, 2004, and our consolidated results of operations for the three and nine months ended September 30, 2005 and 2004. You should read the following analysis of our consolidated financial condition and results of operations in conjunction with our MD&A and audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2004, and Unaudited Consolidated Financial Statements included elsewhere in this Quarterly Report on Form 10-Q.

NATURE OF OPERATIONS

We are a holding company whose subsidiaries are primarily engaged in the business of marketing, underwriting and distributing a broad range of individual life, annuity and insurance deposit products to individuals and businesses in 50 states, the District of Columbia and the U.S. Virgin Islands. We have two reportable operating segments: protection products and accumulation products. The primary offerings of the protection products segment are interest-sensitive whole life, term life, universal life and indexed life insurance policies. Indexed life is a type of universal life or interest-sensitive whole life product. The primary offerings of the accumulation products segment are individual fixed annuities (comprised of traditional fixed annuities and indexed annuities) and funding agreements.

FINANCIAL HIGHLIGHTS

Table of Contents

Operating segment income increased for both the protection products and accumulation products segments in the 2005 periods as compared to the same periods in 2004. Protection products earnings were primarily impacted by the growth in the indexed life business and increased open block product margins. Our accumulation products pre-tax operating segment income increased primarily due to growth in assets. The increases in protection products and accumulation products segment income were partially offset by higher operating losses of the other segment in the first nine months of 2005 compared to 2004. The 2005 other segment activity reflects increased costs associated with complying with Sarbanes-Oxley Act internal control regulations, long term incentive compensation, and employee search and relocation expenses. In addition, the 2004 other segment results were favorably impacted by gains from an equipment transaction and an employee postretirement benefit plan curtailment.

Net income increased in the first nine months of 2005 compared to 2004 primarily as a result of higher operating segment income and lower realized/unrealized losses on open block assets. The year-to-date increases were partially offset by costs accrued for litigation and early retirement of debt recognized in the third quarter of 2005. Net income decreased for the third quarter of 2005 compared to the third quarter of 2004 primarily due to the litigation charge, early retirement of debt, and higher DAC and VOBA amortization associated with open block gains and losses. The decreases for the quarter were partially offset by increased segment operating results and income from derivative market value adjustments.

Total assets increased \$1.4 billion during the first nine months of 2005 primarily as a result of net cash received from collected premiums and deposits, positive cash flows from operating activities and the utilization of securities lending arrangements. Liabilities increased \$1.3 billion primarily due to policy reserves and policyowner funds which increased due to the higher volume of insurance in force, additional securities lending arrangements, and increased annuity sales. Stockholders' equity increased \$74.4 million in the first nine months of 2005 primarily as a result of the issuance of preferred stock which resulted in net proceeds of \$145.3 million, year-to-date net income of \$135.7 million and stock issued under various incentive plans of \$22.5 million. The increase was partially offset by treasury stock purchases of \$150.7 million and decreased unrealized gains on available-for-sale investments of \$89.0 million. The unrealized gains included in accumulated other comprehensive income are presented after related adjustments to DAC, VOBA, capitalized deferred sales inducements, closed block policyowner dividend obligation, unearned revenue reserves and deferred income taxes.

PROTECTION PRODUCTS

Our protection products segment primarily consists of interest-sensitive whole life, term life, universal life and indexed life insurance policies. These products are marketed on a national basis primarily through CMOs, a PPGA distribution system, IMOs and a New York distribution system. Included in protection products is the closed block of ALIC and the closed block of ILIC, established when the companies reorganized from mutual companies to stock companies. When protection products are sold, we invest the premiums we receive in our investment portfolio and establish a liability representing our commitment to the policyowner. We manage investment spread by seeking to maximize the return on these invested assets, consistent with our asset/liability and credit quality policies. We enter into reinsurance arrangements in order to reduce the effects of mortality risk and the statutory capital strain from writing new business. All income statement line items are presented net of reinsurance amounts. Protection products in force totaled \$101.1 billion at September 30, 2005 and \$97.5 billion at December 31, 2004. Protection products in force is a performance measure utilized by investors, analysts and the Company to assess the Company's position in the industry. A summary of our protection products segment operations follows:

Table of Contents

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2005	2004	2005	2004
	\$(in thousands)			
Revenues:				
Insurance premiums	\$ 53,535	\$ 62,829	\$ 174,587	\$ 194,972

Underwriting, acquisition and other expenses	19,473	18,134	57,352	54,207
Amortization of DAC and VOBA, net of open block gain/loss adjustment	27,598	21,443	74,576	66,211
Dividends to policyowners	18,769	24,537	70,633	60,955
Total benefits and expenses	153,758	160,464	458,854	462,323
Pre-tax operating income - Protection Products segment	\$ 40,286	\$ 34,024	\$ 125,642	\$ 102,042

Pre-tax operating income from our protection products increased 18% in the third quarter of 2005 and 23% in the first nine months of 2005 compared to the respective 2004 periods. The year-to-date increase was primarily due to the growth in the indexed life business and higher open block product margins, in particular increased product charges and net investment income. The increase was partially reduced by higher expenses and DAC and VOBA amortization. The key drivers of our protection products business include sales, persistency, net investment income, mortality and expenses.

Sales. Sales are a key driver of our business as they are a leading indicator of future revenue trends to emerge in segment operating income. Sales are presented as annualized premium which is in accordance with industry practice, and represent the amount of new business sold during the period. Sales are a performance metric which we use to measure the productivity of our distribution network and for compensation of sales and marketing employees and agents. The following table summarizes annualized premium by life insurance product:

	Sales Activity by Product			
	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2005	2004	2005	2004
	(\$ in thousands)			
Traditional life insurance:				
Interest-sensitive whole life	\$ 159	\$ 1,076	\$ 392	\$ 5,905

Edgar Filing: AMERUS GROUP CO/IA - Form 10-Q

Term and other life	2,835	3,229	9,241	10,384
Universal life				
Flexible premium without no lapse guarantee	2,651	6,700	10,913	23,469
Indexed life:				
Flexible premium without no lapse guarantee	17,694	12,452	48,703	39,178
Flexible premium with no lapse guarantee	3,386	1,900	9,955	4,390
Fixed premium excess interest whole life	2,843	3,005	7,473	10,383
Total	\$ 29,568	\$ 28,362	\$ 86,677	\$ 93,709

Direct first year annualized premiums increased 4% in the third quarter of 2005 as compared to the third quarter of 2004 and decreased 8% on a year-to-date basis in 2005 compared to 2004. We continue to focus our marketing efforts on our customer-preferred indexed life products. In the first nine months of 2005, sales of indexed life products were \$66.1 million as compared to \$54.0 million for 2004 and comprised 76% of total direct sales in the first nine months of 2005 compared to 58% in the first nine months of 2004. We are the leading writer of indexed life products in the United States. Interest-sensitive whole life insurance sales decreased in both periods of 2005 compared

Table of Contents

to 2004 due to our sales focus on indexed products and our withdrawal from certain tax-advantaged markets. Universal life insurance sales decreased between periods as a result of pricing changes associated with products launched in January 2005. Pricing for the new universal life products reflect higher reinsurance costs and increased mortality expectations in the senior age markets. We also increased our retention levels for certain universal life products in the fourth quarter of 2004 as a result of the overall increase in price in the reinsurance market. For these universal life products, we retain the first \$0.5 million, we reinsure 50% of the coverage between \$0.5 million and \$1.5 million and then fully reinsure the coverage in excess of \$1.5 million. Previously, we retained 10% of the risk on universal life policies. We also continue to de-emphasize our term insurance products.

Premiums and Product Charges. We recognize premiums on traditional life insurance policies as revenues when the premiums are due. Amounts received as payments for universal life and indexed life insurance policies are not recorded as premium revenue, but are instead recorded as a policyowner liability. Revenues from the universal life and indexed life policies consist of charges for the cost of insurance, policy administration and policy surrender and are shown as product charges. All revenue is reported net of reinsurance ceded.

Insurance premium revenue was lower in the first nine months of 2005 as compared to the same period in 2004 primarily due to a decline in closed block in force business and our shift in product mix from traditional to indexed life products. Product charge revenue was higher in the first nine months of 2005 period as compared to 2004 due to growth in the indexed life block of business.

Persistency. Persistency, which we measure in terms of a lapse rate, is a key driver of our business because it refers to the policies which remain in our block of business. A low lapse rate means higher persistency indicating more business is remaining in force to generate future revenues. Annualized lapse rates, based on a rolling four quarter period, were 6.6% as of September 30, 2005 compared to 6.7% as of September 30, 2004. Our persistency experience remained within our pricing assumptions.

Net Investment Income. Net investment income is a key driver of our business as it reflects earnings on our invested assets. Net investment income increased for the first nine months of 2005 as compared to the same period a year ago as a result of the growth in protection products assets and increase in the portfolio earned rate. Protection products assets increased approximately \$314 million in 2005 over 2004. The year-to-date earned rate of the investment portfolio was 6.60% compared to 6.42% a year ago.

Mortality and Benefit Expense. Mortality is a key driver of our business as it impacts the amount of our benefit expense. We utilize reinsurance to reduce the effects of mortality risk. Benefit expense was lower in the first nine months of 2005 compared to 2004 primarily due to the continued decline in the in force closed block business. Open block mortality remained within our pricing assumptions.

Underwriting, Acquisition and Other Expenses. Underwriting, acquisition and other expenses are a key driver of our business as they are costs of our operations. Expenses increased for the first nine months of 2005 compared to 2004 primarily due to increased state premium taxes and higher employee benefit costs and additional expenses of moving ILIC post issue policy service and data center activities from Woodbury, New York to Des Moines, Iowa.

Amortization of DAC and VOBA. The amortization of DAC and VOBA are expense items which increased for the first nine months of 2005 as compared to 2004. DAC and VOBA are generally amortized in proportion to policy gross margins which increased in 2005, resulting in higher amortization expense.

Dividends to Policyowners. In addition to basic policyowner dividends, dividend expense includes increases or decreases to the closed block policyowner dividend obligation liability carried on the consolidated balance sheet. The actual results of the closed block are adjusted to equal the expected earnings based on the actuarial calculation at the time of formation of the closed block (which we refer to as the closed block glide path). An adjustment is made to

Table of Contents

dividend expense to have the closed block operating results equal the closed block glide path. If the actual results for the period exceed the closed block glide path, increased dividend expense is recorded as a policyowner dividend obligation to reduce the actual closed block results. For actual results less than the closed block glide path, dividend expense is reduced to increase the actual closed block results. As a result of this accounting treatment, operating earnings from the closed block only include the predetermined closed block glide path.

Dividend expense increased for the first nine months of 2005 compared to 2004 due to closed block actual results in excess of glide path for both periods, with results being more favorable in 2005 than 2004. The year-to-date actual closed block results reflected favorable surrender activity and lower basic policyowner dividends as compared to 2004. Dividend expense decreased for the third quarter of 2005 compared to 2004 due to closed block actual results in excess of the glide path for both periods, with results being less favorable in 2005 than 2004.

Outlook. We will continue to focus our sales on indexed life products which we expect will favorably impact our product margins. We also expect to incur additional expenses in 2005 to further integrate administrative functions to enhance operating efficiencies in future periods.

ACCUMULATION PRODUCTS

Our accumulation products segment primary offerings consist of individual fixed annuities and funding agreements. The fixed annuities are marketed on a national basis primarily through IMOs and independent brokers. Similar to our protection products segment, we invest the premiums we receive from accumulation product deposits in our investment portfolio and establish a liability representing our commitment to the policyowner. We manage product spread by seeking to maximize the return on our invested assets consistent with our asset/liability management and credit quality policies. When appropriate, we periodically reset the interest rates credited to our policyowner liability. Accumulation products reserves totaled \$13.3 billion at September 30, 2005 and \$12.3 billion at December 31, 2004. A summary of our accumulation products segment operations follows:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2005	2004	2005	2004
	(\$ in thousands)			
Revenues:				
Immediate annuity and supplementary contract premiums	\$ 727	\$ 541	\$ 2,263	\$ 2,123
Product charges	13,589	16,426	39,537	43,173
Net investment income	189,332	177,599	554,531	520,080
Other income	2,551	2,681	7,755	8,058
Total revenues	206,199	197,247	604,086	573,434
Benefits and expenses:				
Policyowner benefits	130,529	121,073	388,152	356,152
Underwriting, acquisition and other expenses	7,230	7,896	21,391	21,334
Amortization of DAC and VOBA	22,030	26,324	68,236	82,003
Dividends to policyowners	1	1	4	3

Other income	7,331	7,463	23,495	21,526
Other expenses	5,873	7,843	19,376	18,558

Edgar Filing: AMERUS GROUP CO/IA - Form 10-Q

Net IMO operating income (loss)	1,458	(380)	4,119	2,968
Pre-tax operating income				
Accumulation				
Products segment	\$ 47,867	\$ 41,573	\$ 130,422	\$ 116,910

Pre-tax operating income from our accumulation products operations increased 15% in the third quarter and 12% in the first nine months of 2005 compared to the respective 2004 periods primarily due to growth in assets. The drivers of profitability in our accumulation products business include deposits, persistency, product spread, expenses, and IMO operations.

Table of Contents

Deposits. Deposits are a key driver of our business as this is a measure which represents collected premiums to be deposited to policyowner accounts for which we will earn a future product spread. Deposits are presented as collected premiums, which are measured in accordance with industry practice, and represent the amount of new business sold during the period. Deposits are a performance metric which we use to measure the productivity of our distribution network and for compensation of sales and marketing employees and agents. The following table summarizes our accumulation products segment deposits:

	Deposits by Product			
	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2005	2004	2005	2004
	\$(in thousands)			
Annuities Deferred fixed annuities:				
Traditional fixed annuities	\$ 52,917	\$ 68,222	\$ 191,277	\$ 228,969
Indexed annuities	632,875	358,773	1,778,971	1,004,130
Variable annuities	864	561	2,002	2,219
Total annuities	686,656	427,556	1,972,250	1,235,318
Funding agreements			26,200	85,000
Total	686,656	427,556	1,998,450	1,320,318
Reinsurance ceded	(1,883)	(2,063)	(6,117)	(9,130)
Total deposits, net of reinsurance	\$ 684,773	\$ 425,493	\$ 1,992,333	\$ 1,311,188

Direct annuity deposits increased 60% in the first nine months of 2005 compared to 2004. The increase was primarily due to our continued focus on marketing of customer-preferred indexed annuities. Indexed annuities comprised 90% of total direct annuity deposits in the first nine months of 2005 compared to 81% in the first nine months of 2004. Our wholly-owned and proprietary organizations accounted for approximately 83% of our annuity deposits in the first nine months of 2005 compared to 78% in the first nine months of 2004. We also placed primarily fixed rate funding agreements totaling \$26.2 million and \$85.0 million during the second quarter of 2005 and 2004, respectively. Funding agreements are issued on an opportunistic basis to provide additional spread income. As a result, issuances of funding agreements can vary widely from one reporting period to another.

Product Charges. The deposits we receive on accumulation products are not recorded as revenue but instead as a policyowner liability. Surrender charges collected on accumulation products are recorded as revenue and shown as a product charge. Product charges decreased in the first nine months of 2005 as compared to 2004 due to fewer policy withdrawals within the surrender charge period.

Persistency. Persistency, which we measure in terms of a withdrawal rate, is a key driver of our business as it refers to the policies which remain in our block of business. A low withdrawal rate reflects higher persistency indicating more business is remaining in force to generate future revenues. Withdrawals represent funds taken out of accumulation products by policyowners not including those due to the death of policyowners. Annuity withdrawal rates without internal replacements, based on a rolling four quarter period, continued to improve in 2005 and amounted to 7.6% and 8.8% as of September 30, 2005 and 2004, respectively. Annuity withdrawals without internal replacements totaled \$799.2 million and \$841.7 million for the first nine months of 2005 and 2004, respectively. Our withdrawal experience remained within our pricing assumptions.

Product Spread. Product spread is a key driver of our business as it measures the difference between the income earned on our invested assets and the rate which we credit to policyowners, with the difference reflected as segment operating income. We actively manage product spreads in response to changes in our investment portfolio yields by adjusting liability crediting rates while considering our competitive strategies. Asset earned rates and liability crediting rates, based on a rolling four quarter period, were as follows for our annuity products:

Table of Contents

	For The Rolling Four Quarters Ended September 30,	
	2005	2004
Asset earned rate	5.73%	5.76%
Liability credited rate	3.58%	3.60%
Product spread	2.15%	2.16%

The product spread decreased one basis point to 215 basis points for the first nine months of 2005 compared to the first nine months of 2004. Liability crediting rates were lowered throughout 2004 to correspond with the decline in investment yields caused by the overall combined lower rates for new and reinvested funds.

At September 30, 2005, the account value of traditional annuities totaled \$6.0 billion of which approximately 92% have minimum guarantee rates ranging from 3% to 4%. For traditional annuities with an account value of \$4.6 billion, the credited rate was equal to the minimum guarantee rate, and as a result, the credited rate cannot be lowered. Traditional annuities with an account value of \$0.9 billion had a multi-year guarantee for which the credited rate cannot be decreased until the end of the multi-year period. At the end of the multi-year period, we will have the ability to lower the crediting rate to the minimum guaranteed rate by an average of approximately 275 basis points. The remaining multi-year period is generally within one year. Due to these limitations on the ability to lower interest crediting rates and the potential for additional credit defaults and lower reinvestment rates on investments, we could experience spread compression in future periods.

Underwriting, Acquisition and Other Expenses. Underwriting, acquisition and other expenses are a key driver of our business as they are costs of our operations. Expenses in 2005 were comparable to 2004.

Amortization of DAC and VOBA. The amortization of DAC and VOBA decreased for the third quarter and first nine months of 2005 compared to the respective 2004 periods. During the third quarter of 2004, projected future margin items for DAC and VOBA amortization were updated with current estimates, which resulted in lower future amortization. These updated projected margins continued to be appropriate for the amortization during the first nine months of 2005 and, as a result, DAC and VOBA amortization in the first nine months of 2005 is lower than for the same period in 2004.

IMO Operations. IMO Operations are a key driver of our business as the earnings from the IMOs are a component of the accumulation products segment operating income. IMOs have contractual arrangements to promote our insurance products in their networks of agents and brokers. Additionally, they also contract with third party insurance companies. We own four such IMOs. The income from IMO operations primarily represents annuity commissions received by our IMOs from those third party insurance companies. Net IMO operations in 2005 exceeded 2004 results primarily due to higher operating expenses in 2004 related to litigation.

Outlook. We anticipate increased product sales from our owned and proprietary distribution organizations but decreased product sales from other distribution channels as we manage our sales in this current low interest rate environment. We also expect to continue our sales focus on the indexed annuity products and to actively manage surrenders. We will continue to manage our spreads as we strive for our desired profitability in this economic environment.

OTHER

The other operations consist of our non-core lines of business outside of protection and accumulation products. These lines of business include holding company revenues and expenses, operations of our real estate management subsidiary, and accident and health insurance. The pre-tax operating loss of our other operations in the first nine

Table of Contents

months of 2005 increased as compared to the first nine months of 2004 primarily as a result higher costs in 2005 for complying with Sarbanes-Oxley Act internal control regulations, long term incentive compensation, and employee search and relocation expenses. In addition, the 2004 other segment results were favorably impacted by gains on an equipment transaction and an employee postretirement benefit plan curtailment which occurred in the first quarter of 2004.

INCOME STATEMENT RECONCILIATION

A reconciliation of our segment pre-tax operating income to net income as shown in our consolidated statements of income follows:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2005	2004	2005	2004
	(\$ in thousands)		(\$ in thousands)	
Segment pre-tax operating income:				
Protection Products	\$ 40,286	\$ 34,024	\$ 125,642	\$ 102,042
Accumulation Products	47,867	41,573	130,422	116,910
Other operations	(6,605)	(4,204)	(17,837)	(9,828)
Total segment pre-tax operating income	81,548	71,393	238,227	209,124
Non-segment items increases (decreases) to income:				
Realized and unrealized gains (losses) on assets and liabilities:

Income from discontinued operations, net of tax				3,899
Cumulative effect of change in accounting, net of tax				(510)
Net income	38,619	42,862	135,674	124,767
Dividends on preferred stock				
Net income available to common stockholders	\$ 38,619	\$ 42,862	\$ 135,674	\$ 124,767

Realized and Unrealized Gains (Losses) on Assets and Liabilities. Realized gains (losses) on open block assets will fluctuate from period to period depending on the prevailing interest rate, the economic environment and the timing of investment sales and credit events. As part of managing our invested assets, we routinely sell securities and realize gains and losses. In addition, in the first quarter of 2004, we recognized a pre-tax impairment loss of \$12.2 million on our Indianapolis, Indiana office building. The building, which was listed for sale in 2003, was sold in the third quarter of 2004 which resulted in a pre-tax gain of \$0.4 million.

Table of Contents

Unrealized gains (losses) on open block options and trading investments also will fluctuate from period to period depending on the prevailing interest rate, the economic environment and credit events. We also have trading securities that back our total return strategy traditional annuity products. The market value adjustment on the trading securities resulted in unrealized losses of \$1.5 million and \$14.9 million in the third quarter and first nine months of 2005, respectively, and an unrealized gain of \$14.5 million and an unrealized loss of \$4.9 million in the third quarter and first nine months of 2004, respectively. In addition, we use options to hedge our indexed products. In accounting for derivatives, we adjusted our options to market value, which, due to the economic environment and stock market conditions, resulted in an unrealized gain of \$26.3 million and an unrealized loss of \$1.7 million in the third quarter and first nine months of 2005, respectively, and an unrealized loss of \$17.4 million and \$5.3 million in the third quarter and first nine months of 2004, respectively.

Most of the unrealized gains and losses on the options and trading securities assets are offset by similar adjustments to the option portion of the indexed product reserves and to the total return strategy annuity reserves. The reserve adjustments are reflected in policyowner benefits expense in the consolidated statements of income as the change in option value of indexed products and market value adjustments on total return strategy annuities. The total adjustment to policyowner benefits amounted to decreased expense of \$6.8 million and \$19.4 million in the third quarter and first nine months of 2005, respectively, and increased expense of \$7.6 million and decreased expense of \$5.9 million in the third quarter and first nine months of 2004, respectively.

DAC and VOBA amortization is adjusted for realized and unrealized gains and losses and derivative related market value adjustments. As a result of the fluctuating gains and losses and derivative adjustments between periods, amortization expense increased \$11.6 million in the third quarter of 2005 as compared to the same period in 2004 and increased \$0.5 million between year-to-date periods.

Litigation Following Class Certification, Net. A charge was taken in the third quarter of 2005, net of insurance recoveries, in connection with pending litigation and results primarily from the estimated cost of a proposed California settlement in *Cheves v. American Investors Life Insurance Company, Family First Advanced Planning et al.*

Early Extinguishment of Debt. In September, 2005, holders of our \$185.0 million aggregate original principal amount of OCEANs exercised their conversion rights which resulted in our issuance of 1.7 million shares of common stock and a cash payment of \$203 million, including a \$12.7 million prepayment premium. The prepayment premium and a write-off of \$6.4 million of remaining unamortized debt issuance costs have been reported as early extinguishment of debt expense in the consolidated statement of income.

Income Tax Expense. The effective income tax rate for the first nine months of 2005 and the three and nine months ended September 30, 2004 varied from the prevailing corporate rate primarily as a result of tax exempt interest, dividends received deductions, a reduction in the income tax accrual and a reduction in the deferred tax valuation allowance. The accrual reduction was for the release of provisions originally established for potential tax adjustments which have been settled or eliminated and for overpayment of tax in prior years for which a refund is expected. The accrual was reduced \$0.3 million and \$13.4 million for the third quarter and first nine months of 2005, respectively, and reduced \$3.7 million and \$11.6 million for the third quarter and first nine months of 2004, respectively. The deferred tax asset valuation allowance was reduced \$10.4 million in the second quarter of 2004 as a result of the realization of capital loss carryforwards. The effective income tax rate for the third quarter of 2005 varied from the prevailing corporate rate primarily due to additional income tax expense of \$6.6 million incurred in the restructuring of our joint venture interest with Ameritas Life Insurance Corp. in which our interest in Ameritas Variable Life Insurance Company was sold to Ameritas Life Insurance Corp. The additional tax expense related to the reversal of taxable temporary differences during the quarter without the benefit of previously anticipated dividends received deductions. The effective income tax rate excluding the accrual changes, the additional tax on the joint venture sale, and the valuation allowance reduction was 33.14% and 32.58% for the nine months ended September 30, 2005 and 2004, respectively.

Table of Contents

Discontinued Operations. In November 2003, we entered into an agreement to sell our residential financing operations. The results of the residential financing operations have been classified as discontinued operations. The sale was completed in January 2004, resulting in an after-tax gain of \$3.9 million.

Change in Accounting. Effective January 1, 2004, the Company adopted SOP 03-1 resulting in the establishment of additional policy reserve liabilities for fees charged for insurance benefit features which are assessed in a manner that is expected to result in profits in earlier years and losses in subsequent years. The total effect of adopting SOP 03-1 (including reinsurance recoverables) as of January 1, 2004, amounted to a decrease of \$0.8 million (\$0.5 million after-tax) in net income which has been reflected as a cumulative effect of a change in accounting.

ACCOUNTING DEVELOPMENTS

In December 2004, the FASB issued SFAS 123 (revised 2004), Share-Based Payment, (SFAS 123R) which is a revision of SFAS 123, Accounting for Stock-Based Compensation, (SFAS 123). SFAS 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on fair values. Pro forma disclosure of fair value information is no longer an alternative. The implementation date of the statement has been delayed to be effective for the fiscal year beginning after June 15, 2005. Adoption is to be made using either the modified prospective method or the modified retrospective method. The modified prospective method recognizes cost based on the requirements for all share-based payments granted after the effective date and for awards granted prior to the effective date that remain unvested prior to the effective date. The modified retrospective method includes the requirements of the modified prospective method but also permits restatement of financial statements based on pro forma amounts previously recognized under SFAS 123. Restatement can either be for all prior periods presented or prior interim periods of the year of adoption. Early adoption is permitted. We plan to adopt SFAS 123R effective January 1, 2006 using the modified prospective method. The pro forma impacts of recognizing fair value as permitted by SFAS 123 are disclosed in note 1 to the consolidated financial statements.

In July 2005, the FASB issued a proposed FASB Staff Position (FSP) that would amend SFAS 13, Accounting for Leases. Currently, under SFAS 13 if a change in an important lease assumption changes the total estimated net income under the lease, then a recalculation of the net investment in the leveraged lease must occur. The FSP provides that changes affecting the timing of cash flows but not the total net income under a leveraged lease will also trigger a recalculation of the lease. We have a leveraged lease investment known as a lease-in, lease-out (LILO) transaction which would be subject to the FSP. If the FSP is finalized as proposed, the change in the timing of cash flows applicable to the LILO would result in an after-tax charge to operations of approximately \$10.8 million on December 31, 2005. Under the proposed FSP, the charge would be reported as a cumulative effect of a change in accounting in the consolidated statement of income and would be recognized as income over the remaining term of the LILO.

LIQUIDITY AND CAPITAL RESOURCES***AmerUs Group Co.***

As a holding company, our cash flows from operations consist of dividends from subsidiaries, if declared and paid, interest from income on loans and advances to subsidiaries (including a surplus note issued to us by ALIC), investment income on our assets and fees which we charge our subsidiaries, offset by the expenses incurred for debt service, salaries and other expenses.

The payment of dividends by our insurance subsidiaries is regulated under various state laws. Generally, under the various state statutes, our insurance subsidiaries' dividends may be paid only from the earned surplus arising from their respective businesses and must receive the prior approval of the respective state regulator to pay any dividend that would exceed certain statutory limitations. The current statutes generally limit any dividend, together

Table of Contents

with dividends paid out within the preceding 12 months, to the greater of (i) 10% of the respective company's policyowners' statutory surplus as of the preceding year end or (ii) the statutory net gain from operations for the previous calendar year. Generally, the various state laws give the state regulators discretion to approve or disapprove requests for dividends in excess of these limits. We also consider risk-based capital levels, capital and liquidity operating needs, and other factors prior to paying dividends from the insurance subsidiaries. Based on the state law limitations and 2004 results, our life insurance subsidiaries could pay us an estimated \$186 million in dividends in 2005 without obtaining regulatory approval. Our life insurance subsidiaries paid us approximately \$20.1 million in dividends this year.

We have a \$200 million revolving credit facility, which we refer to as the Revolving Credit Agreement, with a syndicate of lenders. In the second quarter of 2005, we used our Revolving Credit Agreement to retire a portion of the \$125 million senior notes payable. The borrowings were repaid from proceeds of our \$300 million debt offering in August 2005. As of September 30, 2005, there was no outstanding loan balance. The Revolving Credit Agreement provides for typical events of default and covenants with respect to the conduct of business and requires the maintenance of various financial levels and ratios. Among other covenants, we (a) cannot have a leverage ratio greater than 0.35:1.0, (b) cannot have an interest coverage ratio less than 2.50:1.0, (c) are prohibited from paying cash dividends on common stock in excess of an amount equal to 3% of consolidated net worth as of the last day of the preceding fiscal year, (d) must cause our insurance subsidiaries to maintain certain levels of risk-based capital, and (e) are prohibited from incurring additional indebtedness for borrowed money in excess of certain limits typical for such lines of credit. We closely monitor all of these covenants to ensure continued compliance.

On July 12, 2005, we filed a \$1.5 billion shelf registration statement on Form S-3 with the Securities and Exchange Commission (the Shelf Registration), which was declared effective on July 15. The Shelf Registration will allow us to issue a variety of debt and/or equity securities when market opportunities and the need for financing arise. We utilized the shelf to issue senior notes and preferred stock in the third quarter of 2005. We have \$1.05 billion of shelf capacity remaining.

On August 5, 2005, we issued \$300.0 million of senior notes under the Shelf Registration. The senior notes bear interest at 5.95% per year payable semi-annually on February 15 and August 15 of each year, commencing on February 15, 2006. The senior notes mature on August 15, 2015 and may be redeemed at our option at any time, in whole or in part, subject to payment of a redemption premium. The net proceeds from the offering were primarily utilized to repay revolving credit borrowings, repurchase common stock and convert the \$185.0 million aggregate principal OCEANs described below.

In September 2005, holders of our \$185.0 million aggregate original principal amount of OCEANs exercised their conversion rights which resulted in our issuance of 1.7 million shares of common stock and a cash payment of \$203 million, including a \$12.7 million prepayment premium. The prepayment premium and a write-off of \$6.4 million of remaining unamortized debt issuance costs have been reported as early extinguishment of debt expense in the consolidated statement of income.

On September 26, 2005, we issued 6.0 million shares of Series A Non-Cumulative Perpetual Preferred Stock with no par value under the Shelf Registration. Net proceeds amounted to \$145.3 million after the related underwriting discount and other costs. Dividends on the preferred stock are non-cumulative and are payable quarterly, when, as and if declared by the board of directors, in whole or in part out of legally available funds. Dividends on the preferred stock accrued from September 26, 2005 with the first dividend payable on December 15, 2005 at a fixed rate of 7.25% per annum of the liquidation preference of \$25 per share. Subject to certain restrictions, the Company may redeem the preferred stock at any time in whole, prior to September 15, 2010, at a cash redemption price equal to the greater of \$25 per share or the sum of the present values of \$25 per share plus any declared and unpaid dividends to the redemption date, without accumulation of any undeclared dividends, and any undeclared dividends for the dividend periods from the redemption date to and including the dividend payment date on September 15, 2010. On or after the dividend payment date in September 2010, the shares may be redeemed at a price of \$25 per share or \$150.0 million in

Table of Contents

the aggregate plus declared and unpaid dividends to the redemption date without accumulation of any undeclared dividends. The preferred stock has no stated maturity and is not convertible into any other security. The proceeds from the Series A Perpetual Preferred Stock were used to repay borrowings under the Revolving Credit Agreement and for general corporate purposes.

The Company has several options for deploying excess capital, including supporting higher sales growth, reducing debt levels, pursuing acquisitions and buying back common stock. Our Board of Directors approved a stock purchase program effective June 24, 2005, under which we may purchase up to six million shares of our common stock at such times and under such conditions, as we deem advisable. The purchases may be made in the open market or by such other means as we determine to be appropriate, including privately negotiated purchases. The purchase program supercedes all prior purchase programs. We plan to fund the purchase program from a combination of our internal sources and dividends from insurance subsidiaries. We purchased 2.5 million shares in the third quarter of 2005 under the current purchase plan and we purchased 0.5 million shares in the first six months of 2005 under prior purchase plans. The purchases of shares included buybacks under two accelerated share repurchase programs. The accelerated share repurchase programs allowed the Company to purchase the shares immediately, with the counterparty purchasing the shares in the open market. Except with the approval of the counterparty, the terms of the accelerated share repurchase agreement do not allow us to purchase additional shares until February 2006. As of September 30, 2005, 3.5 million shares remain available for repurchase under the purchase program.

We manage liquidity on a continuing basis. One way is to minimize our need for capital. We accomplish this by attempting to use our capital as efficiently as possible and by developing capital-efficient products in our insurance subsidiaries. We also manage our mix of sales by focusing on the more capital-efficient products. In addition, we use reinsurance agreements, where cost-effective, to reduce capital strain in the insurance subsidiaries. We also focus on optimizing the consolidated capital structure to properly balance the levels and sources of borrowing and the issuance of equity securities.

Insurance Subsidiaries

Our insurance subsidiaries' sources of cash consist primarily of premium receipts; deposits to policyowner account balances; and income from investments, sales, maturities and calls of investments and repayments of investment principal. The uses of cash are primarily related to withdrawals of policyowner account balances, investment purchases, payment of policy acquisition costs, payment of policyowner benefits, repayment of debt, income taxes and current operating expenses. Insurance companies generally produce a positive cash flow from operations, as measured by the amount by which cash flows are adequate to meet benefit obligations to policyowners and normal operating expenses as they are incurred. The remaining cash flow is generally used to increase the asset base to provide funds to meet the need for future policy benefit payments and for writing new business.

Management believes that the current level of cash and available-for-sale, held-for-trading and short-term securities, combined with expected net cash inflows from operations, maturities of fixed maturity investments, principal payments on mortgage-backed securities and sales of its insurance products, will be adequate to meet the anticipated short-term cash obligations of the life insurance subsidiaries.

Matching the investment portfolio maturities to the cash flow demands of the type of insurance being provided is an important consideration for each type of protection product and accumulation product. We continuously monitor benefits and surrenders to provide projections of future cash requirements. As part of this monitoring process, we perform cash flow testing of assets and liabilities under various scenarios to evaluate the adequacy of reserves. In developing our investment strategy, we establish a level of cash and securities which, combined with expected net cash inflows from operations and maturities and principal payments on fixed maturity investment securities, are believed adequate to meet anticipated short-term and long-term benefit and expense payment obligations. There can be no assurance that future experience regarding benefits and surrenders will be similar to historic experience since withdrawal and surrender levels are influenced by such factors as the interest rate environment and general economic conditions and the claims-paying and financial strength ratings of the insurance subsidiaries.

Table of Contents

We take into account asset/liability management considerations in the product development and design process. Contract terms for the interest-sensitive products include surrender and withdrawal provisions which mitigate the risk of losses due to early withdrawals. These provisions generally do one or more of the following: limit the amount of penalty-free withdrawals, limit the circumstances under which withdrawals are permitted, or assess a surrender charge or market value adjustment relating to the underlying assets.

In addition to the interest-sensitive products, our insurance subsidiaries have issued funding agreements totaling \$986.2 million outstanding as of September 30, 2005, consisting primarily of six to ten year fixed rate insurance contracts. The assets backing the funding agreements are legally segregated and are not subject to claims that arise out of any other business of the insurance subsidiaries. The funding agreements are further backed by the general account assets of the insurance subsidiaries. The segregated assets and liabilities are included with general account assets in the financial statements. The funding agreements may not be cancelled by the holders unless there is a default under the agreements, but the insurance subsidiaries may terminate the agreements at any time.

We also have variable separate account assets and liabilities representing funds that are separately administered, principally for variable annuity contracts, and for which the contractholder bears the investment risk. Separate account assets and liabilities are reported at fair value and amounted to \$225.9 million as of September 30, 2005. Separate account contractholders generally have no claim against the assets of the general account, except with respect to certain insurance benefits. The operations of the separate accounts are not included in the accompanying consolidated financial statements.

Through their respective memberships in the Federal Home Loan Banks (FHLB) of Des Moines, Topeka and Indianapolis; ALIC, American and ILIC are eligible to borrow under variable-rate short term federal funds arrangements to provide additional liquidity. These borrowings are secured and interest is payable at the current rate at the time of each advance. There were no borrowings outstanding under these arrangements at September 30, 2005. In addition, ALIC has long-term fixed rate advances from the FHLB outstanding of \$12.2 million at September 30, 2005.

The insurance subsidiaries may also obtain liquidity through sales of investments. The investment portfolio as of September 30, 2005 had a carrying value of \$20 billion, including closed block investments.

The level of capital in the insurance companies is regulated by risk-based capital formulas and is monitored by rating agencies. In order to maintain appropriate capital levels, it may be necessary from time to time for AmerUs Group Co. to provide additional capital to the insurance companies.

We participate in a securities lending program whereby certain fixed maturity securities from the investment portfolio are loaned to other institutions for a short period of time. We receive a fee in exchange for the loan of securities and require initial collateral equal to 102 percent, with an on-going level of 100 percent, of the market value of the loaned securities to be separately maintained. Securities with a market value of \$453.8 million and \$342.6 million were on loan under the program and we were liable for cash collateral under our control of \$469.1 million and \$351.7 million at September 30, 2005 and December 31, 2004, respectively. The collateral held under the securities lending program has been included in cash and cash equivalents in the consolidated balance sheet and the obligation to return the collateral upon the return of the loaned securities has been included in accrued expenses and other liabilities.

We may also enter into securities borrowing arrangements from time to time whereby we borrow securities from other institutions and pay a fee. Securities borrowed amounted to \$130.8 million and \$138.2 million at September 30, 2005, and December 31, 2004, respectively, and are also included in accrued expenses and other liabilities in the consolidated balance sheet.

At September 30, 2005, the statutory surplus of the insurance subsidiaries was approximately \$1.1 billion. Management believes that each life insurance company has statutory capital which provides adequate risk based capital that exceeds required levels.

Table of Contents

In the future, in addition to cash flows from operations and borrowing capacity, the insurance subsidiaries may obtain their required capital from AmerUs Group Co.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The main objectives in managing our investment portfolios and our insurance subsidiaries are to maximize investment income and total investment returns while minimizing credit risks in order to provide maximum support to the insurance underwriting operations. Investment strategies are developed based on many factors including asset liability management, regulatory requirements, fluctuations in interest rates and consideration of other market risks. Investment decisions are centrally managed by investment professionals based on guidelines established by management and approved by the board of directors.

Market risk represents the potential for loss due to adverse changes in the fair value of financial instruments. The market risks related to our financial instruments primarily relate to the investment portfolio, which exposes us to risks related to interest rates, credit quality and prepayment variation. Analytical tools and monitoring systems are in place to assess each of these elements of market risk.

Interest rate risk is the price sensitivity of a fixed income security to changes in interest rates. Management views these potential changes in price within the overall context of asset and liability management. Actuarial professionals estimate the cash flow pattern of our liabilities to determine their duration. This is then compared to the characteristics of the assets that are currently backing the liabilities to arrive at an asset allocation strategy for future investments that management believes mitigates the overall effect of interest rates.

For variable and indexed products, profitability on the portion of the policyowner's account balance invested in the fixed general account option, if any, is also affected by the spreads between interest yields on investments and rates credited to the policies. For the variable products, the policyowner assumes essentially all the investment earnings risk for the portion of the account balance invested in the separate accounts. For the indexed products, we primarily purchase call options that are designed to match the return owed to contract holders who elect to participate in one or more market indices. Profitability on the portion of the indexed products tied to market indices is significantly impacted by the spread on interest earned on investments and the sum of (1) the cost of underlying call options purchased to match the returns owed to contract holders and (2) the minimum interest guarantees owed to the contract holder, if any. Profitability on the indexed products is also impacted by changes in the fair value of the embedded option which provides the contract holder the right to participate in market index returns after the next anniversary date of the contract. This impacts profitability as we primarily purchase one-year call options to fund the returns owed to the contract holders at the inception of each contract year. This practice matches with the contract holders' rights to switch to different indices on each anniversary date. The value of the forward starting options embedded in the indexed products can fluctuate with changes in assumptions as to future volatility of the market indices, risk free interest rates, market returns and the lives of the contracts.

The following table provides information about our fixed maturity investments and mortgage loans for both our trading and other than trading portfolios at September 30, 2005. The table presents amortized cost and related weighted average interest rates by expected maturity dates. The amortized cost approximates the cash flows of principal amounts in each of the periods. The cash flows are based on the earlier of the call date or the maturity date or, for mortgage-backed securities, expected payment patterns. Actual cash flows could differ from the expected amounts.

Table of Contents

	3 months							Expected Cash Flows	Fair Value
	2005	2006	2007	2008	2009	2010	Thereafter		
	\$(in thousands)								
Fixed maturity securities available-for-sale	\$ 275	\$ 880	\$ 1,053	\$ 1,173	\$ 920	\$ 655	\$ 11,459	\$ 16,415	\$ 16,639
Average interest rate	7.6%	6.6%	5.9%	5.8%	6.0%	5.6%	5.6%		
Fixed maturity securities held for trading purposes	\$ 67	\$ 132	\$ 177	\$ 217	\$ 183	\$ 131	\$ 558	\$ 1,465	\$ 1,465
Average interest rate	3.5%	3.1%	3.2%	2.6%	2.5%	3.0%	4.1%		
Mortgage loans	\$ 13	\$ 60	\$ 59	\$ 72	\$ 64	\$ 75	\$ 625	\$ 968	\$ 980
Average interest rate	6.7%	7.0%	7.0%	6.9%	6.9%	6.9%	6.6%		
Total	\$ 355	\$ 1,072	\$ 1,289	\$ 1,462	\$ 1,167	\$ 861	\$ 12,642	\$ 18,848	\$ 19,084

In accordance with our strategy of minimizing credit quality risk, we consistently invest in high quality marketable securities. Fixed maturity securities are comprised of U.S. Treasury, government agency, mortgage-backed and corporate securities. Approximately 63% of our fixed maturity securities are issued by the U.S. Treasury or U.S. government agencies or are rated A or better by Moody's, Standard and Poor's, or the NAIC. Less than 7.8% of the bond portfolio is below investment grade. Fixed maturity securities have an average life of approximately 9.75 years.

Prepayment risk refers to the changes in prepayment patterns that can either shorten or lengthen the expected timing of the principal repayments and thus the average life and the effective yield of a security. Such risk exists primarily within the portfolio of mortgage-backed securities. Management monitors such risk regularly. We invest primarily in those classes of mortgage-backed securities that have average or lower prepayment risk.

Our use of derivatives is generally limited to hedging purposes and has principally consisted of using interest rate swaps, options and futures. These instruments, viewed separately, subject us to varying degrees of market and credit risk. However when used for hedging, the expectation is that these instruments would reduce overall market risk. Credit risk arises from the possibility that counterparties may fail to perform under the terms of the contracts.

Equity price risk is the potential loss arising from changes in the value of equity securities. In general, equities have more year-to-year price variability than intermediate term bonds. However, returns over longer time frames have been consistently higher.

All of the above risks are monitored on an ongoing basis. A combination of in-house systems and proprietary models and externally licensed software are used to analyze individual securities as well as each portfolio. These tools provide the portfolio managers with information to assist them in the evaluation of the market risks of the portfolio.

Item 4. Controls and Procedures

(a) Based upon their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, are effective for recording, processing, summarizing and reporting the information we are required to disclose in our reports filed under such act.

(b) There was no change in our internal control over financial reporting during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

38

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

In recent years, the life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is routinely involved in litigation and other proceedings, including class actions, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive and exemplary damages. In addition, regulatory bodies, such as state insurance departments and attorneys general, periodically make inquiries and conduct examinations concerning the Company's compliance with insurance and other laws. The Company responds to such inquiries and cooperates with regulatory examinations in the ordinary course of business.

On September 23, 2005, the general terms of a settlement of a statewide class action, *Cheves v. American Investors Life Insurance Company, Family First Advanced Estate Planning and Family First Insurance Services et al.*, discussed in the Company's Report on Form 10-Q for the Quarterly Period ended June 30, 2005, were preliminarily approved by the trial court and a hearing on the final approval is scheduled in November of 2005. A charge was taken with respect to this pending settlement during the three months ended September 30, 2005.

On August 29, 2005, a nationwide class action lawsuit was filed against the Company and certain of its subsidiaries in the United States District Court for the Middle District of Florida on behalf of certain purchasers of insurance products who were over the age of 65 at the time of purchase. The plaintiffs allege that the defendants used improper practices in selling annuities to senior citizens because annuity payments allegedly begin only after the annuitant's actuarial life expectancy and the plaintiffs seek class certification, injunctive and equitable relief, a variety of damages, including punitive damages, and attorneys fees. This case and other lawsuits discussed in the Company's Annual Report on Form 10-K for the period ended December 31, 2004 and/or Quarterly Reports on Form 10-Q for the periods ended March 31, 2005 and June 30, 2005 have been consolidated and transferred to the United States District Court for the Eastern District of Pennsylvania.

The Company's pending litigation is subject to many uncertainties, and given its complexity and scope, the outcomes cannot be predicted. Given these uncertainties, the Company is unable to estimate the possible loss or range of loss that may result from all of the Company's pending litigation. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to the Company's pending claims and legal actions, would have no material effect on its operations and financial position.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth information regarding purchases of equity securities for the nine months ended September 30, 2005:

Table of Contents

Period	(a) Total number of shares (or units) purchased (1)	(b) Average price paid per share (or units) \$	(c) Total number of shares (or units) purchased as part of publicly announced plans or programs	(d) Maximum number (or approximate dollar value) of shares (or units) that may yet be purchased under the plans or programs (3)
01/01/2005-01/31/2005				2,027,500
02/01/2005-02/28/2005				2,027,500
03/01/2005-03/31/2005	441,236 (2)	47.36	414,000	1,613,500
04/01/2005-04/30/2005				1,613,500
05/01/2005-05/31/2005	107,500	46.48	107,500	1,506,000
06/01/2005-06/30/2005	436	47.83	436	6,000,000
